Seventh, modify the minimum social security benefit by eliminating the minimum for all new retirees only, while retaining the special minimum benefit for low-wage earners; and

Eighth, begin phasing out college student benefits at the end of 1981, enabling any student who has already started school with social security support to finish their schooling but not bringing any new students into the program.

Not all these provisions are without controversy. There is no painless way to rescue the social security system from the deep financial trouble it faces. But I believe this approach is a positive one.

For instance, my proposal to phase in age 68 for full social security benefits would not begin until the year 2000. It would not affect any current retirees. If we make this change now, and I believe it is inevitable, those workers who would be affected would have 20 years or more to plan and adjust to the change. Yet taking this step would place the whole social security system in close actuarial balance over the long term. When the post-World War II baby-boom workers are ready for retirement early in the next century, the system will be solvent and ready for them. The National Commission on Social Security and the President's Commission on Pension Policy have both recommended similar proposals.

My proposal to phasing out benefits for college students over a 3- to 4-year period would insure that any students who have already planned their education based on help from social security would be able to complete their education while continuing to receive full benefits until age 22. Eliminating the

benefit only for new students, who could plan to receive assistance from other sources if necessary, would still make significant savings to the trust fund—$8.9 billion over the next 5 years. In contrast, the administration's proposal would also reduce current student benefits by 25 percent each year for the next 4 years.

Similarly, my proposal to modify the minimum benefit for all new retirees would preserve the special minimum benefit for all long-term, low-income workers and would not affect anyone currently receiving the minimum benefit. This would insure that those retirees who are really dependent on this benefit would continue to receive it. I think this is a responsible way to proceed, saving almost $800 million over 5 years. The administration would cut the minimum benefit for both current and future beneficiaries.

Mr. President, I will later submit for the RECORD a number of editorials from across the country which support the need to insure the long-range stability of the social security system and to plan ahead for inevitable changes in the Nation's work force. We cannot do it bit by bit, chipping away each year in response to the challenges of a balanced budget alone. We must act now.

The Boston Globe, for instance, says that—

The crucial obligation of Congress is to treat the issue now to avoid a crisis later.

The Los Angeles Times warns that—

Waiting could mean sudden and drastic changes that would plunge the country into a social riptide.

The Chicago Tribune summarizes the situation well:

It is no secret what the short-term solutions are: either reduce benefits to the elderly or raise taxes on current workers. Neither option is pleasant, but the only other alternative—bankruptcy of the system—borders on the unthinkable.

The Fort Lauderdale News states the underlying reality:

Congress has no choice but to make changes that will restore the equity and integrity of a program so vital to Americans.

Mr. President, I have introduced this bill because I think it is only fair that we act now, early enough to allow changes to be gradually phased in without reducing benefits for current beneficiaries and giving future retirees the longest possible advance notice of changes so they can securely plan for the future.

I know these are difficult political choices to make, and I must admit to my colleagues that I was fearful of the response I would get to my proposals, particularly from the over 2 million social security beneficiaries in my own State of Florida. But I have been gratified to find increasing support for this approach both in our Nation's Capitol and throughout the country. I would hope more of my colleagues would join with me in preserving the credibility of the social security program.

I ask that the editorials be printed in the RECORD.

The editorials follow:

[From the Jacksonville, Fla., Times Union, Feb. 15, 1981]

THERE IS NO PAINLESS WAY TO REFORM SOCIAL SECURITY

At the present rate of inflation, the dollar loses half its value every six years.

Further, the Social Security system is not a funded program but a transfer program whereby payments from today's workers are used for programs for today's retirees.

So long as these two conditions continue, there will be no painless "solution" to the problems of the system.

Florida's Sen. Lawton Chiles, D-Lakeland, is trying. He has proposed a reform package with some valid points which would help.

But—in considering the Chiles plan or other proposed reforms—what must be kept in mind is the basic flaw in the system: It is a transfer plan operating in an era of age-shifting and inflation.

Each year—as the population gets older—there are relatively fewer workers to support relatively more retirees—who, due to inflation, need ever-greater benefits.

Because of this, the program will never be actuarially sound, we must simply make the best we can out of a basically unwinnable situation.

Doing this is, inevitably, going to mean some unpleasant choices which will impact various groupings of persons within the system.

For example, consider three points in the Chiles plan:

(1) Eliminating the minimum monthly benefit for new retirees (i.e., prevent deliberate "double dipping").

(2) Eliminate all dependents' benefits after age 18 (these now end at 18 if the youth enters the job market but continue to 21 if the youth goes to college).

(3) Beginning in the year 2000, gradually raise retirement age from 65 to 68 and raise the early retirement age from 62 to 65 in keeping with increasing longevity.

These steps may seem harsh at first. Actually, they are reasonable and would work minimum hardship because (step by step):

(1) Truly low income retirees can receive other benefits (not paid out of Social Security).

(2) Students already in college can continue drawing benefits; in the future others can use other plans (student loans, scholarships, etc.,) while studying.

(3) Plenty of warning—20 years—would be given to people who want to retire early. They can begin their own supplemental plans to make this possible.

Yet, as reasonable as these reforms seem, they have already drawn adamant opposition. For example Chiles' fellow Floridian Rep. Claude Pepper, chairman of the House Aging Committee, declared blunt opposition to "any change" which would lower any benefit.

The truth of the matter is that Social Security reforms aren't going to be a matter of what is desirable; but rather a matter of what is necessary to prevent calamity, outright collapse. There will be no "painless" reforms.

There seems little hope at this late date of correcting the basic flaw: that Social Security isn't a funded program but a transfer scheme.

It could be less so by taking out the general welfare programs it funds and financing them from general funds rather than Social Security taxes.

However, realistically, the best long term hope probably won't be anything done to Social Security itself—but rather an all out assault on inflation. This could make benefit increases more manageable.

And, in the short term, hope must be on precisely the kind of "unpleasant but unavoidable" choices as those advocated by Sen. Chiles.

Senator Chiles believes the legislative package he proposes will reduce economic pressures of inflation and unemployment by providing each employer a steady rollback in his payroll tax rate from 6.65 per cent today to 5.79 per cent in 1983–84. Employers would have the added economic incentive of additional tax savings by retaining or hiring workers over age 65.

Reduced labor costs due to lower payroll taxes, he insists, will aid the solvency of the social security trust funds at the same time they help the overall economy.

Senator Chiles has taken a thorough and thoughtful look at social security and is recommending remedies far more detailed than can be dealt with in this space. They deserve serious consideration by the Congress and the new Reagan administration.

In the words of the senator from Lakeland, ". . . We cannot save social security by going the same old route of simply raising the payroll tax one more time, on top of increases already scheduled for 1982, 1985, 1986 and 1990."

It is the basic system which must be revised.

[From the Tampa Times, Feb. 16, 1981]

A NEW DEAL NEEDED ON SOCIAL SECURITY

Social security has its roots in the Great Depression of the 1930s when this country was gripped in an economic vise which strangled individual and corporate survival, sent elderly people down the road to the poor house and degraded human dignity.

Out of the New Deal of the Roosevelt administration came a concept that, in theory, would guarantee most Americans an income after their productive working years had passed. Its purpose was to protect the older generation.

But there was an additional dimension.

It also would protect the nation's well-being by providing an economic cushion to soften the impact produced by an elderly population which had outlived both its productivity and savings.

Through the years, social security has undergone many changes. Benefits have been expanded to include college-age survivors, health care and a broad umbrella of social services which reach far beyond the program's original intent.

This expanded protection has not come cheaply. The amount contributed by both workers and employers has steadily increased almost to the point of becoming punitive. Yet, despite the increased flow of money into the social security coffers, the fund has teetered on the verge of bankruptcy, frightening old and young alike.

The elderly who depend on these monthly allocations for survival wait for their checks with great apprehension, wondering if one day they will find an empty mail box.

Younger people contemplate the future with concern and serious doubt they will recover in their retirement years even a fraction of the taxes they have contributed to the social security program.

There is no doubt the social security program is in trouble. Recognizing this danger, U.S. Sen. Lawton Chiles (D-Fla.) has introduced legislation in Congress to deal with the problem

He sees the need for some rather drastic changes—and not all of them will be popular. His approach, he says, will require some tough medicine, resulting in the reduction of nonessential benefits. At the same time, he is seeking other changes in the law designed to provide increased income and work opportunities for those over 65.

His proposals, among other things, would remove the mandatory retirement age com-

pletely; eliminate earnings limitations for those over 65; eliminate the payroll tax for both employer and employee in wages earned by any worker over age 65 and phase out student benefits starting in August, 1981.

[From the Los Angeles Times, Jan. 22, 1981]

AVOIDING THE RIPTIDE

The Social Security system hovers over the revelries of the new Reagan Administration like the ghost of budgets future. Nowhere in Washington is there a sharper reminder of how tough it can be, in hard times, to keep promises that were made in good times.

The federal commitment to mail monthly checks to some 35 million Americans who are retired or disabled or widowed and to help pay their medical bills will take nearly 30% of the budget that Jimmy Carter left behind.

The taxes that support Social Security are taking a bigger bite from paychecks this year, and the new income will still fall short of covering next year's Social Security checks by about $6 billion.

Add to Social Security the bills for defense and interest on the national debt, and you find that any cuts must be made in the one-third of the budget that pays for education, general welfare, unemployment insurance, highways and all other federal programs.

That is only the beginning. If nothing in the system changes before the turn of the century, Social Security will account for about half the budget. Instead of the four workers who now help cover the cost of each Social Security check, there will be only two or three workers 30 years from now.

What is required is a series of relatively small changes that would restore the system to its original purpose—a safety net for retirement rather than a guaranteed annuity and a trust fund for medical bills and college tuition.

Tampering with Social Security will be politically difficult for Ronald Reagan. Some of his past statements make him suspect among influential organizations of the elderly.

Refusing to make changes could be even more painful politically. Could Reagan justify squeezing other programs and leaving Social Security intact? We doubt it. Social Security has provided a 10% increase in the standard of living for its beneficiaries in recent years, while workers whose taxes support the system have generally suffered a loss of real income to inflation.

A number of study groups have proposed incremental changes in the system recently. Carter himself endorsed one of those in his final budget—a change in the index used to calculate annual benefit increases. Benefits now rise with the consumer price index, which uses mortgage costs to reflect housing costs. Carter suggested that rent payments would be a better gauge of the cost of living for most pensioners. Had the index been changed in 1979, next year's Social Security budget would be $8 billion lower—almost enough to cover the federal unemployment insurance program.

Medicare might be paid from general revenues, rather than from the Social Security trust fund. Some studies propose a gradual increase in the qualifying retirement age from 65 to 68. Others suggest making taxable part of Social Security income, which now is tax-free.

Reagan should consider all these proposals, and soon. Making changes now could prevent further erosion of the system from relatively gentle waves of demographic change. Waiting could mean sudden and drastic changes that would plunge the country into a social riptide.

[From the Tallahassee Democrat, Feb. 16, 1981]

SOCIAL SECURITY IN NEED OF CHILES' REFORM PLANS

The Social Security system is in financial trouble, although you might not think so when you look at the amount of money extracted from your paycheck to support it. As one witness told a U.S. Senate hearing chaired by Florida Sen. Lawton Chiles, the short-term problem is "critical but not serious," while the long-term problem is "serious but not critical."

That means some minor changes must be made immediately and some major changes within the next few years.

". . . it is clear to me," said Chiles, "that it is time for action—we cannot, as some would hope, shore up Social Security by standing still and continuing to say: 'No change.'

"It is also clear to me that we cannot save Social Security by going the same old route of simply raising the payroll tax one more time, on top of increases already scheduled for 1982, 1985, 1986 and 1990."

Congress cannot simply keep raising taxes because the day is coming when those born during the post-World War II baby boom will begin to retire, and those left in the working force will not be able to bear the burden of supporting their retirement benefits. Today, three workers pay Social Security taxes for every retiree. By the next century only two workers will pay taxes for each retiree.

If future retirees are not to be denied the Social Security benefits they have expected, and contributed to, action must be taken now.

Chiles has proposed a Social Security Reform Act that would address both the short-run, cash-flow problem and the more serious long-term problem. It even includes reductions in the payroll taxes from today's 6.5 percent to 5.79 percent in 1983.

There surely will be arguments over some of the specifics, but in the main the proposal seems workable and fair although it will not be painless.

One of the most controversial changes would increase the eligibility age for full benefits from 65 to 68 over a period of years beginning in 2000. The minimum age for reduced benefits would rise from 62 to 65.

The change is not only necessary, but equitable, and is in proportion to the increasing life span of Americans, which has lengthened by three years since Social Security was instituted. The 19 years until the date the changes take effect will give workers time to adjust their plans to the new retirement ages.

To soften the blow even more, Chiles suggests that the mandatory retirement age be eliminated, that the earning limitation be removed, and that the payroll deduction be eliminated for workers over 65.

Again, this seems sensible. Many persons are both capable of working well past the age of 65 and are eager to do so. They should not be forced to retire and become a drain on the Social Security system.

To meet the immediate problem, Chiles would:

Shift 50 percent of the hospital portion of Medicare costs from Social Security to general revenue. By 1983, the general fund would pay 70 percent of those costs, as it now does for the physician portion of Medicare.

This should have been done long ago. Social Security was intended to be an insurance program paid for by those who benefitted from it. Medicare is a social service program whose benefits are distributed unequally according to need; its cost should be shared by all taxpayers.

End student benefits. Those already receiving payments would continue to get them.

As Chiles points out, it seems unfair to give benefits to surviving children who go to school while denying those who must instead go to work. The payments also duplicate other programs.

Eliminate the minimum benefit—now $122 a month—for new retirees. This would not affect those already getting the minimum, or the "special" minimum benefits going to those who worked for many years at low wages.

Too many minimum benefits go to those who have substantial incomes from other sources, those in actual need should be helped by other, more-straightforward programs.

Require Congress to review any change in the Consumer Price Index.

Social Security payments are tied to the index and its constant rise has been one of the main reasons the Social Security fund is having a cash-crunch. Critics complain that the index often does not really reflect the situation facing most retirees. They point out that the index gives great weight to the cost of new housing, but that few retirees are buying new houses.

Allow the Old Age Survivors Insurance Fund, now cash short, to borrow from the Disability Insurance and Health Insurance funds, which are in better financial condition.

If the borrowing is restricted to meeting the immediate crisis and payback with interest is required, this is acceptable.

Chiles' plan is a comprehensive one and lawmakers should be careful not to pass the "easy" parts of it—such as the decreases in Social Security taxes—without also approving the "tough" parts, such as raising the retirement age.

The time for a thoroughgoing overhaul is here.

[From the Boston Sunday Globe, Feb. 1, 1981]

FINE-TUNING SOCIAL SECURITY

The Social Security System needs some fixing. The arrival of a new Administration plus a shift in power in the Senate has created a mood of change that may make the fixing easier. If all parties meet the challenge, the system can be made both more secure and more equitable without depriving anyone of a full plateful of benefits.

In 1977 Congress increased payroll tax rates for Social Security designed to keep the system fully solvent. Inflation-linked benefit increases coupled with recession caused cuts in revenues have brought the system to the edge of deficit that could put it in technical bankruptcy as early as the end of this year.

Social Security is in reality three separate programs working in parallel, all financed by the single payroll tax so familiar to all workers. This year that tax has risen to 6.65 percent of each employed person's salary up to the maximum of $29,700. Individual tax payments are matched by employers. The system allocates 5.35 percent to two funds: old age and survivors benefits (OASI) and disability insurance (DI). The other 1.30 percent finances hospital insurance, or Medicare.

The deficit problem is slated to strike first in the pension area. It is important to remember that bankruptcy in this context does not mean anything like a total lack of funds. In the next fiscal year more than $187 billion will be paid into the system by workers and employers. However, outlays for

the pension fund portion of the Social Security system will absorb all reserves in the system late this year or early next and they will exceed income by as much as $21 billion in 1983.

Unlike the rest of the federal budget, Social Security has no provisions for deficit financing. Funding is dependent exclusively on the payroll tax. Each of the three funds, furthermore, stands on its own feet. To get over the first problem with the pension fund portion, Congress is apt to and should allow it to borrow funds from the disability portion but that will only postpone the problem for about another year, when that fund too will slip into deficit.

A wide variety of proposals have been made to deal with the longer problem of the deficit, including elimination or reduction of prospective increases in benefits for those already receiving or about to receive pensions. While there might be some justification for adjusting the way in which benefits are increased in an attempt to match inflation, there is no humane reason for even threatening elderly Social Security beneficiaries with a major shift.

One suggestion should be examined in detail: Increases are now established by changes in the Consumer Price Index, a sample designed primarily to indicate living costs of working families. Older persons are apt to have somewhat different spending patterns, which can be examined statistically and might provide a more appropriate basis for making benefit changes. But studies of the details are inadequate and no change should be made before further work.

The ideal way to avoid any benefit reductions would be to switch financing of the system to general revenues. Politically that is out of the question, although some changes along those lines do have some support.

The unavoidable choice that therefore looms before Congress is a further increase in the payroll tax. The problem is how to make it both palatable for workers and employers and politically feasible.

The key opportunity lies in the health insurance segment of the system. Unlike pensions and disability payments, charges to the Medicare account are in no way connected with the earlier income of the beneficiary. Medicare payments are made according to the medical needs of the beneficiary. Given the lack of connection, it is entirely appropriate to shift financing of Medicare to general revenues. The 1.30 percent payroll tax could then be assigned to pensions and disability funds, restoring them to levels that would cushion problems that will accompany inevitable future recessions. Once reserves are built to, say, a full year's probable benefits, Congress might reduce the payroll tax to an appropriate level.

In the very long term, early in the next century, a second problem may surface that should be addressed right now. Retirees in the early 2000s will be far more numerous than now, because of the baby boom of the late 1950s and early '60s. The number of persons working will have declined because of reduced birth levels in the 1970s. Births peaked in 1957 at 4.3 million and dropped below 4 million in 1965; by 1973 they had fallen to 3.1 million and have subsequently risen only slightly.

Congress should act now to raise the age level at which workers will be eligible for Social Security after the turn of the century. It is important that workers today not build up unrealistic expectations about the age at which they retire, which could severely complicate the political problems for future Congresses and jeopardize the fiscal integrity of the Social Security system for its beneficiaries then.

Fortunately, demographics may help out in a practical way. Because the work force will decline in size after the turn of the century, employers may seek out older workers in any event. Alternatively, labor-saving systems may generate additional wealth that could sustain the system comfortably and even allow improvements in benefits at that time, including earlier retirements. The important fact right now is that no one can be sure about the exact shape of the work force and the economy; the crucial obligation of Congress is to treat the issue conservatively now to avoid a crisis later. Time enough then to take advantage of windfalls.

Social Security financing is complex and politically boring. It nevertheless affects millions of Americans in the vulnerable years of old age, and their emotional as well as economic well-being demands that Congress act responsibly and thoughtfully to protect the system. Failure to do so will impose unnecessary burdens on all Americans at some point in their lives.

[From the Ft. Lauderdale News, Feb. 18, 1981]

SOCIAL SECURITY BILL BEGINNING TO REFORMS

Social security needs its credibility restored, and that's what Florida Sen. Lawton Chiles hopes to accomplish with a proposal to revamp the financially wobbly system.

Changes suggested by the senator last week won't be easy to swallow. Some, however, are musts if Social Security benefits are to be guaranteed to a nation of workers and retirees who have paid their dues in the system.

Nothing Chiles proposes is new or revolutionary. What he does have is a package of changes long espoused by various study panels and a handful of people on Capitol Hill who have dared suggest renovating the Social Security program.

Opposition to change is and has been well-organized and vocal.

One item assured of drawing heavy flak from federal, state and city pensioners is the elimination of the "minimum benefit" of $122 a month now paid to anyone who had paid into Social Security, regardless of how much or how long. It would mean an end to the double dipping many federal pensioners now enjoy.

Another proposal likely to be unpopular would gradually raise the retirement age from 65 to 68 over a 12-year period, beginning in the year 2000.

Chiles is being a realist in facing up to the fact that Social Security as we know it today won't survive the financial roller coaster it has been on for nearly a decade.

The National Commission on Social Security, a federally appointed advisory panel, reports the system must be fixed quickly or sometime next year "checks will just not go out."

Such an opinion is frightening and may be a bit overstated, but it does give a sense of urgency to the need for reforms.

Although the Chiles solution may not be the ultimate answer to the Social Security dilemma, it's a concrete proposal and a step in the right direction.

Congress has no choice but to make changes that will restore the equity and integrity of a program so vital to Americans—working and retired. Sen. Chiles has fired the starting gun.

[From the Chicago Tribune, Feb. 15, 1981]

CONFRONTING SOCIAL SECURITY

It is no secret that the Social Security system is in trouble, or that the trouble is bound to get worse. As the American population grows steadily older because of increased longevity and lagging birth rates, the strain of supporting the elderly grows increasingly acute. Nor is it any secret what the short-term solutions are: either reduce benefits to the elderly or raise taxes on current workers. Neither option is pleasant, but the only other alternative—bankruptcy of the system—borders on the unthinkable.

Senator Lawton Chiles (D., Fla.) has made some proposals for bolstering Social Security, some of them sound, some not. But Sen. Chiles deserves credit for opening debate on a subject that Congress would prefer to ignore.

Sen. Chiles' strategy is to reduce the cost of benefits in three ways. First, he would raise the basic retirement age from 65 to 68, a change which reflects the longer productive lives afforded by medical advances. He would also abolish the minimum monthly benefit of $122, which is paid to even those retirees who have paid into the system for only a brief period. Most of these people hardly qualify as needy, so reducing their benefits by computing them according to the amount they paid in should cause no hardship. Finally, he suggests phasing out the survivor benefits for college students, which duplicate many other federal aid programs. These last two measures are among the changes the Reagan Administration is expected to recommend in its new budget. By Mr. Chiles' estimate, these changes alone would be enough to avert a huge deficit next year in the Old Age and Survivors Fund, which pays basic pension benefits.

So confident is he that these cuts will revitalize the system that he wants to couple them with a cut in the payroll tax, reducing it from the current 6.65 per cent to 6 per cent next year to 5.79 per cent by 1984. Part of the loss would be made up by using general revenues to supplement the trust fund that pays for Medicare. This amounts to giving with one hand and taking back with the other.

There are many arguments for using general revenues to pay Social Security benefits, but they raise the most fundamental questions about the purpose of the entire system. Until it is ready to reevaluate what Social Security is suppoesd to accomplish, Congress should require benefits to be paid for out of the payroll tax, which serves at least to provide an automatic check on the government's generosity. To remove that check might cause payments to balloon totally out of proportion to need.

Likewise Congress shouldn't cut the payroll tax at least until it is clear that the system is actuarially healthy. If Sen. Chiles' cuts actually do the trick, he can rest assured that Congress will not neglect to cut taxes later.

His proposal to allow borrowing among the three trust funds is the simpliest and least painful palliative for the insolvency of the old age fund. The other two funds—Medicare and disability—currently enjoy solid surpluses. Allowing the old age fund to make up its expected deficit this year with loans from the other two would keep benefits going out, without violating the underlying principle that Social Security should be self-supporting.

Some of Sen. Chiles' other recommendations would have no particular effect on Social Security. They are intended mostly to encourage the elderly to keep working as long as they're able. These too are a mixed bag. Sen. Chiles wants to allow people to keep working past the specified retirement age and still receive their benefits. This would encourage the elderly to keep working and contributing to the economy. But he wants to exempt them from paying Social Security taxes, which would tend to subsidize the employment of older workers by making them cheaper than younger ones. His proposal to forbid private companies from setting any mandatory retirement age will play well among his elderly Florida constituents, but would make it harder for firms to ease people out when they can no longer carry their weight.

Sen. Chiles doesn't have all the answers, but he at least recognizes the urgency of the problem. If his plan does nothing more than

focus Congress' attention on the Social Security system, it will be a helpful contribution.

[From the New York Times, Apr. 7, 1981]

NOT EVEN THE RICH PAY THEIR WAY

(By Peter Passell)

"I paid for it. Now you want to take it back." That sums up the feelings of many current and potential Social Security recipients. Any proposal to rein in spending—taxing benefits, capping cost-of-living increases—is seen as a betrayal. They think of Social Security as a private pension: those who contribute have as much right to their benefits as someone with an annuity from Metropolitan Life.

This impression, though passionate, is based on a misunderstanding. Payroll taxes are not collected, invested and earmarked for groups of beneficiaries. Social Security works on a pay-as-you-go basis: today's benefit checks are funded by today's payroll taxes, with only a few months' cash kept in reserve.

The system has managed to pay its bills for four decades only because the total amount of wages available to tax grew far more rapidly than the number of people eligible for benefits. But now the ratio of workers to beneficiaries is slipping. Unfunded liabilities—the extra money Social Security would need now to meet expected future claims—currently exceeds $4 trillion.

Even so, a second argument is raised against efforts to control spending. Maybe the system as a whole doesn't pay its own way, but surely affluent people who have made the maximum contribution for years must have fully covered the cost of their benefits. If someone should be cut, the argument goes, it's the poor, who don't pull their own weight.

It's true that benefits are not a fixed proportion of payroll tax contributions; the pensioned poor get more back per dollar contributed during their working lives. This doesn't mean, though, that the payroll taxes of high-income workers now near retirement are really subsidizing lower-income workers. Virtually every current retiree is a winner; the effect of redistribution from rich to poor is minor compared with the transfer from the working young to retired old.

Consider the case of a hypothetical male, affluent and with a dependent spouse, who retired in 1979 at age 65. According to the Government, even with inflation taken into account, he can expect to receive in benefits four and a half times more than he put in.

Suppose this hypothetical worker had been dropped from Social Security and had all payroll taxes—employee and employer contributions—returned with interest on retirement day. Suppose further that the retiree bought a private annuity and health insurance with this nest egg. The monthly check and medical benefits would be only about a quarter the amount Social Security would have been obliged to pay.

Social Security is not like a private annuity, offering retirement funds to those who can foot the whole bill. Nor is it a straightforward welfare system, providing benefits strictly according to need. It is a happy hybrid with many of the practical advantages of a welfare system but one that allows beneficiaries a strong sense of dignity.

Most people would like to keep it that way, avoiding the need for means tests. But unless those who lobby Congress on behalf of beneficiaries adopt a more flexible position, it is hard to see how Social Security will be able to survive in its current form. Working Americans are not about to abandon the old and the handicapped. But neither are they ready to sacrifice to preserve the unearned privileges of well-to-do retirees.●

COOPERATIVE WILDLIFE AND FISHERIES RESEARCH UNITS

● Mr. BAUCUS. Mr. President, my observations of the budgetary process to date lead me to the inescapable conclusion that the epitaph for the fiscal year 1981 budget will be "benefit-cost analyses prevailed." Quite frankly, the approach is one I support when done properly. Laws and regulations that return less to the public than they cost simply do not make sense.

In the case of the cooperative wildlife and fisheries research units program of the Fish and Wildlife Service, however, I believe the administration's efficiency experts have forgotten the formula. In fact, my arithmetic reveals a very positive ratio of benefits to expense despite the $0 budget recommended for fiscal year 1981. A brief look at the program will bear out my conclusion that this is one Federal activity which deserves a better fate than the Office of Management and Budget's scrap heap.

First of all, the cooperative research program is not a multi-billion-dollar expenditure. Rather, for fiscal year 1982, the Carter administration requested only $4.9 million.

While the cost of the cooperative research units is thus minimal in terms of the nearly $700 billion Federal budget, the benefits are significant. Beneficiaries include agriculture, the fishing industry, public land managers, sportsmen, State and Federal fish and wildlife agencies, and 31 universities in 29 States.

The return on this investment is as diverse as the more than 400 research projects currently underway across the Nation. In Montana, for example, the wildlife unit at the University of Montana has focused on practical, on-the-ground wildlife management problems such as coyote predation of sheep, prairie dog control, and the effects of trophy hunting on big game populations. Across the country, other research units are developing valuable information to improve the management of resources ranging from the Great Lakes fisheries to the waterfowl of the Mississippi flyway.

In addition to these direct benefits, the cooperative research units play an important role in training professional wildlife managers. Each year, some 125 trained biologists who have participated in the work of the research units are available to Federal, State, and local agencies for employment in resource management functions.

Finally, as a result of the relationship between the cooperative research units and the universities, hundreds of students annually have the opportunity to participate in graduate level courses in the area of fish and wildlife biology.

The method the cooperative research units have used to achieve this record of remarkable efficiency is obvious from the name of the program. Since the inception of the program some 45 years ago, cooperation has been the key. Funding for the units has come from the U.S. Fish and Wildlife Service, State fish and game agencies, and the cooperating universities. In addition, this support has been supplemented with grants and contracts from Federal, State, and private sources. Indeed, approximately $2 of outside funds have been attracted with every directly appropriated Federal dollar for the program.

I do not, however, wish to give the impression that the cooperative research units have been flush with Federal or State budgets.

The truth of the matter is just the opposite. Nonetheless, by conducting the research activities in the university setting, with the assistance of graduate students anxious for the practical research experience, dollars have been made to stretch.

As is apparent, elimination of this program is a shortsighted and ill-advised economy. Natural resource managers who are daily being asked to produce more for less will be faced with a loss of solid research with which to make decisions. More than 500 graduate students supervised by unit scientists will face termination of their academic programs. State and Federal agencies will be required to perform necessary research at a cost that far exceeds what the cooperative units can provide. In short, this savings of $5 million is illusory at best.

The conclusion of my analysis of this budgetary cutback is clearly stated in a letter I recently received from Dr. W. Leslie Pengelli, director of the wildlife biology program at the University of Montana.

He wrote:

Continuing challenges in designing energy and land and water development with minimal adverse impacts will require a continuous flow of information from well-planned studies and well-trained resource managers. Wildlife and fishery resources throughout the United States will be provided for more effectively if the proven, successful, Cooperative Unit Program is maintained and strengthened through additional highly successful and important roles in the 1980s.

As we proceed through the budget authorization and appropriations processes, I intend to work hard toward this goal of maintaining and strengthening this program. I urge my colleagues to join me in this effort.●

FEDERAL RESERVE POLICY PRESERVES INFLATION

● Mr. JEPSEN. Mr. President, the Nation's No. 1 economic task is to stop inflation. Unless we do, we will not achieve full employment and a substantial part of recorded real GNP growth will be deadweight loss, registering dollars spent to cope with inflation. Bracket creep will increase tax rates, uncertainty will remain high, and interest rates will be both high and volatile. In this environment saving will remain low, thrift institutions and capital markets will be undermined, investment horizons will shorten and, most important of all, personal effort, risk-taking and the buildup of human capital will be increasingly discouraged.

We will, as a people, become more protective and self-indulgent and less forward looking and productive.

The key to stopping inflation is monetary policy. Over the long run, balancing the Federal budget, which the administration and Congress intend to do by 1984, will not stop inflation if monetary policy remains inflationary. In fact, inflation cannot persist if monetary policy is not inflationary. Federal Reserve Board Chairman, Paul A. Volcker, put it this way in testimony before the Joint Economic Committee a year ago:

> The inflationary process is ultimately related to excessive growth in money and credit. . . . It is clear that inflation cannot persist in the long run in the absence of excessive money growth.

We experienced little inflation and enjoyed low interest rates in the 1955–64 period when the growth of the money supply (M1B) averaged only 1.9 percent per year. In that decade the GNP deflator rose only 2.0 percent a year, and the 90-day Treasury bill rate averaged only 2.77 percent. In contrast, in the latest 4 years, 1977 to 1980, M1B grew 7.4 percent per year, the deflator rose 7.7 percent a year, and the bill rate averaged 8.5 percent. Clearly, low inflation and low-interest rates require low money growth. Unfortunately, it is not clear that we will get low money growth, certainly not any time soon.

INTENTIONS OF THE FEDERAL RESERVE

Congress long ago delegated authority to the independent Federal Reserve to manage the Nation's money supply. The results of its management have not always been welcome. In the early 1970's there was a growing feeling that money supply growth was fueling inflation. In 1975, precisely to edge the Federal Reserve in a disinflationary direction, the Congress expressed its sense that money growth be maintained "commensurate with the economy's longrun potential to increase production, so as to promote effectively the goals of maximum employment, stable prices, and moderate long-term interest rates." These words were incorporated into the Federal Reserve Act in 1977. Since then, Federal Reserve officials have repeatedly stated that this is their longrun goal. Despite these good intentions, from 1977 to 1980, M1B growth was substantially higher than the economy's long-term potential to increase production.

On February 5, 1981, Chairman Volcker told the Joint Economic Committee that—

> Firmly disciplined monetary policy has a central—indeed indispensable—role to play in the process of restoring price stability.

Three weeks later, February 25, 1981, he told the Senate Banking Committee that—

> Monetary policy is, of course, designed to encourage (the) disinflationary process.

He emphasized that—

> Our intent is not to accommodate inflationary forces; rather we mean to exert continuing restraint on growth in money and credit to squeeze out inflationary pressures. That posture should be reflected in further deceleration in the monetary aggregates in the years ahead and is an essential ingredient in any effective policy to restore price stability.

These are fine words. Unfortunately, examination of the Federal Reserve's monetary targets for 1981 suggests that they are likely to turn out to be as empty as the promises of previous Federal Reserve officials who promised noninflationary monetary growth.

THE NEW MONEY GROWTH TARGETS

Each year since 1975, the Federal Reserve has set and disclosed in congressional testimony targets for the growth of selected monetary and credit aggregates. The 1981 targets were disclosed on February 25. The 1981 target for M1B is 6 to 8½ percent. This is 2 full percentage points above the 1980 target. Its midpoint, 7¼ percent, exactly equals what M1B grew by in 1980. On the face of it, then, it does not appear that the Federal Reserve really intends to reduce money growth this year.

The Federal Reserve would object that extension of negotiable order of withdrawal (NOW) accounts to all parts of the country, effective January 2, 1981, required raising the target for recorded M1B growth; and that recorded M1B is not now a useful measure of money. In a summary of Chairman Volcker's February 25 reports to the Congress, the Federal Reserve Board explained that—

> Owing to the introduction of NOW accounts on a nationwide basis at the end of 1980, the monetary ranges (must be) stated on a basis that adjusts for the impact of the shift of funds into interest-bearing checkable deposits; this adjustment for the distorting effects of such shifts results in the only meaningful measure of money growth.

The target for the adjusted M1B measure is 3½ to 6 percent. This is one-half a percentage point less than the 1980 target.

However, whether we use the range for recorded M1B growth, the range for the adjusted M1B measure, or the range for some other measure of money, the Federal Reserve's target growth is designed to accommodate and preserve inflation, not to reduce it. The reason for this is that its money growth targets are all, each and every one of them, consistent with the same target for nominal or current dollar GNP growth, and that target assures the preservation of inflation.

THE GNP TARGET

In 1980, nominal GNP increased by 9.5 percent. The Federal Reserve has targeted 1981 GNP growth at 9 to 12 percent. The midpoint of the range is 10.5 percent. This is a full percentage point higher than 1980 GNP growth.

The 10.5 percent GNP target holds for all of the Federal Reserve's money growth targets, including both the recorded and adjusted M1B measures. Whichever M now is thought to be the most meaningful, the Federal Reserve is targeting it to grow enough to produce nominal GNP growth of 10.5 percent, or 1 percentage point more in 1981 than in 1980. At best, this will delay starting the disinflationary process until next year. For, with nominal GNP growth programed to accelerate, it is difficult to see how inflation is going to fall. In fact, the Federal Reserve does not expect it to. The Federal Reserve projects the GNP deflator to rise by 9 to 10.5 percent this year.

Worse, because it takes time for decreases in money and GNP growth to slow inflation proportionately, the Federal Reserve's stated 1981 targets for money and GNP growth will, if implemented, preserve inflation at near the current intolerable level until 1983 or even 1984.

WHAT SHOULD BE DONE

Viewed together, the Federal Reserve's GNP and money growth targets imply that recorded M1B's velocity will rise 3¼ percent this year and that adjusted M1B's velocity will rise by 5¾ percent. The projected velocity increases are equal to the differences between programed GNP growth (10.5 percent) and the targeted money growth rates (7¼ percent and 4¾ percent).

The projected velocity increase for recorded M1B is close to the actual average annual rise of 3.2 percent of the past 25 years. Thus, despite the impact of the introduction this year of NOW accounts on a nationwide basis, which by itself will reduce the rise of recorded M1B's velocity, the Federal Reserve envisions M1B's velocity increasing in 1981 at close to its 1956–80 trend value. For adjusted M1B, there is no historical record to compare the 5¾ percent rise projected for 1981. However, last year it increased only 2¾ percent.

I have called attention to the changes in velocity expected this year in order to show that the Federal Reserve does not expect the relationship between recorded M1B growth and GNP growth to change this year from what it has been, by and large, for 25 years, while at the same time expecting a sharp rise in the rate of increase in the velocity of adjusted M1B from last year's level. As a result, I find it astonishing that the Federal Reserve is targeting recorded M1B to grow 7¼ percent and adjusted M1B to grow 4¾ percent. Both these targets must be much lower for money growth to be anti-inflationary.

It will be objected that the Federal Reserve is projecting not targeting nominal GNP to grow by 10.5 percent this year. In this view money growth must be whatever it takes to validate 10.5 percent GNP growth. By centering its target for recorded M1B growth at 7¼ percent, and its target for adjusted M1B at 4¾ percent, the Federal Reserve is simply saying that this is what is required. However, this is putting the cart before the horse. GNP should be the cart. Money growth is the horse, not the other way around.

I suggest a target for recorded M1B growth of 5 percent this year and 3 percent next year. The associated target for adjusted M1B growth this year is 2½ percent. What would this mean? It would mean that inflation will abate. Interest rates will fall. The beneficial effects of President Reagan's tax and spending reductions will be realized. Currently planned Federal Reserve policy, on the other hand, could very well condemn us to stagflation for years to come.●

SALE OF AWACS TO SAUDI ARABIA SHOULD BE OPPOSED

● Mr. LEVIN. Mr. President, superior technology and skill in using that technology are the keys to Israel's military position. The Arab States have always possessed enormous manpower resources unavailable to Israel. The three frontline Arab States, Egypt, Jordan, and Syria, alone can mobilize armies of over a million men while Israel's mobilized army would total approximately 375,000. Israel is also outnumbered when comparing most weapons systems. The three frontline states have tank inventories approximately twice as large as that of Israel. According to the latest figures from the Institute of Strategic Studies, Egypt, Jordan, and Syria have approximately 820 combat aircraft among them while Israel has only 535. If you count the personnel and equipment of other states likely to participate in a war against Israel, Libya, and Iraq being prime examples, the numbers are truly overwhelming. Yet, because of advanced technology and superior application of that technology, Israel has been able to hold her own militarily.

The sale of the Boeing airborne warning and control aircraft —AWACS— to Saudi Arabia represents a real threat to Israel because it threatens her technological edge. It also threatens Israel's air superiority which has historically enabled her to overcome being outnumbered on the ground.

The AWACS are in effect mobile, flexible, survivable, high capacity radar stations and command, control and communications centers. They provide long-range, high- or low-altitude aircraft surveillance plus an all weather detection, tracking, and identification capability. For low-altitude targets these aircraft have a surveillance range of approximately 230 miles; for high-altitude targets the range is in excess of 300 miles. An AWACS aircraft orbiting in northern Saudi Arabia could detect and track aircraft taking off in Israel, while providing simultaneous warning to Saudi air and air defense forces.

Obviously, this represents a vast enhancement of Saudi air defense capability and a concurrent degradation of Israeli air superiority. The AWACS aircraft could become mobile centers for command and control of Arab tactical air operations against Israel. Each of these aircraft possess a high speed, high capacity, sophisticated data processing system which allows it to do several jobs at once. Effective use of these planes, either by Saudi Arabia alone or by a combined Arab force, would constitute a pronounced enhancement of Arab capabilities in the air.

Saudi Arabia's major problem is not Israel but internal threats to the stability of the Saudi monarchy. All the sophisticated military technology available will not enhance the popularity of the monarchy with its own people. The Saudi oilfields can easily be damaged by small, easy-to-mount guerrilla operations. The AWACS will certainly be no help in this situation. The AWACS represent a clear military threat only to Israel, Saudi Arabia's declared enemy.

There is also a danger to U.S. technological superiority in this situation. Clearly, we are sending this sophisticated system to one of the least stable areas in the world. The AWACS are now used in the front line of U.S.-NATO defenses and although we are considering providing the Saudi AWACS with less sophisticated, commercially available versions of some of the systems used by the U.S. military on these aircraft, the basic package will remain intact. It seems a very real danger that the Saudi AWACS could end up in the hands of unfriendly nations, providing them with a prototype of the technology which we rely on to maintain our technological edge.

However, the danger to Israel and the resulting unbalancing that represents is the most immediate threat to our interests in the Middle East. We are providing the Arab States, for Saudi Arabia is assuredly a leader of the Arab States confronting Israel, with a sophisticated airborne system which could severely degrade Israeli air superiority. This is a system which, properly used, will provide Israel's enemies with instantaneous knowledge of her air operations and increase their ability to effectively respond. The Arab States which are committed to destroying her and who are still in a state of war with her already have a tremendous edge over Israel in sheer numbers, but Israel has been able to overcome this with superior technology. This sale, just as the proposed sale of the offensive equipment for the F–15's, is intrinsically damaging to basic U.S. policy in the Middle East, which is predicated on a strong, stable Israel able to militarily defend herself against her hostile Arab neighbors, and will plunge us into a new, dangerous and costly arms race in one of the world's most volatile areas.●

THE ATTEMPT ON PRESIDENT REAGAN'S LIFE

● Mr. LEVIN. Mr. President, last Monday's events are still too fresh to allow us to analyze them objectively. Yet the bloody mark they have left on the Nation requires some attention, some effort to attend to the wounds inflicted to our national spirit.

As I took in the inconsistent and often conflicting information available to us yesterday in the aftermath of the shooting, several thoughts ran through my mind, thoughts which I want to share with my colleagues.

First, as I was shocked by the shooting, I was also shocked by the reaction to it. There was concern and there was fear and there was human sympathy—as one would expect. But there was something else as well—something as alien and as frightening as the assassination attempt itself. There was a sense of passive acceptance, a mood of a people reconciled to murder, and underlying current in conversation which reflected the feeling that "of course, I knew it would happen."

We have come to accept death and assassination; come to anticipate bloody scenes of violence on our television screens and in our national life. As frightening as the attempt itself was, I would submit that our reaction to it was as frightening. For if we have reached the point where attempts to assassinate the President of the United States are greeted with grim resignation, then we have allowed the assassins' bullets to strike our hearts as a nation and destroy our spirit as a free people.

Second, I have observed the beginning of the chorus crying out for gun control and another choir decrying any attempt to control handguns. I have heard the commentators begin the process of suggesting a sickness in the American spirit and an illness in the American soul. But, Mr. President, the only sickness is a failure to act and the only illness is a failure to comprehend.

This tragic act was the act of an isolated madman and not a nation. The only national guilt will come if we fail to implement realistic legislation designed to make it difficult for such people to get handguns. And we should close the loophole in the Gun Control Act of 1968 so that the ban on the import of cheap handguns cannot be circumvented by importing their parts and assembling them here. It was such a cheap $47 handgun which was used in the attempted assassination of President Reagan, a gun imported in parts and assembled here in violation of the clear purpose of the 1968 act.

Mr. President, we have seen too much violence, too much blood. We have seen too many leaders and too many people struck down. This Nation is starting to become hardened to horror. And that is unacceptable. We are a kind people, a caring people. And we can be a safe people if we view this tragedy both as an isolated event and, at the same time, as just the latest chapter in an ongoing chain.

There are, to be sure, lessons we can learn and actions we can take. But at the moment the wound is too fresh. The need now is for prayer. And in that sense, I join my fellow Americans in praying for the President, for Jim Brady, for Timothy McCarthy, and Thomas Delahanty. May they be well soon.●

DEPARTMENT OF DEFENSE MANPOWER

● Mr. JEPSEN. Mr. President, during the past decade the services have incurred significant cuts in their total force manpower strengths. The total manpower portion of the Department of Defense fiscal year 1981 supplemental is designed to reverse this historical trend and to slowly begin to regain our military capabilities by improving readiness and sustainability and by enhancing our long overdue modernization program. The Manpower and Personnel Subcommtitee has held six hearings on the defense manpower requirements. Repeatedly the committee members have been told of the need to increase our active and civil-

ian levels to meet the requirements of today's commitments.

The Preparedness Subcommittee has also received extensive testimony on the impact that civilian shortfalls are having on readiness. They have concluded that the increased utilization of military manpower to fill civilian positions has had a negative effect on the military's overall manpower and material readiness and sustainability.

The 10,000 increase in active duty manpower for the Navy, Marine Corps, and Air Force not only reflects improvement in recruiting, but more importantly, in the retention of qualified personnel. In general the request increases contained in this supplemental will be used to improve the levels of force manning.

The committee has also recommended approval of an increase of 16,300 civilian positions. The Army, recipient of the largest increase, has a great need to return borrowed military manpower to the operational units. It is extremely difficult to train and prepare a combat unit for battle when soldiers of all rates and MOS's are assigned to base support positions for extended periods because there are no civilians available to do the job. It is imperative that the soldier be returned to his unit.

The balance of the civilian manpower increase will provide all the services with the assets to meet the ever-increasing backlog of maintenance and repairs and for other increased requirements.

The Armed Services Committee has also recommended three technical changes to last year's special pay and allowances benefits for members of the uniformed services, more commonly known as the sea pay/sub pay bill. The first amendment to conform to congressional intent would grant authority to accumulate 90 days leave effective from October 1, 1979, vice the current date of January 1, 1981. This authority was granted because many of our service members were losing leave while on extended deployment in the Indian Ocean without the opportunity to take earned leave. The October 1, 1979, date was inadvertently left off the bill.

The second and third amendments are also designed to correct ambiguities in the law. The bill was intended to increase submarine incentive pay rates and not to disenfranchise or franchise any group of individuals. This is evidenced by the language in the Senate report on H.R. 7626.

Unfortunately, the bill inadvertently omitted from inclusion in the group several small numbers of members who were formerly entitled to incentive pay for the hazardous duty of submarine service. This group includes crew members of deep sea submersible vehicles such as rescue and exploration vehicles and supply corps, medical and intelligence personnel who deploy with the crews of our submarine fleet.

Earlier today the ranking member of the Manpower and Personnel Subcommittee spoke of the need to consider other than across-the-board pay increases for military personnel if we are to correct the manpower problems that confront the military. I agree that before reaching any conclusion as to the reasonableness of an across-the-board increase the Subcommittee on Manpower and Personnel must carefully examine the nature of the problems which need to be corrected and whether the proposed raises are likely to correct them. As I stated to Senator EXON I shall schedule hearings at the earliest time to consider these matters and all proposed solutions to the problem. To do otherwise would run the risk that the wrong remedy would serve to make the problem worse in future years.●

ASBESTOS DISEASE VICTIMS

● Mr. HART. Mr. President, last year the Senate Committee on Labor and Human Resources held 2 days of hearings on legislation to provide compensation benefits to asbestos disease victims. During those hearings and since that time, a broad consensus has emerged in favor of a legislative remedy to insure asbestos workers disabled by an asbestos related disease are equitably compensated.

It is clear from the record we established in these hearings that State workers' compensation laws are inadequate. It is also clear litigation is not the answer. Accordingly, when Congress returns from its recess later this month I intend to reintroduce this important legislation and will seek further hearings as soon as possible.

The inadequacies of our Nation's worker compensation system have been studied, debated, and criticized since at least 1971. There is widespread agreement that the system is inadequate, ineffective, inequitable, and in serious need of reform. In no case is this more true than in State and Federal workers' compensation statutes for asbestos-related diseases.

The Asbestos Health Hazards Compensation Act which I introduced in June 1980, and will reintroduce shortly, represents an independent and unprecedented first step toward developing a system that quickly distributes compensation benefits for asbestos disease victims and at the same time fairly apportions the costs for such benefits among all responsible parties.

It provides a mechanism by which asbestos manufacturers, distributors, other segments of the asbestos industry, and the Federal Government can contribute substantially to the compensation of workers disabled by an asbestos related disease.

Mr. President, this legislation represents real and meaningful progress toward compromise by many who had previously adhered to very different positions. For the first time, major companies in the asbestos industry are supporting legislation based on the principle that all responsible parties will pay their share with no predetermined contribution from the Federal Government or any other party. At the same time, portions of the labor community are now supporting a workers' compensation reform bill which is limited to only one disease, rather than a more comprehensive bill covering all work related injuries and illnesses, which they would understandably prefer. It is my sincere hope this Congress will join in this effort to review and rethink past positions and programs and then go forward toward new, untried approaches in the spirit of compromise my bill represents.

I look forward to working with the members of the Senate Labor and Human Resources Committee and any other Members of this body who are anxious and willing to develop a solution to the complex problem of providing compensation for asbestos related disease. Working together, I am confident we can develop a solution which will insure prompt, equitable, and comprehensive compensation for workers who have no where else to turn.●

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? The Chair hears none.

What is the pleasure of the leadership?

Mr. STEVENS. Mr. President, I ask unanimous consent that morning business be closed.

The PRESIDING OFFICER. Without objection, morning business is closed.

EXPORT TRADING COMPANIES, TRADE ASSOCIATIONS, AND TRADE SERVICES ACT

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 38, S. 734, the export trading company measure.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 734) to encourage exports by facilitating the formation and operation of export trading companies, export trade associations, and the expansion of export trade services generally.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

ORDER FOR RECOGNITION OF SENATORS ON TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent that on tomorrow the following Senators be recognized for special orders of 15 minutes each: Mr. THURMOND, Mr. PELL, Mr. LEVIN, Mr. SIMPSON, Mr. HEFLIN, Mr. ROBERT C. BYRD, and Mr. STEVENS, in that order.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER THAT THE SENATE PROCEED TO S. 734 NO LATER THAN 12:30 P.M. TOMORROW

Mr. STEVENS. Mr. President, so there will be no misunderstanding about it, I ask unanimous consent that tomorrow, no later than 12:30 p.m., the Senate turn to the consideration of Calendar Order No. 38, S. 734, the export trading com-

panies bill that we have just laid down before the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 11 A.M. TOMORROW

Mr. STEVENS. Mr. President, if there be no further business to come before the Senate, I move that the Senate stand in recess until the hour of 11 a.m. tomorrow.

The motion was agreed to; and, at 6:02 p.m., the Senate recessed until Wednesday, April 8, 1981, at 11 o'clock a.m.

NOMINATIONS

Executive nominations received by the Secretary of the Senate April 6, 1981, under authority of the order of the Senate of April 2, 1981:

Department of Commerce

Frederick Morris Bush, of Texas, to be Assistant Secretary of Commerce for Tourism, vice Fabian Chavez, Jr., resigned.

Department of Energy

Robert C. Odle, Jr., of Virginia, to be an Assistant Secretary of Energy (Congressional, Intergovernmental and Public Affairs), vice Ruth M. Davis, resigned.

Department of State

Arthur H. Woodruff, of Florida, a Foreign Service officer of class 2 to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Central African Republic.

Deane R. Hinton, of Illinois, a Foreign Service officer of the class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to El Salvador.

John A. Burroughs, Jr., of Maryland, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Malawi.

John A. Gavin, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Mexico.

Department of the Treasury

Roger William Mehle, Jr., of New York, to be an Assistant Secretary of the Treasury, vice Roger C. Altman, resigned.

Department of Transportation

Donald Allan Derman, of the District of Columbia, to be an Assistant Secretary of Transportation, vice Mortimer L. Downey III, resigned.

In the Air Force

The following-named officers for promotion in the U.S. Air Force, under the appropriate provisions of chapter 839, title 10, United States Code, as amended.

Executive nominations received by the Senate April 7, 1981:

Line of the Air Force

Major to lieutenant colonel

EXTENSIONS OF REMARKS

I SPEAK FOR FREEDOM

HON. HARRY F. BYRD, JR.

OF VIRGINIA

IN THE SENATE OF THE UNITED STATES

Tuesday, April 7, 1981

● Mr. HARRY F. BYRD, JR. Mr. President, Miss Jeanne Lindner of Charlottesville, Va., who attends Western Albemarle High School, has won a scholarship for her original speech in the "I Speak for Freedom" contest sponsored nationally by Friends of Free China. I wish to call this speech to the attention of my colleagues because I think it represents some of the good things our young people are doing, and to congratulate Miss Lindner on her notable achievement.

I ask that the text of Miss Lindner's speech be printed in the Extensions of Remarks.

The speech follows:

I SPEAK FOR FREEDOM

The economy of the Republic of China on Taiwan has grown tremendously. What encouraged this growth? The government gave the economy freedom to develop, constantly changing but always progressing. Such economic freedom affected not only international relations, but also internal developments.

First, let's look at international relations. We can divide this into four parts: foreign aid, private foreign investment, the exchange of technology, and import-export opportunities.

First, foreign aid. U.S. aid to Taiwan after World War II was important to Taiwan's initial economic development. According to Neil Jacoby in "U.S. Aid to Taiwan," foreign aid provided about one-third of the total developmental resources in Taiwan, but Taiwan's excellent economic policies determined the productivity of the aid. In fact, within 15 years after aid was begun, Taiwan's economy had developed enough to be self-supporting.

U.S. aid stopped in 1964, but foreign money kept flowing into the economy. Why? Because Taiwan had adopted policies encouraging investment by private foreign sources. These policies, discussed in a booklet prepared by the Hsinchu Science-Based Industrial Park, included special tax exemptions and a guarantee against government requisition of privately owned enterprises.

In addition to foreign money, foreign technology was also brought into the country. Taiwan adapted knowledge gained from other countries to its own situation to spur the economy's growth. Use of available knowledge enabled Taiwan's economy to develop more quickly than some other economies had been able to develop.

One other factor important to Taiwan's development was its import-export opportunities. Taiwan had limited natural resources and had to import most of its raw materials. Consequently, it had to export a lot to maintain a healthy balance of payments. Thus, it needed both a large base from which to import its materials, and a large market to receive its exports. Taiwan's free economy encouraged good trade relationships with other countries and thus secured the needed sources and market.

So we see that Taiwan's free economy promoted favorable foreign relations. But the government also influenced internal developments. For example, it encouraged private investments, stimulated free enterprise, and developed the infrastructure—Taiwan's system of transportation, communication, power and public works.

How did it do this? Government policies encouraged private domestic investments just as they had encouraged private foreign investment. Private individuals were encouraged to take over business, industrial, and agricultural projects that were once public concerns. The government further encouraged free enterprise through a land reform program, which in turn eliminated the exorbitant rents paid by farmers to wealthy land owners. Because the Chinese people are intelligent and highly motivated, with a willingness to work, the land reform program was an especially successful incentive to improve production.

Taiwan's infrastructure also profited from economic freedom. Under Japanese rule a good infrastructural foundation had been established. Taiwan's free economy subsequently encouraged its continued development.

We see, then, that Taiwan's economic freedom favorably affected internal developments just as it also affected international relations. But how much did Taiwan's free economy grow? By 1964, when the U.S. discontinued aid to Taiwan, Taiwan's economy ranked in the middle third of all nations' economies in terms of development. Compared solely with Asian countries Taiwan was relatively advanced, or well developed. And Taiwan's economy has continued to progress. Over the last 15 years it has had a growth rate of about 10 percent a year. Productivity rates have continued to improve; the per capita income and the gross national product have kept increasing. The Republic of China on Taiwan continues to show the world the progress to be had with a free economy.●

MORE DEFENSE DOLLARS FOR LESS NATIONAL SECURITY

HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. KASTENMEIER. Mr. Speaker, the Washington Post of March 29 contained a compelling article by William Greider, which offers an excellent analysis of the waste, inefficiency, and inflationary effects of our current method of defense spending.

It reveals what many of us have been claiming for years, that you do not get greater national security simply by throwing more dollars at the Defense Department. Indeed, by getting less and less for more and more dollars, we are, in fact, promoting less not more national security.

Mr. Greider, whose article is based on a comprehensive study of defense procurement policies by Jacques S. Gansler, former Deputy Assistant Secretary of Defense in the Ford administration, highlights the grossly inefficient system that has developed as a result of an almost total lack of competition in the defense industry.

The cost of this lack of competition and resulting inefficiency is succinctly illustrated in the cost overruns for 47 major weapons systems from September to December 1980—$47.6 billion. As Mr. Greider points out:

Think of it: The entire domestic budget cut which Ronald Reagan is proposing was swallowed up by one quarter's price escalation for Pentagon weapons.

Mr. Speaker, continuing this noncompetitive, wasteful system runs counter to everything this administration presumes to stand for. The waste costs us billions of dollars each year. The waste is grossly inflationary. The waste weakens our national security.

Mr. Greider's article, and Mr. Gansler's study, should tell us clearly that the Pentagon's budget cannot be exempt from budget scrutiny nor from the same efforts to eliminate waste and inefficiency that are currently being imposed on every other Federal program.

As long as the Pentagon is permitted to continue its policies unchecked and unreformed, millions of people will suffer as a result of the effort to offset this wasteful spending in domestic program cuts.

And, tragically, in the process, we gain little if anything in terms of national security.

Mr. Greider's article, from the Washington Post of March 29, follows:

HOW MORE BUYS LESS—THE MAGINOT CURVE: THE FASTER YOU SPEND ON DEFENSE, THE BEHINDER YOU GET

(By William Greider)

If everyone now comfortably grasps "supply-side" economics and the logical beauty of the Laffer Curve, it will not confuse them further if I introduce them to the Maginot Curve. The Maginot Curve, which I have named in honor of those French generals who prepared so cleverly for World War II, applies the "supply-side" perspective to the "demand side" of President Reagan's new budget—the trillion-dollar boom in defense spending.

The Laffer Curve, as everyone surely knows by now, holds that as the government raises its tax rates, it reaches a zero point where revenue actually begins to decline. The more you tax, the less you collect.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

The Maginot Curve makes the same point about defense spending. The more you spend on rearming, the fewer weapons you get for your money. Those who are familiar with weapons procurement know that this is already happening. As the Reagan rearmament pours $1.5 trillion into the Pentagon over the next five years, the United States will approach the Maginot's theoretical zero point, never before reached by civilized nations. We will spend much, much more on weapons and we will get back nearly zero in national security.

This is only a theory, of course. I do not expect the Reagan team to take it seriously, because it offends all of their cherished notions about what government is for.

Government is for buying tanks, ships, airplanes and making America strong. Who would believe that dumping a trillion dollars on the defense industry might actually make us weaker? The French generals built a big wall across eastern France to keep the Germans out and called it the Maginot Line. Trouble was, Hitler went around it.

A few years hence, after we have experienced the "supply-side" calamities of the Reagan defense budget, I predict people will be ready to examine the Maginot Curve as a serious idea. Point zero in defense procurement is not as distant as you might think.

Last fall, for instance, when the Pentagon was already flush with the Carter administration's budget increases, the negative effects of the Maginot Curve were already visible. In the final three months of 1980, the total purchase cost of 47 major weapons systems escalated by $47.6 billion. From September to December, due to engineering changes and foul-ups and inflation, the total price tag on these planes, tanks, ships, guns and fancy electronic gear rose from $262.6 billion to $310.2 billion, an inflation rate of nearly 20 percent.

That makes Medicaid sound like a real bargain. The $47.6 billion Pentagon overrun is, by the way, a wonderfully apt statistic for all those weep-easies around town who are moaning about the Reagan budget cuts for food stamps or Legal Services or other do-gooder programs. Think of it: The entire domestic budget cut which Ronald Reagan is proposing was swallowed up by one quarter's price escalation for Pentagon weapons. Does that register on anyone's yelp index?

But my fundamental point is this: Thanks to that price escalation, we must buy fewer weapons. The Air force dropped seven F18 fighter jets from its 1981 buy. The Army reduced its order for XM1 tanks by 20 tanks and is negotiating to cut another 45. The Pentagon, like any average consumer, blames it on inflation and promises to be a more careful shopper in the future.

But the future will be worse for weapons inflation, not better, unless the Reagan managers have the political courage to confront the "supply-side" flaws in the defense industry. Otherwise, the rush of new dollars into defense orders will simply aggravate all of the fundamental problems which are producing this extraordinary waste.

To reform the structural flaws in the defense industry, however, the "supply siders" would have to abandon one of their most cherished theological principles, the idea that there is a "free market" which functions efficiently on its own, if only government will get out of the way. Whatever one may say about the rest of the economy, the "free market" is an elaborate pretense in the defense sector. Defense production is perhaps the most highly regulated of all industries, operating partly in government-owned factories and with government guarantees of sales and profits. On many items of hardware, the Pentagon is the only buyer. And on most military parts and systems, the Pentagon buys from a company which is the only seller.

All of this is concealed by an earnest mythology of "free market" competition, based on the simple virtues of public purchases through competitive bidding. The reality approaches monopoly. Only 8 percent of Defense's business is done by the formal system of advertised price competition. Most purchases are effectively "negotiated" between buyer (the government) and seller (defense contractor).

About 60 percent of Pentagon procurement is actually awarded on a noncompetitive, single-source basis in which the supplier names the price and delivery date. The larger the dollar value, the more likely it is that the contract will be noncompetitive.

These reality checkpoints are derived from the defense procurement studies done by a free-thinking economist named Jacques S. Gansler, who studied the structure of the defense industry as a deputy assistant secretary of defense in the Ford administration and who has spent the last five years trying to get generals, admirals and civilian managers to listen to what he found. Today, for those who seriously want to understand the matter, Gansler's analysis is summarized in one dense and troubling volume, "The Defense Industry" (MIT Press, Cambridge, Mass., $19.95).

Gansler, I should add quickly, is no weepy dove or out-of-fashion lib-lab economist. He believes, with the Pentagon brass, that America was "unilaterally disarming" itself in the post-Vietnam defense budgets while the Soviet Union was preparing for war and that the trend must be reversed. But he also believes that simply throwing money at Boeing and General Dynamics and McDonnell-Douglas and the hundreds of other defense contractors will produce disastrous results. Indeed, it was Gansler who explained for me the broad outlines of supply-and-demand inflation which I dubbed the Maginot Curve.

What would happen, for instance, if there were a sharp increase in defense expenditures for aircraft, as Reagan now proposes? Gansler anticipated the question in his book:

"Although there were many badly underutilized plants and redundant employes, it was highly likely that greatly increased defense funds, spent on the present products with the present contractors, would not yield significantly more military equipment but would only raise the prices.

"The existing bottlenecks of labor, parts and production machinery would not be removed, and the few firms doing business on the increased demand would simply pay more for the scarce parts and labor and charge the government more for the equipment produced. The impact would be inflationary, with little benefit in terms of either employment or national security."

This is easier to understand with a humble example. Accordingly to studies by the House Armed Services Committee, there is now a wait of 120 weeks for delivery of aircraft landing gear, twice the delay which existed only a few years ago. In some cases according to Gansler, forgings and other parts for landing gear can only be obtained from one contractor. When the Pentagon makes new orders, those must wait in line behind the old orders. The effect is upward pressure on price and longer delays.

If the supplier decides to expand production, build a new plant an hire more workers, it runs into the industry-wide inflation. There is already a shortage of machinists in America and no surplus of engineers. Firms are already bidding up salaries in furious competition for personnel.

In addition, shortages of key parts hold up production on major weapons systems because the network of small suppliers has atrophied in the last decade. While the Pentagon and Congress concentrated on keeping the prime contractors afloat with bailouts and life-saving orders for the big-ticket items, scores of smaller firms simply dropped out of the defense business. They couldn't stand the boom-or-bust uncertainties; they left behind a greater concentration of producers, which means of course, even less competition on price.

So far, we have not even mentioned the reliability of these weapons. Americans have gotten so accustomed to reading that their billion-dollar weapons don't work right or their huge airplanes have serious flaws that they are no longer shocked. Gansler believes that the scandals of unreliable defense products also flow from the structure of industry, the absence of genuine competition.

An aircraft manufacturer is encouraged by the present system to "buy in" during the research and development phase of a weapons program—that's a business term for pricing the product too low at the start in order to win the sale. Then the contractor "gets well" later by gouging the customer when the aircraft is in full production and the buyer can't easily turn elsewhere.

In this case, of course, the customer is us. If the aircraft or its engine doesn't work right, so much the better. That means more engineering changes, an increased price tag and, under present procurement rules, greater profit.

The fundamental answer, of course, is more competition. Every true-blue conservative is for that. But the argument begins with this question: How do you create more competition in a highly regulated industrial sector where the government is the only customer and the marketplace is dominated by product monopolists? As I understand the "supply-side" approach, they might say something like this: Deregulate the businesses, get the government off their backs and then simply throw a lot of the money on the table and let the fittest get the mostest.

Gansler, alas, thinks the government cannot withdraw from managing the defense industry, even if it wants to. The only issue is whether the Pentagon will reform its procurement strategies to produce more competition and, thus, lower prices and more reliability. Or whether it will allow the present structure to continue to swallow up these new billions and frustrate further the anxieties over our national arsenal versus the Reds.

Among other things, Gansler would apply "indicative planning" to the defense sector. "Indicative planning" is a dirty socialist term borrowed from the mixed economies of Western Europe, so Gansler prefers an Americanized euphemism: "coordinated government policy." What it means, crudely stated, is that the Pentagon would force-feed competitive arrangements on the defense industry. The peculiar nature of this sector is that, unlike the "free market" theory, ineffective firms don't get eliminated from the marketplace and efficient new

competitors find it most difficult to gain entry.

For instance, in some cases, the Pentagon should set aside the meaningless facade of competitive bidding and use guarantees and subsidies to draw new firms into the field to compete on price and quality with the old monopolists. It should separate the R&D phase of weapons development from the production phase so that companies would have no incentive to "buy in" with dishonest estimates of costs. (Gansler notes, without irony, that this is what the Soviets do in their military-industrial complex, not to mention our European allies.) Military planners, if they really want to catch up with the Russians, should reverse the system's present incentives for raising costs and make the price tag a basic criterion in the design of new weapons.

And Gansler recommends this: Instead of perennially propping up losers, the government should allow some weak companies, including some of the major aircraft makers, to go under. Their plants are inefficient and represent a costly overcapacity which keeps valuable people and machines from converting to more useful enterprises.

As these remedies suggest, competition hurts. Will Defense Secretary Caspar Weinberger have the courage to confront the Pentagon pork barrel and apply his famous knife to its bloated contracts? Weinberger's initial moves to reform contracting have been encouraging, but he has not gotten to the hard parts.

Reagan's staunch supporters in the defense industry will yelp like wounded liberals if the SecDef tries to force a little honest competition upon them. If he doesn't try, we will watch the defense budget climb the Maginot Curve faster than you can cut the free lunch for poor people.●

ACT TO ENCOURAGE SAVINGS

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. GEPHARDT. Mr. Speaker, I am introducing the Investment Credit Incentive Act as a fair tax incentive to stimulate savings. One of the few things all of us here agree on is the need to encourage personal savings in our country. I believe there is also a concensus that changes in our tax laws can induce additional savings.

The ICIA will provide a tax credit of 10 percent on the first $5,000 invested each year in an account in a financial institution. Up to $50,000 in cash or qualified securities could also be placed in such an account.

The earnings on this investment would not be taxed as long as they were kept on deposit. Withdrawals of principal or interest before the end of a 10-year period would be taxed at normal tax rates. This would encourage the money to be retained in the account for at least a decade.

At the end of this period, up to $50,000 in capital and $50,000 in earnings could be removed from the account tax free. Additional withdrawals of either would be taxed at the capital gains rate.

I believe this plan will solve a number of our economic problems. It will create a substantial pool of new capital which will create new jobs and modernize our industry. This, in turn, will improve our productivity rate and put a brake on inflation.

This bill would not solve all of our economic problems, but it will point us in the right direction. If we do not act to encourage savings, we will never be able to solve them.

The British save at twice the rate Americans do. The Japanese savings rate is more than triple ours. This disparity cries out for a remedy. The ICIA should provide it.●

CETA WORKS IN HOUSING REVITALIZATION

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. HAWKINS. Mr. Speaker, proof that public service employment under the Comprehensive Employment and Training Act (CETA) has worked and should not be eliminated has been firmly established in hearings before the House Education and Labor Committee. Typical of such proved experience under CETA is the following testimony of David Berger of the Rehab Project, a private, nonprofit housing corporation in Lima, Ohio.

STATEMENT BY DAVID J. BERGER, EXECUTIVE DIRECTOR, REHAB PROJECT

Members of the Education and Labor Committee, my name is David Berger. I am the Executive Director of Rehab Project, a private, non-profit housing corporation in Lima, Ohio. I appreciate the opportunity to speak briefly to the Committee concerning Rehab Project's involvement with the CETA program and the very real loss that we will experience if the Public Service Employment component of CETA is eliminated by budget cut-backs. Please note, as I begin, that I am not a PSE employee and that my remarks are not made as one who is about to lose his job. Instead my testimony is intended to bear witness to the harm which PSE cutbacks will effect on the Lima community at-large. Further, I do not intend my remarks to be taken as a blanket defense of the CETA PSE program. Such a defense is not possible. Rather, I offer my testimony as an example of what Public Service Employment can accomplish, and I do so with the hope that it will encourage some discretion in determining the budget cuts.

Rehab Project was incorporated in early 1977 in order to stimulate neighborhood revitalization through concentrated housing rehabilitation and home ownership activities for lower-income families. Since that time we have renovated 25 houses, and are presently putting the final touches to a financial package and 5-Year Plan which will make possible the rehabilitation of over 400 additional housing units. Rehab Project thus has a significant track record of achievements, as well as ambitious hopes for the future, and CETA Public Service Employment is a key element in both.

Since November, 1979, Rehab Project has worked closely with CETA's prime sponsor in Lima to design and implement a residential construction training program. To date, we have 3 CETA crews operational that perform the entire array of housing rehabilitation and construction tasks, except the licensed electrical and plumbing work. (Some of these details have been provided in Ms. Irons' statement.) These crews have been responsible for the renovation of 10 houses, and their work has been acclaimed throughout the community for its quality, value, and contribution to neighborhood revitalization.

Since the program's initiation 17 months ago, 23 persons have left it, with 12 or over 50% having moved into private employment or other educational pursuits. At present, 20 additional persons are employed on the three crews, with lay-offs due to budget cutbacks scheduled to begin April 8 for Title II-D participants and June 3 for Title VI participants. Forty-three persons have thus been able to participate in a training program that has been described by community leaders and other third-party observers as "tremendously successful," and "uniquely beneficial for the participants and the community," as "exactly what CETA Public Service Employment was intended for." These comments have been made by persons with the Lima Board of Realtors, Lima's local lending institutions, and others in the private housing industry.

In the interest of brevity, I will present in outline form the major points of emphasis with respect to Rehab Project and CETA's PSE program:

1. In our PSE residential construction training program, unskilled, undereducated, chronically unemployed or underemployed persons are receiving training and developing skills and work habits that have substantially increased their employability. The fact that 50 percent of the persons who have left the program have found employment is a significant one. This is all the more impressive if one realizes that none of those persons had been with the program for longer than 11 months.

2. The self-esteem and personal attitudes of persons in the program have improved dramatically. Prior to the announcements of pending program cuts, a waiting list of persons wanting on the crews existed. Pride of workmanship and a zeal for learning are concrete realities among crew participants. As stated in a written evaluation by a crew member, "I am gaining skills to take through life. This work is something I look forward to with each day."

3. The carpentry work accomplished by the crews allows Rehab Project to continue to serve lower-income persons. That is, because of the in-kind contribution of the carpentry and construction work, Rehab Project is able to keep the costs of a renovated property low enough so as to be affordable to lower-income persons. Typically, the contribution by the training crews cuts rehabilitation costs by one-half.

4. Beyond the simple benefit to the purchaser of a renovated property, the quality and value of the crews' work benefits the neighborhood and the entire community. This is not a make-work project; rather, it is work which the community has recognized for years as absolutely necessary to its long-term health and economy, but is also work that the community found no adequate way of accomplishing prior to CETA PSE. Again, as a typical instance, a home renovated by a CETA crew has acquisition and material

costs of approximately $20,000, but that house also has an appraised value thousands of dollars in excess of those costs. Thus the investment in the neighborhood is substantial and positively impacts on all surrounding property values.

5. Because of the overwhelming success of the three present crews, the 5-Year Plan, mentioned earlier, had projected the initiation of 6 crews. Rehab Project thus looked forward to training some 40 to 45 persons at a time, with a housing production rate of 30 houses per year. Lima's neighborhoods, its labor market, and its general economic base would be profoundly influenced by these activities when carried out for the full five years. Thus the possible loss of CETA PSE will severely retard our efforts to both revitalize Lima's neighborhoods and serve our lower-income clients.

In summary, it is my hope today that my testimony will be seen as illustrative of many CETA PSE programs throughout the country. Real training and real work are being accomplished by these programs. This is not to say that all CETA's PSE programs have been worthwhile or without problems. Rather, my testimony is offered as evidence that Public Service Employment can and has worked, and, therefore, that it should not be totally eliminated.

Thus, we would appreciate a serious look at both the assets and failings of CETA PSE before final decisions are made with respect to budget appropriations.

Thank you.●

NAGASAKI, AUGUST 9, 1945

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. OTTINGER. Mr. Speaker, I am including in today's RECORD an extremely unsettling article which recently appeared in the New York Times. It recounts the tragic experiences of Michaito Ichimaru when the atom bomb was exploded in Nagasaki in 1945.

Mr. Ichimaru's recollections bring us firsthand the magnitude of horror and suffering caused by nuclear weapons. These experiences may well occur again as the administration lowers the barrier to use of nuclear weapons by promoting tactical nuclear weapons—each many times the explosive power of the Hiroshima weapon—neutron bombs and deprives our overseas forces of a capability for anything but a nuclear response.

I highly commend this article to the attention of my colleagues:

NAGASAKI, AUGUST 9, 1945

(By Michaito Ichimaru)

WARRENTON, VA.—In August 1945, I was a freshman at Nagasaki Medical College. The ninth of August was a clear, hot, beautiful, summer day. I left my lodging house, which was one and one half miles from the hypocenter, at eight in the morning, as usual, to catch a tram car. When I got to the tram stop, I found that it had been derailed in an accident. I decided to return home. I was lucky. I never made it to school that day.

At 11 A.M., I was sitting in my room with a fellow student when I heard the sound of a B-29 passing overhead. A few minutes later, the air flashed a brilliant yellow and there was a huge blast of wind.

We were terrified and ran downstairs to the toilet to hide. Later, when I came to my senses, I noticed a hole had been blown in the roof, all the glass had been shattered, and that the glass had cut my shoulder and I was bleeding. When I went outside, the sky had turned from blue to black and the black rain started to fall. The stone walls between the houses were reduced to rubble.

After a short time, I tried to go to my medical school in Urakami, which was 500 meters from the hypocenter. The air dose of radiation was more than 7,000 rads at this distance but I could not complete my journey because there were fires everywhere. I met many people coming back from Urakami. Their clothes were in rags, and shreds of skin hung from their bodies. They looked like ghosts with vacant stares. The next day, I was able to enter Urakami on foot, and all that I knew had disappeared. Only the concrete and iron skeletons of the buildings remained. There were dead bodies everywhere. On each street corner we had tubs of water used for putting out fires after the air raids. In one of these small tubs, scarcely large enough for one person, was the body of a desperate man who sought cool water.

There was foam coming from his mouth, but he was not alive. I cannot get rid of the sounds of crying women in the destroyed fields. As I got nearer to school, there were black charred bodies, with the white edges of bones showing in the arms and legs. A dead horse with a bloated belly lay by the side of the road. Only the skeleton of the medical hospital remained standing. Because the school building was wood, it was completely destroyed. My classmates were in that building attending their physiology lecture. When I arrived some were still alive. They were unable to move their bodies. The strongest were so weak that they were slumped over on the ground. I talked with them and they thought they would be O.K., but all of them would eventually die within weeks. I cannot forget the way their eyes looked at me and their voices spoke to me forever. I went up to the small hill behind the medical school, where all of the leaves of the trees were lost. The green mountain had changed to a bald mountain. There were many medical students, doctors, nurses, and some patients who escaped from the school and hospital. They were very weak and wanted water badly, crying out, "Give me water, please." Their clothes were in rags, bloody and dirty. Their condition was very bad. I carried down several friends of mine on my back from this hill. I brought them to their houses using a cart hitched to my bicycle. All of them died in the next few days. Some friends died with high fever, talking deliriously. Some friends complained of general malaise and bloody diarrhea, caused by necrosis of the bowel mucous membrane by severe radiation.

One of my jobs was to contact the families of the survivors. In all the public schools I visited, there were many many survivors brought there by the healthy people. It is impossible to describe the horrors I saw. I heard many voices in pain, crying out, and there was a terrible stench. I remember it as an inferno. All of these people also died within several weeks.

One of my friends who was living in the same lodging houses cycled back from medical school by himself that day. He was a strong man doing Judo. That night he gradually became weak but he went back to his home in the country by himself the next day. I heard he died a few weeks later. I lost many friends. So many people died that disposing of the bodies was difficult. We burned the bodies of my friends in a pile of wood which we gathered, in a small open place. I clearly remember the movement of the bowels in the fire.

On Aug. 15, 1945, I left Nagasaki by train to return to my home in the country. There were many survivors in the same car. Even now, I think of the grief of the parents of my friends who died. I cannot capture the magnitude of the misery and horror I saw. Never again should these terrible nuclear weapons be used, no matter what happens. Only when mankind renounces the use of these nuclear weapons will the souls of my friends rest in peace.●

THE BEST CREDIT IN TOWN: YOUR LIBRARY CARD

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. BIAGGI. Mr. Speaker, This week of April 6 marks the annual celebration of National Library Week. It is both appropriate and necessary to bring to the attention of my colleagues here some of the many services which our local public libraries provide to their communities. Not only are these services varied, but more importantly they are the best deal in town because they are free. You need only to carry a library card to be eligible to use our public libraries. In these days of rising credit card finance charges and soaring interest rates, it is a credit to our national library system that we have been able to continue these services for communities free of charge.

I am proud to be from the Empire State of New York which boasts one of the largest library systems in the world. In my own city of New York, we are most fortunate to have the New York Public Library which operates both internationally famous research libraries and 83 branch libraries in the neighborhoods of Manhattan, the Bronx, and Staten Island. The dramatic growth and expansion of our library system has been evident, since its meager beginnings in 1901 with 11 branches, to its nearly 15,000 programs it operates for over 17 million users today.

As New York's senior member of the House Education and Labor Committee which oversees our Federal library programs, I have remained committed to working for adequate funding for the Library Services and Construction Act. This act, first approved in the 84th Congress, has helped the New York Public Library provide services such as job opportunities information centers, learner's advisory centers, a community information/service direc-

tory, literacy centers, children's media centers, and a special library for the blind and physically disabled. I am particularly impressed with the information services which our libraries provide, for adults who are seeking to return to college and other degree programs. As an original cosponsor of the Education Amendments of 1980 and author of the provision that provides for the creation of student financial aid data banks in title I of that legislation, it is my hope that libraries will continue to expand their services in these areas.

The reauthorization of the Library Services and Construction Act provides us with a special challenge in this Congress which has been faced with the unfortunate task of addressing proposed reductions in Federal library programs. New York City has been particularly hard hit by steady losses in funds since 1970: Services hours have been cut by 50 percent, over one-third of their staff—over 350 full-time positions—have been lost, resulting in many branch libraries eliminating weekend, evening, and morning services and opening for only 3 or 4 afternoons per week. Yet, the New York Public Library continues its diverse and numerous services, spending far less than other major cities in comparison; while New York spends $7.14 per capita for library service, Baltimore spends $11.62, Washington, D.C., $14.06 and Philadelphia $9.63.

I would like to urge all of my colleagues to take a close look at the public library systems in their own communities, if they have not done so already, and acquaint themselves with the services available and the number of people who take advantage of their services. Our public libraries have become the focal point for many communities, for citizens of all ages and they deserve our continued support. In these times of fiscal and budgetary restraint, let us not be quick to dissolve programs which have, for such a small investment, provided benefits to so many.●

PRAISE FOR THE VOICE OF AMERICA

HON. ROBERT H. MICHEL
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. MICHEL. Mr. Speaker, the Voice of America (VOA), the official international broadcasting station of the U.S. Government, has to be accurate, fast moving, and informative—but, above all, accurate.

How did the VOA deal with the confusing and dramatic events of Monday, March 30, 1981, when President Reagan was a victim of an assassination attempt? It would appear that the VOA did an extremely capable, professional, and credible job according to one knowledgeable observer, Tom Dowling of the Washington Star.

Once more we are brought face to face with the fact that our international broadcasting stations are of inestimable value to our image overseas and to our national security. Any misjudgment or sign of panic on VOA would have been interpreted by millions throughout the world as representing our Government's confusion. Tom Dowling finds that the staff of VOA handled the tough job of reporting fast-breaking and often contradictory information very professionally.

At this point I insert in the RECORD, "VOA's Caution Paid Dividends in Credibility" by Tom Dowling, the Washington Star, April 2, 1981.

VOA'S CAUTION PAID DIVIDENDS IN CREDIBILITY

"There seems to be some confusion here," said Dan Rather late Monday afternoon, his voice momentarily dropping out of overdrive as it dawned on him that CBS had made a ghastly mistake in reporting that James Brady was dead. It seemed a moment when the magisterial, calming figure of Walter Cronkite might have been mercifully summoned to slide into the anchorman's seat.

But in reality the events of Monday afternoon had a bureaucratic dynamic beyond even Cronkite's reportorial powers. The modern age lives in fear of the vacuum, and bureaucratic procedure exists to fill it. Government must be filled with rules and regulations, whether they are necessary or senseless; air time must be filled with talk, whether it is information or conjecture. The cardinal bureaucratic law of television news is that error is preferable to silence. Accordingly, all three networks went with anything, however soft, in order to avoid saying nothing.

The federal bureaucracy is also in the broadcast news business, and on Monday it did a measurably better reporting job than the commercial networks—if, that is, the relative absence of misinformation is the standard by which news should be judged.

The Voice of America is the government's news outlet, with its estimated potential worldwide audience of 300 million shortwave radio listeners. The VOA was able to beat the networks simply by saying less and by tolerating—however uneasily—vacuums in a running news story. That was possible because the Voice marches to a different, and perhaps sounder, beat than its commercial rivals. As a government news agency, VOA is always suspect as a propaganda outlet; therefore, its always fragile credibility routinely requires two reliable sources to confirm a news story before it is aired.

As it happened, VOA had a possible world scoop on the Reagan assassination attempt. On Monday, VOA's 25-year old Mallory Saleson was covering the president alone for the service. He had been on the job less than two weeks.

"I was right there for the shots, saw the gun flash and dropped to my knees," Saleson recalled. "I thought I understood what happened, so I ran inside and found a phone booth. As far as I could tell I was the first reporter to hit the booths. I got the round-up editor, said I knew there were three of four shots fired and I'd seen people on the ground. I said, 'You're going to put it out?' He said, 'Yes.' "

Saleson's call came at 2:30 p.m.—which meant that had VOA run with its report it could have beaten ABC news by four minutes, CBS by seven minutes and NBC by eight. At 2:39—one minute after NBC-VOA ran its first shooting bulletin: "Shots rang out near a Washington hotel a few moments ago—as President Reagan was leaving the hotel to return to the White House. . . ."

"With our own correspondent on the spot, we do not require a second source," says Bernie Kamenske, the head of VOA news. "Probably we should have gone with our own people and put out the story immediately. But when someone is shooting at a president you do some hard, quick thinking. I remembered that when Kennedy was assassinated, the BBC did not go with his death until they heard it confirmed on VOA. They said they knew we could not afford to be wrong on that story."

By 2:48 VOA was running with what would be the basic initial assassination attempt news story: Reagan had escaped unharmed in his limousine, three men were wounded, one of them Jim Brady, and the assailant was in police custody. The ensuing official line—or absence of one—would have a more deleterious future impact on VOA's credibility than on its network rivals. "When you have to start changing your story about whether someone was shot, the foreign audience finds it hard to believe that it was all an accident," Kamenske said.

And, no doubt, the news vacuum so abhorred by networks was created by the White House. Happily, VOA had the Polish strike settlement going for it to partially fill the void. And at 2:50 p.m. its Thailand correspondent scored a half-hour world beat on the Indonesian commando raid on the hijacked airliner in Bangkok. "The networks were on the air with one story, so they were continuously forced to clutch at rumors, whereas we had other stories," Mark Willen, VOA's news round-up editor, said.

When all three networks reported that Brady had died, VOA issued its own death bulletin at 5:17 and then carried the White House denial of the report nine minutes later. Luckily, such bizarre events as the Alexander Haig press appearance were not aired live—not out of any particular tender concern for Haig's image, but because his jumbled, quavering remarks lacked shortwave broadcast sound quality.

As the afternoon wore on, VOA began tenuously to learn to live with a vacuum. "They've got the president walking into the hospital," Kamenske says. "Wait a second. What's this? He's undergoing open-heart surgery? It didn't add up. Then comes Hinkley. He's a Yale dropout? A DJ?, an ex-Nazi? The holes and gaps were getting too big. They commit you to accuracy here. On a breaking news story it's like being committed to purgatory, but there it is."

And so, by keeping still about Reagan's premature trip to death's door and other exciting errors, the government news sector ended the day with much less egg on its mike than the networks. "Our one mistake was Brady," Saleson said, "but at least the networks had him dead a lot longer than we did."

Perhaps, in the end, there's something to be said in behalf of a slow-moving federal bureaucracy that would rather live with a vacuum than be wrong.●

U.S. TAX LIABILITY FOR FOREIGN TAXPAYERS

HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. CONABLE. Mr. Speaker, I am introducing legislation today which would amend the Internal Revenue Code to provide equal tax treatment for investment income earned by U.S. and foreign pension plans.

It is a matter of longstanding U.S. tax policy that determinations of U.S. tax liability for foreign taxpayers should be based on U.S. standards. However, this policy has not been carried out in the case of the taxation of foreign pension plans. Present U.S. tax law exempts from U.S. tax the investment income and gains of qualified pension plans and similar retirement plans. On the contrary, the U.S. investment income of foreign plans is subject to U.S. tax even though the foreign pension plans are generally exempt from taxes in their home countries.

Mr. Speaker, this inequity in the tax treatment of investment income between U.S. and foreign pension plans not only is against our general tax policy in dealing on the international level but prevents the United States from tapping a potential market for additional capital. Foreign pension plans have shown an interest in investing in the United States in order to diversify their investment portfolios and lessen their dependence on the economy of their home countries. The funds from the foreign pension plans are a source of capital that should be made available to the U.S. economy and their availability should not be impeded by our current tax laws. The funds from foreign pension plans are usually invested on a long-term basis and thus would be more stable than other forms of foreign investment. Moreover, such foreign pension fund investment actually increases the pool of capital in the United States rather than merely shifting capital from one sector to another as some capital formation proposals. This makes the bill an unusual and attractive capital formation proposal.

Mr. Speaker, my proposal would exempt from U.S. taxation the income from investment in the United States by qualified foreign pension plans. The bill limits the exemption to foreign pension plans that qualify for favorable treatment under the tax laws of the country in which they are organized; that are funded with assets which are segregated from those of the employer; and that are maintained primarily to provide retirement benefits for nonresident employees. Finally, the bill would establish a framework of review under which only foreign pension plans that are organized in countries which give the same favorable tax treatment to investment income of U.S. pension plans in that country would continue to be eligible for the tax exemption. This reciprocal tax treatment between the United States and another nation would allow U.S. pension plans, if they so desire, to invest in opportunities outside of the United States.

Mr. Speaker, the bill would remove a current inequity in the tax treatment of the United States and foreign pension plans, carry out the current tax policy with regard to the treatment of foreign taxpayers, and allow the United States to tap a new source of capital that can help to stabilize our economy on a long-range basis. Moreover, because foreign pension plans have not generally been investing in the United States because of the current tax disincentives or have been structuring their investments so as to minimize U.S. tax, the proposal would have little or no revenue loss.

I urge my colleagues to support this legislation.●

TUITION TAX CREDIT LEGISLATION

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. PHILIP M. CRANE. Mr. Speaker, it is my hope that the 97th Congress will consider and pass legislation providing for tuition tax credits for education.

This legislation would strengthen and improve education in the United States. It would not hurt public schools. It would help private schools which are facing growing financial burdens. Students would be the main beneficiaries of this educational reform. The most important development which will flow from tuition tax credit legislation will be to encourage freedom of choice and diversity in our educational system.

On March 12, 1981, Frank Scott, the vice president and general manager of radio station WRC, delivered an editorial which makes an effective case for tuition tax credit legislation. I enter the editorial in the CONGRESSIONAL RECORD and encourage my colleagues to read it.

The editorial follows:

ALVORD. Tuition tax credits are back in the news, and WRC's Vice President and General Manager, Frank Scott, has an editorial comment. Frank * * * is it a good idea to let parents take the cost of private schools off their taxes?

SCOTT. Yes, Ken, we think so.

Private schools have been around for a long time * * * longer than public schools. Private schools come in all sizes and shapes * * * from the well-known, and notoriously elite prep schools, to the far more numerous neighborhood parochial schools and the fundamentalist Christian "academies" that are often accused of fostering racial discrimination under the guise of education.

But the bottom line is free choice and competition. Private schools now attract the rich, those willing to make a significant financial sacrifice, and those lucky enough to win some form of financial aid.

Meanwhile, the free public schools are going downhill fast * * * especially in the big cities.

The public education lobby suggests that any form of governmental aid to private education * * * even one as benign as a tuition tax credit, would spell the end of public education as we know it.

That may well be true. But we think the blame is being misplaced. Public education isn't being ruined by private schools. Private schools attract the very people who might otherwise support public education * * * if it were not so demonstrably ineffective.

Private education is not enjoying a renaissance because of elitism or race prejudice. Private education is growing in popularity because public education is falling apart.

Federal interference, collapsing discipline, and teachers more interested in short hours and big paychecks than the children they are shaping are the real reasons for the public education crisis in this country.

Private schools * * * to the extent that their limited budgets permit * * * are filling the gap.

The tuition tax credit proposal would not only help many excellent private schools do an even better job, it would also open up the advantages of private education to students who simply can't afford it now.

Public education is a monopoly. For most parents it's a case of "if you don't like it * * * tough." Middle and lower income parents can't afford to send their kids anywhere but public school. So their kids all too often graduate from high school as functional illiterates.

If tuition tax credits help close down that sort of public school, we say "great." Good old American competition will do nothing but improve the overall state of education. And that, after all, is the point.

The purpose of a school is education * * * not the enrichment of teachers and administrators.

Private schools may be small and poor, but they generally produce well-educated children * * * without bloated paychecks, stifling bureaucracy, teacher sick outs, or drugs and violence in the rest rooms.

We think the time is at hand to let parents have a choice between a public school system that obviously doesn't work and private schools that might.

ALVORD.—That's the opinion of WRC Management. Replies by qualified representatives of opposing viewpoints are welcome.●

THE FUTURE OF SYNFUELS?

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. RAHALL. Mr. Speaker, when the 96th Congress overwhelmingly approved legislation to establish the Synthetic Fuels Corporation momen-

tum was built to make the United States independent from foreign petroleum sources. Many of us in this body are extremely concerned with the administration's proposal to reduce, and or eliminate, Government involvement in the development of this industry.

The Huntington Herald Dispatch, the newspaper of the largest city in West Virginia, published an editorial on March 29, that I would like to share with my colleagues at this time. I believe it sums up the concerns of all of us who are interested in the future of synthetic fuels.

WITHOUT PUSH NOW, SYNFUELS WON'T GET OFF DRAWING BOARD

The Reagan administration has proposed that the federal government all but get out of the effort to develop synthetic fuels.

We view that proposal as nothing short of tragic.

Here's why:

It's going to take time—many years—to experiment with, design and develop synthetic fuel processes and facilities.

Various companies (including, here in our own Tri-State Area, Ashland Oil) are currently engaged, in partnership with Uncle Sam, in researching and testing a number of different methods to produce synthetic oil and gas from coal and to extract oil from shale for processing into gasoline, heating oil and other petroleum products.

Several coal liquefaction and gasification demonstration plants could be operating within the next three to four years. If these plants prove that synthetic fuels from coal can be produced in an economically (and environmentally sound) way, then larger, commerical-sized facilities will be constructed. But that would take several additional years.

A number of published studies, by both the government and private industry, estimate that production of synthetic fuels could total at least 1 million barrels a day by 1990.

But unless synthetic fuel experimentation and commercialization moves forward now, the projected snyfuel plants will remain on the drawing board and that ambitious 1990 production target won't be met.

Coal constitutes this nation's largest energy resource. Recoverable coal reserves in this country are said to be more than three times greater than our recoverable reserves of oil and natural gas.

We, like many others concerned about the nation's energy woes, are absolutely convinced that the best means of reducing our nation's heavy dependence on foreign oil rests in moving forward with the effort to convert this treasure trove of coal into synthetic fuel.

And we utterly fail to understand the Reagan administration's unwillingness to assign that task the urgent priority it so clearly merits.●

THE CETA CUTS DON'T MAKE SENSE

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. HAWKINS. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following news article which appeared in the Philadelphia Inquirer on April 6, 1981.

[From the Philadelphia Inquirer, Apr. 6, 1981]

THE CETA CUTS DON'T MAKE SENSE

(By Irvin D. Rutman)

Most Philadelphians, I'd be willing to wager, received the recent news that the federal government was making major cutbacks in the city's Comprehensive Employment Training Act (CETA) program with reactions ranging from "so what?" to "that's a good idea."

The news reports were rather routine in nature. They stated that the new administration in Washington had decided to cut back the appropriation previously awarded our city to subsidize CETA positions in public service agencies. This decision, the reports noted, would return some $26 million to the federal government.

On the face of it, it seemed fine. Who would quarrel with a $26 million saving in federal spending, or with the goal of reducing governmental programs and costs?

And, there was a second part to the announcements. The cutback would cause some 1,900 Philadelphia public service employees—mostly black and disadvantaged, and including veterans and persons with physical and emotional handicaps—to lose their jobs almost immediately; another 1,400 workers would be dismissed by the end of the summer. But even this news, I would suspect, caused relatively little concern among persons not directly involved or familiar with the CETA program.

However, for a sizeable number of nonprofit organizations in the city—health care agencies, senior citizen centers, day care centers, crime prevention programs—these past few weeks have been agonizing. I base this on my experience as a front-row observer of the events that struck so quickly and unexpectedly throughout our city.

For more than three years. Horizon House Institute for Research and Development, a Germantown-based, nonprofit human services planning agency, has worked in close cooperation with the Philadelphia CETA program to provide skill training, work experience and job placement to CETA enrollees. During this period, we have trained and supervised 56 men and women in a wide variety of professional, semiprofessional and clerical fields: survey supervisors, data processing supervisors, survey interviewers, research and library assistants, human services trainers, computerized data-entry technicians, assistant bookkeepers and receptionists.

Our most recent project, which utilized the skills of 21 CETA workers, consisted of a comprehensive community survey measuring Philadelphians' attitudes toward both the mentally disabled and the various types of programs that provide mental health care to them. Our trainees worked hard, and the project was in full swing as recently as a month ago, when we were informed of the budget cuts. At that point, our CETA staff had conducted some 1,500 face-to-face interviews, were organizing, coding and entering the collected data into the computer, and were helping in the analysis of the findings.

Now, however, work on this project has all but stopped, and the final results—which would have contributed to more effective administration of mental health care in Philadelphia and throughout the nation—may never be realized.

But our concern goes far beyond the impact of the budget cuts on our own research study. Over the years, we have seen our CETA staff acquire marketable skills, gain in confidence and improve in self-esteem as they progressed through their training. Some of the transformations were quite dramatic; individuals who hadn't worked for months (sometimes years) and were becoming resigned to welfare-roll dependency, began to demonstrate new-found motivation, job effectiveness and self respect.

Did all our CETA trainees exhibit such transformation? No, not all. But over our 3.5 years of experience with the trainees, about two-thirds advanced from CETA-supported positions within our organization to regular jobs in business and industry.

The emphasis here is on regular jobs—work that is meaningful, provides decent wages, carries no stigma. And, of course, our trainees, while on CETA and later as regular job holders, paid federal, state and city taxes, contributed to the Social Security fund and removed themselves from welfare rolls and related forms of public support.

Horizon House Institute is one of some 150 nonprofit organizations affected by the sudden elimination of this CETA program. We have no reason to believe their experiences with CETA trainees are significantly different from our own. In fact, some of the other organizations reported even higher competitive job placement rates than those we achieved.

But what about the $26 million saving—isn't that still important? The sad and ironic fact is that these advertised savings dwindle away quickly, when other economic realities are taken into account.

Many, perhaps most, of the 3,300 whose jobs are being eliminated will be unable to find new ones for months, even years. Those eligible will have to turn to unemployment compensation. Some served by CETA will return to Supplemental Security Income or federal disability insurance. Many will ultimately have to rely on welfare support. They will require additional assistance from Medicaid, food stamps, housing subsidies and other tax-supported "safety net" programs. Their own payment of taxes will, of course, cease. And their purchasing power will decline sharply.

Performing the simple arithmetic associated with these consequences makes it clear that the net savings of tax dollars realized by closing the CETA program will amount to only a fraction of the announced $26 million. The greater loss will be realized in human costs, and will be felt not only by the trainees themselves, but also through the cessation of the work they were doing, much of which held the promise of improving the quality of life for us all.●

UNIVERSITY OF TEXAS SWIM TEAMS WIN WOMEN'S AND MEN'S NATIONAL TITLES

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. PICKLE. Mr. Speaker, Texas is known as a State where football fervor pervades and the lack of water sometimes invades. But aquatic sports are front and center these days at the University of Texas at Austin. The Texas Longhorns recently won the

men's and women's national swimming championships—a clean sweep. The men's team captured its first NCAA men's swimming and diving championship, just a week after the Texas women won their first AIAW swim title in South Carolina.

It is unusual indeed for a single university to take the men's and women's title. The only other school to hit a double like this was Stanford in 1978, and that was in tennis.

The men's title represented a culmination of firsts: Texas' first NCAA title since 1975, the first time since 1969 that the home team won the national swim title and the first time since 1977 that Swimming World magazine's preseason No. 1 pick fulfilled expectations.

The women's swim team has come from nothing in 5 years to bring the University of Texas the first women's national championship of any kind.

Men's swimming at the University of Texas has been gaining over the years. Back in the early 1930's, the first swim coach was C. J. "Shorty" Alderson, a spirited dynamo in the tradition of a Knute Rockne. He and Ted Belmont started the swim program in 1932. We also recall PE instructor Ed Barlow, who was the unofficial swim coach for some 20 years.

After Alderson and Belmont, we received the excellent services of Bob Bollinger and then Tex Robertson. Tex has been the most loyal and dedicated swim coach, enthusiast, and supporter of all our alumni. He brought the first All Americans to Texas, men such as Adolph Kiefer and the late beloved Olympic swimmer, Hondo Crouch.

Coach Hank Chapman carried on in fine style for some 10 years and brought the school into national prominence. The University of Texas' more regular participation in national swim programs really began under Pat Patterson who for 8 years molded the character and direction of our teams.

With the completion of our new swim center, the best in the United States, and the hiring of coach Eddie Reese, the University of Texas is on its way. In 28 short years, we have reached the pinnacle of national success, much to the credit of Eddie Reese.

The women gained their national prominence even faster than the men. As I said earlier, the women's program has been around for only 5 years. Coach Paul Bergen was hired 3 years ago, the same time Eddie Reese came on board. In coach Bergen's first year, the team placed No. 18 in the country. Last year, the women moved to No. 2 and then took the championship this year. Quite an accomplishment for the whole women's athletic department.

So we salute the men and women swimmers at the University of Texas, along with their coaches, as they bask in the well-deserved national limelight●

THE REAGAN ADMINISTRATION'S REVOLUTION

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. STOKES. Mr. Speaker, in November, President Reagan was swept into office on the slogan "America's New Beginning" which essentially was a promise of change. We have heard many editorial comments about the defeat of former President Carter and the reason why President Reagan was so appealing to the American electorate. Even though less than half of the registered voters bothered to vote on November 4, the President claimed to have a mandate from the people for change.

He said then and the media carried stories about how the American people were tired of inflation and our perceived sagging image abroad. Ronald Reagan was billed as the man to change this. His appeal to make America strong again seemingly transcended various groups such as blue collar workers, senior citizens, and others as well as the traditional Republican voters.

Yes, Mr. Speaker; I suppose you could sum it all up by saying that the American people who voted for Ronald Reagan voted for a change. But, I ask you, is what they are getting under the guise of an austere budget and drastic public policy shifts what they voted for?

Mr. Speaker, I believe that many of them would say "no" to that question. While I admit many Americans are prodefense and anti-inflation, comparatively speaking, many are not fundamentally opposed to human needs programs, especially those which serve the elderly and the needy. In fact, Mr. Speaker, a substantial percentage of Americans will benefit from one of these programs in their lifetime. Therefore, it stands to reason that many of the people who voted for President Reagan were not deliberately voting against these programs.

But this is what they are getting. The President through his disproportionate and unfair cuts to programs which aid the poor and disadvantaged and unrelenting rhetoric about the truly needy places these people in an eternal second-class citizenship. It portends that the poor's quest for a just piece of the American dream through assistance from the Government is unrealistic and unnatural. Finally, the Reagan administration appears to be blaming the poor for their own poverty and places them in the position of individuals who have taken the Government through their participation in social programs for a ride.

Cuts in welfare, food stamp allotments, and the termination of many services which are entitlements—all weighted against an increase in the military budget—illustrates a Government which has lost its heart and allegiance to the people it serves. For many of those individuals who voted for President Reagan, the change and new beginning they voted for has become a frightening revolution that many did not envision.

At this time, Mr. Speaker, I insert an article in the RECORD, written by Mr. Richard Cohen, for the March 15 Washington Post, about what many Republican voters wanted versus what they are getting from President Reagan.

VOTERS WANTED A CHANGE, NOT A REVOLUTION

Excuse me and pardon me, but I have something to ask you. Did you vote for this?

Did you vote to reduce food stamps, make it rougher on poor people and even get rid of the 108-year-old National Aquarium?

Did you, when you voted for Ronald Reagan, have in mind making a big to-do about El Salavdor, and did you think that we had to dump a whole ton of money into the Defense Department so that we will spend $55 million on military bands but nothing for legal services for the poor?

Did you vote for block grants to the states so that they could do with federal money (not state money) pretty much what they want? Was it your intention when you went into the voting booth to eliminate the tiny national water project that costs $1.5 million a year, which helps local governments with their water and sewer problems? How about National Public Radio? Did you think you were voting on it?

I don't think most people voted for this. They sure didn't vote for Jimmy Carter, either, but what they voted for was a change—not a revolution. They voted for a bit more backbone in our foreign policy and maybe a little toughness in the budgeting process. They wanted someone to get hold of the economy and do something about inflation, and if that meant making some hard decisions, that was fine with them. But they did not vote against poor people and they did not vote to repeal the lessons we learned in blood in Vietnam.

After all, for all the talk about a Reagan landslide, he won with only 51.6 percent of the vote—hardly the groundswell it is now made out to have been. If there was a statement in those results it was that Carter lost, not that Reagan won—certainly not that he won big and certainly not that he won with a mandate to fundamentally change the relationship of the government to the people. What was expected was some minor changes, some tinkering, less liberalism, maybe, but not a crash course in conservatism. You knew with Reagan that there would be less government, but not, I think, less heart.

But the decision to end federal funding of legal services for the poor is not a budget decision. It is a policy decision. Sure, legal services cost money. (So does trial by jury.) It cost, in fact, $300 million a year, and while that's not peanuts, it is not what is known in Washington as Big Bucks. Money,

though, is not the issue. You don't scrimp on basic rights. You don't tell one segment of society that the government cannot afford to protect its rights. You don't tell poor people that, because of poverty, they have less rights than other citizens, that somehow they are less of a citizen and less of a person.

That's not economics. That's not budgetary. It has nothing to do with monetarism or supply-side theory or even this compulsive need to balance the budget. Eliminating legal services, insisting on work for welfare and cutting welfare itself is neither new nor rooted in economics. It is as old as holding the poor, all the poor, accountable for their own poverty, for seeing them as somehow having chosen to be poor, to live off the government, to bum, to be parasites. It is a demon theory of the poor—evil that must be punished. It seems that being poor is never punishment enough.

These were not the sorts of issues that were before us in the election. For that, the press must take some blame. In two highly touted debates, one with John Anderson, the other with Jimmy Carter, Ronald Reagan was not asked a single question about either legal services or food stamps or, in specifics, how he was going to reduce the welfare burden. Always, the assumption seemed to be that Reagan accepted the premise of the New Deal and the era of social legislation that followed, and that the differences with Carter were only of shading, emphasis—a dollar here, a dollar there. Even when the press got specific, Reagan responded with bromides and anecdotes.

If you are one of the people who saw through that, who knew all along what Ronald Reagan intended, then the morning papers must bring good news indeed. But for a whole lot of us, we pick it up, scan the headlines, scratch our heads and ask, "Did you vote for this?" The answer is no. But the question no longer matters.●

EDUCATORS REBUTT REAGAN'S WANT AD JOB AVAILABILITY

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. HAWKINS. Mr. Speaker, for years the want ads have been used as proof that job seekers are not serious about wanting to work for if they really did, how could so many unfilled jobs be vacant? Such simplistic description of the complex labor market was the basis on which President Reagan recently justified his budget cuts of job training.

As officials of the American Vocational Association pointed out, it is precisely the kind of skill training being eliminated by the President's budget cuts that would help to make the want ads what the Chief Executive thinks they are.

The following news story appearing in the New York Times, March 22, 1981, is a case in point:

EDUCATORS, REBUTTING REAGAN, OPPOSE CUT IN FUNDS FOR JOB TRAINING

WASHINGTON, March 21.—President Reagan's suggestion that many people who are unemployed are ignoring available jobs has been challenged by officials of the American Vocational Association, an organization of teachers and administrators of vocational education.

Dr. Gene Bottoms, executive director of the group, told a Senate subcommittee on education, "Jobs are available. But they aren't being filled because the people seeking employment do not have the skills to qualify for these jobs."

In a White House meeting on Monday with women in Congress, the President noted that the Sunday issue of The New York Times had carried 45½ pages of help-wanted advertisements and The Washington Post the same day had 33½ pages of job openings covering a broad range of skills.

"How does a person in any one of those skills justify calling themselves unemployed when there's a fellow spending money advertising and saying, 'I've got a job. Come fill my job,'" the President said.

Dr. Bottoms said that an analysis of The Washington Post help-wanted advertisements last Sunday showed that 85 percent of the jobs advertised required "a high level of skills training."

Among the jobs advertised were openings for engineers, legal secretaries, medical technicians and therapists, computer programmers and operators, bookkeepers, accountants, draftsmen, teachers, mechanics, electricians and typists.

Dr. Bottoms mentioned the President's remarks and the subsequent analysis of job openings in urging Congress to reject the Administration's proposed reductions in Federal funds for vocational education.

The Administration seeks a reduction of 25 percent in funds for vocational education for the current fiscal year, a cut exceeding $100 million. It has further proposed a 20 percent reduction, totaling about $200 million, for the fiscal year 1982, starting next Oct. 1.

AMENDMENTS TO THE INTERNAL REVENUE CODE

HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. CONABLE. Mr. Speaker, last May I introduced legislation which would amend the Internal Revenue Code to provide that the value of meals furnished by employers to employees which is excluded from income shall not be subject to employment taxes. I am again introducing this legislation to resolve a tax liability question and establish a clear understanding for employers, employees and the Internal Revenue Service of tax exposure for the payment of employment taxes related to meals furnished to employees.

On April 18, 1979, the U.S. Court of Claims handed down a decision of major importance to the restaurant and hotel industries. The action, Hotel Conquistador versus the United States, was decided in favor of Hotel Conquistador in which the court held that essentially, since the value of meals provided under section 119 is not deemed income to employees, it should not be considered wages or remuneration for employment for social security and Federal unemployment tax purposes. Previously, the Internal Revenue Service had maintained that, notwithstanding the income exclusion provision for the value of meals, the value was subject to employment taxes. Responding to the lower court's decision, the Government appealed the matter to the U.S. Supreme Court in November 1979 and on January 14, 1980, the Supreme Court denied certiorari.

On January 28, 1980, the Internal Revenue Service announced that it "will not follow the decision of the U.S. Court of Claims in the Hotel Conquistador case, and employers must continue to treat the value of such free meals furnished to their employees as wages under section 3121(a) and 3306(b) of the Code."

The position taken by Internal Revenue leaves thousands of employers across our country in a quandary. On the one hand, they have the decision of the U.S. Court of Claims with national jurisdiction and the denial of certiorari by the Supreme Court respecting the Government's appeal from that decision. On the other hand, the Internal Revenue Service has not acquiesced in this decision and publicly announced its guidelines. The Court decisions received widespread publicity consequently motivating employees to question the right of their employers to continue to withhold social security taxes on the value of meals provided them. Under this current situation, employers who pay the tax and then seek a refund are placed in a perplexing position. In order to file a claim to recover taxes paid in previous years, the employer must also, naturally, protect the rights of his employees. Consequently, he must retrace his steps and calculate on an individual-by-individual basis the amount of social security taxes withheld and also receive the permission of his present or former employees to seek this refund. This process in itself can present an administrative burden of considerable magnitude.

The likely result of this procedure is extensive litigation. It should be emphasized that while larger employers are in an economic position to litigate the issue as the refunds sought may be quite substantial and the cost of litigation acceptable, smaller employers, whose refunds may be significant, however, may find that the legal expenses associated with litigation far exceed the amount of money to be recovered. Hence, the small businessman cannot justify the costs associated with such an action, and he is clearly disadvantaged. It is unfair for our tax laws to be applied in this manner and wrong for the Federal Government to leave this situation unresolved.

The purpose of this legislation is to clarify the law and remove any doubt as to the meaning of section 119 for all employers, employees, and the Internal Revenue Service.●

HONORS FOR A DISTINGUISHED LONG ISLANDER

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. CARMAN. Mr. Speaker, when Arnold B. Hedlund retired, recently, the village of Lloyd Harbor on Long Island honored his years of service by proclaiming March 8, 1981, "Arnold Hedlund Day." There are many good reasons for paying tribute to this outstanding resident of Long Island.

Mr. Hedlund joined the Lloyd Harbor Highway Department in 1937. He became highway superintendent in 1958 and served his community with distinction for 43 years.

Mr. Hedlund's expertise and effort helped to beautify and enhance the village environment through the establishment of a recycling program and extensive service to the conservation board, the Three Harbors Garden Club, and the village park.

During his over 40 years of service, Mr. Hedlund earned the respect and affection of all by consistently doing more than was asked of him, readily volunteering the services of his staff and himself, and improving the village while, significantly, saving the taxpayer's money.

Mr. Speaker, our country needs more solid citizens like Arnold Hedlund, an outstanding Long Islander and a fine American.●

NAT HOLMAN, A TEACHER'S TEACHER

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. KEMP. Mr. Speaker, I would like to call to your attention a tribute to a man who, for almost 50 years, has contributed his time and talent to instructing young people in the value of fair competition through the sport of basketball.

The man is Mr. Nat Holman, a coach for more than 60 years, and currently, president of the United States Committee for Sports in Israel. This year the USCSFI will hold the 11th Maccabean games in Israel, in early July. Mr. Holman's role in the games has allowed him to extend his values to all sports. He believes that:

Perhaps the most rewarding experience is seeing the young athletes all pulling and caring for each other. It's beautiful to see how close they all become. It's more than a sporting event. It's an intense cultural experience second to none.

Because we all can learn from this man, and from the wonderful example of teamwork, unity, and international fellowship of the games, I commend this article of February 1, 1981, to your attention:

[From the New York Times, Feb. 1, 1981]

HOLMAN, AT 84, IS STILL A TEACHER

In 1948, Nat Holman was invited to Israel to teach the nation's youngsters how to play basketball.

To say that he was qualified is an understatement; he became acquainted with the game only 19 years after Dr. James Naismith invented it in Springfield, Mass., in 1891.

Holman, 84 years old, was introduced to basketball in 1910 at New York's Savage School of Physical Education. He has taught the game for more than 60 years.

The latest challenge for Holman, who coached City College of New York for 37 years beginning in 1919 and had a 423-190 record, is the Maccabiah Games in Israel, July 6-16, when more than 3,000 athletes are expected to compete in 23 sports.

As president of United States Committee for Sports for Israel, Holman takes as much pride in the growth of basketball in Israel as he does in his many other achievemeents in the sport. He was a member of the Original Celtics, has been recognized as an innovator in almost every phase of the sport, been elected to the Hall of Fame, and is the only coach whose team (City College in 1950) won both the National Invitation and NCAA basketball tournaments in the same year.

And now he says that "more boys and girls play basketball in Israel than soccer."

"When I first went to Israel they played with their feet rather than their heads," Holman said. "There were 40 in the class and they all come to improve. In their first session, they were kicking and guiding the ball with their feet and heads like in soccer.

"I told the boys I felt highly honored to help them. I told them it was important for everyone to respond . . . to listen intently . . . to report on time . . . to feel free to ask questions at any time."

Still straight in his posture and in good health, Holman skips back and forth over 66 years of association with basketball easily. He emphasizes his role as a teacher, even though he has received—every honor that the sport could give him. Holman spoke about some of the principles he has tried to pass on to youngsters about basketball and life.

"Basketball is a game of movement; movement of the ball and the body." he said. "The big boys in the N.B.A. are so big and such accurate shooters that some of them don't bother to learn other things that could be the difference between victory and defeat. When I see some of those big fellows standing around out there, I feel like giving them a push."

"A coach can't get players to do these things unless he has their respect," he said." When I watch a team play, I see the work of the architect. "A teacher is one whose students come to class properly prepared and ready to learn. There should be no exceptions. If you want a passing mark, you have to work and work and maybe work a little more. Put that principle in the world outside basketball and it will apply."

"My teams could lose but they played good basketball," he said. "I remember seeing Hank Luisetti for the first time. I said if any of my men took a one-handed shot I would cut off his hands. I have since changed my mind. I was a hard man to convince but I tried to be flexible in my teaching." Luisetti was a star at Stanford from 1936 to 1938 and developed the one-handed jump shot.

"I am a patient man. But if a fellow doesn't think, I have limited patience," Holman said.

Holman's basketball career began on the streets of New York's Lower East Side, where he learned the body movements and rhythms that made him a great player.

"You had to move the ball and your body," he said. "They were small playing areas and you had to move fast."

Holman was a starter with the Original Celtics, the most famous barnstorming team of the era, from 1920 to 1927.

"All great players," he said of his teammates. The other starters were Marty Friedman, Barney Sedran, Dutch Dehnert and Chris Leonard, the big man at 6-4. "We had to contend with all kinds of conditions. To beat the Original Celtics could make an entire season for a team."

Holman believes that "competing is that main goal in sports." And so he sees competition in the Maccabiah Games as "a great experience in the lives of young people" and strongly endorses the principle of housing the athletes according to their sports rather than according to their nationalities.

"The big thing is to try to bring these boys together," he said. "Let 'em knock heads and then realize afterwards how important it is to be friends."

"It takes two weeks to experience the games," Holman said, "And a lifetime to remember."●

EDA—AN AGENCY THAT WORKS

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. PICKLE. Mr. Speaker, the Economic Development Administration has been slated for extinction because it has been lumped in with several other agencies which do little more than give bureaucrats jobs and pass out pork barrel projects. We are being asked to eliminate this agency to help balance the Federal budget and get the Government on a more business-like footing.

But I am submitting an article from the April 2 issue of the Brenham Banner Press which reports the rewarding of an EDA grant in Brenham, Tex. The grant came only after the city and several businesses could prove that the moneys would help create jobs and benefit the city's water system. The city of Brenham worked hard for the grant—this was no handout.

EDA is one of the most probusiness agencies in the Federal Government. This article shows the agency in action and shows why the need for EDA remains.

MONEY OK'D FOR LOCAL WATER PLANT

Brenham will get $93,750 from state and federal sources to make line and pumping improvements at the water treatment plant here.

City officials were told Tuesday that Gov. Bill Clements approved funding for the treatment plant project, one of only 10 projects statewide to receive money.

Clements OK'd $75,000 in Economic Development Administration funds and another $18,750 from the Texas Department of Community Affairs.

City Manager Johnny P. Smith said the money will be used to alleviate problems in the water system that became evident during last summer's record-breaking temperatures and drought.

Mandatory outside watering restrictions were imposed here because reserves in storage tanks were being drained faster than it could be restored out of the treatment plant.

Smith said larger lines and pumps will be installed "so we can get the water into the system better."

Improvements at the treatment plant were already in the works. Smith said about $75,000 had been budgeted for upgrading the plant.

"This money," he said, "means we can do more than we had intended to do. It means we can do in one year what we had planned to do in two."

Seventy-five applications for EDA funding were initially made, said Smith. Those were narrowed down to 25 and finally to 10, he said.

Brenham was "extremely fortunate" to be funded, said Smith.

In order to get the EDA money, the city had to show that jobs would be created and how much of a financial impact the improvements would have, he said.

Sealy Mattress and Blue Bell Creameries, both of which are planning expansions, and Murray Rubber Co., which will open its 250-employee plant here soon, gave assistance in those areas, said Smith.

Other help came from local banker Tieman Dippel; Myrna Hoskins, EDA administrator with the Brazos Valley Development Council; and the O'Malley and Clay engineering firm, he said.

Smith said the city is already arranging an initial engineering and construction conference to begin the project.

The $18,750 from the community affairs department must be spent by Aug. 31 "or we'll lose it," he said.●

NATIONAL EDUCATION FOR BUSINESS WEEK

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. OTTINGER. Mr. Speaker, National Education for Business Week will be observed April 12 through April 18, 1981. I would like to take this opportunity to recognize all the outstanding institutions which are encouraging their students to participate in a program of study which will enable them to acquire fundamental skills of business management.

The observance of National Education for Business Week was called to my attention by Mr. Thomas Mucciolo of the Pace Business School in Yonkers, N.Y. The Pace Business School was founded in 1923 as one of the pioneers in the field of business career education in Westchester County. The Pace Business School continually gears itself to the individual needs of the students, while reorganizing and modernizing its curriculums to adapt to the changing needs and demands of business.

The Pace Business School moved to its present location in Yonkers, N.Y., in early 1979. The goal of the institution is to provide each student with a thorough working knowledge of business skills which will be readily adaptable to the job market.

The objectives of the school are as follows:

To provide students with an educational opportunity leading to excellence in business skills and knowledge;

To help students cultivate beneficial habits in appearance and demeanor, concern for personal well-being and sustained self-discipline;

To assist students in becoming more aware of their social responsibilities and the need to become productive citizens;

To maintain a professional student personnel and placement service designed with the student's interest as the only aim.

I salute this week of recognition for National Education for Business Week and congratulate all the business schools in Westchester County, New York State, and the Nation for their outstanding work.●

SHERIFF MELVIN STEPHENS, CRIME SOLVER

HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. SHELBY. Mr. Speaker, I would like to share with my colleagues in the House of Representatives, a story that recently appeared in the Home-Record, Livingston, Alabama's weekly newspaper. It is a fascinating narrative about a man name Stephens, who has a remarkable reputation for catching criminals.

The article follows:

SHERIFF MELVIN STEPHENS, CRIME SOLVER

Melvin Stephens, who became sheriff of Sumter County in 1963, has been affiliated with the Sheriff's Department since 1950.

Stephens, a native of Cuba, served in the U.S. Army for two and a half years as a member of the Military Police.

"When I got out of the army I just naturally gravitated toward law enforcement," he said. "I had enjoyed being an MP and decided that I wanted to make law enforcement my career.

"I've never regretted that decision."

Stephens was Chief Deputy for Sheriff Bill Bratton in December of 1963 when four itinerate carnival workers murdered Leonard Culpepper and threw his body down a 25-foot well in the Old Town Community.

Mrs. Culpepper, who had been severely beaten, was also thrown down the well, where she remained for over 12 hours before being rescued.

Later that same month, Sheriff Bratton suffered a fatal heart attack while testifying at the preliminary hearing.

Melvin Stephens was appointed sheriff by the Governor of Alabama and has held the post since that time.

"Naturally the Culpepper Case is one of the most memorable to me," he said.

"It was an awful thing. There are several other cases I'll never forget.

"Around 1977 we had three people who called themselves Bonnie and Clyde. They murdered the service station attendant at Rooster Bridge.

"We never did get to try that case. We held the 13th murder warrant against them and the last I heard, Florida had them."

Stephens said one of his most frustrating cases was the one he calls the Black Poplar case.

"It took us seven years to solve and I don't think a day passed that we didn't work on it.

"For a long time we didn't have a body, only a missing report. We searched the woods for several weeks.

"The man we ultimately arrested and convicted had been questioned more than once, but until we found the body we didn't really have a case.

"Once the body was found, we had trouble identifying it. Eventually we traced the x-rays of an old leg injury. Dr. Hill in Bellamy had treated him when he was just a kid and had used a wire pin in his leg. When we found the x-rays, we just kept on working until we got a conviction.

"Since I have been Sheriff I can only think of one murder we didn't eventually solve. In that case we had a body, but never were able to identify it. We never even knew if the crime had actually been committed in Sumter County.

"But in every other murder in Sumter County, sooner or later, no matter how long it took, we solved the crime."

That sort of dogged, day after day persistence until the case is solved has become a trademark of Melvin Stephens and his department.

"We've acquired a reputation for catching criminals," he explained, "and that helps keep the crime rate down. Folks who commit crimes are kinda leery of doing it in an area where the law has the reputation of never stopping work until a crime is solved."

Stephens said that in light of all his experience he had to feel that capital punishment was a deterrent to crimes of violence. "I definitely favor capital punishment," he replied to a direct question.

Besides combatting crime in a 927 square mile area, Stephens and his men have many other duties. The sheriff's department serves all summons, is in charge of placing and removing election boxes, paying election officials, issuing jury summons, is in charge of the jail, and in about 95% of all commitments to mental institutions has to transport the patient.

"I've been lucky," said Stephens. "I've had really good deputies. First Larry (now Livingston Police Chief) and now Willie Gunn. Don Rainey and Steve Moore are also excellent men. And Tilla Stuckey, my secretary, takes a lot of work off my shoulders.

"Also my wife Barbara helps out at the jail. She prepares the food bills for all the prisoners that have to be sent to Montgomery and, believe me, that helps. Having been jailor, she is able to really understand the pressures of this job."

Melvin said having state prisoners in the county jail makes his job even harder. "We haven't been able to transfer a prisoner to the state in about three years," he said. "Although the state pays for them to be here, there is a lot of paperwork involved. We have one prisoner in jail right now who is serving three life sentences."

Although being sheriff is a 24-hour a day job, Melvin still finds time to raise horses and cattle. He and most members of his department are excellent horsemen and add glamour to most parades in Sumter County.

The sheriff's job is made easier, according to Stephens, by some of the modern equipment the department has.

"Take the NCIC hookup," he said. "We have recovered from $1,000 to $10,000 worth of stolen property using it.

"When I first became sheriff, we only had one car and one radio. We got money through LEPA grants to buy radios and equipment.

"Violent crimes have decreased in the 17 years I have been sheriff, but burglaries have definitely increased. We solve at least 75% of the burglaries and usually recover the property."

Stephens is very active in law-enforcement related organizations. He has served on the Board of Alabama Sheriffs' Boys and Girls Ranch, on the LEPA Board; is a member of the Sheriffs Association; a past president and presently a Trustee for the Fraternal Order of Police and is a member of the Alabama Peace Officers Association.

"Sumter County is my home," he confided. "I've been very satisfied here. We do a good job, but it wouldn't be possible without the cooperation we get from other law enforcement agencies, the district attorney, the judges and the citizens.

"I'm proud of the confidence the citizens have in this department. I've always tried to treat everyone fair and square and so have my men.

"And as long as I can help to make my county a better and a safer place to live in, I'm happy."●

DOL CARELESSNESS IN CETA TERMINATIONS

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. HAWKINS. Mr. Speaker, as Comprehensive Employment and Training Act (CETA) jobs are being cut by the Reagan administration, its officials keep saying "the jobs are there" in reference to some vague mystical jobs, which the CETA workers have waiting for them.

If Federal officials have knowledge of such jobs in the private sector or elsewhere, why do they not share the information with responsible local officials and assist in matching the jobs with the jobseekers?

Typical of the irresponsibility of the Department of Labor in failing to undertake proper planning in advance of its own action or to consult with congressional oversight committees which could have eased transitional problems is illustrated by the following news item from the Washington Post of March 14, 1981:

[From the Washington Post, Mar. 14, 1981]

CITY WOULD LOSE 1,000 CETA EMPLOYEES

(By Ron Shaffer)

The budget cuts that the Reagan administration wants to make in Comprehensive Employment and Training Act (CETA) personnel, announced in detail yesterday, will require the District to fire about 1,000 people, and Montgomery County to lay off 160, local officials said yesterday.

"It's going to have a devastating impact, obviously, on the city," said D.C. City Administrator Elijah B. Rogers. "You're talking about 1,000 workers and a lot of them are providing direct services to citizens. It will mean delays, longer lines, more complaints."

Officials in Prince George's, Fairfax and Loudoun counties, as well as Arlington and Alexandria said yesterday they have not had a chance to calculate the impact of the cuts on their CETA public service programs.

While the U.S. Department of Labor said that a number of agencies will be involved in trying to find jobs in the private sector for those laid off, city officials expressed doubt this could be done.

"The economy is down; I don't see where these people are going to wind up getting jobs," said Ivanhoe Donaldson, director of the city's Department of Employment Services. "It means a lot of people are going to be going on the unemployment lines. It means more pain on the street."

Federal officials have pointed out that the purpose of CETA was to provide jobs and training, not a permanent federally funded work force for local governments.

Jack Hashien, a spokesman for the Labor Department, said the government will ask chambers of commerce, major community-based groups, and others to help find jobs for the ex-CETA employes in the private market. "To say there are no jobs and these people are going on welfare is overstating it a bit," Hashien said. "The jobs are there."

The cuts announced yesterday amounted to a 36 percent reduction in federal funds to localities for CETA public service jobs. The two programs affected are Title II(d), which provides on-the-job and classroom training for the hard to employ, and Title VI, which provides jobs and training for those unemployed because of a downward economic cycle. The jobs are generally low-paying clerical positions in local governments and community-based organizations.

The Title VI cuts have to be approved by Congress. The others do not need additional approval.

The cuts, which come about halfway through the fiscal year, mean that some localities will have to terminate employes immediately because they have been spending based on higher projections. "We are now allotted $1.7 million for our II(d) program, and we've already spent $1.6 million," Rogers said.

Donaldson said that the 400 employes in the city's Title VI program will have to be released within a month, and that the 600 in the Title II(d) program will probably be gone by the middle of the summer.

Alan Kutz, Montgomery County's CETA chief, said the 160 employes that fall in those categories in his county will be terminated within about three months.●

BUDGET CUTS AFFECTING HEALTH CARE IN NEW YORK

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. WEISS. Mr. Speaker, President Reagan has presented his economic package with the stated goals of eliminating waste in Government and revitalizing the American economy. But I believe that the way he has chosen to achieve these goals promises even more severe problems for America than we now face.

While the President claims that his program provides a safety net for the truly needy, on close examination this simply is not the case. In fact, the cuts will hit hardest in the area of human services and without the strong support of Congress, health care programs will become an early target in the budget fight.

In fiscal year 1981 the Reagan budget recommends that Federal medicaid spending be capped at $100 million below the $16.2 billion that had been estimated for the year. The administration's plan to impose an arbitrary cap of 5 percent on annual growth in medicaid expenditures beginning in fiscal year 1982 would almost certainly lead to a reduction in the scope and quality of care provided to the poor of New York City. Such controls would prevent the city's reimbursement schedules from rising as fast as the cost of the medical services that are being provided. The resulting budget gap would have to be met either by a reduction in the range of health services available to medicaid patients or by an increase in the city's tax contribution to the program. It has been estimated that a 5-percent cap on growth on the Federal share of medicaid would result in a budget gap of at least $80 million to $100 million for all medicaid financing programs operating in both the public and private sectors in New York City. Estimates compiled by New York State set the loss for the city at closer to $200 million.

These controls on medicaid would also increase the annual deficit of the New York City Health and Hospital Corporation. Confronted with inadequate reimbursement funds, voluntary hospitals would have an incentive to steer more medicaid patients to the public hospital system. The voluntary hospitals may absorb a portion of this deficit, but their ability to do so is severely limited. The New York City HHC would then be faced with the prospect of either providing the additional medicaid services, thereby in-

curring a larger deficit, or scaling down the range of services it provides to medicaid recipients. The ultimate result of the administration's plan would be to block the access of New York City's poor to primary health care.

Health and social services programs will also suffer enormously under the President's program. About 40 separate programs, including community health centers, family planning services, senior centers, alcohol and drug abuse programs, day care services, and community mental health programs, among many others, would be consolidated into a single block grant to the States with an overall reduction of 25 percent in funding levels for fiscal year 1982. This cut in Federal aid would result in a loss of more than $120 million to New York City for these much needed programs. Though the social impact of these cuts is difficult to quantify, it would surely require a significant curtailment in the scope of services geared particularly to the young and the elderly, as well as a reduction in the legal and public health services available to the city's poor and moderate income residents.

Health planning activities under the Reagan budget will be extremely hard hit and in many cases would be phased out completely in the next 2 to 3 years. New York State currently receives $2.1 million to support planning and regulatory activities of the Health Planning Commission and the Office of Health Systems Management. In addition, $7.5 million is received from the Federal Government to support the eight health systems agencies which carry out planning and certificate of need functions in local areas within the State. The elimination of the HSA system will end the important role in local health decisionmaking and health advocacy that is played by these planning agencies and could have a significant impact on the State's efforts to control health expenditures.

The administration also proposes a 3-year phase out of the Professional Standards Review Organization program. PSRO's are primarily intended to be a cost-containment mechanism and a means of determining the appropriate use of health care and maintaining quality of care. All Federal support would end in 1984 beginning with a loss to New York State of $14.3 million in fiscal year 1982.

I urge my colleagues to reject the proposed program cuts which would impose serious hardship on those who rely on medicaid and a wide range of community health services now assisted by the Federal Government. I would also urge your support for a health planning system which insures citizen involvement and provides effective-cost controls on local expenditures for medical care.●

THE RADIO WAR

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. YATRON. Mr. Speaker, I would like to submit an article which appeared in the Journal of Electronic Defense, entitled "The Radio War." This informative article was authored by our esteemed colleague from Illinois, the Honorable EDWARD DERWINSKI. Mr. DERWINSKI is unquestionably one of the foremost authorities on international broadcasting in the Congress and I strongly believe that we all can benefit from his insightful observations.

The article follows:

THE RADIO WAR

Unbeknown to most Americans, we are involved in an international radio war. It is a struggle of the truth of a free society against totalitarian propaganda broadcasts on the international airways.

A large part of the threat posed to the United States by the increasing power and contentiousness of the Soviet Union lies in the area of political and propaganda activity. Mass communication is used by the Soviets to indoctrinate, mislead and confuse people throughout the world; the influence and strategic position of the United States are weakened in the process.

In addition, 330 million persons are subjected to communist regimes in Eastern Europe and the USSR, innocent victims of a rigid system of information control. The totalitarian governments of these countries methodically seal off at their borders all but "licensed" communication to deny their people access to unofficial sources of fact and opinion. International broadcasting, therefore, is a major vehicle to reach the captive people of the USSR and the satellite nations of Eastern Europe.

Unfortunately, in the past few years, the effectiveness of U.S. broadcasting to the Soviet Union and Eastern Europe has been systematically reduced, primarily due to inadequate budgets. The Soviets have achieved great success in rendering many American broadcasts into their own territory inaudible, or nearly so, through a determined jamming effort. The CIA estimates that the Soviet Union spends $300 million a year on jamming, four times what the U.S. spends on the programming itself. The truth as broadcast by the U.S. has become less audible and less competitive with Soviet lies. In this battle of truth against falsehood, we risk defeat largely due to our own ineffectiveness.

U.S. Government international broadcasting is conducted by the Voice of America (VOA), part of the International Communication Agency (ICA), and Radio Free Europe (RFE) to Eastern Europe, and Radio Liberty (RL) to the Soviet Union, supervised by the Board for International Broadcasting (BIB). VOA disseminates U.S. and world news internationally, including to the Soviet bloc, whereas RFE and RL are in effect surrogate internal news services. They serve as free versions of national news services of the countries concerned. The Lithuanian, Latvian, Estonian, Polish or Ukrainian language service of these radios, for example, operates as if it were the unfettered radio news bureau in the country where that language is used.

Maintenance of viable radio transmissions, however, requires a large number of qualified language specialists, engineers, technicians, cultural reporters, editors and news contacts. Yet RFE/RL has been forced to reduce its staff by almost 40 percent in the past seven years at the same time its basic broadcasting commitment of 1000 hours a week remained unchanged. Funding for the radios has never matched their most basic needs. During Fiscal Year 1980, for example, RFE/RL was forced to borrow DM 6 million from the West Germans for current expenses. The number and strength of our transmitters are inadequate, but instead of expanding and improving our overseas broadcasting, we have permitted it to decline.

VOA transmitters, and even more so, those of RFE/RL, are considerably overloaded. Almost every new programming demand requires a corresponding reduction in present programming. Moreover, new programming beamed to Afghanistan cannot be heard in most of that country because VOA transmitters are not located where they can reach beyond its western border areas. We should not eliminate audible broadcasts to Iran to create the illusion that we are making the effort to broadcast to Afghanistan.

Furthermore, communist jamming creates serious problems. The standards of reception for RFE/RL transmitters, as defined by the President's Report of 1977, are set at 2.5 millivolts per meter on four frequencies (in a jammed environment). In practice, existing transmitters broadcasting to East Europe provide the minimum signal strength only at the center of their service areas, much of their effectiveness being lost to listeners on the periphery of the signal range. Moreover, audience level in the entire USSR remains a mere 4 percent or 5.5 percent of the population west of the Ural Mountains.

The Administration, in its report to Congress on March 22, 1977, set forth technical standards providing for an eightfold increase of transmitter resources when a radio signal is jammed. RL has never been able to meet this standard, nor can VOA, anytime that the Soviets resort to jamming of its broadcasts. Unfortunately, the 23 RFE/RL transmitters that the Congress authorized in 1976 will not make up even half the transmitter shortage.

U.S. shortcomings in the radio war must be contrasted to consistent expansion of Soviet radio, now the most extensive and expensive broadcasting arm in the world. It is part of an estimated $3½ billion a year Soviet foreign propaganda offensive. The Soviets have not forgotten Lenin's words: "Ideas are more fatal than guns."

Soviet radios are on the air for more than 2,000 hours a week in 82 languages over 285 shortwave transmitters. They are particularly active in the Third World, spreading anti-American propaganda, contributing to turmoil and promoting violence. For example, in Iran, the USSR has been beaming inflammatory programs since 1959, doubling its hours on the air after the fall of the Shah.

Radio Moscow is the principal Soviet broadcaster to Iran in Farsi, or Persian, with 21 hours a week. Radio Baku, in the

Soviet Caucasus, is next with 17½ hours. Other Soviet transmitters which beam Farsi abroad are located in Dushanbe (7 hours) and Tashkent (3½). A Soviet clandestine radio, the National Voice of Iran, broadcasts to Iran from Baku in both Farsi (5½ hours weekly) and Azerbaijani (3½). This station poses as Iranian, denouncing US policy as "imperialistic" and "satanic," while it describes the Soviet Union as Iran's "true friend."

The USSR broadcasts to every continent. Soviet propaganda programs in English now blanket the Caribbean, relayed by powerful medium wave transmitters in Cuba and picked up on much of the East Coast of the United States on ordinary transistor receivers or car radios.

There is very little of the spirit of detente in all of this. The Soviets consider detente as peaceful coexistence, the opportunity to wage "ideological warfare" against the West, principally the United States.

In August, 1980, as the Polish crisis unfolded, the Soviets began jamming VOA and other foreign broadcasts beamed to their territory. The communist countries have long jammed RFE and RL signals but had not for some years, in the spirit of "detente," interfered with VOA. The Soviet move in this case was not, however, a spur-of-the-moment decision on the part of top Soviet leaders but must have been planned for several months, at least.

The measure was probably contemplated sometime before as a Soviet adjustment to the world reaction to its invasion of Afghanistan. It was possibly held up until the Moscow Olympics were over and the foreign visitors had gone home. It is now known that the Soviets made their 1968 decision to jam foreign broadcasts to coincide with the Warsaw Pact invasion of Czechoslovakia three to four months before the event.

Radio jamming is extremely expensive. An estimate of the cost of the Soviet bloc jamming of RFE/RL, mentioned above, is roughly $300 million a year. In the Soviet Union alone, there are 2075 jammers involved and more than 5,000 employees. A large increase in jamming, which now includes the British Broadcasting Corporation (BBC) and the Deutsche Welle (DW) foreign broadcasts to the Soviet Union, as well as VOA, means large additional costs in electric power, radio equipment, and the diversion of engineers and technicians from other work, a "brain drain" if you will.

What is more, it takes a long time to marshal the necessary resources and coordinate the jamming effort. Jamming shortwave signals must be on the same wavelengths, of course, as the broadcasts being interfered with. Inasmuch as the incoming programs are beamed on several frequencies, a good deal of coordination is required on the part of the jamming effort, all of which takes considerable planning.

Local ground wave jamming is also expensive and of limited range with only a local effect. Ground waves, mere noise, have a range of five to ten miles, thus requiring many small stations near the target areas. Every Soviet city with a population of more than quarter million has about 15 of its own local jammers of from 5 to 20 kilowatts, with associated control and monitoring sites and equipment. Larger cities have more. Airwave jamming affects more listeners and is more common than ground jamming. The jammer signal is broadcast on the shortwave band from approximately the same distance from the audience as the transmitters broadcasting the offensive programs—England, Spain, and Germany, for example. These foreign stations, and thus the Soviet jamming transmitters, are 1,200 to 2,000 miles from the intended audience groups. The Soviets must back off, as it were, between 1,000 and 2,000 miles to beam their jamming signals, which are incidentally largely music from Radio Mayak.

Nonetheless, some of the foreign transmitters are very powerful. DW, for example, uses 500 kW transmitters, broadcasting programs on several frequencies. The Soviet engineers must match the power of these signals, more or less, come on the air at the same time, and be on the correct frequency, all of which takes planning and preparation. And yet, the recent renewed intensive jamming of VOA, BBC and DW was all done with reserve capacity; no Soviet equipment was removed from the jamming of Radio Liberty broadcasts. Thus, the total Soviet interference effort is twice what it was.

Solzhenitsyn has spoken of the irony wherein cities are considered the centers of culture. In Russia, he has pointed out, foreign broadcasts are often so jammed they cannot be heard at all in the cities. If you want to hear their message, you often must leave the cities for the countryside. Muffled signals from abroad in the "muffled zone."

What are the strategic implications of the radio war? The Soviet Union maintains an iron grasp on the Russian people and on the captive nationalities of its empire. Its strategic military strength shields its continuing conquests abroad. Our old policy of containment no longer works against Soviet aggression for our strategic superiority, on which this policy was based, has been lost. Nonetheless, the Soviet empire is vulnerable. Its economic system is truly inefficient, its agriculture a shambles. Its population, and those of the captive nations, are shamelessly exploited to support corrupt and incompetent regimes. The masses out of whose hide the cost of Soviet imperialism comes are extremely susceptible to the truth. Soviet control of its own people and Russian power over non-Russian nationalities—the Ukrainians, Balts, Byelorussians, Armenians, and so forth—are eroded by the winds of freedom from abroad. In addition, there are 40 million Moslems in the Soviet Union who should have the benefit of the message of truth from abroad. These Moslem peoples are a fertile field awaiting cultivation.

It is of special interest that RFE and RL often assist the forces of internal dissent in the USSR and the satellite countries in frustrating the Communist secret police by broadcasting smuggled dissident papers and messages. Dissident samizdat efforts are multiplied manyfold when these documents are read on the air at dictation speed. Moreover, according to the AFL-CIO Executive Council, "the airwaves provide protection for Andrei Sakharov and others who have no other defense except for public prominence."

It is obvious that the massive support that the Polish people gave the workers' strike and are giving the effort to form independent unions in Poland constitute complete repudiation of their Communist government. It is also apparent that the thirst for freedom behind the Iron Curtain remains strong and unquenchable. I do not believe that the recent events in Poland would have developed the way they have without the communication provided to the courageous Polish workers by the U.S. radios, especially RFE, and those of other free world countries. In a letter to President Carter dated September 4, 1980, three Soviet dissidents now living in the West called his attention to the enormous importance of the strength and intensity of the internal opposition in the subjugated countries. They reminded the President that this opposition demands neither money nor arms from us; it asks only moral or political support, they said. They then made the point that my colleagues and I have made numerous times: all the information broadcasts to the Soviet Union cost the West less than one modern bomber.

Our friends abroad are sometimes circumspect in offering unsolicited advice, and our diplomats are frequently reluctant to report their friendly, yet critical, observation. Too much of the time, their views fail to percolate to the top. More and more, however, word reaches us that we should take off the gloves. There is nothing wrong with propaganda, they point out, as long as it is accurate.

Symbolic of our long-lived foreign information malaise was the thinking underlying the change of name, under the Carter Administration, of the US Information Agency (USIA) to the International Communication Agency (ICA). ICA cannot be merely the means for an interchange. It must not be simply an agency of dialogue. This is a hard-nosed and occasionally irrational world. Our information service must be a confident spokesman for our point of view. America should return to selling itself.

The Communists themselves suffer a major deficiency in broadcasting their message. Significant delays impede their response to events as they unfold; the top leadership must review the handling of important stories while it determines what the party line will be. It cannot thus be timely, and the West can properly fill the breech. It is often pointed out that it is not just the content of our broadcasts that upsets the Commissars, it is the constant flow of hard news.

I maintain that to wage this radio war, the US should immediately establish the optimal number and types of transmitters and their locations. Efforts should be stepped up to negotiate agreements with foreign nations with regard to locating transmitters and relays. Existing facilities should be improved; for example, most of the studio equipment at RFE/RL headquarters in Munich is more than 25 years old. Research should be undertaken on means to apply VHF satellite to the operations of the radios.

Additional qualified staff should be recruited to man the improved facilities. In some cases it takes more than a year to identify and recruit qualified staff members with the needed language ability.

A real effort should be made to reach the Soviet Moslem minorities located in Central Asia. For this we need transmitter facilities in the Middle East.

We should improve program content. We need a strong signal and a strong message.

We should reorganize the BIB and RFE/RL boards and staffs and revitalize the language desks, and we should forego plans of relocating certain language RFE services from Munich to the US.

A Spanish-language unit, Radio Free Cuba in Miami, should be established to beam the American message to the people of Cuba.

I am not alone in believing that the radios should be considered as elements in our national security. International broadcasting is an important weapon in our arsenal.

The struggle for men's minds is at stake. We have history and truth on out side, yet we let the Soviets have a technological advantage. This is a war the average American does not realize is going on, yet it is a major concern of the Soviets. We must recognize the responsibilities and challenges we face and make the policy and budget decisions necessary to gain the technological edge we need to win.●

POSSIBLE WESTERN EUROPEAN PRESENCE IN THE PERSIAN GULF

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. HAMILTON. Mr. Speaker, I would like to bring to the attention of my colleagues the recent report that was prepared by the directors of four major councils on foreign relations in the United States, France, the Federal Republic of Germany, and the United Kingdom. The report is entitled "Western Security: What Has Changed? What Should Be Done?"

This report examines the challenges facing the Atlantic Alliance in the coming years and suggests several options for dealing with them. It is argued that one approach to deterring Soviet aggression and adventurism in Southwest Asia is to seek a greater Western European presence in the Persian Gulf in support of U.S. activities in the region.

An excerpt of the 48-page report, addressing this particular point which was reprinted in the March 24 edition of the Baltimore Sun, follows:

WESTERN SECURITY AND THE GULF

The United States, Europe and Japan share a vital interest in keeping Middle East oil flowing. Europe's and Japan's dependence on oil from the Gulf hardly needs further emphasis. But it would be entirely false to regard the secure supply of this oil as exclusively a European or Japanese matter. The loss of this source would also have calamitous consequences for the United States, both in its effects on the American economy and because the blow which it would inflict to the entire Western economic position would strike at the heart of America's security. It is not simply "European oil" that the United States is being asked to defend in the Middle East.

The threats to this supply come from four main directions:

The menace of Soviet military power: This Russian threat to the Gulf region is not unique in the past hundred years, nor, given the difficulty of the terrain, is it easy from the Russian point of view, to put into effect. In recent years, however, a greatly increased Soviet airlift capability and increased presence in and around the region enhances Soviet capacity to move military forces into the area. The invasion of Afghanistan has shown that this is a capacity which the Soviet Union is prepared to use in certain circumstances. Moreover, the Iranian Revolution and the Iraq-Iran war have created conditions in which the Soviet Union might be tempted to intervene.

National and ethnic rivalries: The tensions which produced the Iraq-Iran war are by no means the only ones in the area that could at some time lead to open hostilities in the region and consequent disruption of oil production.

Revolution or internal disruption: There are at least half a dozen countries in the area whose regimes must be regarded as precarious in a 10-year perspective. Any of these upheavals could lead to interruption of oil supplies.

A new Arab-Israeli war: In case of a new conflict it should be assumed that the West would continue to supply Israel with materiel and that the Arab states would retaliate with at least a partial oil embargo against the West. It is also true that even without a resumption of hostilities, the failure to solve the Palestinian problem is a permanent contribution to the instability of the whole area.

The exact role which military force should play in deterring these threats, or in coping with them if they materialize, is debatable. While the arguments are in part dependent on the detailed scenarios envisaged, a Western military presence would in itself, for certain countries in the region, have a positive political effect and a reassuring impact.

Many in the West believe that there should exist a large Western capacity to confront the Soviet Army in the area. This would not necessarily entail a large Western presence permanently stationed in the Gulf region—rather an ability to deploy a very considerable force rapidly in case of a large Soviet invasion. The main argument in favor of provision on this large scale is that no small capability would be able to hold the position without early recourse to nuclear weapons. This latter is undesirable in itself and possibly lacking in credibility. On the other side, it can be maintained, first, that even a substantial expeditionary force would be at a serious geographical disadvantage and that the nuclear threshold might have to be crossed in any case; and second, that it might aggravate the situation of the West in the area by necessitating large bases and a general "visibility" which some of the countries involved do not desire at present.

Whatever is thought of these arguments, it is clear that, given the immense uncertainties in the region, there is a need for some Western forces. The Soviet leaders have shown themselves extremely reluctant in the past to get into a direct military confrontation with the other superpower. Their knowledge that an American force with European and Japanese support, however inadequate for prolonged hostilities, was poised and ready to throw itself in the path of the Soviet advance and would therefore have an important deterrent effect.

A Western force might also prove invaluable in the face of other threats than that of Soviet military intervention. In the case of national rivalries leading to war in the Gulf area a Western naval task force able to keep open the Straits of Hormuz might well be required. In the case of domestic turmoil threatening Western interests we should need a capacity to intervene on the side of any friendly power which called for help. There are also many possible eventualities calling for a quick deployment into the area for defense of oil fields.

If it is conceded to be in the interest of all Western countries that some Western capability for deployment should exist, it follows that those who benefit should bear some of the cost of its maintenance. The question is, what constitutes a significant and appropriate contribution?

The problem here is to some extent one of public opinion, which in America tends to see Europe's willingness to take part actively in the protection of "European" oil in the Middle East as a major touchstone of the present relationship. From this point of view the more visible and directly related to the Middle East problem the European contributions, the better. Even marginal assistance from Europeans would be symbolically important in maintaining alliance cohesion, in demonstrating to the Soviets and the countries of the region that the West is united, and in persuading American public opinion of the futility of a major U.S. effort in the area. From a European point of view it is also necessary to ensure, by direct involvement, that the arrangement should be based on shared reponsibility and truly collective decision-making. A new reality needs to be given to these principles where the vital interests of the whole Western world are at stake.

These considerations point to active European military participation on the ground and at sea in the Middle East. There are political and practical difficulties about this approach. The non-American powers have very limited resources available for long-range operations, and it is arguable that for them to try, at this stage, to create a capacity which would make any appreciable difference to the military situation would cost money that would be better spent on improving the quality of their forces in the NATO sector. Moreover, in the case of Germany and Japan there are considerable misgivings inside and outside these countries about whether they should assume a global military role for the first time since the end of World War II.

For these reasons it seems best to adopt a mixed policy whereby the main burden of putting together a rapid deployment force falls on the United States, but the Europeans make some contribution in terms of men and materiel where this is appropriate (as in the case of Britain and France) and/or provide en route facilities for the American rapid deployment force, contribute to the enhancement of the existing Western bases in the area, and, by maintaining their own defence expenditures in Europe, permit some American resources to be released for the Middle East.

A European presence in the area would be politically and symbolically important. It would underline to European publics their stake in the area; it would greatly help to gain American congressional and public support for a major U.S. effort in the area; and it would therefore improve American-European relations.●

A TRIBUTE TO JEWISH HERITAGE

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. WALGREN. Mr. Speaker, our Nation is rich with ethnic and cultural diversity. As immigrants have melted into our communities, they have contributed their spirit, talents, and traditions to our national identity. As a co-

sponsor of House Joint Resolution 155, a bill proclaiming May 3 through May 10, 1981, "Jewish Heritage Week," I am pleased that the House passed this bill on March 26.

This week would be designated primarily for educational ceremonies and activities. Last year during Jewish Heritage Week, many school systems sponsored programs on Jewish history and culture, Hebrew as a modern language, the Holocaust, and current concerns of American Jews.

The months of April and May contain many events important to Jewish history including Passover, the anniversary of the Warsaw ghetto uprising, Israeli Independence Day, Solidarity Sunday for Soviet Jewry, and Jerusalem Day. Each of these events marks an important period of Jewish history that all of us, regardless of our religion or ethnicity, should remember.

During this week, while we honor the historical accomplishments of the Jewish people, we should also strengthen resolve to work on remaining problems. I believe we should also express our concern for the most recent Jewish emigrees from the Soviet Union—who seek refuge in various countries around the world from persecution in Russia. I have cosponsored House Concurrent Resolution 50, to urge the Soviet Union to release scientist Viktor Brailovsky, and House Joint Resolution 220, to award honorary citizenship to Raoul Wallenberg, who heroically rescued many in Hungary during World War II. The fate of Mr. Wallenberg is still unknown.

I hope that Jewish Heritage Week will draw attention to the successes and the stuggles of the Jewish people. Through increased awareness of diverse cultures, we will all gain a greater understanding of our national heritage and build more bonds of friendship among the many ethnic groups in our Nation.●

DESOTO NATIONAL PARK

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. IRELAND. Mr. Speaker, I have the pleasure of informing you of local voluntary efforts to cut Federal spending. Although President Reagan has not earmarked drastic cuts for the National Park Service, Richard F. Hite, superintendent of the DeSoto National Memorial, has joined the national effort for economic recovery by voluntarily trimming costs. Mr. Hite has announced his willingness to do his part by scrutinizing the operational budget, and cutting back and eliminating all but the essential visitor service and resource protection at the memorial.

I commend Mr. Richard F. Hite for taking the initiative to curb Federal spending, and I congratulate him for his active role as a Federal spending watchdog.●

THE ELEPHANT PROTECTION ACT OF 1981

HON. ANTHONY C. BEILENSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. BEILENSON. Mr. Speaker, I am introducing a bill today, along with 56 of my colleagues, to halt the massive slaughter of African elephants. The Elephant Protection Act of 1981, identical to the bill passed by the House of Representatives last Congress, would restrict ivory imports from African nations which do not curb the rampant killing of their country's elephants.

Elephant populations in Africa are rapidly diminishing. In 1970, there were an estimated 5,000,000 elephants in Africa. By 1980, the population of elephants had dropped to 1,300,000. After surviving for more than 300,000 years as a species, the African elephant is experiencing such a swift decline in numbers that it is facing extinction.

While drought, deforestation, urbanization, and competition with the rapidly increasing human population have all contributed to the fast decline in elephant populations, it is the deliberate slaughter of elephants for their valuable ivory tusks that poses the greatest present threat to Africa's remaining herds. Ivory trade alone is believed to account for 50,000 to 150,000 elephant deaths each year—deaths which are mostly brought about by inhumane methods, including rockets fired from helicopters, use of automatic weapons, and the poisoning of waterholes which indiscriminately kills all wildlife in the area.

Ivory trade has been a lucrative business throughout history and has resulted in numbers of elephant deaths at various times, even when man did not have the technical advantages over elephants which he has today. Like gold and silver, ivory is a hard currency, a commodity that increases in worth in times of inflation. Ivory that brought a trader $3 a pound in the 1960's now brings $40 to $50 a pound. International trade in both raw and worked ivory is estimated to be worth $200 million or more annually. High inflation in recent years has caused the elephant to become a most unfortunate victim of a vicious supply-and-demand spiral. As the price of ivory rises, more elephants are slaughtered. As more elephants are killed, there is increased fear that the supply will run out. In turn, fear that the supply will run out drives up the price even more.

The African elephant is following the path of the near-extinct Asian elephant. The United States has banned trade in Asian elephant ivory since 1976 when the Department of the Interior officially listed these creatures as an endangered species. Now that Africa is the sole source of the ivory trade, the African elephant is quickly following the path toward endangered status, too. It was not until I introduced a bill to ban trade in ivory from African elephants 4 years ago that the Department of the Interior took any action to protect the African elephant. At that time, Interior issued regulations listing the African elephant as a threatened species and allowing ivory imports only from countries which are parties to the Convention of International Trade in Endangered Species (CITES).

Unfortunately, Interior's regulations have not been effective. Much ivory entering this country still comes from elephants which are killed illegally, and is shipped through a vast worldwide trade in smuggled elephant products. Worked ivory from places such as Hong Kong, where large amounts of raw ivory are carved, is required to be accompanied by a reexportation document stating that the ivory was legally taken in the country of origin. However, it is almost impossible for U.S. Customs agents to verify documents which have been falsified by attributing ivory origin to a CITES member country when the ivory was actually taken in a nonmember country.

But even more frustrating than the falsification of documents is our Government's failure to deal with obvious fraud in elephant imports. Two years ago, when the House Merchant Marine and Fisheries Committee reviewed some ivory import documents obtained from the Department of the Interior they found some declarations listing "Africa" as the country of origin, and other declarations listing "Kenya," a country which has banned the export of wildlife products since 1977. The ivory listed on these documents, and on other obviously erroneous or fraudulent documents, successfully entered the United States.

Clearly, stronger action is needed to halt the destruction of the African elephant than what is being taken under current law, and we must act quickly while we still have a chance to reverse the decline of these magnificent animals. During the last Congress I worked with members and staff of the Merchant Marine and Fisheries Committee to devise a way to end our Nation's participation in the slaughter of elephants and to establish a system whereby those countries which successfully manage their elephant populations are recognized and encouraged.

I believe, as do numerous environmental and animal protection organizations whose representatives testified in support of this bill, that the legislation we developed would do just that.

The bill I am introducing is identical to H.R. 4685 of last Congress—except for necessary date changes. With strong, bipartisan endorsement from the Merchant Marine and Fisheries Committee, this bill passed the House of Representatives on December 19, 1979. In the Senate, the Subcommittee on Resource Protection held a hearing on this bill in June of 1980, but Senate consideration of it was stalled as that Chamber prepared for adjournment.

Briefly, the bill would do the following: First, it would impose a 6-month moratorium on the import and export of any elephant or elephant product to or from the United States. The moratorium would apply to both worked and raw ivory, whether the ivory comes directly from an ivory-exporting country or from an intermediate country which works the ivory and reexports it. During the 6-month period, however, 10,000 pounds of ivory would be exempt in order to allow the 1,000 to 3,000 scrimshaw artisans in this country to practice their skill and maintain their livelihood. Ivory for this purpose is unavailable from any other source. In addition, during the first 90-day period, the bill would exempt worked ivory purchased abroad by tourists which is not intended for resale.

During the moratorium, the Department of the Interior would develop a permit program to allow ivory trade with countries which meet strict criteria. Permits would be granted for ivory originating in countries which have strong elephant conservation programs and sound recordkeeping for their ivory exports. Permits would be issued for ivory from intermediate countries only if the reexporting nation has sufficient recordkeeping requirements to insure that the nation of origin can be determined.

Provisions are made to assist the Department of the Interior in enforcing restrictions on ivory trade. In order to allow Interior to concentrate its enforcement efforts, elephant product imports would be limited to the Ports of New York and Seattle. Violators would face stiff penalties: First-time offenders would be subject to a civil penalty of $10,000 and a criminal penalty of $20,000 or 1 year imprisonment or both. Second-time and subsequent violators would face stronger penalties.

Exempt from coverage of this bill would be imports and exports of elephants and elephant products for zoological, educational, scientific, or exhibitional purposes; keyboard ivory which is part of a musical instrument; and elephant trophies taken by sports hunters, provided that the imported item is well-documented and taken in compliance with the laws of the host country.

Our bill would take an additional step to aid conservation of elephants. It would direct the Secretary of State to establish programs to assist nations in protecting habitat for elephants, and in developing and implementing elephant conservation and management programs. This would help those nations which want to conserve their elephant populations but simply do not have the capability to develop a program without outside assistance.

Funding for this bill would be authorized for the next 4 years—fiscal years 1982–85—at the following levels: For the Department of Interior's enforcement program, the bill would authorize $1.5 million for fiscal year 1982, and $2 million for the 3 subsequent fiscal years; for the State Department's conservation assistance program, the bill would authorize $400,000 in fiscal year 1982, $4.7 million in fiscal year 1983, $5.5 million in fiscal year 1984, $7 million in fiscal year 1985, and $0.7 million in fiscal year 1986.

The proposals contained in this bill present a better approach to reducing elephant deaths than would a complete ban of ivory trade such as I have advocated in the past, because they take a more positive approach to solving problems of elephant conservation. This bill's distinct advantage over a ban on ivory trade is that it provides a means to implement conservation programs in ivory-exporting countries, and gives countries an incentive to conserve their elephant populations: We reward them by permitting their ivory to be imported into our country. It also refrains from punishing those in industries for which there are no substitutes for elephant ivory—in particular, for scrimshaw work and musical instrument keyboards.

It would be unconscionable to allow our desire for unnecessary luxury items such as ivory carvings and jewelry to continue to contribute to the inhumane, extinction-threatening slaughter of the largest land mammals in the world. We can help put a stop to this large-scale destruction of the African elephant. Passage of our bill will be an important step toward doing so.●

THE ATLANTA SITUATION

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. MITCHELL of Maryland. Mr. Speaker, first of all, I would like to commend Congressman WYCHE FOWLER for providing the time for this much needed discussion of a very critical issue. The slaying of over 20 children in Atlanta, Ga., is clearly indicative of the sickness which is eroding the fibers of our society.

Violence is becoming more and more a way of life throughout our Nation. The Atlanta slayings and related attacks against children are very cogent symbols that we are moving further away from the highest regard for human life.

It frightens me deeply to acknowledge the significant psychological damage which is growing among all children due to the recent incidences. While the victims of these murders have all been black, it is no secret that such acts of violence do not discriminate. The fundamental question we must face now is that any child may be forced to live in fear during every phase of a day's activity. Surely, the increased number of weapon-carrying schoolchildren; momentary periods of panic if a parent is late picking up a schoolchild; and decrease in academic achievement, are not peculiar to the findings of several Atlanta psychiatrists, psychologists, and mental health officials. The feelings of distrust, fear, and apprehension will spread among all of our Nation's children as they begin to dread functioning in everyday environments. This is a sad outlook for our future.

Another fundamental question which is magnified in the minds of those who fear for human safety, is the continuing focus away from human needs. We are forced now to question if whether or not the evils of poverty, deprivation, and unemployment may be so deep rooted in our society that respect for human life becomes secondary to mere survival. We are also forced to question the validity of continuous violence as romanticized and glamourized on our television and movie screens.

The situations in Georgia, Florida, Maryland, and throughout most regions in this country leave us frustrated and angry. They leave us to question the basic responsiveness of authorities who must become more adamant in the protection of human lives. However, they must not lead us to take the law into our own hands.

The widespread acts of violence must also remind us that the protection and preservation of human lives are cross-jurisdictional. When as many as 21 lives are lost, it cannot be pegged as a State or local government matter. Both the President and the Congress realized this, and I laud the dispersal of Federal funds to Atlanta, and the efforts to appropriate $1.5 and $1.8 million for use by this city.

We have to examine closely the climate that motivates and encourages psychotic violence. The violence of

racism, the aforementioned influence of television and movies, and the violence of war and militarism—all of these inevitably get reflected in individual behavior to a greater or lesser degree. The psychotic killers who murder our children in Atlanta or anywhere else are victims of this climate and have apparently been affected to a greater degree.

We cannot excuse this behavior. However, we can and must deal squarely with the environment which fosters such actions.

Several sociologists tell us that most of the slain Atlanta children come from public housing neighborhoods which are more vulnerable and conducive to human mistreatment, abduction, and even death. Such conditions and incidences are not limited to this region of the country. Right here in Washington, D.C., children from low-income housing projects are becoming more and more susceptible to conditions of drug abuse and molestation. Here, the elimination of unemployment, underemployment, and poverty must precede the eradication of such criminal acts.

It is not easy to warn the blacks of Atlanta to stay away from theories that the acts of violence against 21 black children are conspiratorial in nature or racially motivated. The pattern of systematic murders, rapes, additional overt and covert actions against black citizens in the South and throughout this country is still just too prevalent. However, we must assist in the efforts of Mayor Maynard Jackson, the numerous task forces, and concerned citizens in addressing the problem in a rational way.

Again, until we eliminate the fundamental societal ills, we cannot be shocked at deviant behavioral patterns of violence, irresponsibility, and total disregard for human lives. There is little help in calling on citizens to care about each other when increasing inequities among neighborhoods, schools, living standards, and opportunities have become a way of life.

Those of us who are in a position to impact on public policy must stand firm against further inequities and burdens on our children, elderly, and low-income citizens. We must promote the kind of solidarity which has been displayed as citizens across the Nation have rallied behind the victimized Atlanta families. Most importantly, we must not be afraid to oppose and openly attack racism, chronic unemployment, poverty, injustice, and other societal ills which cloud any efforts to provide equal opportunities for each and every citizen.●

GAINESVILLE JUNIOR COLLEGE

HON. ED JENKINS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. JENKINS. Mr. Speaker, it is with pleasure that I offer my personal tribute to an outstanding junior college basketball team that has recently completed a championship season.

The Gainesville Junior College Lakers of Gainesville, Ga., were crowned as the 1981 Georgia champion, earning a berth in the National Junior College Tournament held in Kansas this month.

The Lakers posted a 22–8 season under the tutelage of Coach Mike Nordholz.

A remarkable fact exists with the entire athletic program at Gainesville Junior College. It is the only nondormitory junior college in the university system of Georgia which supports a full, intercollegiate athletic program.

The 1980–81 team members were: Sam Beasley, Rex Ellington, Dwayne Dorsey, Billy Joe Wright, Keith Porter, George McKinney, Mitch Chapman, Doug Mahaffey, Doug Lipscomb, Denver Byrd, Lonnie Conner, and Yolando Giles. The student managers were: Ricky Campfield, Bobby Maxwell, and Sid Bramblett. I am proud to contribute this salute to these champions at Gainesville Junior College.

Gainesville Junior College president, Dr. Hugh Mills, Jr., recently stated:

Many of us who have come up through athletic competition find that we are able to take both the hard knocks and the victories of life much more positively because of this competitive training in our youth.

I appreciate the fine work and high ideals that have been set by the Gainesville Junior College administration, faculty, staff, foundation, and students.

I am confident that many more victories are headed their way.●

ABORTION—APRIL 7, 1981

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. WEISS. Mr. Speaker, the debate in Congress over a woman's right to choose abortion still persists despite the Supreme Court ruling affirming this right in 1973. In an effort to circumvent the Court's decision, antiabortion forces shifted their sights and sought to deny medicaid funding for poor women for abortion services.

More recently these activities appear to have broadened again to ban abortion entirely through a new approach—that is through a statutory or constitutional definition of when life begins, which in the view of this minority is at conception. Survey after survey has shown that the majority of Americans support the right to choose abortion. I strongly believe that the Congress would be infringing on this constitutional right by enacting into law the religious or moral views of only one segment of the population. The repercussions of such misguided action could be devastating not only to our system of criminal and civil law, but to the constitutional issue of separation of powers between the legislative and judicial branches of Government.

The following article by John Hart Ely and Laurence Tribe appeared recently in the New York Times and clearly outlines the dangerous precedent that would be set by congressional action overriding the decisions of the Supreme Court. I urge my colleagues to consider the constitutional as well as public policy implications involved in any congressional move to restrict reproductive freedom for women.

LET THERE BE LIFE

(By John Hart Ely and Laurence H. Tribe)

CAMBRIDGE, MASS.—Sometimes it's hard to keep up. First it was life created in a test tube. Then patented life forms. And now we're told that all Congress has to do is pass a statute redefining "life"—by declaring fetuses to be "persons" from the moment of conception—and, presto, Roe v. Wade, the United States Supreme Court 1973 decision preventing legislative interference with abortions until late pregnancy will disappear. No muss, no fuss, and, most important, no struggle for all the votes it would take to amend the Constitution the old-fashioned way.

The two of us have been on opposite sides of the debate over the constitutional legitimacy of Roe virtually since it was decided. But we have no trouble at all agreeing that this formula for overturning it is badly misguided. It won't work, and it's a good thing it won't.

Even if it were offered in the form of a constitutional amendment, it would be at best an unpredictable vehicle for overruling Roe. If fetuses really are to be regarded as persons from the moment of conception, that would seem to require states to punish rape victims who get abortions as murderers and the druggists who provide them morning-after pills as accomplices to murder. If, on the other hand (as certainly seems likely) the statute's proponents assure us that they don't mean that—that some distinctions between the extinction of fetal life and the extinction of other life can still be drawn—it could then become at least arguable that the goal of overruling Roe had not in fact been realized.

Let's suppose, though, that the Supreme Court would uphold a ban on abortion on the strength of a "fetal life" amendment to the Constitution. It doesn't follow that a mere act of Congress could accomplish the same result. The point of Roe v. Wade was not that the Supreme Court had too little "scientific" information about when life began or what a fetus was, but rather that the Government, merely "by adopting one

theory of life," could not "override the rights of the pregnant woman." For Congress to proclaim the theory that a fetus is a person from the very beginning would leave this constitutional calculus unchanged. It was a question of rights, not an issue of biology or a matter of definition, that Roe resolved.

Congressional power to rescue an otherwise unconstitutional law by the expedient of redefining the terms of the 14th Amendment would have the dizzying implications well beyond the abortion controversy.

Should we make it as easy for Government officials to sue for libel as it was before The New York Times v. Sullivan, which barred damages for defamation of public officials in the absence of deliberate or reckless falsehood? That's simple enough: Congress need only announce that one's "liberty" of reputation demands that any publisher of libelous matter about an official be strictly liable for every falsehood. How about bringing back the racially restrictive convenants that were common before the Supreme Court in 1948 held them to be unenforceable? No problem. Just have Congress define judicial refusal to enforce racial restrictions on real-estate sales as a "deprivation of property." Yearn for the halcyon day when coerced confessions were admissible as evidence? Easy. Congress proclaims that from here on releasing any defendant on the ground that his rights were violated will be deemed to deprive all members to the public of their "Liberty" from fear.

Indeed, why not skip all the bother and just let Congress redefine "due process of law" to include "any law Congress or a state legislature approves." It hardly matters—once Congress can defeat liberty by definitional fiat. Reducing the Constitution to whatever those in power want it to mean is an awfully high price to pay for making Roe disappear. We're all lucky—supporters and opponents of Roe alike—that such a gambit won't work.

Senator Jesse A. Helms wasn't conceived yesterday, and his constitutional advisers undoubtedly have explained to him why an attempt to overrule Roe V. Wade by statute must fail. Obviously, the idea is to score points with the "pro-life" constituency at the expense of the courts, which, as the senator well knows, will have no choice but to strike the statute down. When Roe was decided, many screamed—including one of us (Mr. Ely)—that the Court was playing politics. With treatment like this at the hands of the Congress, what else can we really expect?●

USEFULNESS OF THE SOCIAL AND ECONOMIC SCIENCES

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. WALGREN. Mr. Speaker, funding cuts proposed by the Reagan administration in the National Science Foundation are more than an attempt at budget trimming and prudent management. They exhibit a view that could destroy some of the social and economic science research activities we clearly need to assist in the solution of our Nation's problems.

Critical national problems of the 1980's such as productivity and energy have major social and economic elements. The Japanese application of social science principles, mainly of American origin, to problems of industrial management illustrates how innovation in social organization for manufacturing and marketing can lead to increased productivity and economic gain.

The February 13, 1981, issue of Science contains an eloquent editorial by Dr. Kenneth Prewitt titled: "Usefulness of the Social Sciences," which I would like to call to the attention of my colleagues.

USEFULNESS OF THE SOCIAL SCIENCES

National attention has turned to the productivity, the performance, and even the profitability of science. Measured against such criteria, how will the social sciences fare? Quite well, I believe. Close scrutiny will disclose substantial contributions to economic growth and the public welfare. For instance, numerous well-established industries now market technologies that are derived from social science research: demographic projections, programmed language instruction, standardized educational testing, behavior modification, man-machine system design, political polling, consumer research and market testing, management consulting. Just as medicine draws upon biological research or electronics upon physics, government and management draw upon psychology, economics, demography, geography, and other social sciences.

In addition, the social sciences have vastly extended the observational powers of contemporary societies. Advanced industrial nations are commonly described as information societies in reference to their systematically collected information about the human as well as the physical environment. Human actions and the meanings attached to them constitute the most dynamic and complex of all those environments in which markets sell, banks invest, businesses produce, governments govern, and families plan. Monitoring the ever-changing human environment is a task approached through a variety of tools and disciplines of the social sciences: economic indicators, demographic trends, national statistical systems, historical research, time-series analysis, input-output matrices, developmental psychology, area studies, political geography.

Of course, the public importance of the social sciences, like that of the biological and physical sciences, is not limited to their accomplishments as observational sciences or to a list of industries that market their technologies. It is through theories and intellectual constructs that the sciences realize their greatest potential. In the empirical regularities they reveal, the counterintuitive questions they ask, the contingent associations they discover, and the successive layers of meaning they uncover, the social sciences conceptualize and thereby render accessible to human intelligence a wide array of economic, social, political, and cultural phenomena. Ironically, the social sciences seldom get full credit for their theoretical accomplishments, because the discoveries, once labeled, are quickly absorbed into conventional wisdom. This is easily demonstrated; note the number of social science concepts common to our vocabulary: human capital, gross national product, identity crisis, span of control, the unconscious, price elasticity, acculturation, political party identification reference group, externalities. Obviously, the phenomena revealed through such concepts existed prior to the relevant research, just as DNA, quarks, and the source of the Nile existed prior to their discovery. Yet concepts generated through research are discoveries that make phenomena intelligible and accessible that previously were inaccurately or incompletely understood.

That the tools and concepts of social science work their way into public discourse is a matter of some national importance. Regulatory policy, for example, is seldom discussed without reference to cost-benefit analysis. It is with models from economics and demography that the financial base of Social Security is being examined. Evaluation research is called upon to demonstrate program successes or failures. Game theory provides a vocabulary for looking at shifting international alliances. The current national discussion of productivity will make use of research on topics such as investment and savings behavior, management of complex organizations, competency testing, international labor migration, or human creativity.

In just a few decades the social sciences have accomplished much of practical significance. With continued public and private support, much can reasonably be expected in the decades to come.●

THE ILLUSION OF AMERICAN OMNIPOTENCE

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mrs. SCHROEDER. Mr. Speaker, Dennis Brogan's call for prudence, above all, prudence, in the conduct of foreign affairs, is as warranted today as it was in 1952.

Part II follows:

IV

At first sight, the growing American distress at the continuance of the Korean war seems to show something very different from a sense of omnipotence. It shows, indeed, a sense of frustration, dismay, bewilderment. To find hundreds of thousands of American troops fighting in a remote country, seven years after "the end of the war," is baffling enough. To suffer over 120,000 casualties in such a situation is worse. The Korean war is already, in terms of losses, the third most serious war in American history. An American mother lamenting the fate of her son is a figure to inspire sympathy and understanding. It is natural that the American people should want, not on any terms but on some terms, an end to the Korean war.

But in addition to this common and natural sentiment there is another American attitude that is less defensible and decidedly dangerous. It might be likened to the attitude of the prosperous and pompous citizen who, in a jam, firmly tells the cops, "You can't do that to me." Many, very many Americans, its seems to me, find it inconceivable that an American policy, announced and carried out by the American government, acting with the support of the American people, does not immediately suc-

ceed. If it does not, this, they feel, must be because of stupidity or treason. That the Chinese Communist government should defy—and successfully defy—the policy of the United States, seems to them to fly in the face of a truth which they hold to be self-evident.

Yet such situations exist and may well continue to exist. It is by no means certain that American forces will easily be withdrawn from Korea, or even that they may not have to take part in other wars of that kind. Mrs. Kathleen Norris can no more alter that fact than Senator Taft can really guarantee to keep the military budget to a fixed proportion of the total. In the great power vacuum created by the decline of Europe, the United States is forced, and will be forced, to do a great many disagreeable things—or to surrender. This is a new story for the United States, but it is an old one for Europe. What the American people are enduring now is what the French, the English, the Russian peoples, even the Spanish and Italian peoples, suffered in the process of extending or trying to retain their empires.

But, it will be objected, America is not trying to extend an empire; she is defending public order and morality in Korea. This is very different from the piratical adventures of the old world, from the French in Africa, the English in India, or the Russians in Samarkand or Armenia. Morally, this is true. But, just as the purity of the American cause does not win all American families to an acceptance of the Korean war as necessary and tolerable, so the moral turpitude of European enterprises added very little to the burden of empire. And that burden was heavy in terms of lives lost.

It has been calculated—and I do not think it is an improbable calculation—that the French conquest of Algeria cost the French 150,000 lives. (What it cost the Arabs, resisting civilization, no one has paused to compute.) I don't know what the British wars in India cost either in great battles, in minor battles, or in disease, but they cost plenty. Even the British peace, imposed on India, cost plenty to the 100,000 white troops permanently garrisoned in that remote, unhealthy land. Do you think it mattered to a French mother that her son, dead in Algeria, was an agent of imperialism? All she knew was that he had paid what Marshal Gouvion Saint-Cyr candidly called a blood tax. And the same story can be told of Indochina seventy years ago—and now. It is one of minor themes of a once-famous novel, Loti's Pêcheur d'Islande. "It's a long way to Carcassonne," said the soldier of the Grande Armée, dying in the snow on the retreat from Moscow; and it is a long time since Vergil made the dying Greek remember sweet Argos.

Morally justifiable—indeed, morally splendid—as the American action in Korea on behalf of the United Nations may be, and urgent as the need may be to find an honorable way out of the predicament in which she finds herself, what Americans are paying today is one of the normal prices of being a great power, of bearing the burdens as well as enjoying the advantages of power.

Again, I have no intention of minimizing the horror of the Korean War. I was in New York in December 1950, when it was still not certain that the Marines would get out of the trap sprung on them in North Korea—when, indeed, it was not certain that many of them would ever get home. I felt passionately with the American people. And the situation is not purely American. In a year and a half, my eldest son will be in the army and may be in Malaya or Korea. It is a painful story. But it is an old one.

v

Another aspect of the "you can't do this to me" mentality—which, in turn, is an aspect of the illusion of omnipotence—can best be studied in the writings of Mr. David Lawrence of the U.S. News & World Report. To Mr. Lawrence the Korean war, the loss of American lives in it, is not merely painful but unendurable. It must be put an end to, and one of the methods suggested has a real interest—to me a pathological interest. If I understand Mr. Lawrence aright, in order to diminish Communist pressures on the Americans in Korea, Poles and Czechs are to be encouraged to acts of sabotage if not of active revolt, and a "resistance movement" is to be subsidized, with a view to diverting Russian or other Communist resources from Korea—that is, from the Americans in Korea.

This modest proposal deserves examination. Mr. Lawrence apparently does not pretend that the United States proposes to do anything more to liberate Poland and Czechoslovakia than to encourage and equip saboteurs. He does not pretend that such activities, in themselves, will bring down the Stalinist regime. They will, he hopes, cause such inconvenience that the heat will be off the Americans.

It is obvious that Mr. Lawrence does not know very much about resistance movements, or the means open to a totally ruthless government to repress resistance movements. He may have heard of Lidice, of Warsaw, even of Oradour-sur-Glane. But the meaning of those episodes is lost on him (and on many other Americans). To save the lives of Americans, to relieve this new and heavy but not intolerable pressure on American society, Poles and Czechs are to risk—for themselves and for their families and, if it comes to a pitch, for their countries—total destruction, the execution of hostages, the annihilation of whole villages, possibly the fate of the peoples of the three Baltic states, of whom we do not even know that, as nations, Lithuania, Estonia, and Latvia exist any longer.

These nations, and more especially the Poles, have undergone experiences that not one home-staying American in a hundred thousand, perhaps in a million, can really comprehend. The liberation of Poland, on these terms, might mean the end of Poland. And the Poles are not even promised liberation; merely the satisfaction of annoying the Russians and relieving the Americans. If the United States were in mortal danger, patriotic Poles might be willing to take great risks to aid her, since in American survival "the only hope of freedom lies." But she is not in mortal danger; she is in what a Pole who has known first German, then Russian rule, can hardly regard as more than acute discomfort. To ask the Poles to act, at such risks, to diminish this discomfort is something pardonable only on the grounds of invincible ignorance. And it is something that Americans could hardly seriously recommend unless they saw in the situation a denial of one of "the Laws of Nature and of Nature's God," namely, the immunity of the United States from the common ills of this distressed world.

For it should be evident that only if the United States is willing, in a reasonably short time, to undertake, by general war, the liberation of the captive nations, has any American any business urging kinds of resistance which can pay only in the event of a general—and successful—war. Even were the United States to proclaim such a policy, the problem of encouraging resistance is not a simple one. It can be argued, for instance, that the damage done to France by the resistance movement there—from the torturing and burning of victims to the demoralization that some resistance methods fostered—was far more serious than any damage done to the German occupiers. The only justification for disregarding that calculation was a moral one: that if France took no part in her own liberation, she could not, in fact, be liberated; all that could be done was to expel the Germans, which was not the same thing. But even so, the appeals of General de Gaulle and others, and the organization from London of all sorts of resistance activities, were only just tolerable, because they were not only a means of saving English lives but also of saving French souls.

This is not to say that everything possible should not be done to keep alive hope, the Western tradition, the national tradition in the captive nations. A permanently hostile Poland or Czechoslovakia is a double weakness for the U.S.S.R., a possible future military weakness and a present propaganda weakness. But there is a world between the policy advocated by John Foster Dulles and that advocated by those Americans who say, "This can't go on." It may, and no amount of asserting that it can't will alter the fact.

When policies are advocated on the ground that they will "save the lives of American boys," the implication sometimes seems to be that only the lives of American boys really count. It is often forgotten, in this world of short memories, that one justification of Yalta, of the coaxing and bribing of Stalin to enter the Japanese war, was the saving of the lives of American boys. To save the lives of American boys is a high object of policy indeed. It is one of the marks of a democracy, or of a free government, that the military and political leaders can be held to account on that one point. As the Duke of Wellington pointed out, Napoleon could spend his conscripts as he liked, while Wellington might be summoned to the bar of the House of Commons if he threw away the lives of five hundred British soldiers. But that is a very different matter from giving the impression that American lives, as such, are of any special importance; that, as an American friend of mine put it in some unpublished verses;

Clean-limbed American boys are not like any others.
Only clean-limbed American boys have mothers.

Their lives are of special importance to Americans, but not to the people of other lands. And there would be widespread resentment over the thoughtless implication that it is the first duty of Poles or Czechs to save American lives.

These are hard sayings and they are negative sayings. But they may not be useless all the same. Only by constant vigilance, prudence, willingness to take the long view and to assess the situation, even in its most unpleasant, frustrating, and dangerous aspects, can American policy succeed—succeed in preserving the freedom of the United States and the freedom of other nations as a means to that end. There are no quick, sure recipes for security and power. The Kremlin hasn't got them; the White House will not have them either. This means that the American people will have to learn a great many new attitudes. (They learn fast,

as the history of the world since 1939 shows.) They will have to learn that, even in election years, the world cannot be altered overnight by a speech or a platform. Only by accepting this depressing truth can American power, great, flexible, and beneficent as it is, be used to full advantage.●

RECOMMENDS INCREASE IN AUTHORIZATION

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. SCHUMER. Mr. Speaker, I am pleased to join my colleague from Texas, the distinguished chairman of the Subcommittee on Housing and Community Development, in introducing this measure. Although the stated purpose of the bill is to increase the authorization for public housing operating subsidies, the real purpose is to save our Nation's public housing authorities (PHA's) from nearcertain financial disaster.

I will illustrate the gravity of the situation by describing the financial condition of the housing authority in my home city of New York. Due to the underestimation of inflation and utility cost increases, funds appropriated by Congress for fiscal year 1981 have filled only 85.5 percent of PHA's HUD-approved need. This left the New York City Housing Authority with a $31 million deficit, and PHA's nationwide with a deficit close to $165 million. When the Reagan administration decontrolled the price of oil, the New York City Housing Authority's deficit instantly rose another $12 million, to $43 million. The administration has proposed that States cover this deficit with funds they received for low-income energy assistance. In New York, however, the State can provide only $12 million, because the rest of the funds it received under the program already have been spent or allocated to others. This leaves the original $31 million deficit, and no possibility of additional State funds.

Public housing is frequently thought of as a big-city problem, but all housing authorities—large and small—are feeling this squeeze. PHA's across the country have already cut programs, deferred needed maintenance, and depleted their operating reserve funds to dangerously low levels. Many face the unpleasant choice between bankruptcy and not filling vacated units. I suggest to my colleagues that you can easily confirm this by calling up the heads of the housing authorities in your own district.

The Nation has an investment of $20 billion in our public housing stock. Public housing provides a necessary service to the elderly and poor of our country, especially at a time when rents are skyrocketing, vacancy rates are at an all-time low, and the construction of unassisted rental housing for low- and moderate-income people has virtually halted. It makes no sense to allow this resource to deteriorate. If we do not fund the operating subsidy program adequately now, it is likely that in the long run we will just have to pay more than we are requesting today.●

REDUCING GUN VIOLENCE

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. MAZZOLI. Mr. Speaker, once again, the debate about gun control has been revived as a result of the recent despicable attempt on the life of our President.

But, regardless of which side of this emotional issue one adopts, it is conceded by all that gun violence in this country must be reduced.

While there is no one simple solution to this vexing problem, I would like to call to the attention of my colleagues an article written by Prof. James Q. Wilson and Mark H. Moore which appeared in the April 1, 1981, edition of the Washington Post. It makes many important and interesting points well worth our consideration.

The article reads as follows:

ENFORCING THE LAWS WE HAVE

(By James Q. Wilson and Mark H. Moore)

Every publicized shooting revives the debate about gun control without bringing the debaters closer together. The deaths of Dr. Michael Halberstam and John Lennon, and the attempted assassination of President Reagan, like the death of Robert F. Kennedy and the assault on George Wallace, stir emotions but produce no consensus. When people think an issue important but can make no progress toward resolving it, it is probably time to rethink the way in which they define it.

Essentially three views are in contention. One is to do nothing: Guns do not kill, people kill. A second is that a handgun exists only to kill and its production and possession should be tightly restricted. A third is that certain kinds of violent encounters are more likely to have lethal consequences if guns happen to be readily available and that society ought to devise ways of reducing that availability among people likely to be involved in those encounters.

The first view is correct but misleading. People pull triggers. And some triggers are pulled by people so determined that the gun is merely a tool. But many crimes are committed by persons without clear or strong intentions—persons who are enraged, drunk or looking for trouble. In such cases, people let the means at hand determine what kind of force they will employ and against whom.

The second view is wrong, unfeasible and impolitic. There are handguns in at least one-fifth of all American households. The vast majority of these weapons are never used to threaten or injure anyone. Banning the production of new handguns might prevent that stock from increasing. Buying back existing guns might reduce that stock slightly, but it would be enormously expensive and, without production controls, futile. Larger reductions would require confiscation. And even if all these policies were adopted, and even if the reductions in ownership were great (say, by 50 percent), the remaining guns would easily support current rates of robberies at gunpoint for a decade.

But none of these policies is likely to be adopted, and for reasons having nothing to do with the presumed power of the National Rifle Association. The average legislator simply cannot afford to come before his or her constituents with the following proposal: "Your government, having failed to protect you against crime, now proposes to strip from you what you regard as an effective means of self-defense as well as an enjoyable hobby." Never mind whether the belief about self-defense is true; gun ownership, from the First Lady to the average citizen, is testimony to the unshakeable power of that belief.

The third view is one that we wish policymakers to take more seriously than they have. We should recognize that people have a right to own guns but do not have the right to use them criminally. Moreover, we think that people who are found in possession of guns while committing a crime or participating in a violent dispute should lose both the gun and their freedom. Finally, we think that the police should be more active in intercepting the traffic in contraband guns and apprehending people carrying unlicensed guns in public places and that judges should deal with them more severely.

Federal and state laws now make it unlawful for convicted felons, ex-addicts, and mental defectives to possess a handgun. Moreover, in many states and most big cities, it is illegal to carry a concealed handgun except for a small number of people with police permits. The laws governing possession might usefully be tightened even further—for example, by denying handguns to people convicted of violent misdemeanors (such as assault) or of chronic public drunkenness. The real problem, however, is to motivate the criminal justice system to take these or better laws seriously.

To see what this involves, it is first necessary to understand the different situations in which a weapon affects the outcome of a violent encounter. The first involves disputes—family quarrels, barroom fights, street corner brawls among "friends." The traditional police response to such disputes is to pacify the opponents, perhaps separate them for the night and occasionally make an arrest if the assault seems to be serious, the officer's authority is challenged or the "victim" clearly intends to press charges. Who is the "victim" and who the assailant in these disputes is often hard to decide. The victim may simply be the person who lost the fight.

There is strong evidence that the presence of a gun in these situations raises dramatically the chance of a lethal outcome and that people who regularly engage in such disputes are much more likely than others of similar incomes and circumstances to be responsible for, or the victim of, a homicide, yet there is equally strong evidence that communal disputes are not taken seriously by the criminal justice system. Either no arrest is made or the charges are dropped or the sentence is trivial. This is understandable, given the constraints: If only a simple assault (a misdemeanor) has occurred, the police cannot lawfully make an arrest with-

out a signed complaint. And even if a complaint is forthcoming, the victim is likely to change her (sometimes his) mind the next day. Without an arrest, a search for a seizure of weapons is difficult, if not impossible.

We suggest that state law and police practice be amended so as to take violent disputes more seriously. Following the lead of Minnesota and other states, the police should be empowered to make arrests in these cases if they have probable cause to believe an assault has occurred, even if the assault is not felonious. Following the policy of the New York Police Department, officers should be encouraged to make arrests both to protect the victim and to deter, if possible, further assaults. And incident to these arrests, valid searches should be made for guns improperly in the possession of the disputants. Both the assault and the illegal possession of a weapon in these circumstances should be dealt with more sternly than now is the custom with judges who tend not to regard such matters as "real crime." That attitude may encourage a real crime later because a predisposition to violence is unchecked by sanctions. These sanctions may involve jail or they may involve posting peace bonds, intensive probation or the like. The key is a clear penalty and the removal of the gun.

The second situation is the stranger-to-stranger violent crime—muggings and robberies. The guns used by such criminals are often already possessed in violation of the law. For them, the problem is not tightening the laws involving carrying a weapon, but clocking the access these people have to supplies of guns and increasing the risks from carrying weapons. Moore's research indicates that the largest sources of supply of handguns to people who use them for stranger-to-stranger crimes are thefts and the black market. In short, armed robbers usually violate gun laws in two ways: They have stolen their handgun, or bought it from somebody who did, and they are carrying it without a permit.

To reduce the black-market traffic in guns, the police should consider mounting more undercover "buy and bust" operations (much as they now do with respect to heroin and dangerous drugs) in order to make illegal gun dealers wary of dealing with strangers, to raise the price and difficulty of acquiring illegal guns (perhaps beyond the point that opportunistic, teenage robbers will find it worthwhile) and to deter some people from going into the illegal gun business at all.

To inhibit the carrying of handguns, the police should become more aggressive in stopping suspicious people and, where they have reasonable grounds for their suspicions, frisking (i.e., patting down) those stopped to obtain guns. Hand-held magnet meters, of the sort used by airport security guards, might make the street frisks easier and less intrusive. All this can be done without changing the law.

The success of undercover buys and aggressive patrolling depends partly on the extent to which judges will seriously penalize the unauthorized carrying of concealed weapons. Though judges often give more serious sentences to people who commit a crime using a gun, the available data suggest that a person convicted of illegally carring or possessing a handgun is generally treated leniently. This is a serious mistake: A person in a public place with a gun and without a permit is often a person looking for trouble.

The Bartley-Fox law in Massachusetts requires a mandatory one-year jail sentence for any unlicensed person who carries a firearm. It was opposed by those who said the law would not be enforced and by those who said it would not have the desired effect. Both criticisms appear to have been wrong—the criminal justice system did not engage in wholesale evasions of the requirements of the law, and three studies that have been done of its effect all point to some decline in the proportion of the assaults that were committed with firearms. Assaults as a whole increased; firearm assaults decreased. The effect of Bartley-Fox might have been even greater if the police had been more aggressive in enforcing it (or less if it had not been so heavily publicized).

Note what we are suggesting: not "gun control" in any comprehensive sense, but rather increased pressure on the particular circumstances and people whose illegal behavior is most likely to be affected by the availability of a gun. Note also that to do these things requires action chiefly by state and local, not federal agencies. Bear in mind that motivating police and prosecutors to act in these ways is not easy. And note finally that real progress in reducing gun violence almost certainly requires methods—aggressive patrolling, undercover operations, tougher sentences—that liberals instinctively dislike. We think, however, there is no way around these tough choices, and it is time we face up to them.●

IMPORTANCE OF LEGAL SERVICES FOR OLDER AMERICANS

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. WEISS. Mr. Speaker, most older Americans have had very little contact with Government during their younger years—except, of course, to pay their taxes or perhaps to perform their military obligation.

But upon reaching their midsixties, they become increasingly dependent upon Federal programs, such as social security, medicare, VA pensions, and others.

Quite often, they have legal or quasi-legal questions about their benefit eligibility, the amount of their entitlement, and other issues.

As a consequence, legal services can be especially valuable for the elderly because they rely—perhaps more so than any other group—upon Federal programs for their daily lives.

The amount of their social security benefits frequently determines whether they have enough to eat. A denial of a medicare claim by an insurance company can cost them precious dollars.

Legal services attorneys have helped to assure that older Americans receive the benefits that they earned during their working years. Approximately 15 percent of all Legal Services Corporation clients are 60 years or older. They have been helped in countless ways by the 6,200 legal services attorneys and 2,800 paralegals in 1,450 neighborhood offices throughout the country.

Without the legal services program, many older Americans would find that they would have to fend for themselves when a legal problem arises.

I strongly believe that our legal system should be designed to achieve justice for all—whether they are rich, poor, moderate income, young, old, or middle aged.

The legal services program helps to assure that low-income persons are treated fairly by the courts and other institutions in our society.

The administration has proposed to undermine these fundamental concepts—which have broad support by conservative and liberal groups alike—by terminating funding for the Legal Services Corporation.

I want to reaffirm that I strongly oppose this measure, and I urge the Congress to continue the successful work of the Legal Services Corporation.

A recent editorial in the New York Times provides compelling arguments to retain the Legal Services Corporation.

Mr. Speaker, I commend this editorial to my colleagues and ask unanimous consent that it be printed in the RECORD.

SAVING MONEY? NO, PRESERVING JUSTICE

(From the New York Times, Mar. 8, 1981)

So it isn't the cost, after all, that bothers Mr. Reagan about legal services to the poor. It's the very idea of this program, which has enriched American justice, that sticks in the craw of a President who tilted against its lawyers when he was Governor of California. He offers to let the states use some of their other Federal money to sustain the program, if they like. But he knows not many will. Mr. Reagan aims to kill the Legal Services Corporation. He should be stopped.

The issue here is not just another worthy social program that America can't fully afford. It is a matter of protecting a fundamental principle of a fair society—equal justice. Legal Services represents in civil law what public defenders represent in criminal law: a chance for poor people to establish their rights by means available to the rest of society.

Ever since the Supreme Court ruled in 1963 that indigents charged with crimes are entitled to free representation, they have been routinely supplied with public defenders. But the same is not true when poor people are harassed by arrogant welfare agencies or hostile landlords. Without the Federally funded Legal Services program, they would have to represent themselves or rely on overworked legal aid bureaus and inexperienced law students.

The Federal lawyers have not only moved energetically to press individual grievances but have also brought class actions to correct systematic injustice. And that, of course, is why the program has made few friends among the elected officials, businessmen and bureaucrats it has beaten in court. Mr. Reagan has never forgiven California's Rural Legal Assistance program for requiring him to spend more than he wanted on welfare and Medicaid.

Legal Services is no radical scheme for the redistribution of wealth. The American Bar Association and liberal lawyers alike know it

is a plan for fairly establishing rights. The relief it manages to obtain for the poor can be won only under laws passed by legislatures and interpreted by the courts. But a legal right, like a tax benefit, is meaningless for those who cannot afford the experts to claim it.

There may be aspects of Legal Services worth debating; it may even be that economies could be found in its $320 million budget. But to kill the program, under the pretense that the states are free to keep it alive, is unconscionable. The issue is not whether to save money; it is whether to preserve justice.●

SMALL BUSINESS INNOVATION AND RESEARCH

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. LEWIS. Mr. Speaker, I am introducing today, for Mr. McDADE and myself, the Small Business Innovation Research Act which will strengthen technological innovation in the Nation's economy. This bill is identical to a bill which is also being introduced today in the Senate by the Honorable WARREN RUDMAN, chairman of the Subcommittee on Innovation and Technology of the Select Committee on Small Business, and the Honorable LOWELL P. WEICKER, Jr., chairman of the Senate Select Committee on Small Business.

The rate of productivity growth in the United States now lags behind most of our competitors in the world economy. At the same time, we are suffering from unemployment, inflation, and a large, negative balance of payments.

Many of these problems result in part from a lack of innovation which could keep our economy abreast, if not ahead, of other industrialized economies. According to a Department of Commerce study, both the U.S. share of patents filed worldwide and the number of U.S. patents awarded to U.S. citizens have dramatically decreased in the last decade. That finding, together with the decline in the number of new innovative technology based companies and the reduction by 50 percent in the U.S. worldwide lead in productivity, clearly demonstrates that there is serious decline in innovation in the United States.

This decline in technological innovation poses a major threat to the quality of our lives. It represents a decline in U.S. industrial might, a loss of jobs, and a decrease in our standard of living. Today, we often find foreign technology running circles around our domestic industries. Overseas industries often use more advanced technology, foreign manufacturers are often first to introduce new features, new energy technology is often applied more quickly in other countries.

The low rate of technological innovation and new high-technology firm formation in the United States is even more significant in view of the findings of a study by Data Resources, Inc. The study shows high-technology companies growing nearly three times as fast as lower technology firms, while increasing their productivity growth rate nearly twice as fast as lower technology firms. The rate of inflation in higher technology companies is lower because of this productivity growth rate. Of great significance is the finding supported by many studies that higher technology firms create jobs at a much greater rate than lower technology companies.

Among the innovative or high-technology companies, there is mounting evidence that small business firms far surpass large firms in the rate and efficiency of innovation and in job creation. A 1977 OMB report found that "firms of less than 1,000 employees accounted for almost one-half of the major innovations during 1953-73." Numerous other studies have shown similar results. The study also found that "firms of less than 1,000 employees have a ratio of innovations to R. & D. employment which is approximately four times greater compared to firms with more than 1,000 employees." Independent investors and small business firms have been responsible for inventions such as insulin, titanium, dacron, polyester fiber, automatic transmissions, the ballpoint pen, helicopter and many others.

The same OMB report found that small firms are far more cost effective, with a cost per scientist or engineer of only half as much as large firms. Numerous other studies substantiate the outstanding contribution of innovative small business firms to our Nation's economy. For example, the House Subcommittee on Antitrust, Consumers and Employment's study, "Employment of the Fortune 1,000 Top Industrial Corian Labor Force" indicates that small businesses were responsible for 96 percent of the jobs created in the private sector in the period from 1969-77: the Fortune 1,000 top industrial corporations accounted for only 4 percent of the jobs created in the same period.

In light of the more favorable record of small business in innovation and cost efficiency and in view of the vital need for increased innovation, greater productivity growth and new employment opportunities—it is startling that only 3½ percent of the Federal research and development budget is awarded each year to small business firms.

It is long past time for the Nation to establish programs and incentives to increase the small business share of Federal R. & D. awards. In concluding that small, particularly new, enterprises occupy the critical role in innovation of linking ideas and innovation to the marketplace, a 1978 joint hearing of House and Senate small business committees found that:

> The market linking function of small enterprises, their problems and potentials should be receiving the very highest priority treatment in the Nation's effort to encourage and strengthen technological innovation.

The National Science Foundation has established a program known as small business innovation applied to national needs. This three-phase program has as its main purpose the reserving of a specific amount of money for award to small innovative firms to promote greater utilization of their capabilities in NSF research and development and to convert the results of their research to technological innovation in the private sector.

First phase results from this program are very encouraging in terms of small firm response and quality of research performed.

The bill I am introducing today will amend the Small Business Act to establish small business innovation research programs similar to the NSF program throughout the Federal Government. The bill requires each executive agency having an annual R. & D. budget of more than $100 million to establish a small business innovation research (SBIR) program where one half of 1 percent of its 1982 R. & D. budget and 1 percent of its subsequent years R. & D. budgets would be reserved for award to small business firms specifically in connection with its small business innovation research program. In fiscal year 1982, $169 million would be channeled to small business. In subsequent fiscal years, the total amount would approximate $340 million.

The money would be spent by each agency for projects suitable to the SBIR program and that would fulfill the agency's R. & D. plans. Therefore, funds beyond the normal R. & D. budgets are not required for the SBIR programs. The SBIR programs would differ from normal small business setasides in several significant ways.

First, the funds would be specifically reserved for small business on a continuing basis, thereby eliminating the question of whether the contracts awarded with these funds should go to large or small business and giving Federal technical and procurement officials the responsibility and incentive to promote competition among small firms for these R. & D. contracts awards.

Second, the continuity of the program will encourage participation by existing small firms and will promote the establishment of additional highly innovative small firms.

Third, the bill calls for a simplified acquisition process for the program

with SBIR requests for proposals being standardized throughout the Federal Government. Instead of being faced with a dozen different, highly complex, 100-plus-page requests for proposals, the small business person will only have to deal with one or two standard forms, simplified 20-page solicitations. The small businesspersons' initial response likewise will be simple and of a few pages instead of the complex, expensive, several-hundred-page proposal that is now often required.

The SBIR programs will be phased to take a basic idea or concept to the production stage. The first phase solicits small feasibility research proposals to determine the practicability of an idea. These first-phase efforts are funded by the Government for about $25,000 each. Phase II is limited to firms successfully completing phase I and is for the principal research effort to develop a new product or process. The second-phase efforts are also funded by the Government for about $250,000 each. The third and final phase, which is carried out with venture capital or other private funds, is for follow-on development effort to pursue commercial objectives that will justify continued private-sector investment. The SBIR program will provide a major link between the basic idea and the point where it is developed sufficiently to be of interest to venture capitalist and other financing sources. Much has been written about the very real shortage of venture capital, especially for small businesses. Some studies have concluded that a good part of the venture capital problem is the lack of good ideas that are developed into viable proposals. The SBIR program would directly address these problems.

I urge my colleagues to join me in supporting this legislation.●

IN THEIR OWN WORDS

HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. HOLLENBECK. Mr. Speaker, I would like to take this opportunity to express my support for H.R. 2884, as introduced by my colleague, the Hon. BEN GILMAN, which authorizes domestic release of the International Communications Agency film "In Their Own Words." I am confident that this film will be of interest to the American people and will help correct some of the misconceptions surrounding refugees from Cuba. By interviewing some of the more than 100,000 Cubans who fled to the United States between April 21 and June 19, 1980, I believe the filmmakers provide the audience with a rare chance to understand the motivations of these individuals for leaving Cuba and their hopes for life in the United States.

As the Representative of the largest Cuban constituency in America outside of Miami, I know all too well how little effort has been made in the past to shed some understanding on the plight of those fleeing from Fidel Castro's Cuba. I believe a film like "In Their Own Words" is long overdue, and I urge all of my colleagues to support H.R. 2884 and provide for its public dissemination.●

STATEMENT BY CHAIRMAN FORD ON PUBLIC EMPLOYEES

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. FORD of Michigan. Mr. Speaker, all too infrequently do we hear kind words about the public employees who keep our Government running. We are more likely to hear unwarranted criticism from candidates and commentators. This is especially distressing these days when there is strong evidence that a crisis in Government is developing because of our failure to address conditions that are driving some of our best people out of Government service.

Recently I was pleased to read two very thoughtful articles on the subject by writers in the Washington Post. Mark Shields discusses the debt of gratitude we owe our public employees. Haynes Johnson analyzes the flight of some of our best people. I offer both the articles for the benefit of my colleagues:

VERY SPECIAL AGENTS

(By Mark Shields)

Jerry S. Parr, 50, lives in Gaithersburg and works in Washington. For the past 18 years, he has been a Secret Service agent; for the last two of those years, he has been special agent in charge of presidential protection. That was Jerry Parr, on Monday's videotape, thrusting himself into the line of fire so he could shield the president and shove him into the limousine.

Timothy J. McCarthy, nine years in the Secret Service and only 31, was the agent who immediately occupied the position between the president and the gunman. He assumed his post and absorbed a bullet through his liver.

In 17 good years on the Washington police force, Thomas K. Delahanty, 45, has earned a file full of commendations as well as the respect of his colleagues. While protecting the president of the United States, he was hit by a .22 bullet that had to be removed from his neck, not far from his spinal column.

The medical reports are encouraging. Both McCarthy and Delahanty, like press secretary Jim Brady and the president himself, are doing better than was at first expected. Maybe, we have begun to hope, after the suffering they and the rest of us will be able to celebrate their survival and recovery.

That's the way it was last January when 52 Americans returned home after spending two Christmases in cruel captivity. After their suffering, there was a celebration filled with fitting tributes to the patriotism and the guts of those Americans who had persevered. Those deserved testimonials must have been especially welcome to the men and women of the career Foreign Service. Foreign Service personnel have had very little experience in accepting public praise. Ridicule and mockery have been their regular fare: the cookie-pusher and striped-trousers set are not spoken about respectfully.

For some reason, we have overlooked the one demographic characteristic shared by 51 of the 52 repatriated Americans with Jerry Parr, Timothy McCarthy and Thomas Delahanty. It has nothing to do with race, region, religion or reading scores. Most generations and both sexes were represented in this very non-homogeneous group of 54 American heros. All of them, of course, did their jobs. They fulfilled their responsibilities, and then some. And each and every one of the 54 is—are you ready?—a public employee.

Public employees—that indolent subspecies that candidates and commentators love to attack. You know the mindless public employees: You could line up an office full of them and clean their ears with one long Q-tip. Over and over we have been told that if public employees are not incompetent, they are indifferent and surly. And if they are not mindless sloths, then they have to be zealous meddlers, feverishly regulating American business right out of business. You've read of them, those faceless bureaucrats who've never met a payroll.

It's been a long time since any politician talked publicly the way John Kennedy did in his first State of the Union speech, when he said: "Let the public service be a proud and lively career." Not many of today's winning candidates borrow that line from JFK. In fact, along with WASPs, public employees must be the last remaining group in our society without its own anti-defamation department. Both those groups are attacked with regularity and without fear of reprisal. If half the things muttered about public employees were spoken about any religious or racial group, the speaker would be dismissed as a hopeless bigot.

So what of the 54? Are they simply rare exceptions? Then so, too, must have been Col. John Glenn, Sen. Arthur Vanderberg and Gen. George Marshall because they are all public employees. Dwight Eisenhower was a public employee and so was Warren Christopher when he negotiated freedom and so was Secret Service agent Larry Buendorf on Sept, 5, 1975, in Sacramento when he took a Colt .45 away from a Charles Manson disciple who was trying to murder President Ford.

Of course, there are indifferent, incompetent and surly public employees. Too many of them in fact. But surliness and incompetence are not entirely alien to our vaunted private sector either.

The next time we see a picture of a fire fighter risking his life to save a child or hear about a government worker's risking her career to blow the whistle, let's remember that both of them are public employees. And the next time someone starts in with the predictable blanket indictment of public employees, simply remind him of three

names he should recognize: Jerry Parr, Timothy McCarthy and Thomas Delahanty.

EMPLOYEE FRUSTRATION DRAINING BEST BRAINS OUT OF GOVERNMENT

(By Haynes Johnson)

We've been through waste and fraud week, another president's attempt to capitalize on the public's fed-up feeling about government. And, yes, to do something about it.

Ronald Reagan's team says its campaign against waste and fraud will be led by a new group, "The President's Council on Integrity and Efficiency." Despite that stern Prussian-like title, the effort is worthy and the internal governmental problem real enough. But this highly publicized Reagan campaign, no less than others ordered by his presidential predecessors, masks a greater form of governmental waste.

What's happening inside the government today presents a problem worse than waste and more serious than fraud. The evidence points to a tragic breakdown of the government service itself. If the voices this reporter has been hearing recently are correct, the nation faces a governmental crisis all the more dramatic and damaging because it seems so little understood or discussed. Even though it has been building for years, you don't hear presidents warning about this crisis. They are, you see, part of the problem.

The waste I'm talking about involves the loss of many of the government's best people; the crisis comes from the deterioration of morale and rising frustration at all levels of the U.S. workforce.

Last week the president of the largest union representing federal employees talked openly about a confrontational mood among his membership that could lead to wildcat strikes and slowdowns throughout the government. Even top management officials are discussing the possibility of forming executive unions. A sense of anger and anxiety comes through conversations with government employees of both high and low rank. And the flow of talent out of the government continues.

Stop any top U.S. official on the streets of Washington these days, one of them says, and ask when that person will complete the 25 years of service making him eligible for early retirement. "He'll immediately tell you, not down to the year or the month—but to the exact day," this official remarks. "I think the government is heading down the road to a disaster. Within five years the group of supergrade people that are now between the ages of 50 and 60 will all be gone. The best of them are gone already. . . . The next president of the United States will turn to his top government people and say, 'Do this,' and he'll find no one able to get it done."

That respected official, who entered government service under Eisenhower, found himself rather startled at the apocalyptic tone of his remarks, "but I just can't find any cause to feel other than deeply dismayed today." In that, he seems sadly typical of many others.

From New Year's Day through the first week in March, the federal Office of Personnel Management received 38,000 retirement papers from federal employees—twice the average monthly rate of retirements, according to the Bureau of National Affairs.

A government study completed before the new year provides disturbing evidence of the rapid departure rate in the government's key managerial echelon—officials who oversee two million civilian employees, a budget of more than $600 billion, and whose decisions have a profound effect on all American citizens.

"The retirement rate for career employees at the Executive Level V pay ceiling," the study says, "has increased from 17.6 percent of those eligible to retire during the 12 months ending in March 1978 to an astonishing 57.1 percent during the 12 months ending in March 1980."

Not even the dullest set of statistics about federal retirements can cloak an ominous trend—unless, that is, you are among those who believe all U.S. bureaucrats are as bad as recent presidential candidates have depicted them and think the answer to the woes of government is to dismantle it all.

The problem inside the government extends into every area of the workforce. "The bottom line is morale is very low and frustration is very high," says Kenneth Blaylock, national president of the American Federation of Government Employees, the largest federal workers' union. "Government employees—and that includes managers—feel they've been kicked and kicked and kicked. . . . Now they're forced to pay the price again with a 4.8 percent pay raise in a time of 12 percent inflation and cuts in retirement benefits."

His point about pay and benefits touches a sore nerve among all federal employees. A special commission that recently completed a study of executive government salaries found a direct link between low pay and increasing difficulties of attracting and retaining outstanding people for top U.S. positions.

The commission also found that salaries of key U.S. officials in the three branches of government have fallen dramatically behind the corresponding managerial groups in private business. In addition, in most cases Congress has not allowed annual increases called for in a salary-cost-of-living act for top officials, placing those people significantly behind what they had promised legally. "The resulting compression of salaries," the commission adds, "has created the anomalous situation in which up to seven tiers of management are now being paid identical salaries."

The complaints about pay and benefits are real enough, but the grievances within the government are more serious than economic issues—and they go beyond the present emotional state of fears, rumors and resentments spurred by the Reagan administration's blueprint for federal hiring freezes, pay caps, reductions in force and slashing or junking of government programs and agencies. Another top U.S. official, whose work has drawn praise from a number of presidents, both Democrat and Republican, and who is now highly placed within the White House operation, says we are approaching the end of "a decade of despondency for bureaucrats." He fears the period ahead could worsen.

Ronald Reagan was not the first candidate to run against the bureaucracy and then have to lead it as president. Richard Nixon and Jimmy Carter sounded similar themes, and encountered similar problems in power. Reagan's presidential task is even more delicate, for it is his fate to preside over the government at a time when respect for public officials has declined even further and the concept of public service continues to generate greater expressions of public cynicism.

Reagan's gifts for conciliation and leadership will be put to a critical test in his handling of the federal workforce. He can attempt to inspire it and begin rebuilding a national sense of public service or he can witness a further disintegration in an already dispirited federal establishment. Before Reagan took office, a veteran bureaucrat, Bertrand M. Harding, who headed the National Civil Service League, said he hoped the new president and his people would put aside all their campaign rhetoric about "faceless bureaucrats." As he said, "for better or worse, these 'faceless' persons belong to the president and for the moment are all the glue he has to keep the government together."

The danger is the glue is coming unstuck.●

FEDERAL PROTECTIVE SERVICE ACT OF 1981

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. MITCHELL of Maryland. Mr. Speaker, today I am introducing the Federal Protective Service Act of 1981. This measure seeks to obtain equity status for the over 3,000 Federal protective officers throughout our country who provide protection and security in approximately 10,000 Federal Government facilities under the jurisdiction of the General Services Administration.

Since its inception in the early seventies, the Federal Protective Service has assumed a more complex and demanding role in response to modern conditions of mass demonstrations, terrorism, and government-citizen relations. yet, the benefits, and protection for these officers are not commensurate with the gradual addition of life-threatening responsibilities. In addition, this year, the Federal Protective Service is faced with the administration's recommendation for serious cutbacks in the actual number of officers.

The bill which I have introduced represents a continued effort to eliminate the substandard status which has been tolerated by Federal protective officers for a number of years. Specifically, the Federal Protective Service Act of 1981 provides that:

First, Federal protective officers be considered "law enforcement" officers;

Second, their grades, salaries, and fringe benefits be comparable to those in the Executive Protective Service; and

Third, they be covered under the standard or existing statutory benefits for early retirement, protection against assaults, and survivors' benefits for death in the line of duty.

I know that some have problems with Federal protective officers being accorded such benefits. A number of

people have expressed particular opposition to grade and salary increases, and the consideration of the officers as law enforcement officers. Perhaps these expressions of opposition can be nullified if clarification is added to most people's limited knowledge of the functions of the Federal protective officers.

There is no question that the requirements and functions of the Federal Protective Service positions are very similar to those of police officers. The changing role of the FPO, new demands and aassignments, new qualifications and training requirements, and other activities, have placed the Federal protective officer on the same level as the Executive Protective Service officer in terms of law enforcement, response to emergencies, and the protection of persons and property under novel and difficult circumstances. Such changes undoubtedly merit a shift in the status of Federal protective officers so that they may be categorized as law enforcement officers.

The primary responsibilities of the police officer are defined generally as law enforcement and community service; namely, maintaining public order and security, apprehending offenders, and preventing crime. Inherent in this overall function is the application, when needed, of the techniques of investigation and apprehension. While the frequency of these particular techniques is less when compared to the overall activities of the officer, it is certainly safe to say that the policeman or Federal protective officer who lacks the vital skills, knowledge, and physical capabilities to deal successfully with the need for investigation, pursuit, apprehension, and detention of suspects, is useless.

Further, let me add to this justification by referring to section 8331(20) of title 5, United States Code, which reads in pertinent part as follows:

> "Law enforcement officer" means an employee, the duties of whose position are primarily the investigation, apprehension, or detention of individuals suspected or convicted of offenses against the criminal laws of the United States, including an employee engaged in this activity who is transferred to a supervisory or administrative position.

This brings us to an additional issue on the provision in my bill which calls for the application of existing statutory benefits for Federal protective officers' early retirement. In the past, the position of the Bureau of Retirement, Insurance, and Occupational Health (BRIOH), within the Civil Service Commission, has been that the Federal protective officers are not primarily engaged in the protection of property. Accordingly, the Commission considers the Federal protective officer to be outside the purpose of the provisions relating to early retirement, section 8336(c) of title 5, United States Code. The purpose of these provisions is to permit the retirement and replacement by younger persons of those employees who, because of the stringent physical requirements of their positions and the hazardous activities involved, are no longer capable of carrying on at peak efficiency. Therefore, the operative phrase, in the mind of BRIOH, continues to be the question of the "primary" responsibility of the FPO relative to the investigation, apprehension, or detention of individuals suspected or convicted of offenses against the criminal laws of the United States.

The basic difficulty here is that, traditionally, the function of the law enforcement officer has not been defined in terms of retirement and replacement. The legislative history of section 8336(c), title 5, United States Code, suggests that the intent in using such a definition was to limit eligibility thereunder to the "investigative" category of law enforcement, that is, as distant from the general duty of maintaining community law and order. However, the later inclusion of corrections officers and, still later, firefighters, expanded and refocused the perspective and intent of the standard from the investigative to the occupational work in general and the hazards involved.

I submit that the Federal protective officer is a law enforcement officer under the generally accepted meaning of the police function, as well as the expanded scope which includes firefighters and corrections officers.

Within the overall function, the Federal protective officer is called upon on a regular, recurring basis similar to other uniformed police organizations, to apply the functions of investigation and apprehension of individuals suspected or convicted of offenses against the criminal laws of the United States. Within his or her specific jurisdiction, the officer maintains public order and security, and investigates, apprehends, or detains suspects when necessary.

It should be noted that during the last Congress, a bill which provided death benefits for Federal protective officers comparable to other law enforcement officers reached the President's desk. The measure was vetoed with the rationale that Federal protective officers are accorded the same benefits as other Federal Government workers. Needless to say, the failure to qualify these officers as law enforcement officers is a major impediment.

I urge that my colleagues join in my efforts to eliminate the inequities faced by the Federal Protective Service officers and support the Federal Protective Service Act of 1981.●

A BILL TO TRANSFER CERTAIN PUBLIC LANDS OF THE CITY OF HENDERSON, NEV.

HON. JIM SANTINI

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. SANTINI. Mr. Speaker, I am introducing a bill today which provides for the transfer of some 5,885 acres of public lands to the city of Henderson, Nev. All of this land is currently under control of the Bureau of Land Management and lies totally within city boundaries. Additional land is needed by this southern Nevada community for streets and highways, water resource development, parks, and residential expansion. I would like to add here that this small town is not asking Uncle Sam for a free ride. The land would be conveyed at fair market value.

Mr. Speaker, the fact of the matter is that there should be no necessity for this bill at all. What Eastern town would have to beg the Federal Government for land for townsite expansion, or land for a senior trailer court? What Eastern town needs Federal permission for natural growth and expansion?

Frankly, I thought we had solved at least part of this problem with the enactment of section 203 of the Federal Land Policy and Management Act (FLPMA). I was particularly active in crafting this section because I knew firsthand about townsite expansion problems such as the one facing Henderson, Nev., today. If the law were working as intended, my bill would not be necessary. The city of Henderson would simply request sale of this property and if justifiable, which I believe it is, the land would be offered for sale at fair market value. But as usual, the bureaucracy is moving very, very slowly in those areas where it is not particularly interested or enthusiastic. It took almost 4 years just to get regulations pursuant to the FLPMA section which authorizes land sales. And in the most urban area of southern Nevada, it took 3 years to sell fewer than 700 acres of public land. In the meantime, Henderson continues to grow and its needs are not being met.

I urge my colleagues to give every consideration to this bill for the city of Henderson, and I remind you that every bit of this land lies within the city's existing boundaries. It seems to me the most fundamental element of good Government is that local governments should have jurisdiction over the land within their borders. Thank you.●

THE 10TH DISTRICT (TEXAS) QUESTIONNAIRE RESULTS

HON. J. J. PICKLE
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. PICKLE. Mr. Speaker, I am pleased to submit the results of my 1981 legislative questionnaire. We sent the questionnaire to every postal patron in the 10th District of Texas and received almost 16,000 responses.

The results are fascinating. On tax breaks, more people favor increasing savings incentives and reducing the marriage penalty tax than an across the board rate reduction. My constituents' biggest priority is to balance the budget before reducing taxes.

Central Texans express a strong belief in the market system on energy—endorsing oil and gas decontrol so prices regulate consumption—while endorsing more tax credits to encourage alternate energy sources. There is a strong consensus to reactivate the draft, while maintaining or increasing aid overseas to relieve world hunger.

My constituents would not increase pollution standards, would probably decrease them, and not be willing to pay for more pollution control devices on cars. On a frequently discussed social service program, the questionnaire reflects general realization for the need of food stamps but with tighter standards to eliminate waste and fraud.

An overwhelming majority opposes a constitutional amendment to ban abortions, while feelings are mixed on present prohibitions on medicaid-financed abortions. The emotional issue of busing also gets mixed positions. The biggest plurality feels that Supreme Court reversals of past decisions represent the most likely vehicle for change.

Question 34 asked respondents to name one Government program they support besides defense spending. Answers were quite varied. One of the more popular areas was NASA and the space program. But a wide variety of programs were endorsed, including social security, education, medicare, the EPA, various social service programs and many others.

Legislative questionnaire and replies follow:

Replies given in percent

1. If we have a tax cut or tax restructuring package this year, it should include—

Accelerated depreciation	10
Dividend reinvestment	9
Elimination of the so-called "bracket creep"	11
Elimination or easing of the marriage penalty tax	21
Savings incentives	20
An across the board reduction in the personal tax rate	18
Incentives for research and development	11

2. If you had to make a choice between the following priorities, which should occur first?

Decrease taxes	31
Balance the federal budget	67
No opinion	2

3. To prevent a worsening economic situation, the President and Congress should quickly—

Control wages and prices	11
Decide not to issue new federal rules and regulations	20
Cut federal spending 2% or more across the board for the rest of Fiscal Year 1981	49
Allow the Federal Reserve to continue making money tighter and controlling credit to reduce demand and inflation	20

4. What is the biggest cause of inflation?

Increase of debt and credit by individuals	12
Increased business borrowing	3
OPEC oil price hikes since 1973	23
Deficit spending by the government	62

5. How can we best keep the social security system in the black?

Increase revenues by taking funds from general revenue	13
Increase revenues by raising social security taxes more	4
Reduce benefits across the board to keep the system in balance	11
Eliminate or reduce certain benefits such as spouse or student benefits	28
Reduce benefits by gradually raising the retirement age	17
Pay for a portion of Medicare from general revenues	16
Reduce program growth by restricting cost of living increases	11

6. Should all public employees' pension programs, including those of federal workers, be coordinated within the social security system?

Yes	50
No	37
No opinion	13

7. What is your opinion of President Reagan's decision to immediately decontrol crude oil, gasoline and propane?

Agree	65
Disagree	29
No opinion	6

8. Natural gas prices should be—

Gradually decontrolled to reach full decontrol on schedule in 1985	38
Decontrolled at once	43
Controlled again by the federal government	19

9. To encourage use of solar, wind and other non-fossil energy sources, the government should—

Increase tax credits to stimulate purchase of such equipment	60
Do nothing, since increased energy prices will prompt people to convert anyway	26
Keep tax credits at present levels	14

10. The best way to encourage energy conservation is to—

Ration energy supplies	15
Impose taxes on gasoline, natural gas, oil, etc.	9
Immediately decontrol energy prices to reflect true market demand	56
Depend on voluntary efforts to cut back	16
Do nothing	4

11. To decrease dependency on foreign oil and diversify our local energy base, Central Texas lignite should be mined in compliance with pollution laws, if it can be shown that damage will be minimal.

Agree	84
Disagree	11
No opinion	5

12. Do you support reactivation of the draft—not just registration?

Yes	61
No	32
No opinion	7

13. If the Soviet Union were to invade Poland or another Communist East European country, the U.S. should—

Send U.S. troops to resist the invasion by military means	2
Join NATO troops to resist the invasion by military means	17
Freeze diplomatic relations with Russia	24
Reduce or eliminate trade with Russia and encourage NATO allies to do likewise	49
Maintain relations and protest the action	8

14. The U.S. can best fight extremism in Central and South America by—

Continuing support for coalition governments like Nicaragua and El Salvador	29
Supporting any government no matter the form, if it supports U.S. policy	26
Stationing U.S. troops in trouble spots	5
Increasing aid and weapons sales regardless of the kind of government in power	3
Not getting involved	37

15. To help relieve world famine which is affecting millions of people now, the U.S. should—

Increase food shipments	42
Decrease food shipments	17
Maintain current levels	39

16. Agricultural extension, price supports and loan programs should be—

Continued because they stabilize the farm economy and open up new markets for products	35
Discontinued because they cost too much and violate supply and demand economics	51
No opinion	14

17. The Clean Air Act and Clean Water Act, up for reauthorization this year, should—

Remain the same	34
Contain less stringent pollution standards	37
Contain more stringent pollution standards	29

18. Would you be willing to pay more money for a new car that is more pollution-free?

Yes	30
No	62
No opinion	8

19. Since revenues in the Highway Trust Fund are decreasing should the federal gasoline tax be increased to help maintain the interstate highway system?

Yes 33
No 60
No opinion 7

20. To save money, should the federal government reduce or eliminate mass transportation expenditures—for subways or buses—to cities?

Yes 42
No 50
No opinion 8

21. The domestic auto and steel industries can best recover their competitive edge by—

Federal protections through tariffs to reduce imports 11
Tax advantages to help modernize equipment 18
Reduction of pollution and safety programs 8
A better understanding of consumer preferences 22
A change in the relationship between management and labor 12
Pure marketplace economics—no government involvement 30

22. If the Chrysler Corporation exhausts its government loan guarantees and is still experiencing severe financial problems.

Congress should pass another loan guarantee package 3
Congress should take no further action 56
The government should encourage Chrysler to sell off more divisions to stay solvent 37
Congress should gave Chrysler special tax breaks and exemptions from safety/pollution regulations 4

23. Federal entitlement programs, such as pensions, social security, veterans benefits, housing, etc. should—

Be reduced 28
Continue to be tied to increases in the Consumer Price Index (cost of living) 51
Be tied to some other economic indicator 15
Be increased faster than the CPI to keep ahead of inflation 6

24. The food stamp program, up for reauthorization this year, should be—

Abolished 19
Tightened up to reduce the roughly 12% level of abuse 46
Run solely as a state program 11
Tightened to eliminate people temporarily unemployed 10
Accompanied by better nutrition education 8
Reduced by eliminating automatic inflation escalators 6

25. Congress should pass a Constitutional Amendment to prohibit all abortions.

Yes 17
No 76
No opinion 7

26. Congress should allow abortions under Medicaid.

With no restrictions 34
Under present restrictions of rape, incest or when the mother's life is in danger 48
In no cases at all 18

27. Which of the following methods can most likely stop busing in Austin?

Statutory legislation in Congress ... 21
Supreme Court reversal of past busing decisions 29
A Constitutional Amendment to ban busing, requiring a two-thirds majority vote in Congress and ratification by three-quarters of the states 28
Local school board action 6
Nothing can effectively stop busing, short of fully integrated neighborhoods 16

28. Would you support registration of handguns as long as rifles were not covered by the action?

Yes 51
No 43
No opinion 6

29. Do you favor a lower minimum wage for teenagers under 18?

Yes 70
No 27
No opinion 3

30. The Job Corps program should be—

Abolished 44
Enlarged 9
Reduced 15
Kept about the same 32

31. The Occupational Safety and Health Administration (OSHA) should be—

Abolished 34
Reduced 33
Kept about the same 33

32. Do you support a ceiling on the amount of Political Action Committee (PAC) funds that can be used in Congressional elections?

Yes 75
No 15
No opinion 10

33. The windfall profits tax, the extra tax on decontrolled domestically-produced oil, should be reduced or repealed.

Yes 60
No 32
No opinion ..... 8●

AMA'S RECORD ON THE HEALTH CARE AMENDMENTS OF 1980

HON. WILLIAM HILL BONER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. BONER of Tennessee. Mr. Speaker, the CONGRESSIONAL RECORD of December 5, 1980, carried a curious extension of remarks by the former House Veterans' Affairs Committee Chairman Ray Roberts. In his lengthy extension of remarks my former colleague stated that:

To my knowledge, the American Medical Association made no effort, nor did it take any position, on the Veterans Administration Health Care Amendments of 1980.

Mr. Speaker, as a cosponsor of the legislation, along with my former chairman, I wish to correct the record on this matter. The American Medical Association began lobbying in support of this legislation almost a year prior to Mr. Roberts' extension of remarks. In letters sent to Congressman David Satterfield, chairman of the House Veterans' Affairs Subcommittee on Medical Facilities and Benefits, and Senator ALAN CRANSTON, chairman of the Senate Veterans' Affairs Committee, dated February 6 and March 7 of 1980, the AMA urged swift passage of the legislation within days of introduction of the legislation which later became Public Law 96-330. In order that any interested parties may have a complete understanding of the circumstances surrounding this event, I am submitting the letters from the American Medical Association to the chairmen.

The letters follow:

AMERICAN MEDICAL ASSOCIATION,
Chicago, Ill., February 6, 1980.

Re Veterans' Administration physicians and dentists comparability pay.

HON. DAVID E. SATTERFIELD,
Chairman, Subcommittee on Medical Facilities and Benefits, Committee on Veterans' Affairs, House of Representatives, Washington, D.C.

DEAR CONGRESSMAN SATTERFIELD: The American Medical Association takes this opportunity to offer its support for legislation to make permanent the Veterans' Administration's program of pay comparability for physicians and dentists.

The American Medical Association has been supportive for many years of the federal government's efforts to recruit and retain career-minded health professionals for federal health delivery programs. The statutory requirements placed on the federal government to provide medical care to certain persons and groups cannot be fulfilled without an adequate number of skilled health professionals. The Veterans' Administration Physician and Dentist Pay Comparability Act has contributed in the past and will in the future continue to contribute to the achievement of this goal.

The AMA believes that the compensation levels for VA physicians should be comparable with compensation and benefits received by physicians in other government services. There would seem to be no rational basis for any substantial difference in compensation levels among the various federal services that could well result in self-defeating competition in recruitment and retention of health professionals.

The AMA urges favorable action on legislation that would make the VA special pay program a permanent one, and that would provide compensation levels for VA physicians comparable to those received by physicians in other branches of government service.

Sincerely,

JAMES H. SAMMONS, M.D.

AMERICAN MEDICAL ASSOCIATION,
Chicago, Ill., March 7, 1980.

Re Veterans' Administration physicians and dentists comparability pay.

HON. ALAN CRANSTON,
Chairman, Committee on Veterans' Affairs, U.S. Senate, Washington, D.C.

DEAR SENATOR CRANSTON: The American Medical Association takes this opportunity to offer its support for legislation to make permanent the Veterans' Administration's program of pay comparability for physicians and dentists.

The American Medical Association has been supportive for many years of the federal government's efforts to recruit and retain career-minded health professionals for federal health delivery programs. The statutory requirements placed on the federal government to provide medical care to certain persons and groups cannot be ful-

filled without an adequate number of skilled health professionals. The Veterans' Administration Physician and Dentist Pay Comparability Act has contributed in the past and will in the future continue to contribute to the achievement of this goal.

The AMA believes that the compensation levels for VA physicians should be comparable with compensation and benefits received by physicians in other government services. There would seem to be no rational basis for any substantial difference in compensation levels among the various federal services that could well result in self-defeating competition in recruitment and retention of health professionals.

The AMA urges favorable action on legislation that would make the VA special pay program a permanent one, and that would provide compensation levels for VA physicians comparable to those received by physicians in other branches of government service.

Sincerely,

JAMES H. SAMMONS, M.D.●

STATEMENT IN SUPPORT OF THE NATIONAL ENDOWMENT FOR THE ARTS FUNDING

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. WEISS. Mr. Speaker, we are at a critical juncture in the history of public support for the arts. Just last year the Subcommittee on Postsecondary Education reauthorized the National Endowment for the Arts for 5 more years. We felt that the Endowment's importance to this country warranted not only its continued existence, but considerably more money with which it could perform its vital mission.

Today the Reagan administration is asking Congress to appropriate to the arts a mere $88 million. This figure is $140 million less than that authorized by the Congress last year; half of the amount proposed by President Carter before leaving office; $70 million less than the Art Endowments budget for the current year; and only $36 million more than the $52 million that the President has requested for funding of military bands.

At my request, the Subcommittee on Postsecondary Education held two hearings examining the impact of the proposed budget cuts on the artistic community. At these hearings we heard extensive testimony which contradicted the President's justifications for slashing Federal support for the arts. For example, contrary to the administration's contention that endowment funding has led to a reduction of private and corporate support for the arts, we learned that corporate support has risen from $22 million in 1967 to $436 million in 1979, an increase of 1,881 percent. Individual contributions have also increased dramatically in the 15 years since the establishment of the endowment, up from $226 million to $2.7 billion.

While it is true that many Federal programs are being cut under the administration's economic proposal, few are being slashed as dramatically as the arts with such counterproductive results. Recently Ms. Leontyne Price testified before the Senate Appropriations Subcommittee on behalf of the arts and eloquently warned the subcommittee of the destruction a 50-percent cutback in Government funding will impose on American cultural life. Following is an article which appeared in the Washington Star on March 28 excerpting some of Ms. Price's testimony, which she sang before the subcommittee, in support of funding for the arts.

A MELODIC PLEA FOR THE ARTS FROM DIVA PRICE

(By Ruth Dean)

The Senate hearing room filled with the deep, rich tones of Metropolitian Opera diva Leontyne Price's voice Thursday, raised in a singing plea to Congress to protect the arts from proposed budget cuts.

"Save the performing arts," she sang in a lyric she improvised to the tune of Irving Berlin's "God Bless America."

"Arts that we love./ Stand beside us/and guide us/through the night with those funds from above.

"From the mountains to the prairies/to the oceans white with foam,/please save the performing arts;/don't let us fall."

The packed hearing room and the two senators from the Senate Appropriations subcommittee on the Interior who came to hear her testimony gave Price a standing ovation. But she'd much rather they'd heeded her earlier spoken words protesting the Reagan administration's proposed 50 percent budget cut to the National Endowment for the Arts. Price said she "can't understand why you're going to stop the flow" when for so many years, the arts have been used to showcase the United States' preeminence in the arts around the world.

The alternative, she warned, would be to make this "a total cultural wasteland, and simply kill, bash and dash the dreams of some fantastic, wonderful kids I've met on my tours across the country."

As an example of what the arts endowment has done for communities across the land. Price pointed to the funding of the Dance Theater of Harlem.

The dance theater is such a "strong force" in Harlem, she said, that "for thousands of kids it's an alternative for drug addiction, running around, hustling, crime and alcoholism. And it has even affected their families concerned with their image. They make costumes, run errands, and baby-sit with some of the kids who need help."

This sort of venture, she said, illustrates "the very necessity in the community for such a driving force for so many kids and their future."

Price was more fortunate than witnesses who followed her at the Thursday hearing. She, at least, had two senators to talk to. But after her appearance, a quorum call summoned away Sens. Mark Andrews, R-N.D., and Thad Cochran, R-Miss. They nerver returned, even after what might have been considered a reasonable, interval to vote, as Rep. Sidney Yates, D-III., did twice during the previous day's testimony in a House hearing.

The subcommittee chairman, Sen. James A. McClure, R-Idaho, never appeared either—not even for the testimony of esteemed scholar-investor Buckminister Fuller. However, Louise McClure was overheard in the hall outside the hearing room inviting Price to lunch with her and the senator.

The 85-year-old Fuller, humanist and inventor of the geodesic dome, appearing on a panel in defense of the National Endowment for the Humanities, had no one to expound to except the committee chief clerk who presided for the rest of the session. The clerk reassured witnessess the senators would see "everything you have submitted into the record."

Asked afterwards how he felt facing all those empty chairs, Fuller said, "Those vacant seats were ominous. It's really a shocking thing they weren't there. I came a long way to talk to them."

During his testimony, Fuller said he "deplored cutting down an appropriation that has to do with what people do with their minds." It has taken man 10 billion years to get to this stage, and even in his own lifetime Fuller said, "two billion more galaxies have been discovered in the universe, and we may not be here in another week; things are that critical."

A visionary of the future, whose new about-to-be-published book, "Critical Path," embodies some of this philosophy, Fuller said he sees as the only salvation of the planet "an intergration of all nations." Taking afterwards, he said he didn't even see Soviet Russia as a threat. "They're just trying to show off their way of life, but I think they're finding out not even that worked. All these earthly differences melt away before our confrontation with the universe."●

A USELESS OBSTRUCTION

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. WHITEHURST. Mr. Speaker, an editorial which appeared in the April 6, 1981 issue of Business Week made an excellent point with regard to the need to expedite customs inspections at gateway points, and I am pleased to share this with my colleagues.

Although I have the highest regard for our conscientious, hardworking customs officers, I think it is fair to say that under the present system of regulations, the United States is probably the most frustrating country to enter in the world; I believe that anyone who has traveled abroad to any extent will agree with this conclusion. I know of no other country where the waiting lines are longer or entry takes more time, and I am introducing legislation today to help remedy this, by authorizing the Customs Service to institute methods to facilitate and expedite passenger inspections at entry points by means of what has become known as the "red door/green door" system.

If we are to encourage tourism on an international scale, I believe it is incumbent upon us to make visiting the United States a pleasant experience from the very beginning. At the present time, our welcome mat is very much in need of repair.

I commend the editorial to my colleagues, and I would welcome their support for this bill.

Thank you, Mr. Speaker.

A USELESS OBSTRUCTION

If President Reagan's budget cutters are serious about taking the waste and inefficiency out of government operations, they could do not better than to start with the U.S. Customs Service. Here is an agency that has increased its budget from $54 million in 1960 to $770 million this year. In the same period, it has doubled its staff, which now numbers around 14,000. And yet it is known around the world as the most picayune, quibbling, time-wasting customs system on earth. The time it costs international travelers each year is beyond calculation except by astronomers.

There can be no question of abolishing the Customs Service entirely. With $250 billion a year in merchandise imports to process, it is understandable that all but 800 agents are involved in collecting duties and inspecting cargoes. The problem is to reorganize the activities of the 800 suitcase-churners to increase their productivity and reduce their numbers.

Most industrial nations have practically eliminated the ordeal of customs clearance by adopting the so-called "red door-green door" system. Passengers arriving at gateway points can breeze untouched through a green door if they have nothing to declare. Passengers who must pay duties get faster service because the crowds are much reduced. Spot checks keep travelers with elastic consciences from using the green door for smuggling. Large shipments of contraband, especially drugs, are picked up by special agents working on tips from informants—which is also true of the U.S. system.

A bill just introduced in Congress would provide for a one-year test of the red door-green door system at five entry points. This would be a step in the right direction but there is no reason to be so cautious about it. Fast clearance for travelers with nothing to declare has proved out all around the world. The U.S. should adopt the system without delay and start saving the expense now.●

FREE PRIVATE ENTERPRISE WEEK HIGHLIGHTS AMERICANS' INITIATIVE

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. ROTH. Mr. Speaker, I would like to call my colleagues' attention to Free Private Enterprise Week in the State of Wisconsin, taking place from April 5 to April 11, 1981.

I think we can all take this opportunity to reaffirm our commitment to the spirit of personal initiative and the drive to achieve that fueled America's greatness in the past and will light the path ahead.

Free Private Enterprise Week has special significance in these days as we focus our energies on restoring the health of our economy by moving to deregulate private enterprise, reduce inflation, and provide additional incentives to growth and productivity in the private sector.

Americans have long enjoyed the highest standard of living in the world. Central to this achievement is Americans' freedom to rise above his or her circumstances and make their destiny what they will. Free Private Enterprise Week speaks to the innovator, the inventor, and the risk-taker who has made America strong and who will continue the tradition of economic freedom.

I know my colleagues will join me in renewing our covenant with a free and prosperous private enterprise.●

MY COMMITMENT TO MY COUNTRY

HON. BUDDY ROEMER

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. ROEMER. Mr. Speaker, it is an honor for me to share with my colleagues an excellent speech written and delivered by one of my constituents, 18-year-old Mary Elizabeth Craigo of Haughton, La. This speech, entitled "My Commitment to My Country," was written for the voice of democracy scholarship program sponsored by the Veterans of Foreign Wars and was awarded first place in Louisiana. It describes very eloquently the rights and privileges of this great country that we too often take for granted. I am proud to represent patriotic young people such as Mary Craigo.

The address follows:

I wake each morning not to the roar of artillery, but to the sound of the gentle breeze whistling through the trees. Outside my window, the birds sing peacefully—their natural beauty untouched by the tragic destruction of war. As I look outside, I see sunshine and blue skies, skies which would be dark with enemy planes if there had not been those willing to make a commitment. I then rise and walk the path of freedom knowing that it can lead to wherever I want to go and that I am free to speak my feelings along the way. This path was made smoother by those who were committed. Upon reaching my destination, whether it be school, church, or merely a friend's house, I stop and gaze around me. I stand surrounded by rolling hills, green meadows, and crystal clear lakes; and I know that this is my country and I too, like many Americans before me, must be committed.

A commitment, by definition, is an intellectual or emotional bond to some course of action. What I know about America, bonds me intellectually to many commitments. As I study about how my forefathers struggled and suffered, that I might have the freedoms I possess today, I realize that it is my responsibility to take advantage of these freedoms and use them to better my country.

When I reach the voting age, it is my duty to view the candidates equally, then make a choice, and exercise my right to vote. Here again—I am committed.

Each time I attend church, I thank God for those who fought and died, that I might have the freedom of religion. I am committed to use this religious freedom so that I can set an example for others to follow and also as a guide when raising my children to be law abiding, God fearing adults. I must teach them to love and respect this land, her flag, and the principles which make her the "Land of the free and the brave," a land well worth committing themselves to.

When I pick up a newspaper or magazine I am reminded that all Americans have the freedom of speech. The freedom to voice their opinion verbally or in print. But there are times when I am angered to hear of those who insist upon using this freedom destructively—people who speak derrogatorily and disrespectfully about America and her way of life. Those who have this type of negative attitude, do not realize that they are responsible for making the changes they desire. The entire purpose behind the freedoms granted us, as Americans, is to make us free to improve our country, not by counterproductive statements, but by taking positive action, by making a commitment!

Not only the things that I know, but also the things which I feel commit me to America. When I see the flag being raised or hear our National Anthem, the stirring in my heart confirms my emotional commitment to my country. When I think in terms of an emotional commitment, the word "marriage" comes to my mind. The marriage commitment is one of the strongest commitments made in the lives of two individuals. I can compare my commitment to America to that of marriage because it is based on love and respect, a relationship of giving as well as taking. If I expect to take advantage of all the freedom granted me, as an American, I must give my trust, my loyalty, and respect in return. I must be willing to make a vow of commitment. I must be willing to say that I, do indeed, take America to be my country, my land, my home—to love, honor, and cherish, for better or for worse, in time of peace, or in time of war, through prosperity or times of need, for as long as I shall live. And with my heart I do pledge my life, my soul, and my undying devotion forever.

I must be committed to keeping this vow, for it is the bond which makes me free; which makes me an American—an American who can dream—who can reach for any goal with never ending effort—an American who enjoys a great number of privileges and is responsible for preserving each and every one of them. I now take my stand: An American with a commitment!●

IOWAN HEADS NATIONAL TRUCKING ASSOCIATION

HON. THOMAS J. TAUKE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. TAUKE. Mr. Speaker, I am pleased to call to the attention of my colleagues the fact that Mr. Herald A. Smith, Jr., chairman of CRST, Inc., of

Cedar Rapids, Iowa, was elected president last week of the Common Carrier Conference—Irregular Route.

The conference, an affiliate of the American Trucking Associations, represents more than 600 trucking companies throughout the country.

Mr. Smith brings to the presidency a broad background of knowledge and experience in the trucking industry dating since 1946. Among other high industry offices he has held, he recently was chairman of the Iowa Motor Truck Association.

Along with his wife Miriam, he is a community leader, giving generously of his time to promote many worthwhile civic and community endeavors.

The conference has chosen well, and I am pleased that his abilities and accomplishments have been recognized by his peers in the trucking industry.●

OUR MONETARY CRISIS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. McDONALD. Mr. Speaker, deficit spending and an unsupported dollar are the devices that have been determining our doom for several decades now. President Reagan has proposed to change this trend and has said much about what he is going to do. The problem is that his actions are not even coming close to the rhetoric he proclaims; a sad but true report. Dr. Franz Pick, a contributing editor to the "Silver and Gold Report," March 1981, explains this disappointment and what it is going to mean for Americans. I commend it to the attention of my colleagues:

AMERICAN INDUSTRY, DECAPITALIZED BY FOUR DECADES OF INFLATION, IS LIVING ON CASH FLOW AND BANK LOANS TO STAY IN BUSINESS

(By Dr. Franz Pick)

Throughout history, governments have always spent more money than they've received from revenues. In order to keep this up, governments have had to cheat their citizens—by borrowing money in exchange for unkept promises to pay it back with interest.

This is a charade which regimes and a gullible public continue to play today.

In the United States, the new ruler confronted this age-old problem by making a widely-praised "speech from the throne." In it, he proposed to master the problem with some sort of four-year plan to wipe out the budget deficit.

Politicians through the ages have known that the voters do not want realism; they want magic! And it seems as if the new ruler and his technicians fancy themselves as prestidigitators par excellence.

Stopping inflation, or even reducing it below 10% a year, is a political illusion. So long as all the so-called "off-budget" borrowing by the various virtually autonomous agencies remains practically untouched, then it is an act of hypocrisy to believe that the finances of the government can ever be sanitized.

Nonetheless, optimism of almost messianic proportions has greeted the speech from the throne. The new ruler says that taxes are being cut to activate a fresh avalanche of goods into the marketplace—and this will meet the so-called inflationary demand supposedly resulting from too much money chasing too few goods.

But the automobile showrooms are filled with vehicles that cannot be sold, while residential housing finds few buyers.

As for increased productivity reducing the rate of currency debasement, how much more hair can a barber cut, or how many more shoes can a cobbler repair, or how many more pastramis on rye can a delicatessen put together?

The "Great American Inflation" is not the result of too much demand and too little supply. It is the result of the willful and irresponsible abuse of the creation of money and credit.

Spending cuts and tax cuts tied together with the pink ribbon of statesmanship have dazzled holders of the Minidollar into believing that the American currency has finally left the primrose path of debasement.

Unfortunately, nothing could be further from the tuth. The titanic abuses in the creation of money and credit since 1940 have irreversibly undermined the financial structure that underpins the Minidollars. So now even if a balanced budget were to be realized, it could in no way reduce the Greenback's loss of purchasing power.

After four decades of maltreatment of the nation's money, the vested interests of inflation have become too powerful and too influential. They have absolutely no desire to see their financial empires and attendant political privileges dismantled by such an obscene thing as a monetary unit stable in purchasing power as well as in foreign exchange value.

Moreover, American industry, decapitalized by the four decades of inflation, is now living on cash flow as well as bank loans to stay in business—not to mention paying out dividends.

It is no accident that the same familiar faces of money moguls can always be noticed at the fringes of the Oval Office regardless of who the occupant may be or his publicly professed politics.

Therefore, all attempts by the new regime in Washington to cope with the debasement of the Minidollar will, in the end, prove to be in vain. Whatever successes it may have will be short-lived. And they will have been achieved more by accident than by design.

Meanwhile, substantial buying of gold by central banks of Arab countries, as well as the central banks of underdeveloped plus industrialized lands, was noticed around the $US500-per-ounce level.

Libya continued to appear as an aggressive buyer of bullion, as 17 tons of the yellow metal were shipped out of Britain to that African nation during the last 90 days. South Africa still withheld gold supplies from the market.

Gold buying by central banks has been one of the more positive features in the gold markets. These banks don't put the excess Minidollars of their monetary reserves into American money markets—which are currently paying extortionist interest rates that a loan shark might envy. Instead, they have chosen to convert their Greenbacks into bullion, which yields no interest.

These banks know only too well the true condition of the Minidollar. They know the price inflation will be increasing and not decreasing.

Meanwhile, the final phase in the current decline of the gold price seems to be in the making. Many long positions in the yellow metal have been liquidated.

Also at this time, the silver-gold ratio has been widening, which can generally be taken as an indication that silver is becoming underpriced.

The world's most famous silver hoarders, the two gentlemen from Texas, are again making headlines. There have been the customary rumors that the decline in the silver price has been triggered by selling from the vast stocks of the white metal owned by the siblings from the Lone Star State.

While this financial daydreaming has been going on, the Hunt brothers have been shifting the location of their silver stocks. In recent weeks, they shipped about 27.5 million ounces of silver from their storage vaults in Chicago to another bank vault located in the state of Delaware.

This transfer of silver bars is ostensibly being done for tax reasons. The real reason, however, will soon be felt in the marketplace.

In addition, it has been estimated that hoarders presently own silver exceeding one year's consumption of the metal by industrial users. This is supposedly an overhang that will keep silver's price down.

But hoarders do not sell. They have bought the white metal to replace their paper money assets, for the forces generating the inflation are much too strong to be turned back by the speech from the throne.

All in all, chances are that the bottom of the slide in silver and gold may be reached before Easter.●

RECOMMENDS INCREASE IN AUTHORIZATION FOR PUBLIC HOUSING OPERATING SUBSIDIES

HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. GONZALEZ. Mr. Speaker, the purpose of this bill which I am introducing today along with my colleague, Mr. SCHUMER of New York, is to increase the fiscal year 1981 authorization for public housing operating subsidies. The increase is necessary to reflect a proposed $140 million supplemental appropriation for operating subsidies during fiscal year 1981.

Operating subsidies are provided on an annual basis by the Congress to public housing authorities for the purpose of operating and maintaining federally financed public housing projects. A very large portion of these operating subsidies are used to fund utility costs. As much as 36 percent of operating subsidies are used for utility costs. For fiscal year 1981, the administration had requested $862 million for these operating subsidies. This amount was based on an assumed 12-percent increase in utility costs from 1979 to 1980, and an 8.8-percent in-

crease from 1980 to 1981. However, utility costs have actually increased at a far greater rate. HUD is now estimating that utility costs increased by 25 percent from 1979 to 1980, and by 16 percent from 1980 to 1981.

The bill which is being introduced today would amend the authorization levels for this program in order to reflect these increased utility costs. It would increase the fiscal year 1981 authorization for operating subsidies to $1,110,800,000, instead of the $826 million provided for fiscal year 1981 in the Housing and Community Development Act of 1980.

Although this bill appears to require an increase totaling $284.8 million over the fiscal year 1981 funding level provided in the 1980 Housing Act, the actual increase over current appropriations is only $140 million. Let me explain how this could be so. First, a printing error in the 1980 act resulted in publication of the figure $826 million, instead of the $862 million that was intended to be authorized. The appropriations act for fiscal year 1981 took this $36 million error into account, and also provided an additional $108.8 million appropriation to reflect the actual 25-percent increase in utility costs from 1979 to 1980. So the actual appropriation for fiscal year 1981 was $970.8 million. However, the increase in appropriations has not yet been reflected in an authorization act. This bill will account for these already appropriated amounts. It will also increase the authorization by an additional $140 million, in order to reflect a shortfall in the funding of public housing utility costs that occurred from 1980 to 1981.●

COMMODITY ALLOWANCE PROPOSAL

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. GOODLING. Mr. Speaker, I am pleased to sponsor, along with my colleague, Representative WILLIAM D. FORD of Michigan, a bill to streamline the system by which agricultural commodities are made available to local schools. This legislation is an improved version of a similar bill which we introduced during the last Congress along with a list of 26 bipartisan cosponsors and which just missed being reported out of the Education and Labor Committee on a tie vote. This bill is designed to streamline the system by which agricultural commodities are made available to local schools by establishing a more efficient commodity delivery mechanism. An additional virtue of the proposal is that it is designed to achieve a significant savings at the State and local levels while producing a modest savings at the Federal level.

Currently, school districts rely on U.S. Department of Agriculture (USDA) donated commodities for about 20 percent of their food requirements, with the remaining 80 percent being purchased locally. To supply this 20 percent, USDA buys foods at market prices under its commodity price support and surplus removal programs, and then has these commodities moved to various locations within the States. In addition to the USDA purchase price and initial transportation costs, States and local school districts must pay substantial amounts for warehousing, handling, and transporting of these products. The present system of purchasing, processing, warehousing, distributing, handling, and storing of these USDA-bought foods operates largely outside the normal channels of trade. These foods move in a separate USDA food system in which there is, at best, limited competition and in which the costs are enormous.

What our legislation would do is replace the USDA national purchase and distribution of commodities with an allowance system to permit local school districts to buy their foods at the local level.

The savings involved can be achieved without any child now eating a school lunch being denied access to the program. These savings can be achieved without any reduction in the number of pounds of price support and surplus agricultural foods moved to these school lunch programs. These savings can be achieved simply by going from the separate expensive and inefficient USDA food system to using the existing private food system to make a share of our agricultural production available to the Nation's school lunch programs.

Use of a commodity allowance system will maintain the role of the Congress and USDA in determining which commodities are in need of price support and surplus removal. It will retain the right of Congress and USDA to determine the amounts of these commodities which should be moved off the market. It will retain the responsibility of the USDA to give the schools help in making them intelligent buyers. Such a system will move at least the same amount of commodities but it will do it in a more efficient and more timely fashion than the present USDA food system since the private food sector will do the job.

The commodity system will not jeopardize, in any way, the funds which the Congress has approved for commodity assistance to the national school lunch and other programs. These same funds will still be used for commodities. They will still be used for the same price support commodities probably with roughly the same pounds and dollars as now. They will still be used for many of the same surplus removal operations. The dollars and pounds will remain about the same there, too.

A commodity allowance system improves the flexibility that schools and other agencies have. Under a commodity allowance system, the local school lunch programs will be buying 100 percent of their food needs at competitive bid prices from local vendors rather than the present 80 percent. What the school lunch programs had been getting in USDA-bought foods through the expensive and inefficient USDA food system will be replaced by the same commodities bought from local vendors. There would be one extremely important difference—the local school lunch programs could use their allotment of commodities to buy the specified commodities in a form which they can readily use in their programs. They would no longer have the USDA in Washington deciding in what form they should receive their commodities.

Congress over the past few years has steadily provided alternatives to the Federal commodity programs. Food stamps replaced the family commodity distribution program. In the Nation's elderly feeding program, local agencies were given the option of receiving cash instead of commodities and are doing so in large numbers. The same holds true for child care programs.

Eliminated from the bill of last year is any reference to USDA deciding and communicating to the States and school districts amounts and quality of purchases. USDA simply says it wants to move a certain commodity; it allocates a certain dollar allowance to provide a producer assist for moving it. School districts are merely directed to report their purchase. This would eliminate the paperwork arguments that were made against the commodity letter of credit proposal of last year. At the same time, it would create a commodity program for school lunch and other programs which achieve its congressional objective of increasing the use of domestically produced agricultural commodities in these programs. Another improvement over last year's proposal is the inclusion of suggestions made during hearings by the Federal Emergency Management Administration (FEMA) to provide for the availability of assistance during any disaster relief effort. In addition, this bill also provides for a commodity allowance option for summer camps, child care food program, Older Americans Act—State option including cash—and continues from last year the exclusion of the programs for supplemental feeding and Indian assistance.

It should also be noted that Senator SYMMS has asked the General Accounting Office to do a study of the commodity program costs from A to Z.

In this way, we will soon have GAO figures on which to judge the exact extent of the excess costs of the current inefficient commodity distribution program.●

ANNUAL ACIM AWARDS TO WESTCHESTER RESIDENTS

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. OTTINGER. Mr. Speaker, I am pleased to announce that on April 11, the Westchester Women's Division of the American Committee on Italian Migration (ACIM) will honor four Westchester couples at its humanitarian spring luncheon and fashion show. I wish to call my colleagues' attention to this annual event and to the tribute which is awarded to outstanding citizens of the Westchester area. I would also like to share with my colleagues a portion of an article which recently appeared in the Gannett Westchester Newspapers on March 28, 1981.

The honorees, who will be presented handpainted scrolls from Italy, will be lauded for their dedicated service to and support of civic, professional business, educational and social programs of benefit to many races and creeds; for devotion to their community projects, and for constantly remembering those of their heritage through support of the ACIM legislative and social services programs.

Honorees include Salvatore S. and Rose Argento of Valhalla; James R. and Helen E. Caruso of Armonk; Charles J. and Theresa M. Cirelli of Yorktown Heights; and Theodore V. and Donna R. Garofalo of Scarsdale.

Mr. Argento, a native of Striano, Italy, is the owner of R. Argento & Sons Inc., White Plains. He has been and is still actively involved in many civic, fraternal, and community organizations, among them the White Plains Lions Club, Westchester Chapter of ACIM, Westchester Lighthouse, and the Boys Town of Italy of Westchester.

Mrs. Argento has been active as a Girl Scout leader, Brownie den mother, president of the St. John's Elementary School PTA, and many other organizations.

Mr. Caruso, a member of a White Plains law firm, served as county judge of Westchester from 1973 to 1977 and as acting supreme court justice from 1974–77, He, too, is very active in civic, political, and fraternal organizations throughout the county.

Mrs. Caruso is associated with the American Red Cross, USO Campaign Committee, Cancer and Heart Fund campaigns, and many others.

Mr. Cirelli, the recipient of the ACIM President's Silver Bowl Service Award, has been a member of ACIM since 1951. Active in civic, political, social, and community affairs, he has been especially dedicated to the plight of Italian immigrants. He is presently vice president of the Yonkers Lions Club.

Mrs. Cirelli, is recording secretary for the Lakeland School Board and teaches part time for St. Elizabeth Ann Seton Elementary School in Shrub Oak.

Mr. Garofalo is budget director for the city of Yonkers. He is chairman for the Columbus Day celebration of Yonkers and served as chairman of the 1980 Enrico Fermi Scholarship Fund.

Mrs. Garofalo is executive assistant to the administrator of Yonkers General Hospital. She serves on various committees of the Enrico Fermi Scholarship Fund.

In addition to the honorees, credit should also be extended to Mrs. Carol Martinelli, who is the chairwoman of the luncheon, and fashion show director Elaine Van Scoyoc. Vera DeMarco is president of the Women's Division of ACIM●

WELCOME TO OUR NEWLY NATURALIZED AMERICANS

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. GILMAN. Mr. Speaker, it is with sincere pleasure that I congratulate the 57 Orange County residents of New York's 26th Congressional District who have recently chosen to become citizens of the United States, with all of the privileges, freedoms, and responsibilities that American citizenship entails.

Our Hudson Valley region in New York State is proud of its newest citizens and I invite my colleagues to join in welcoming the following newly naturalized Americans and extending to them our best wishes for a happy and prosperous life in their new homeland:

Amnon Aharonov, Terry Elliott Andresen, Heather Joyce Anspach, Moses Brach, Vincent Cannella, Candido Manuel Carmona, Jr., Elizabeth Lugtu Centeno, Peter Mark Centeno, Jacqueline Young Hi Kim Choo, Benjamin Yeon Sahang Choo, Dagmar Ludmila Cisar, William Donald K. Clark, Christos Davis, Yoo Mi Desmond, Aurora Barros Domingues, Rosario Durante, Michael Feder, Sara Feder, Fernando Lopes Ferreira, Carlos Augusto P. Ferreira.

Ada Elisabeth George, Joseph Anthony M. J. George, Michael Giannakouros, Carmelo Giunta, Lilia Socorro Halk, Wally Erica Hennessy, Walter Franz Herrmann, Adela Padilla Heth, Margarita Ioannidis, Thomas P. John, Alexandros Lagakos, Sotirios Lagakos, Young Bong Lee, Mona Lehuray, Marisa Contessa Lofrano, Antonio Mennite, Henry Michtalik, Maria Michtalik, Nancy Jean Moore, Johana Maria Nagy.

Abraham Nagy, Rosina Paonessa, Zrinko Petrak, Teresa Pillitteri, Antonio Pillitteri, Gillian Jane D. H. Plevritis, Esther Porgesz, Eugen Porgesz, Josephine Ruebenstahl, Mallika Salgunan, Marta Ondina Sanchez, Hiroko Ellie Smith, Wolfram Karl-Heinz Stahl, Geetha Mary Thomas, Aliette Toussaint, Samuel Constantine Wilson, Cecilia Yannitty.●

GROWTH OF MONEY MARKET MUTUAL FUNDS

HON. DAVID W. EVANS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. EVANS of Indiana. Mr. Speaker, I would like to take this opportunity to call the attention of my colleagues to what promises to be one of the major financial issues coming before the 97th Congress; namely, the tremendous growth of money market mutual funds. Assets of the Nation's 107 money market funds grew faster last week than any week in their 7-year history, increasing $3.7 billion to a record $105 billion. The new total represents an increase of more than 40 percent since the beginning of 1981.

The reason for this explosive growth is, of course, the fact that the funds are currently paying interest to consumers at approximately 16 percent, with relatively small amounts required to open an account and instant liquidity in the form of check-writing capability. This is precisely the type of innovative service which should be encouraged but, unfortunately, it is having some deleterious side effects on the Nation's regulated financial institutions, mortgage and credit markets.

I am pleased to note that the Subcommittee on Domestic Monetary Policy will commence hearings on the difficult public policy issues presented by the money market mutual fund phenomenon. In an effort to assist my colleagues in familiarizing themselves with the arguments pro and con, I insert a recent New York Times editorial on this subject, and a response by Dr. Saul B. Klaman, president of the National Association of Mutual Savings Banks, be included in today's RECORD.

[From the New York Times, Mar. 20, 1981]

CONSUMER INTEREST AND BANKING INTERESTS

It seems too good to be true. By parking your cash in a "money market" mutual fund, you can earn 16 percent interest and still have instant access to your nest egg. But it is true, and both banks and savings and loans are worried that the money market funds are draining enormous sums from their deposits. To counter the threat, they are trying to chop the funds down to size by pressing for changes in Federal and state regulations.

Some of the changes the banks want, for example the right to set up their own mutual funds, would be harmless enough,

perhaps even desirable. But their major purpose is to reduce competition by limiting the existing funds—and that would be unfair to savers.

Traditional thrift institutions, notably savings banks and savings and loan associations, are in trouble. Most of their assets are home mortgages, written years ago, earning as little as 7 or 8 percent interest. That seemed fine as long as the interest they had to pay to savers was about 5 percent. But to attract new deposits and keep old ones in inflationary times, they must offer rates competitive with Government bonds and other securities. Those rates are now somewhere between 12 and 16 percent.

The banks propose the elimination of costly regulation, to make them more competitive, but even that action wouldn't help much. Some would eliminate special reserve requirements on deposits. Others would simply allow banks to set up subsidiary money market funds, a strategy now prohibited by Federal law. It is hard to object to any proposal that increases competition for savers' dollars. But the potential benefits are quite limited.

The other prong of the banks' strategy is to squeeze the money market funds. Representative Jim Leach, an Iowa Republican, wants to impose reserve requirements on the funds, immobilizing a portion of their assets and lowering the return they can pay to depositors. Probably the more potent threat is from state legislatures, where banks are trying to prevent the funds from providing check-writing privileges.

They might get the legislation they want. But making money market funds less attractive isn't likely to help the banks get back deposits at low interest rates. About $92 billion of the $105 billion now in the money funds is from corporations, pension funds and other large institutional investors. If they were pushed out of the funds, they would reinvest in Government bonds and other high-yield assets, not bank savings accounts.

Some of the remaining $13 billion, mostly the savings of middle-income people, might flow to the "thrift" institutions. But compare $13 billion with the trillion-plus dollars now in various types of savings accounts: a drop in the bucket. Besides, it would be unfair to penalize small savers, who are barely staying ahead of inflation at current high yields.

The "thrifts" do indeed have a problem, and one not of their own making. There are other, better fixes that could, at minimum, keep them solvent until they can shed their portfolios of cheap mortgages. But it is hard to imagine a less effective or less fair approach than attacking the money market funds.

[From the New York Times, Mar. 31, 1981]

BANK-LIKE RESTRICTIONS SHOULD APPLY TO MONEY-MARKET FUNDS

To the Editor:

The March 20 editorial on "Consumer Interest and Banking Interests" is based partly on the factual error bearing on the impact of money market mutual funds on depository institutions. An equally serious error is the failure of the editorial to address the public policy issues arising from the growth of the funds.

The editorial claims that the major purpose of bank and thrift institution legislation efforts in this area is to reduce competition by such means as imposing reserve requirements on money market funds, which would be "unfair" to savers. According to the editorial, such legislation would be "ineffective" since only $13 billion of the $105 billion now in the funds—"a drop in the bucket"—is held by individuals who might otherwise place their savings in banks and thrift institutions.

As for the factual error, a quick check with the Investment Company Institute—the trade organization representing the mutual fund industry—would reveal that 60 percent, or about $63 billion, of the total volume of savings in money market funds represents the holdings of individuals. Even a casual observer could reasonably conclude that most of these funds would have been attracted by depository institutions.

This shift of funds has serious implications for the allocation of credit in the nation. Money market funds have been a vehicle for diverting savings away from thrift institutions and small, community-oriented commercial banks in favor of giant commercial banks located in the money centers. This arises from the fact that money market funds invest a large part of the money they attract in the obligations of large commercials banks and bank holding companies. The results are reduced availability of mortgage funds for home-buyers and a redirection of credit from small businesses to the large domestic and foreign customers of money center banks.

As for the remedy, savings banks would like nothing better than to be able to compete more effectively against all comers. They are handicapped, however, by the impact of government restrictions, past and present. Among the obstacles they face, as the editorial recognizes, are their large holdings of long-term mortgage loans acquired pursuant to government policy in earlier, pre-inflationary periods of low interest rates. Other government restrictions are also imposed on depository institutions and the question is: Why shouldn't they apply equally to money market funds?

Reserve requirements, cited in your editorial, are a case in point. Recent legislation imposed universal reserve requirements on depository institutions, in order to make Federal Reserve monetary policy more effective in the battle against inflation. If the public interest demands that these requirements be applied to depository institutions, then they should also be extended to organizations which provide bank-like services but under a different label.

SAUL B. KLAMAN.●

HIGH INTEREST RATES ARE AN ECONOMIC PLAGUE

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. DORGAN of North Dakota. Mr. Speaker, the people of my State, and of this Nation, are angry about high interest rates, and they are wondering why we in Congress are not doing anything. Farmers, small business people, and homebuilders are suffering under interest rates unprecedented in history, and savings and loans are paying so much for their money that they are threatened with extinction.

While the Federal deficit is part of our interest rate problem, it is only part. The other part is the deliberate policies of Paul Volcker and the Federal Reserve Board—policies which the Fed promises to continue even if the administration's economic program goes into effect.

One of my constituents, Mr. Erwin Schumacher of Drayton, N. Dak., has written a short piece on this subject which I think represents the views of many, many people in my State and across the Nation. And Erwin Schumacher knows whereof he speaks. At the age of 83 he has had a long and active career in the agricultural cooperative movement in North Dakota and lost a race for Governor of our State in 1948 by only one vote per precinct. Mr. Schumacher wants to know when Congress is going to do something about the Fed's crippling interest rate policies, and I think we in Congress owe citizens like Mr. Schumacher an answer.

Mr. Speaker, I commend to you and my colleagues Mr. Schumacher's comments.

INTEREST RATES

The most insidious, dangerous and inflationary influence that affects us is the usurious interest rates now promoted by the Federal Reserve Board.

Interest rates are pumping the life blood out of our national economy. They are piling profits into the hands of those who have no need for them and are adding to the cost of goods and services.

The burden of this high interest falls on the ultimate consumer. It must be controlled—and at once. It must not continue. It cannot continue without damaging the nation and its working people. We will have economic chaos if the Fed's high interest rate policies persist.

The President and the Congress of the United States must carry out their constitutional responsibility under article 1, section 8, paragraph 5, which clearly spells out their duty to keep watch over our medium of exchange.

When FDR was elected, the U.S.A. was in a similar monetary crisis. He acted at once—drastically. FDR called for a reorganization of our national and state banking systems. He closed all of the banks and "made a new beginning." (Seems that I have heard this slogan lately.) When the banks were reopened the prime rate was one-half of one percent. Our economy then began to grow and stabilize. Even in 1949 the prime rate of the Federal Reserve was two percent. Since then the prime rate has been unstable and has been continuously boosted upward until it has now gone past 21½ percent on occasion.

Our new President threatened to do something drastic at once to turn things around. Let's start on the Federal Reserve policy first. This is where the most can be done the soonest, and in the most effective way, on the highest priority problem we have. Action to lower interest rates will yield effective and lasting results for our national economy.●

BLUEPRINT FOR A HOUSE THAT WORKS: PART VI

HON. TRENT LOTT
OF MISSISSIPPI
IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. LOTT. Mr. Speaker, during the last Congress our Select Committee on Committees surveyed Members on a wide variety of issues relating to the House as an institution. Nearly 70 percent of the respondents agreed with the proposition that the House committee system is in disarray and in drastic need of revision, while only 21 percent disagreed.

My own committee improvement amendments, House Resolution 100, introduced on March 4 of this year, stems from that same conviction that our committee system is becoming increasingly fragmented, unworkable, and unmanageable, and as a result, the legislative process is at the point of breakdown and paralysis. Our committee jurisdictions are badly tangled, we have too many subcommittees, subcommittee assignments, and staff. As a result of this proliferation of subcommittees we have been forced to resort to such phantom legislative procedures as miniquorums and proxy voting. And our oversight function is being largely overlooked. What is clearly needed is a "Blueprint for a House that Works," and my committee improvement package is designed to meet that need.

In today's blueprint discussion, I would like to relate my proposals to the results of the select committee's survey.

One of my proposals calls for a limitation on subcommittees to no more than six per committee, and a limitation on Member subcommittee assignments to no more than four. According to the survey, 81 percent of the Members agree that the number of subcommittees should be reduced, and 82.6 percent agree that a limitation should be placed on Member subcommittee assignments. The select committee endorsed limitations similar to those contained in my proposal.

Another one of my amendments calls for the abolition of joint bill referral, while retaining split and sequential referrals. While only 28.4 percent of the Members favor this idea and 34 percent oppose it, another 37.6 percent either gave no answer or were undecided. And 62.4 percent of the Members agreed that in joint referrals a lead committee should be designated and given authority to bring a bill to the floor if secondary committees have not reported within a specified period of time. My proposal likewise requires the designation of committees of principal jurisdiction in multiple referrals and expands the sequential referral authority. The select committee also endorsed this lead committee proposal.

On the issue of phantom legislative procedures, I have proposed the abolition of proxy voting in committees and the restoration of a majority quorum requirement for transacting business, as opposed to the present one-third quorum requirement. While the proxy voting ban was narrowly opposed by Members by a margin of 43.5 percent to 52.5 percent, over 75 percent of House Republicans favor such a ban. And the majority quorum requirement is favored by all Members by a margin of 47.8 percent to 42.4 percent.

My committee improvement package also calls for the House adoption of an overall committee staff ceiling at the beginning of each year, to which the committee funding resolutions would then have to conform. Some 63 percent of the respondents agree that committee staffs are too big, and over 80 percent agree that some kind of ceiling should be placed on committee staff overall.

I have also called for a strengthening of our oversight procedures by requiring formal committee adoption of oversight agendas, and House adoption of a consolidated oversight agenda, giving the Government Operations Committee and the majority and minority leaders authority to propose amendments to those agendas. Over 75 percent of the Members in the survey agree that the House is not doing an adequate job of oversight, and, by a margin of 39 to 32.6 percent, Members agree that the oversight coordination role of the Government Operations Committee should be strengthened.

Unfortunately, the select committee did not ask a question on my final proposal, which is to require equitable party ratios on House committees in line with the overall House party ratio.

Mr. Speaker, on April 15 I intend to reintroduce House Resolution 100 with cosponsors, and I invite my colleagues to join on this "Blueprint for a House that Works." A fuller explanation can be found at page 3545 of the March 4 RECORD. At this point in the RECORD I include the relevant portions of the select committee's survey from the 96th Congress. The survey follows:

SELECTED EXCERPTS FROM SURVEY OF HOUSE MEMBERS, 96TH CONGRESS, BY SELECT COMMITTEE ON COMMITTEES [1]

[In percent]

	Democrats			Republicans			Combined		
	Yes	No	Undecided	Yes	No	Undecided	Yes	No	Undecided
Is the House committee system in disarray?	67.2	23	9.8	74	17.7	8	69.6	21.2	9.2
Should the number of subcommittees be reduced? [2]	80	7	12	82	13	4.8	81	9.2	9.8
Should member subcommittee assignments be limited [3]	78	5.7	16.4	92	4.8	3.2	82.6	5.4	12
Should proxy voting be prohibited?	27	68	5	75.8	22.6	1.6	43.5	52.7	3.8
Should majority quorums be required for business?	34.4	54	11.5	74.2	19.4	6.4	47.8	42.4	9.8
Are committee staffs too big?	56.5	27	16.4	75.8	16	8	63	23.4	13.6
Have large staffs contributed to fragmentation and unmanageability of committee system?	57.3	24.6	18	71	11.3	17.7	62	20	18
Should some kind of ceiling be placed on committee staff overall?	73	15.6	11.5	95	3.2	1.6	80.4	11.4	8.2
Are House committees doing an adequate job of oversight?	21.3	68.8	9.8	4.8	88.7	6.5	15.7	75.5	8.7
Should the oversight coordination role of the Government Operations Committee be strengthened?	38.5	31.1	30.3	40.3	35.5	24.2	39	32.6	28.3
Should joint referrals of bills be abolished while retaining split and sequential referrals?	28.6	31.2	40.3	28	40.6	31.3	28.4	34	37.6
On joint referrals, should a lead committee be designated?	66.2	9	24.7	53	15.6	31.3	62.4	11	26.6

[1] The total number of respondents to questions 1 to 9 was 184: 122 Democrats (66.3 percent), and 62 Republicans (33.7 percent). Questions 10 and 11 are taken from a second survey to which there were 109 respondents: 77 Democrats (70.6 percent), and 32 Republicans (29.3 percent).

[2] Of the combined totals, 64 percent felt committees should be limited to 6 or less subcommittees.

[3] Of the combined totals, 62 percent felt Members should be limited to 4 or less subcommittees. ●

INSTITUTE FOR POLICY STUDIES: PART I

HON. LARRY McDONALD
OF GEORGIA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. McDONALD. Mr. Speaker, once again, the Institute for Policy Studies (IPS) is attempting to use its Capitol Hill contacts to bring congressional staff aides within its ambience.

Self-described as a "radical" institution, the Institute for Policy Studies operates a project called the Washington School. The school is targeted at bringing together Capitol Hill staff aides, Government officials, journalists, students, and radical activists. The purpose is to expose them to foreign revolutionaries, including terrorist agents, and domestic activists in order to indoctrinate them with alternative policies and strategies for a progressive America. As IPS's record demonstrates, that is jargon meaning policies that benefit the Soviet Union, its satellites, client states, and controlled terrorist movements.

In the 4 years since the chief of IPS's international operation, the Transnational Institute, Orlando Letelier, was found to be a paid Cuban agent, IPS has come under increasing public comment. Indeed, the Institute for Policy Studies has become highly sensitive because of a work of fiction, "The Spike," written by Arnaud de Borchgrave and Robert Moss, which discusses a genuine Soviet covert action operation in America from the 1930's to 1950's called the Institute of Pacific Relations.

"The Spike" in fictional terms extrapolates the continuance of such a Soviet covert action operation designed to influence U.S. policies along lines favorable to Soviet interests.

But the frenetic efforts by IPS to spike upcoming articles regarding its activities in support of international terrorist groups like the Palestine Liberation Organization (PLO) and the Farabundo Marti National Liberation Front (FMNL) in El Salvador continue, as do their futile attempts to seek retribution against those who have told the truth about their sleazy operations and slipshod scholarship which even IPS admits is not academic.

For the information of my colleagues and their staff aides who may be encouraged to participate in IPS activities and in the Washington School, I refer them to the following article, published by the Western Goals Foundation.

The article, "The Institute for Policy Studies: Transnational Intrigue and Revolutionary Terrorism," is an overview. It was written by John Rees, an investigative journalist who has reported on IPS for over a decade. When at last Rees' articles were brought to IPS' attention and they realized his reports were accurate, fair and truthful, he was barred from direct observation of their activities, and subjected to a campaign of calumny. However, he has continued his investigative reporting through the cooperation of other journalists as this and other articles demonstrate.

The article follows:

The Institute for Policy Studies (IPS) and its international subsidiary, the Transnational Institute (TNI), occupy two substantial office buildings just off Dupont Circle in Washington, D.C., a townhouse in Amsterdam, and other offices in London. Through the IPS/TNI doors pass the radical organizers who run support networks for various Soviet-backed revolutionary terrorist movements; others who head the disarmament, women's, and anti-nuclear power movements; diplomats including those identified as intelligence agents from Communist and pro-Soviet states and political parties; journalists from the major U.S. newspapers, and aspiring free-lance writers; apologists for totalitarian revolutionary regimes; members of the U.S. Congress and Senate; radical and liberal academics, and officials from the White House and Administration.

Reflecting its contacts with high-level U.S. policymakers, members of the IPS/TNI community, both present official members of the staff and members of what IPS terms its "transnational networks of scholars and activists," have ready access to the editorial pages of America's two leading newspapers, the New York Times and the Washington Post. They also publish regularly in such magazines and journals as The Nation, Foreign Policy, The Village Voice, New Statesman, and The Progressive.

Yet, the liberal media are curiously reticent regarding coverage of the institute for Policy Studies and its members. When they bother to characterize IPS at all, IPS is usually termed merely "a Washington think-tank" or a "liberal think-tank."

This is curious since IPS itself says it is a "source of radical scholarship." The adjective "radical" is correct, but it is difficult to see how the noun "scholarship" can be applied to the activities of this organization since even IPS director Robert Borosage recently admitted that the Institute's "public scholarship" is "not academic" and "does not adhere to academic disciplines."

Rather, IPS members are expected to "teach . . . through books, films and articles, . . . projects and . . . organized experiments" that put into practice the radical "alternative" schemes of the IPS fellows. In effect, this is an admission that IPS exists—at least on one level—as a training center for radical organizers and as a center for the production and dissemination of propaganda designed to affect U.S. foreign and domestic policies.

As for IPS's assiduous cultivation of Congressmen, their staff aides, Administration officials, academics, journalists and others, and its projects designed to influence government policymaking, IPS terms this "attempts to bridge the world of ideas and the world of affairs." The bland verbiage in which IPS tries to cloak its activities no more holds up to scrutiny than does the "cover" of a KGB agent operating as a "scholar" with the Moscow Institute of the U.S.A. while trying to develop contacts in the new Reagan Administration.

In a friendly write-up of the Institute for Policy Studies in 1971, Paul Dickson said that IPS "is attempting to lay the groundwork for the new society that will replace the present collapsing one. It not only has dedicated itself to ushering in the new society by inquiry and experimentation but it is also doing what it can to hasten the demise of the present one."

During the last five years, Rep. Larry McDonald, the leading Congressional expert on terrorism and internal security, brought many reports on the involvement of the Institute for Policy Studies with foreign and domestic terrorist groups and agents of the Soviet and Cuban intelligence services to the attention of Congress through the Congressional Record. He pointed out that the "single cohesive cord that binds together IPS's multitude of projects and activities is the influencing of U.S. policies along lines ultimately favorable to the interests of the Soviet Union, its satellites, client states and controlled terrorist 'national liberation' movements."

The IPS hierarchy had first received criticism in conservative publications during the late 1960s, but had utilized its contacts to evade criticism in liberal journals. This situation was changed with the publication of the novel, The Spike, by Arnaud de Borchgrave and Robert Moss, early in 1980. The novel, on the best-seller list for many months, concerns a fictional "Institute for Progressive Reform" that is utilized by the KGB to build networks of influence among liberal legislators, academics, and journalists which are used to disseminate KGB "disinformation." Disinformation is articles and stories containing a kernel of truth used to give substance to efforts to discredit individuals, institutions, and policies that interfere with those of the Soviet Union.

Commentators and reviewers for the Washington Post, The Nation, and the Institute for Policy Studies' own Marxist weekly, In These Times, have proclaimed that the financial "IPR" "is clearly the Institute for Policy Studies," and go on to provide interesting tables and charts on their guestimates as to which fictional characters are based on which real-life characters.

The crude one-for-one character parallels drawn by the reviewers friendly to IPS are often quite misleading. What is interesting is that they all recognize the "Institute for Progressive Reform" as the Institute for Policy Studies. There is a passage in the novel (p. 128) in which the fictional KGB bosses in Moscow discuss an institution which really did exist in Washington from the 1930s to the early 1950s called the Institute for Pacific Relations (IPR).

As investigations by the Senate Internal Security Subcommittee showed, the IPR and a closely related publication, Amerasia, were covers for Soviet espionage work. IPS and Amerasia were a means for recruiting Soviet sympathizers in important federal government posts, for obtaining classified documents (contributed to IPR and Amerasia for purposes of "academic discussion" of course), and for coordinating the efforts of Soviet sympathizers in the Administration to benefit the aims of the USSR.

The Spike explains that this type of covert operation is one in which many of the participants are unaware of the role of the hostile intelligence service. Only certain members of the operation know it is really a KGB project. In such an operation the dupes—Lenin's "useful idiots"—can think that the Cubans, members of revolutionary terrorist movements, Tanzanians, Czechs,

Algerians and Americans they meet and work with are independent of Moscow. In fact they work for the KGB.

In the novel, the fictional "IPR" is set up to make use of all varieties of "new left" radicalization, anti-Vietnam campus sentiment, and the perversely fashionable anti-Americanism of some U.S. intellectuals.

The Institute for Policy Studies (IPS) was founded in 1963 by Marcus Raskin and Richard Barnet. Raskin had come to Washington in 1959 as a legislative aide to Wisconsin Congressman Robert Kastenmeier, Raskin promptly set about organizing the "Liberal Project," a mini-caucus of twelve Congressmen who wished to propose some utopian, if not radical, policies for the United States. Raskin's efforts did not go far because in the November 1960 elections nearly half the Congressmen associated with the project were defeated. Raskin not only survived, but moved from Capitol Hill into the Kennedy White House as a member of the National Security Council.

Although the "Liberal Project" was aborted in Congress (to be revived later under the impetus of anti-Vietnam sentiment in the form of Members of Congress for Peace through Law), it did result in a volume of essays. The Liberal Papers, edited by James Roosevelt, included several themes fundamental to the Institute for Policy Studies such as the desirability for total U.S. disarmament, for the ending of defense alliances, and for supporting and encouraging revolutionary change in the Third World in order to demonstrate America's bona fides as a nation on the side of the angels, as it were.

Raskin and Barnet met while attending a joint White House and State Department conference on disarmament in April 1961. Barnet, who was Deputy Director for Political Research of the U.S. Arms Control and Disarmament Agency, had reached the State Department via Boston's Roxbury Latin School, Harvard (summa cum laude), Harvard Law School, Harvard's Russian Research Center and the Boston law firm of Choate, Hall and Stewart. Years later, Barnet told an interviewer that he immediately recognized Raskin's alienation and hostility toward "the whole military-industrial establishment sitting there at one table." Barnet commented, "Marc and I both grimaced at the same moment—and knew we didn't belong here."

Whether or not the decision to form their private think-tank immediately followed this meeting of minds in a bizarre "enchanted evening" is unclear. But in any case, Raskin and Barnet were able to use their contacts with leading liberal figures in foreign policy and academic circles to find the funding for IPS in 1963.

IPS's first two years were relatively uneventful with emphasis on various social and domestic issues, and contacts with Congressmen, Senators, and Johnson Administration "New Society" officials. Even then, IPS did not neglect radical change in the area of national security. IPS leaders urged ending NATO, a "non-interventionist" neo-isolationist foreign policy, and lowering military expenditures to release funds for social programs. But about 1965, Raskin and Barnet intensified their attacks on U.S. foreign policy. There vehemence was related to several events including the landing of U.S. Marines in the Dominican Republic to block a Cuban-backed leftist takeover, the failure of a Communist coup attempt in Indonesia followed by purges and the imprisonment of thousands of Communists, and the growing involvement of U.S. military forces to support South Vietnam against a Communist terrorist force spearheading aggression by North Vietnam and the Soviet Union.

From this point onward, IPS leaders have painted the United States in the blackest term while supporting the goals and causes of virtually every revolutionary terrorist movement supported also by Havana, Hanoi and Moscow.

IPS activists found the cause of the Vietcong and Hanoi "just". In January 1977, when Western liberals were shaken by finding that the Hanoi regime had incarcerated 300,000 people in forced labor camps and prisons, Richard Barnet and several others associated with IPS including Cora Weiss, the energetic pro-Hanoi organizer who is the wife of the chairman of the Institute's Board of Trustees, signed a new York Times ad supporting Hanoi's jailing of these political prisoners. But a Stalinist tradition may be part of the heritage of Cora Weiss, daughter of IPS's principle financial backer, Samuel Rubin. Rubin, then living at 615 Pelham Parkway, Bronx, N.Y., listed himself as a Communist in registering for the 1936 general election.

But the North Vietnamese and Vietcong were not the only "progressive" movements backed by IPS. The Palestine Liberation Organization (PLO), the Soviet-controlled MPLA in Angola and African National Congress (ANC) in South Africa, Iranian revolutionaries, and assorted Castroite terrorist organizations in Latin America have been found to be just as "progressive" as the Vietcong, Pathet Lao, and Khmer Rouge. Additionally, the denunciations of the genocide in Cambodia in IPS publications did not appear until Soviet-backed Vietnam was preparing to invade Cambodia whose main ally was the Peoples Republic of China. And while these causes are "progressive," the actions of the United States and its allies are found to be unrelievedly and irreparably corrupt, repressive, morally degenerate and evil.●

SKI SHASTA

HON. GENE CHAPPIE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. CHAPPIE. Mr. Speaker, today I am introducing a bill which, to many of my colleagues may seem small in scope and purpose. However, this view would be contrary to that held by the residents of the nine northernmost California counties, which I represent, where the ski industry has provided great recreational and economic benefits in the past.

For many years now, Congress has deliberated about which roadless areas in the United States should be designated as wilderness and added to our National Wilderness Preservation System. This undertaking has been both monumental and controversial. In the last Congress, consideration was given to three wilderness proposals affecting Mount Shasta, in Siskiyou County, Calif. Each proposal offered different boundaries as to which land should or should not be considered wilderness. I do not intend to further complicate the issue by drawing more boundary lines on a map, nor do I believe the residents of northern California should have to wait for what this Congress and this administration may propose for wilderness, in order to clear up the matter of 1,090 acres of public land on Mount Shasta.

For skiers, Mount Shasta is currently a wasted recreational resource. Skiing has enjoyed as a winter sport on Mount Shasta for 20 years until an avalanche destroyed the main chairlift at the Green Butte area on January 5, 1978. At that time, the ski area permittee as well as concerned citizens and expert ski area consultants, decided that due to the adverse weather conditions of the Green Butte area—high winds, white ice, and crippling snow storms—the ski area should be relocated to the more conducive areas of Giddy Giddy Gulch and Sand Flat. The Giddy Giddy Gulch and Sand Flat areas of Mount Shasta have been studied and have been determined to be prime areas for downhill skiing. Both Giddy Giddy Gulch and Sand Flat have been in and out of wilderness designations and are now in a state of "limbo," awaiting Congress decision on wilderness and the outcome of the State of California against Bergland court injunction. Since 1978, existing businesses, hopeful entrepreneurs and thousands of ski enthusiasts have had to play a waiting game.

Congress can settle this question for northern California by removing the 260 acres of public land in Giddy Giddy Gulch from further wilderness consideration, and upholding the adequacy of the environmental impact statement for the 830 acres of public land in Sand Flat. When placed in the light that wilderness proposals for Mount Shasta have ranged between 25,980 acres to 37,000 acres, we are not talking about a large land withdrawal for skiing. The acreage involved in the Giddy Giddy Gulch and Sand Flat areas is very small. However, the possible economic benefits for the northern region of California are very great.

Tourism and wood product industries are leading sources of revenue for northern California. In the last year, three of the lumber mills in the immediate area of Mount Shasta have shut down operations, along with eight Mount Shasta merchants, pushing unemployment in the area far above the national average. A privately owned and operated ski area, under permit by the National Forest Service, would provide employment in the ski area itself and in the restaurants, shops, and hotels of the surrounding communities. As a point of comparison, Summit County in Colorado provides recreational skiers the choice of four major ski areas. Neighboring Pitkin County, Colo., also has four areas, and similar examples can be found in

other Western and New England States. A regional ski area on Mount Shasta would provide the sole option for downhill skiing in an area the size of Vermont, New Hampshire, Massachusetts, Connecticut, Rhode Island, and portions of Maine and upstate New York combined.

At a time of high inflation and unemployment I do not think we can afford to be swayed from the economic benefits a ski area would bring this economically depressed region by a vocal minority of opponents. Skiing on Mount Shasta has the support of a strong consensus in the nine most northern California counties. This consensus was made clear during the 1979 field hearings held by the House Interior Committee in Weed, Calif. Supporters range from those who enjoy skiing as a family sport to elected officials of the area including:

Nine Northern Counties Supervisors Association.
Siskiyou County Board of Supervisors.
Glenn County Board of Supervisors.
Trinity County Board of Supervisors.
Shasta County Board of Supervisors.
Lassen County Board of Supervisors.
Tehama County Board of Supervisors.
Plumas County Board of Supervisors.
Modoc County Board of Supervisors.
Butte County Board of Supervisors.
Mt. Shasta City Council.
Siskiyou County Superintendent of Schools.
Redding City Council.
Mt. Shasta Recreation Department.
Anderson City Council.
Redding Recreational Department.
Anderson Recreational Department.
Shasta County Economic Development.
Greater Redding Chamber of Commerce.
Mt. Shasta Chamber of Commerce and numerous recreational ski associations and ski patrol associations.

While the 97th Congress and the administration continue the wilderness debate in Washington, D.C., the ski seasons and ski revenue slide by. Passage of this bill will affirm Congress decision to manage Giddy Giddy Gulch and Sand Flat for uses other than wilderness, and will settle the question of this land's use in a way which benefits the economy of northern California. If Congress acts quickly, a Mt. Shasta area for downhill skiers can get underway before the next snow falls.

The bill follows:

H.R. 3053

A bill to require that certain lands in the Shasta National Forest be managed for uses other than wilderness

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the approximately 420 acres of land which is known as Giddy Giddy Gulch, located in Shasta National Forest, and the approximately 990 acres of land which is known as Sand Flat, located in Shasta National Forest, each of which is depicted on a map entitled "Giddy Giddy Gulch and Sand Flat Areas, Shasta National Forest, California" dated April 3, 1981, on file in the office of the Chief, Forest Service, Department of Agriculture, shall be managed for uses other than wilderness.●

CAPITAL ADEQUACY UPDATE—I

HON. DAVID W. EVANS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. EVANS of Indiana. Mr. Speaker, on March 3, 1981, I introduced House Concurrent Resolution 82 calling on the Federal bank regulators to diminish the inequitable capital requirements among commercial banks. This resolution, introduced with the bipartisan support of Mr. D'AMOURS, Mr. MATTOX, Mr. SHUMWAY, and Mr. WATKINS, has sparked a great deal of interest among my colleagues, and I am pleased to report the list of cosponsors is growing daily.

As I indicated when I introduced the resolution, the Federal bank regulators have talked about doing something in the area of bank capital for some time. Leading the way toward fairness and equity, the Comptroller of the Currency recently announced his office's program to require less capital of small well-managed banks. While I, and my fellow cosponsors, will look for more details of the Comptroller's program, we applaud this first important announcement and hope it will be followed very shortly by similar announcements by the Federal Reserve and the Federal Deposit Insurance Corporation.

The relevant portions of Comptroller Heimann's remarks follow:

INDEPENDENT BANKING IN THE 1980's: STRENGTHS AND OPPORTUNITIES

(By John G. Heimann)

Adapting to the times means not only adjusting laws and regulations, it will also require new examination procedures, new training programs, new technical capabilities—but, above all, new modes of thought.

In this vein, we indicated at the American Bankers Association Convention last October that we might consider relaxing certain prudential standards such as permitting sound and well-managed smaller banks to reduce their traditionally high capital ratios, and accept the increased risk this would entail.

As community banks adopt many of the sophisticated management systems, techniques, policies, procedures and controls that are characteristic of larger banks, such a policy becomes more appropriate. Moreover, we have taken significant strides in improving our ability to examine and monitor bank activities. We have developed techniques to identify banking problems in their early stages on an individual bank basis. This has enabled us to initiate corrective action often before a problem gets out of hand. As a result, high capital ratios, on an industry-wide basis, are no longer as necessary as they were in the past as a means of limiting bank failures.

For these reasons, we have concluded that we can accept lower capital ratios for sound and well-managed smaller banks to the extent and degree that they possess the depth and quality of management; the level and quality of earnings; the quality of assets; the geographical diversification; effective internal planning; operating and control systems; the market presence and reputation; the board risk diversification in both assets and liabilities; as well as other characteristics which justify lower capital ratios for larger institutions. We recognize that these factors, collectively, have more to do with the financial strength and health of a bank than the magnitude of its capital ratio.

Although such a policy may pose some additional risk, we are convinced that the majority of smaller banks can operate prudently with lower capital ratios. We believe the benefits of more aggressive, competitive smaller banking organizations will outweigh the increased risks posed by lower capital ratios.●

MIGRANTS: THE NATION'S INVISIBLE CHILDREN

HON. SHIRLEY CHISHOLM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mrs. CHISHOLM. Mr. Speaker, block grants are one of the major themes in the administration's economic recovery package. For example, 45 education programs would be shifted into 2 block grants to State and local education agencies. These programs were created precisely because the needs of specific population groups were not being met at the local level. The block grant proposal contains no method by which assistance will be specifically provided to these special-needs populations. Therefore, there is a great probability that funds will be shifted from these education programs into general school aid which would appeal to the middle-class voter or other local education power structures. These fears are confirmed by the history of the community development block grant program, general revenue sharing, and by the historic vulnerability of poor and disadvantaged people to local pressure groups.

Perhaps the most neglected group in education are migrant children. In 1966, Congress expanded title I of the Elementary and Secondary Education Act to meet the special needs of the migrant child. The administration's proposal would block grant all title I funds, including those funds for migrant children, to State and local education agencies. Prior to 1966, the education of migrant children was virtually ignored by local education officials. To presume that the education of migrant children would now become a priority with these same education officials is simply not rational. Yesterday, in testimony before the House Education and Labor Committee, David Randall, director of the Migrant

Education Center in Sunnyside, Wash., graphically illustrated the implications for migrant children if the administration's block grant proposals are adopted for education programs. I am submitting his testimony for the benefit of my colleagues:

EFFECTS OF BUDGET PROPOSAL AND BLOCK GRANTS ON MIGRANT EDUCATION

I appreciate the opportunity to talk with you about 750,000 boys and girls, 750,000 of the most severely disadvantaged children in our country today. These are children of migrant workers who must disrupt their school year by moving with their families to work in the fields, the fishing waters, or the processing plants. This disruption of school causes the migrant child to loose continuity in his education and miss vital basic skills as his family moves from school district to school district. It is one of the biggest reasons that only 11 out of every 100 migrant children graduate from high school. The high dropout rate when added to the gaps in basic skills virtually guarantees the migrant child no escape from the cycle of itinerant work and poverty level living.

The administration's current proposal to put migrant programs under a block grant creates a very serious problem for these children. As they move across their state or across the country a carefully coordinated plan must be developed and carried out to assure a continuity of education. No school district or state is equipped to do this independently. Under current block grant and budget proposals a serious reduction of educational funds would occur. How can school districts and states stretch already limited dollars to serve children who are transcient? With reduced funding only the most permanant and powerful will be able to make a concerted effort for these funds. The Migrant child will have come and left again before his plight is ever really known. There is no question in my mind but that most school districts do their very best to serve all children, but with reduced resources the money will have long been obligated by the time the migrant child arrives. It is likely that the migrant child will never even be identified and recruited into school. A school with already crowded classes and limited funds would be hard pressed to make a special effort to go into the fields and recruit migrant children who will only be with them for a short period of time.

At present a national computer system relays academic and medical records, between participating schools giving some semblance or order to continually changing migrant patterns. Without this system, it is impossible for States to accurately keep track of the educational needs of these children and their whereabouts in order to effectively allocate the funds needed for a continuous educational program.

The need for interstate coordination is not adequately addressed in the block grant and budget proposals. The past 7 years I have been actively involved in an alternative high school for migrant children. In 1970 there were only 9 high school aged migrants enrolled in the entire State of Washington. This past year there have been more than 2,000. This has come about as a result of a great deal of communication and cooperation among schools at the local, regional, and State levels. This would not have been possible without adequate financial resources, schools would have simply been limited to addressing local needs with possibly a special program for the migrant child while he/she was there, and with no consideration for coordinating school work when the student leaves.

This spring in Washington State there will be 14 programs for migrant high school children who must work with their families in the fields. In late afternoon or evening about 700 boys and girls will come to school after a full day of cutting asparagus and pick up their studies and they will succeed in their coursework and when they return to their home school in the fall their credits will have been transferred and they will be at the very same place as their classmates who did not move.

This special program had its first high school graduate in 1974. The same year my older son graduated. As a seasoned school principal I don't get too excited about graduation ceremonies but that year I attended graduation with just a little more interest. I felt real pride and just a touch of relief when my 17 year old son picked up his diploma. I shared with this other young man's family in the pride that they felt when their 21 year old son became the first graduate in their family when he walked across the stage. This boy was three years late due to constant moving and missing portions of school. He had a tremendous desire to graduate and did because he overcame great barriers.

In 1968 I became acquainted with a migrant family, a mother and 5 children who had just lost their father in an auto accident. Since that time the mother and at least some of her children made the trek from Texas to Washington for the harvest. Four of these children are high school graduates, one is a college graduate and completed her first year teaching, and two more are enrolled in college.

I can tell you this story a hundred times over only with different names, and it still only scratches the surface.

I have spoken today about the program in Washington state. Many other states have developed fine migrant education programs with similar good results.

Somewhere a myth began that migrants were lazy and lived the way they do because they didn't want anything better. I'd like to correct that myth, the migrant life style is backbreaking work and only the most ambitious ever continue in it and they do it for the same reasons that you and I work to get something just a little bit better for our children. This tremendous level of ambition inherent in the migrant worker is the reason that their children's success rate in school is so great—if they get the opportunity to go to school.

Loosing the migrant program in a block grant or even cutting back already limited funds will cut off the success potential of a group of children who are programmed with an ability and desire to work under the most severe of circumstances just at the time they are ready to break the migrant cycle and take their place in society with your children and mine. It's an economic fact of life that migrant children must work. It is my sincere feeling that this contribution that the boys and girls make to their families should be recognized and that every possible effort be made to enable them to continue and complete their education.●

HONORING VIETNAM VETERANS

HON. CLINT ROBERTS

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. ROBERTS of South Dakota. Mr. Speaker, the declaration of April 26 as Vietnam Veterans Day by the Congress is long overdue. It is my hope that we observe it as a welcome home to our veterans that served in that war.

Over 17,000 of my fellow South Dakotans served their country in Vietnam. Our South Dakota Vietnam war veterans, like their fellow servicemen and women across the Nation, are deserving of our thanks for their loyal service to their country.

It is the duty of every citizen to find a place in our hearts for those veterans of Vietnam who are home, and those who are not.

Twenty-five hundred servicemen still have a missing-in-action status. Congress should use the impetus of Vietnam Veterans Day to renew our efforts to resolve the remaining MIA mystery.

Furthermore, the fear and dismay that veterans share over the prospect of physical and mental damage from agent orange exposure should be allayed by providing the full support of the Government in solving the agent orange problem.

Delayed shock syndrome as well is a recently surfaced tragedy of Vietnam, and must be addressed by Congress in our legislation designed to serve the Vietnam vet.

The Veterans' Administration recently found that Vietnam veterans suffer significantly higher rates of unemployment, alcoholism, drug abuse, and criminal activity than do their counterparts who are not veterans. Is this our "thank you" to those who served their country? I hope not.

Let us join together this April 26 to give an honest and heartfelt thanks to our Vietnam veterans.●

CONSOLIDATED REFUGEE EDUCATION ASSISTANCE ACT

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. GOODLING. Mr. Speaker, as a member of both the Foreign Affairs and Education and Labor Committees, I am deeply concerned about the uncertain congressional response to the plight of local communities when faced with a periodic new influx of refugees. Our local schools are among the institutions which are usually faced with the expense and the responsibili-

ty of these sudden unanticipated demands upon their services. I have seen time after time a mad scramble of legislative activity to create piecemeal education assistance programs to assist local schools to deal with situations quite beyond their own control and rational planning mechanisms. We all are sufficiently aware of the recent Indochinese, Haitian, and Cuban situations to recognize this problem.

I have lately been focusing much attention on the recent upheavals in Central America and have discovered some sobering facts. For example, one recent news report noted that guerrilla activity in El Salvador has resulted in some 60,000 displaced people, many of whom apparently are seeking to migrate to the United States. In another example, "ABC News" reported on the influx of Salvadorans into the United States and stated that approximately 500 per month are settling in San Francisco alone. Similarly, we should not overlook the potential disaster that exists in Poland. If the shaky truce between the beleaguered Polish Government and the free union movement Solidarity blows apart, the international repercussions are difficult to gage. It is not incomprehensible that a substantial influx of Polish refugees into the United States might occur, similar to the 1956 Hungarian episode, especially if there is direct Soviet military intervention.

Unfortunately, as a result of piecemeal attempts to cope with these problems as they arise, we have created a hodgepodge of refugee education assistance programs which are confusing, duplicative and indicative of shortsighted legislative responses.

For example, on education of refugees we have created at least five legislative alternatives, four of which are under the jurisdiction of the Education and Labor Committee: Impact aid; Indochina Refugee Children Assistance Act; discretionary grants under ESEA title III; the Refugee Education Assistance Act of 1980; and title III of the Refugee Act of 1980.

Because of the international events which I described above and because of the opportunity created by the expiration of the Indochina Children Refugee Assistance Act, I think that it is time to consolidate and improve the duplicative and confusing variety of programs designed to assist local education agencies in responding to the educational requirements of new refugees. At the same time, it is necessary to insure that there can be no double dipping by school districts which might qualify for education aid for these students under other general Federal refugee assistance programs.

Specifically, my proposal would define refugee for purposes of this act to include any person legally admitted to the United States, regardless of their status under the Immigration and Nationality Act. In addition, I propose to limit the eligibility of these students for education aid to a maximum of 5 years. This is a reasonable savings provision which provides aid to local schools for the special problems that are initially associated with refugees and for transition into regular school programs. My bill would also create a permanent authorization which avoids the need for new separate authorizations for each specific new wave of refugees. Of course, any final determination of actual aid would require that an appropriations bill pass Congress and receive the President's signature.

The body of the proposal is modeled after the Refugee Education Assistance Act of 1980. In addition, the bill repeals the duplication of programs under the Education and Labor Committee's jurisdiction:

Section 4A of the Impact Aid Law (Public Law 81-874). This program authorizes payment to local education agencies of funds equal to the product of the number of eligible children above 20 in the schools multiplied by the current local expenditure rate of the LEA plus $200 per eligible child in excess of 20.

Titles I and II of the Indochina Refugee Children Assistance Act of 1976, as amended:

This program authorizes payments at a flat rate of $450 per refugee child paroled into the U.S. after January 1, 1977 to local education agencies providing education services to Indochinese refugee children between the ages of 5-17.

Section 317 of the Adult Education Act:

This program authorizes grants to State and local education agencies for operating adult education programs for Indochinese refugees.

Cuban-Haitian Refugee Education Assistance Act:

This program provides special assistance to schools with influx of Cuban and Haitian refugees and further provides additional assistance for heavily impacted districts. In addition, this bill provides for adult education assistance for these people.

Each of these former separate refugee education assistance programs would be folded into one consolidated refugee education program. The new program would be a permanent authorization.

TITLE II

Grants to state education agencies for schools providing basic education to refugee children. The schools could receive $400 per refugee child—if the program is fully funded.

TITLE III

Grants to State agencies for school districts with substantial increases in the number of refugee children. This aid would be for supplemental educational services for school districts in which these children comprise 500 students or five per cent of school population. Amounts range from $300 to $700 per child, depending on when the child was enrolled.

TITLE IV

Aid amounting to $300 per enrolled adult, to states for adult education programs for refugees aged 16 or older.

I would like to emphasize that the legislation insures that any Federal funds received by a State or local school district under any other Federal program for the purpose of refugee educational assistance would reduce, dollar for dollar, the amount that any school might be eligible for under any title in this bill. However, money received under discretionary grant programs for these same purposes would not be considered in the allocation formula.

Mr. Speaker, it is time that we recognize and clarify our role in providing education assistance for refugees who are legally admitted to this Nation. Since these children are entitled to an education under our laws, the costs to the American taxpayers will be the same, regardless of which level of government is providing the funds. The decision to admit refugees is a national policy, and consequently, the burden of this Federal decision ought not to be placed solely upon a few selected local areas.●

A BILL TO AMEND THE FEDERAL MINE SAFETY AND HEALTH ACT OF 1977

HON. RAY KOGOVSEK

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. KOGOVSEK. Mr. Speaker, I have introduced a bill today to amend the Federal Mine Safety and Health Act of 1977, to provide greater cooperation between the administration and mine operators in providing safe and healthy working conditions in our Nation's mines. I have received many complaints from mine operators in my district, particularly small operators, who are facing extreme difficulty in complying with all the regulations imposed by the Federal Government.

Mr. Speaker, I would not want to be a small mine operator in this day and time. Between the Mine Safety and Health Administration, the Bureau of Land Management, Office of Surface Mining, the Environmental Protection Agency and a multitude of State agencies—many of which have duplicating responsibilities with Federal agencies—the small operator is literally smothered with government regulations. They are required to know what the gas content of the air in their mine is at all times. What pollutants are in the water of their area. What vegetation exists in the area for reclamation purposes. If they are emitting any radiation or radioactive elements into the air or water. What percentage of lead, zinc, copper, and other miner-

als are in the streams and tailing ponds. He must have an established plan for reclaiming the area after he has completed mining and an established and approved mine evacuation plan. They must bear the costs of maintaining a local mine rescue team consisting of at least six people and all the necessary equipment. Operators are required to have self-rescuers for every mine, each weighing 8 pounds and costing over $500. To say nothing of all the reports and paperwork required of them for each agency.

Mr. Speaker, I could go on and on about these regulations and requirements. The point is that these are miners. Not safety experts, biologists, chemists, hygienists, or air quality experts—just miners. Yet, when it is found that they have not met any one of the regulations set by experts in the various agencies, they are fined or forced to close their mines, and in some cases forced to go out of business altogether. We must provide means of assisting operators in meeting Government requirements. While the Mine Safety and Health Administration does have a program to assist miners in recognizing safety hazards—the compliance assistance visitation program—it is on an extremely limited scale due to restrictions in the act. My legislation would lift the restrictions and allow the Secretary to expand the assistance program to encompass all types of mines and mining conditions. It would enable MSHA to act in a cooperative manner with operators in providing safer working conditions. Safety inspectors would be allowed to come into the mine in an advisory capacity and use their expertise in assisting, instead of harassing, operators. The legislation also mandates that MSHA provide this service within 2 weeks upon a request from an operator, thus insuring there will be no delays. It also insures that there will be no civil penalties attached to any warnings given during an assistance visit.

While large companies might have the financial and personnel resources to comply with all the Federal regulations, the small operator cannot possibly do so without some form of help. At least, through this legislation, they will receive assistance from the Federal Government in meeting safety and health requirements. I urge my colleagues' support.●

FATHER JOSEPH F. THORNING—"PADRE OF THE AMERICAS"

HON. HENRY S. REUSS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. REUSS. Mr. Speaker, on April 25, Father Joseph F. Thorning will celebrate his 85th birthday. Father Thorning is well known to us, because for more than 30 consecutive years he offered in the House of Representatives the prayer for the observance of Pan American Day.

In 1944, he took the initiative of inaugurating that special celebration on Capitol Hill for the cause of inter-American understanding, cooperation, and friendship. The annual observance has now become a firm tradition, which has immeasurably increased our understanding and respect for our neighbors in this hemisphere. Former Senator Mike Mansfield of Montana aptly named him "Padre of the Americas."

Wisconsin is proud to claim Father Thorning as a native son, and pleased that he is continuing his active roles as a journalist, scholar, and pastor.

I want to share with my colleagues an article from the December 7, 1979, issue of the Catholic Review in praise of this extraordinary man. The article, by Thomas M. Kavanaugh, follows:

FATHER THORNING, FORMER FREDERICK COUNTY PASTOR, MAN FOR ALL SEASONS

The problem with writing about Fr. Joseph F. Thorning is that he represents a topic more appropriately addessed in book-form.

Better yet, he could be the subject of a television or film documentary, for not only is his curriculum vitae worthy of catalogue-sized treatment, but Father Thorning himself is such an animated, colorful man at age 83 that a sound and visual presentation would best capture his character and zest for living.

But here, alas, are only words, which given the stature and past accomplishments of this Jesuit-ordained priest, can at best merely form like a crowd of people dwarfed by a large and impressive statue.

Although he was the pastor of historic St. Joseph-on-Carrollton Manor Parish from 1947-72, it is the first 50 years of Father Thorning's life that are so especially speckled with honors of achievement. Termed by former Senate majority leader Mike Mansfield the "Padre of the Americas," Father Thorning's most indelible marks have been made in the area of international relations.

Joseph Francis Thorning, you see, was one of those people whose perceptual genius and scholarship displayed itself so clearly, at such an early age, that his destiny as a man of letters and statesmanship was his most obvious and certainly most productive route through life.

Born the eldest of four children in Whitefish Bay, Wis., a Milwaukee suburb, he is the son of a New England mother and a Viking father who made his living as a fisherman, hunter, carpenter and cabinetmaker.

Educated at Catholic schools in Massachusetts and Wisconsin, he graduated first in his class from the Marquette Academy. Being at or near the top of his class was to be a common occurrence: Father Thorning earned a bachelor's degree from Holy Cross College, graduated summa cum laude with a master's degree from St. Louis University and was the first member of the Jesuit order to be matriculated in and eventually to be awarded a doctorate from the Catholic University of America.

He also received a doctorate in sacred theology from the Gregorian University in Rome, taught as well as took instruction at Oxford University in England and the Sorbonne in Paris, and has received honorary degrees from other institutions as well. He holds a doctor of laws degree from the University of Santo Domingo, the oldest institution of higher learning in the Western Hemisphere, founded in 1538.

If Father Thorning's plaudits as an educator seem remarkable, it is his accomplishments as an author and diplomatic liaison which take on even greater insignificance.

Having written nine books, and now at work on a tenth—his memoirs—Father Thorning was also associate editor of World Affairs Magazine, Americas (the journal of inter-American cultural history), a correspondent for Sign magazine, the New York Times and the Washington Post, to mention only several of his journalistic involvements.

Through his writing he earned a reputation as a man of considerable foresight. The New York Times Book Review described Father Thorning's Miranda: World Citizen (a biography of Don Francisco de Miranda, the precursor of Latin American freedom) as "one of the outstanding books of the year" in 1952. Religious Liberty in Transition, completed as a doctoral dissertation in 1931, has been acclaimed by scholars the world over as "the premier scholarly work on the ecumenical movement."

As a correspondent for Commonweal, America and a number of other publications, the then-young-Jesuit priest spoke out early in the 1930s, following study trips abroad, of the impending menace which grew in the persons of Adolph Hitler, Benito Mussolini, and off in Russia, Josef Stalin.

"I've been called a radical many times," the still robust priest said recently at his residence near Hood College in Frederick.

"And when someone calls me that I say 'thank you' because it's a compliment. I like to be a radical; you go to the roots of any problem."

Somewhat stooped and wearing a beret, blue blazer and characteristic white scarf and gloves (his hallmarks, he says), Father Thorning seems, like Miranda, something of a world citizen himself. Fluent in seven languages, he will lapse into French or Spanish to underscore a statement.

Residing in a small apartment, his living room is cluttered with dozens of partially-read books, scores of magazines, and seemingly hundreds of newspapers from all over the world which he scans for "anything relevant." Off to one side, a neat little osis amid the apparent disorder, is small altar.

Interviews with this man are conducted in somewhat reverse order: Father Thorning remains standing, as though lecturing before a class of one, and with all the verve of a young orator gesticulates dramatically while making various points and fielding questions.

His memory, especially for detail, is incredible. While having traveled to nearly every country in the Western Hemisphere, Europe, parts of Asia and the Pacific, and met diplomats and ambassadors of international renown, he can still recall the name (including middle initial of a Latin instructor in high school or the fellow he substituted for as a third stringer on the Holy Cross football team nearly 60 years ago.

Noting that his father lived to be nearly 100 years old, the one-time chairman of the sociology and social history department at Mount St. Mary's College, Emmitsburg, is quick to point out that he is in sound physical condition.

And indeed, he must be; he climbs the steep steps to his second-floor quarters without hesitation, spends considerable time walking each day, and will invite you to test the muscle tone of his biceps. He also cleans and cooks for himself, "at least, I try," he said laughingly.

"I've always avoided over-eating and excessive drinking," he emphasized, blue eyes peering out from behind long, craggy eyebrows. "I never eat lunch. It's habit that dates back to my time as a student when after theology class I would spend the lunch hour talking with the teacher."

He added that cold showers and various nutritional concoctions of his own design are also responsible for his good health.

Incardinated into the archdiocese in 1937 at the request of Archbishop Michael J. Curley, Father Thorning is proud of his Jesuit background. He is also not overly modest: "The Jesuits claim me as the wonder of their order. I am the complete image of a Jesuit-educated diocesan priest."

Of his climb up the educational ladder, he recalled: "I was number one in just about everything, even theology. You know, most brilliant men don't usually pass moral theology, but I had no trouble."

But even though he served as ambassador for several special diplomatic missions (by presidential appointments), received awards of honor and prestige from nearly every Central and South American nation, held the position of acting dean of the graduate school of Georgetown University, and served as broadcast commentator for NBC on several occasions (he broadcast the story of the 1938 National Eucharistic Congress from Hungary in seven languages), Father Thorning said he was glad to take on the role of pastor at St. Joseph's located near quiet, rural Buckeystown.

"I liked that very much," he remarked of the 25 years spent in the parish.

During that time, however, his dynamism for foreign affairs carried on. For more than a dozen consecutive years, Father Thorning was invited by the U.S. Congress to deliver the invocation at the start of Pan American Day at the Capitol.

While holding the reins at St. Joseph's and its mission churches, he traveled extensively to be honored in the nations where his interest, expertise and leadership had "served the cause of friendship" and understanding.

A lover of opera and the fine arts, Father Thorning still teaches "informally" and remains active in the community. He does not own a phone, the retired priest noted, however, because too many people demand his time and interrupt a tightly filled schedule of writing and reading.●

THE 20TH ANNIVERSARY OF THE CITY OF SAN JUAN CAPISTRANO

HON. ROBERT E. BADHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. BADHAM. Mr. Speaker, 200 years ago Father Junipero Serra stood in front of a crude wooden cross and prayed for the success of a new settlement, which was to be named San Juan Capistrano, after an Italian saint.

Now I address this honorable body to call attention to the 20th anniversary of the city of San Juan Capistrano, which was incorporated on April 19, 1961, even though it was world-reknowned because of its beautiful mission and the legendary annual return of swallows to the shelter of its buildings.

The mission, around which the present city has grown, was founded on November 1, 1776, at a ceremony attended by 11 soldiers, 2 Franciscan priests, some curious Indians and Father Serra, who presided.

Father Serra came to the New World from Petra, Mallorca, Spain, to establish a line of California missions. San Juan Capistrano was the seventh in that line founded by Father Serra.

It was 65 years later when the Mexican Government took official action establishing San Juan Capistrano as a pueblo and in 1840 it became an American community with the deeding of California to the United States.

Like most Mexican pueblos, San Juan was built around a plaza in the center of town. Adobe houses and stores lined the plaza. Homes bordered Los Rios Street which marked the edge of the mission garden.

San Juan Capistrano has withstood the seige by bandit Juan Flores in 1857 and the drought. However, the combination of a drought and a smallpox epidemic took its toll and because of the loss of cattle, workers, and payment of high property taxes, the large ranchos were gradually broken into smaller parcels and sold to settlers who sought mild climate and pleasant surroundings.

Now San Juan Capistrano, as a city, has developed into one of the most beautiful and coveted communities in southern California, growing steadily, under the guidance of a prudent community, its elected leaders, and professional managers.

From humble beginnings, with 6,000 acres, and 1,200 residents, who voted in 1961, 363 to 89 for cityhood, San Juan Capistrano now covers 12 square miles and has a population of 18,859. Throughout it all, San Juan Capistrano has retained its historic past while responding to the needs of its residents.

It has been my pleasure to represent San Juan Capistrano for more than 18 years in the California Legislature and in the Congress of the United States. Therefore, I take this opportunity to wish all connected with the city, its history, and its future, well with the hope that the years ahead will be as rich for all concerned as the city's heritage.●

REAGAN'S BUDGET PROPOSALS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. McDONALD. Mr. Speaker, much has been said about President Reagan's proposals for economic rejuvenation and regulatory reform. It has been bantered about that he is actually going to cut spending, terminate such regulatory monsters as the Council on Wage and Price Stability, and give industry the incentive it needs to produce. Right? Wrong.

The distinguished economist, Murray Rothbard, recently had an interview published in the "Silver and Gold Report" late in March 1981. In this interview he separates the fiction of President Reagan's proposals from the facts.

Mr. Rothbard is a key member of the Austrian school of economics. Although he is perhaps subject to criticism for support of what might be termed extreme libertarian views with an antidefense bias, nevertheless, his analysis is one that is excellent in scope and depth. I strongly commend it to the attention of my colleagues.

REAGAN'S BUDGET PROPOSALS

ROTHBARD. Well, there are three parts to Reagan's economic package: the so-called budget cuts, deregulation, and tax cuts. In all three areas, Reagan's program has great rhetoric, but little substance. His program has got no chance at all of stopping inflation.

That inflation will continue is bad enough. But what makes it even worse is that Reagan is selling this program to the public with the rhetoric of the free market and hard money. When it fails, the hard-money philosophy will be unjustly blamed and discredited in the eyes of the public. This will mean the chances for a genuine economic recovery in the future are that much more remote.

The tragedy of Reagan's program is that the American public demands that inflation be stopped. Reagan was given a hard-money mandate by the American voters—but he's betraying it. The hard-money movement will go down the tubes for years to come.

That's the disaster. It could be 10 years before hard-money ideas get another chance to be heard.

SGR: Well, Prof. Rothbard, your own rhetoric isn't too bad. How about some details now?

ROTHBARD: Fine. Why don't we start off on the budget cuts—the so-called budget cuts I should say, because they're not real.

I think the doubts you raised in your own analysis were right on target. [Editor's note: See SGR late February 1981 issue.] That was one of the best critiques of Reagan's program I've seen anywhere. You just didn't go far enough.

First, Reagan isn't really cutting anything back from 1981. He's actually increasing the 1982 budget by a whopping $40.1 billion. That's a hefty 6.1% increase.

Reagan is actually doing worse than Carter. Carter's deficit in fiscal 1978, the first year he had full control of the budget,

was $48.7 billion. Reagan's projected 1982 deficit was announced at $45 billion. But now Congress is claiming that Reagan's arithmetic was wrong—and the 1982 deficit may well be closer to $65 billion.

Moreover, the new $65 billion deficit projection assumes that Reagan will get every single one of the cuts he's asking for. And for the reasons you pointed out [in the February SGR article] no President can possibly get all the budget cuts he asks for. There's just too much resistance from every special interest group.

So in fact, Reagan's first-year deficit will be a lot worse than Carter's was.

But it's interesting to see how well Reagan has deflected hard-money critics with his rhetoric.

SGR: What do you mean?

ROTHBARD: During Eisenhower's first year in office he really did roll back federal spending below previous levels. He cut the budget by 8.7%.

Eisenhower lowered spending by $6.5 billion. He didn't just slow down the rate of increase in spending, the way Reagan is doing. Yet because Eisenhower only cut his budget by 8.7%, conservatives accused him—correctly, I think—of locking in the excesses of the New Deal.

For Reagan to do as well, proportionately, as Eisenhower—he'd have to cut the 1982 budget by another $97.1 billion.

SGR: What about Reagan's deregulation push. To us, it appears good. The Wage and Price Board, thermostats, his attacks on the SEC . . .

ROTHBARD: You're right about thermostats—and wrong about everything else. I heartily approve of dropping those hideous temperature "guidelines" for commercial buildings. I love air conditioning, and I'm happy to give Reagan credit for ending a despicable little harassment by the government.

Unfortunately, aside from liberating the thermostats, Reagan's deregulation effort doesn't stand up well under close examination. Again, though, Reagan's rhetoric is fooling everybody.

For example, the New York Times printed right on page one that Reagan is abolishing the Council on Wage and Price Stability. Unfortunately, that just isn't so. Reagan isn't abolishing the entire Council. All he's doing is cutting out the Council's wage-price monitoring program. The Council itself is intact.

Yes, this cut will get rid of 135 federal employees and save $1.5 million a year. And, that's okay—since these people didn't do anything except harass businessmen. But firing 135 people off the federal payroll is hardly making a dent in that vast bureaucracy of 1.9 million employees.

Reagan didn't take the all-important step of abolishing the Council on Wage and Price Stability. I don't have to explain to your readers that bureaucracies have lives of their own. If you cut away only part of one of these agencies, it'll soon start to grow again—like a cancer.

But Reagan is doing the same thing over and over. He talked boldly about abolishing the Council on Environmental Quality—but then he backed off very quietly. More talk about dismantling the Federal Trade Commission's anti-trust bureau. And again, he backed off. He even conveniently forgot his campaign promises to abolish the Department of Education and the monstrous Department of Energy.

You see the same pattern repeated all throughout Reagan's economic program. Every step is presented with a flourish of great—magnificent even—free-market rhetoric. But there's little substance behind it. Time after time, Reagan backs off quietly after grabbing headlines with an impressive announcement.

SGR: What about the freeze on new business regulations?

ROTHBARD: All that does is to delay the upcoming regulations that Carter programmed in. Again, that's not a real cutback. It's just like the budget cuts where Reagan is only slowing down the rate of increase. He isn't doing anything to wipe out the jungle of regulations that are driving businessmen crazy—especially the small businessmen who are the backbone of the economy.

SGR: How about Reagan's elimination of price controls on domestic crude oil?

ROTHBARD: It was the Carter Administration that passed the law ending domestic oil price control. This was scheduled to go into effect in September 1981. All Reagan did was to move up the starting date to January.

Now I'm even reading in the newspapers that Reagan cabinet members are arguing for restrictions on Japanese auto imports. That's as far from the free market as you can get.

It's a rotten deal for consumers who have to pay more. It's also rotten for the economy because it locks our capital investment into inefficient producers like Chrysler—whom the free market is saying loud and clear should go out of business.

Still another development: news stories are saying that Reagan is leaning towards new regulations to lower the interest rates that money market funds are allowed to pay. What can I say about that? It's totally inimical to the free market. Again, it screws consumers—this time investors, like your readers.

SGR: How about Reagan's tax cuts, Prof. Rothbard? Don't you think 10%, 10%, 10% sounds pretty good?

ROTHBARD: This alleged 10%-a-year income tax cut is being advertised as the acid test for supply-side economics. Taxes on middle and upper-income people are supposed to be cut significantly—in order to increase savings and investment. The theory then says that the savings will stimulate production.

Actually this could work—if there really were significant tax cuts for the middle class and the wealthy. But they aren't.

To begin with, the top income tax bracket on interest and dividends *wasn't* cut from 70% to 50%, as Reagan had promised. This means that a typical wealthy person paying taxes on $200,000 a year will get only a 3.4% cut. At the other end of the scale a low-income person earning $10,000 a year will get a 15.3% cut.

So the middle and upper income people get the short end of the stick again.

If Reagan was really serious about a supply-side tax cut, he'd have to do away with a lot of other taxes that aren't even being touched.

He should do away with the double taxation on corporate dividends. He should also do away with the excess accumulated earnings tax—which is the bane of all small businessmen who are trying to build growth capital. This is a little-known tax, but it's terribly destructive of employment because it makes it hard for small businessmen to enlarge their operations.

He should also do away with Carter's horrendous "windfall profits tax" on the domestic oil industry. And he should dramatically cut back the taxes on corporate profits.

But none of these really valuable tax cuts are even being considered. And at the same time, there's been a whopping big Social Security increase put into effect this January with little fanfare.

And more: I'm sure your subscribers are aware that Reagan promised to tie his tax cuts to an indexing plan that would end "bracket creep." In other words, inflation wasn't supposed to push you into higher tax brackets anymore. Except that the indexing proposal has now been dropped from Reagan's program, too.

So as you can see, between continued inflationary "bracket creep" and the big new Social Security hike, the much-vaunted 10-10-10 tax cut turns out to be a sham. Most people will end up paying more in taxes than they ever did before.

Even Jack Kemp, one of the originators of the Kemp-Roth tax reduction bill, has disassociated himself from Reagan's so-called tax cut program.

SGR. What about the accelerated depreciation allowances that business will get? That'll have a positive effect on the economy.

ROTHBARD. Yes, it will, but not very much. The way this depreciation proposal is coming through, the improvements it'll produce are very selective. It won't help the high-technology industries, such as computers, which are the fastest-growing sector of our economy.

The main benefits of the speeded-up tax depreciation schedule will go to the old, basic industries like autos and steel, which are highly capitalized and have long-lived assets.

SGR. Prof. Rothbard, how's the economy going to be affected over the next few years by all these factors you've outlined? And what does it mean for silver and gold investors?

ROTHBARD. As I've said, I believe that we're going to have a repressed inflation for the next nine months to a year. This will be a period of strength for the dollar, but it'll be followed by a period of great weakness. Inflation will get worse, very quickly.

SGR. How much worse will inflation become, and how quickly?

ROTHBARD. Well, inflation doesn't stand still. It has to be stopped or it'll keep on accelerating.

At the end of the line—if there isn't a return to genuine hard-money, gold-standard government—we would face runaway inflation.

But your readers don't have to worry about runaway inflation being here tomorrow or next year. It isn't at all imminent. After all, about 30 years were required for inflation to climb from 1% to 10%.

SGR. Both times before when we interviewed you, you urged our readers to get out of dollars and dollar-denominated investments such as stocks and bonds. You recommended hard assets like gold, silver, real estate, art, and diamonds. Has your advice changed today?

ROTHBARD. No. It's pretty much the same. It worked back then and it still works now. I do think, however, that with the present high interest rates, money market funds are a good place for parking some of your short-term liquid assets.

I'm still in favor of the various classic collectables, particularly in fields where you have some personal expertise.

I don't agree with the hard-money people who predict a real estate crash. I still think there's money to be made in good housing.

But in the 1980s there are no longer going to be automatic real estate profits.

For example, some years ago I bought a rental property in a small town in Virginia—and it's done nothing. Unfortunately, the house I bought is in a part of the country that consistently has a high rate of unemployment. So you've got to be very careful where and how you buy, and what your mortgage terms are.

SGR. What about gold as an investment now?

ROTHBARD. I think this would be a great time to buy gold. At present, gold is being over-discounted because of Reagan's rhetoric.

I'd expect a big increase in gold prices, in the not-too-distant future. Inflation has got to catch up with realities. Gold will follow it up as soon as it's no longer artificially depressed by the false hopes Reagan holds out.

SGR. Remember way back in 1972 when we first interviewed you? You didn't want to go on record about how high you thought the price of gold would go—because you said everybody would think you were crazy.

ROTHBARD. Yes, I wish I could remember how high I thought gold would go. But I don't.

SGR. Well, judging from what's happened to its price since then, you must have been pretty close to right on target. Back in 1972, very few would have dreamed that gold would rise to $400 or $800. Are you willing to go on record now with a forecast for specific gold prices.?

ROTHBARD. I honestly don't believe that precise numerical price forecasts are my forte. As an economist and historian, I prefer to analyze the broad sweep of events and not get into "buy this and sell that" types of projections. I leave those projections to investment analysts.

SGR. Just one last question then. What do you see as the trend for silver prices?

ROTHBARD. To be frank, I stopped studying silver some time ago, when I decided silver wasn't a monetary metal any more.

However, the historic trend has been that silver prices generally follow gold prices. So I'd say that today silver is probably a pretty good buy too.●

H.R. 2387

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mrs. COLLINS of Illinois. Mr. Speaker, on March 10, 1981, I introduced H.R. 2387, the Child and Family Development Act, which was drafted with significant input from the Chicago Day Care Task Force.

Since the introduction of the legislation, my office has been beseiged with requests for copies of the bill. Accordingly, I would like to share with my colleagues and general public a summary of H.R. 2387:

SUMMARY OF THE CHILD AND FAMILY DEVELOPMENT ACT (H.R. 2387)

Sections 1-5: Basically devoted to assessment of needs, rationale for child care research findings, purpose, protection of parental rights, definition of child care service.

Section 6(a): Comprehensive plan and program for child care services states: That HHS Secretary will carry out a complete study and assessment of child care needs in United States and transmit results to Congress within 90 days after date of enactment of this act.

(b): On basis of study, Secretary shall prepare and promulgate a comprehensive plan.

Section 6(b): (1) Plan designed to meet need for child care services within each State for infants, preschool and school age—special attention given to children with special needs; (2) provide for coordination of child care services furnished and child care programs conducted under all Federal laws; (3) provide for maximum possible participation by States in the furnishing of services; and (4) program shall be promptly submitted to Congress along with Secretary's recommendation for legislation which may be necessary for its implementation.

Section 7(b): Plan shall not affect level or source of funding for Headstart program or program under ESEA.

Section 9: Incentives for development of improved child care facilities: (1) Annual subsidies to child care facilities serving children not elegible for assistance under title XX of SS Act but whose parents have incomes just above the poverty level; (2) loans or other financial assistance to private, not for profit child care facilities in amounts up to 75 percent of costs involved; (3) grants to defray portion of interest payable by proprietary child care facilities on loans obtained from non-Federal source; and (4) grants to proprietary child care facilities: (c) Assist small individually owned child care facilities on obtaining low cost financing and small business loans to be used in renovation; and (d) Secretary shall develop and recommend legislation providing (1) tax credits for proprietary child care facilities and (2) income tax deductions for license providers of family child care which are affiliated with license group child care facilities.

Section 10(a): Plan shall establish procedures for collection and evaluation of data designed to show how child care needs on each State are being met or not being met.

(b) Secretary to assure establishment within each State an advisory panel to review child care programs and to recommend policy and policy revisions.

Section 11(a): Functions vested in the Secretary by this act shall be performed by a designed State agency if such State has in effect a plan for the administration of child care programs within the State which has been approved by Secretary.

(b) Secretary must (1) designate State agency which is responsible for administration * * * (4) provide for necessary coordination between activities authorized by this act and other child care programs within State including State, local, and private agencies and Federal child care activities; and (5) State shall specifically provide for the establishment of information and referral centers.

(b)(1): Pay to each State which has in effect a State plan for the administration of child care programs approved under this section.

Section 12: Secretary shall annually report to Congress.

Section 13: There are authorized to be appropriated the necessary such sums to carry out such act.●

HELP NEEDED TO SAVE A LIFE

HON. STEPHEN L. NEAL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. NEAL. Mr. Speaker, I would like to bring to the attention of my colleagues the plight of one of my constituents, Mrs. Elinor Chandler of Winston-Salem, N.C., who suffers from Crohn's disease, an incurable condition that requires appallingly expensive medical treatment.

Mrs. Chandler's difficulty in paying for the costly treatment necessary to keep her alive offers a clear example of the need for a policy that encourages catastrophic health insurance for all, for any one of us could also suffer from catastrophic illnesses.

Mr. Speaker, Mrs. Chandler recently asked me to assist her in securing social security disability payments. Although she worked for 10 years, she lacks two quarters of the social security coverage needed to qualify for disability payments. Had she been able to work for 6 months longer, she would have been eligible for this assistance.

Mr. Speaker, Mrs. Chandler's life is one of constant struggle to survive and to combat Crohn's disease. This disease, also known as ileitis and colitis, is an intestinal tract affliction whose cure has not yet been found. Among the most serious problems associated with the illness are the chronic conditions which must be endured. Victims are certain to face prolonged periods of hospitalization and severe pain. Because it strikes hardest at the younger population, many victims are doomed to a lifetime of physical and emotional suffering. There are about 500,000 known cases of the disease in the country, with 100,000 new cases reported each year.

Mrs. Chandler's situation is most grave for she faces both economic and medical hardships. She is afflicted with a severe case of Crohn's which has already destroyed her small intestines. She lives precariously close to malnutrition because her body is unable to process the nutrients needed to sustain itself. To combat this, Mrs. Chandler requires a 5,000-calorie-a-day diet in addition to a special treatment called total parenteral hyperalimentation. This treatment involves the intravenous feeding each night of amino acids and proteins. The treatment, which is necessary for her to live, ranges in price from $30,000 to $50,000 a year. Mrs. Chandler, however, is financially unable to afford the treatment. She lacks just two-quarters of coverage to be considered for social security disability benefits even though she has worked for over 10 years. Her private health insurance plan does not provide total coverage of this type of

treatment on an outpatient basis because it is classified under the category of food. Her husband's middle-income salary disqualifies her for Federal assistance. And paying for the treatment out of pocket is becoming more and more difficult.

Mr. Speaker, I am today introducing a private bill for the relief of Mrs. Chandler. This bill, if approved, would grant the additional two-quarters of coverage under social security that she must have to be considered for disability benefits. These benefits will not meet all of her financial needs, but she needs this help in getting the social security benefits she has contributed to and deserves.

Mr. Speaker, I, like many of my colleagues in the House, have reservations about introducing private bills of this kind. But considering the costly treatment, the seriousness of Mrs. Chandler's illness, and her work record, I believe this is an appropriate step. I urge the Congress to credit her with the necessary two quarters of coverage.

Mr. Speaker, I would like to insert in the RECORD and article which appeared in the Winston-Salem Journal which tells in greater detail of the complex problems faced by Mrs. Chandler.

SHE'S LOOKING FOR HELP . . . HELP TO SAVE HER LIFE

(By Paul Haskins)

Elinor Chandler is looking for a big handout and she isn't too shy to ask for it.

She wants the money for what she considers a worthy cause—saving her life.

Mrs. Chandler has Crohn's disease, a condition that attacks the digestive tract and, in her case, has destroyed the small intestine.

She can't keep her weight up, and she's living perilously close to the thin edge of malnutrition.

Thanks to advancements in modern medicine, there's a treatment that can help Mrs. Chandler. It's called total Parenteral Hyperalimentation.

Thanks to advances in the cost of staying alive, she can't afford the treatment. That's called health-care inflation.

The treatment carries a price tag as hefty as its name: $30,000 to $50,000 yearly.

The telethons haven't discovered Crohn's disease yet—or ileitis, the specific name for her intestinal problem.

There are no high-powered research institutes rushing to her support.

Mrs. Chandler isn't the first person to be denied high-cost care because she can't pay for it. She surely won't be the last.

What makes her situation special is that it seems to defy the popular notion that our society spares no expense in saving lives that can be saved.

Mrs. Chandler, her husband Bill, and their younger daughter live on Birchwood Drive. Her husband has a good job as an engineer with AMP Inc. here.

The family's middle-level income disqualifies them from Medicare or Medicaid—which would have covered her hyperalimentation feedings. But paying for the treatment on their own is out of the question.

"You could make $100,000 a year and still not be able to afford $50,000," Mrs. Chandler says.

One well-intentioned bureaucrat recently advised her that she might qualify for aid if she divorced her husband. But she says such a choice is no choice at all.

Mrs. Chandler contracted Crohn's disease in 1956, a month after her marriage. She's been in and out of the hospitals ever since, 30 times in the last 10 years alone.

Her husband's medical insurance has covered all of her expenses as long as she was hospitalized. If she checked into the hospital for hyperalimentation feedings, it would cover that, too. But the whole idea of the feedings is to let people treat themselves, at home. However, the insurance money would run out after a year if she started home treatment, she says.

Disability payments might also have paid for the treatment. There again, though, she fell through a crack in the system.

Mrs. Chandler says that if her work record covered just six additional months, she would meet Social Security's requirements for disability.

But the bureaucracy won't budge on its eligibility limits, and Mrs. Chandler's requests for an exception have all been denied.

When Mrs. Chandler says she is dying, she qualifies it by noting that her condition isn't fatal in the imminent sense.

The small intestine absorbs nutrients from food, converts them into body bulk and helps people maintain adequate body weight.

Mrs. Chandler's last big operation, in 1979, took away what was left of her diseased ileum. As a result, she's engaged in a constant fight against malnutrition.

Just to keep her weight at a borderline 90 pounds, she consumes 5,000 calories in an average day—two times more than a full grown man would eat.

To supplement her meals, Mrs. Chandler feeds herself fluids intravenously each night while she sleeps.

Total Parenteral Hyperalimentation is an expensive way of adding amino acids and protein to the fluids she already takes. The promise it holds is that it could help her build back her strength and weight, possibly even allow her to go back to work.

With her weight so low, she has little resistance to disease. She says luck alone accounts for her managing to avoid a major illness.

End-stage renal disease is nothing to envy, but Mrs. Chandler says half-seriously she'd like to trade places with a kidney dialysis patient—at least then her life-sustaining treatment would be paid for.

The cost of dialysis, twice- or thrice-weekly blood-rinsings, is about the same as Total Parenteral Hyperalimentation, in the $50,000-a-year range.

The difference is that a few years back state and federal lawmakers decided that no-one should be denied dialysis for financial reasons.

Nearly all of North Carolina's 1,100 dialysis patients are covered under Medicare. In most cases the N.C. State Kidney Program picks up the 20 percent of the dialysis bill not footed by Medicare.

Advanced ileitis is just as deadly as end-stage renal disease. Unfortunately for Mrs. Chandler, it just hasn't caught on in Raleigh.

That double standard doesn't make Mrs. Chandler feel persecuted—only perplexed.

"I don't feel sorry for myself," she says, "The thing is, there's an answer for me, something that's going to keep me alive."

"All right, maybe I haven't paid that much in taxes myself," she continues, "I've been home with my kids.

"But my husband's gainfully employed. We've sent two kids to college, even with my illness. We've paid taxes. Now we're asking for help."

Mrs. Chandler isn't taking her quandary quietly. She has written to Dr. Sarah Morrow, the state secretary of human resources, to the Forsyth legislative delegation, and to Congressman Steve Neal. The replies have all been the same: They're sorry, but rules are rules.

With the usual resources exhausted, Mrs. Chandler is now looking for some special help. She's hoping a local foundation will take an interest in her case and help subsidize her feedings.

As handouts go, Mrs. Chander realizes $50,000 a year is a lot to ask of anybody, even a foundation. But she's not ashamed to ask. She won't go along easily with the idea that she may have to give up all that she and her family own to get the feedings she needs.

She's waiting to see if the right people agree.●

TAR SANDS: AN IMPORTANT SOURCE OF AMERICAN ENERGY

HON. JAMES V. HANSEN

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. HANSEN of Utah. Mr. Speaker, today I cosponsored legislation with support from Chairman SANTINI and other members of the Interior Subcommittee on Mines and Mining to encourage and promote the development of oil from tar sands and other hydrocarbon deposits on Federal lands.

It is estimated that domestic deposits of tar sand contain at least 30 billion barrels of oil, and that as much as 5 billion barrels are presently recoverable with known technology. While tar sand deposits occur in 22 States, it is estimated that over 90 percent of the in-place oil occurs in my congressional district in Utah. Unfortunately, several events have contributed to repeated disappointment and frustration for those who now seek to develop tar sands. Well over half of all tar sand deposits in Utah are located on federally managed public lands and these lands are situated such that major commercial development cannot occur without at least partial utilization of federally controlled tar sand resource.

For 15 years DOI had a moratorium on leasing these lands for commercial development. Thus, private developers were unable to obtain enough contiguous acreage to pursue commercialization. This factor has had a discouraging influence on research, demonstration, and development activities by private industry.

Interestingly enough, the root of this impasse can be traced to Federal legislation passed in 1960, which amended the 1920 Mineral Leasing Act. Ironically, Congress actually intended at that time for the new provisions to allow Federal leasing of tar sands under section 21 leases.

The Department of the Interior last issued such a lease in 1965, and has not issued any additional section 21 leases since that time because of the technical problems involved in differentiating between conventional oil and gas, and tar sands. The definition problem is tied to legal controversy if both oil and gas, section 17, and tar sands, section 21, leases were to be issued to separate lessees for the same land.

Prior to 1965, the State of Utah faced similar difficulties in the leasing of State lands; but in that year, Utah resolved that problem by passing legislation authorizing tar sand leasing under a new combined hydrocarbon lease. The bill I introduced today gives Congress the opportunity to resolve the same problem with the same method.

Last Congress, the Mines and Mining Subcommittee passed through the House a tar sand leasing bill, H.R. 7242. The bill died, however, in the Senate.

The bill which we introduce today is similar to H.R. 7242 in its several provisions. Specifically, provision has been made to:

First, unite tar sands with oil and gas in a combined hydrocarbon lease.

Second, in designated tar sand areas, the acreage for competitive lease may be increased from 640 to 5,120 acres recognizing the additional requirements of tar sand production.

Third, royalties for leases in a designated tar sand area are set at the statutory rate of 12 percent. However, as an additional incentive to stimulate tar sand development, the Secretary is authorized to suspend or reduce the royalty in order to achieve the objective of production.

Fourth, a competitive lease involving tar sands shall, upon application of the lessee, be extended for not less than 5 years beyond its primary term of 5 years.

Fifth, upon proper application, an existing oil and gas lessee may apply to the Secretary for a converted lease to include tar sands.

Sixth, a disclaimer as to the tax consequences and the taxable status of production of tar sands versus oil is included. The purpose of this section is to assure that nothing in the act will affect the present tax treatment of tar sands production on Federal or fee lands, under the Federal income tax or the windfall profit tax.●

INCREASE I.R.A. CONTRIBUTIONS TO $7,500

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. GUARINI. Mr. Speaker, today I am reintroducing legislation which would amend the Tax Code to increase to $7,500 the maximum deduction for contributions to Individual Retirement Accounts.

Under current law, an individual may contribute the lesser of 15 percent of gross income or $1,500 to an I.R.A. While I.R.A.'s have been an excellent device for workers who are not covered by pensions to provide for their retirement, the $1,500 limitation is inadequate in light of today's double-digit inflation.

As a member of the Social Security Subcommittee, I have had some opportunity to study the problems we, as a Nation, face in sustaining a population which is growing increasingly older. During hearings on social security financing issues, members of the subcommittee repeatedly heard that workers should not depend solely upon social security benefits at retirement. Rather, they should plan ahead and save—specifically relying on pensions and savings in addition to social security. In these times of unprecedented inflation, that goal, laudable as it may be, is impossible without attention to the provisions of I.R.A.'s.

I would also note that many of my colleagues are of the opinion that increases in Government benefit programs and increases in social security payroll taxes are unwarranted and unjustified. If that is the case, then Congress must affirmatively act to enable individuals to make substantive provision for their retirement years. Liberalization of contributions to I.R.A.'s is one way in which this objective can be achieved.

In closing, I would note that many Members of Congress have expressed an interest in stimulating capital formation. I.R.A.'s which bear substantial penalties for early withdrawal of contributions are a logical method of increasing capital available to business and industry. Thus, liberalization of the Tax Code with respect to I.R.A. contributions would assist workers in preparing for retirement and spur capital formation as well.●

TRIBUTE TO HON. CARL D. PERKINS

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. FORD of Michigan. Mr. Speaker, I was pleased to read in the April 6 edition of the Washington Post a very accurate and laudatory profile of my dear friend and colleague, Hon. CARL D. PERKINS, chairman of the House Education and Labor Committee. Many of us in the House, and particularly those of us on his committee, have seen firsthand the skills and persuasiveness of Chairman PERKINS. His commitment to the social equality and justice and educational opportunity are unparalleled. The many, many residents of my congressional district who hail from Chairman PERKINS home State of Kentucky can be truly proud of the achievements of this great man. I am inserting this tribute so that others can have the benefit of reading about one of the outstanding leaders in the 97th Congress:

MOUNTAIN MAN'S TURF—PERKINS STOUTLY RESISTS REAGAN'S CUTS IN EDUCATION, NUTRITION, JOB PROGRAMS

(By Margot Hornblower)

Carl D. Perkins, mountain man. He calls himself that and, on first impression, you might believe it. He is a great hulk of a fellow whose east Kentucky twang whistles through the gap in his front teeth. With his loping stride, plowboy hands and rumpled suits, he seems out of place among Congress' manicured politicians.

But if President Reagan wants to slash federal spending, wipe out whole social programs, he's going to have to get past wily Carl Perkins first. And that is no mean feat.

Perkins, 68, is the chairman of the House Education and Labor Committee; he has been for 14 years. That 34-member panel has created and now oversees $34 billion in federal programs. Many of these Perkins fathered.

And now some of Reagan's largest cuts would come in this turf: $2.6 billion (a 28 percent cut) in elementary and secondary educational assistance, the main source of funds for teaching poor children; $6.1 billion (58 percent) from employment programs, including public service jobs; $1.9 billion (38 percent) from child nutrition funds.

The Republican-controlled Senate concurred in most of these cuts last week, and the House Budget Committee is to begin its work on them today. Perkins, one of the opposition's point men in the Democratic House, is stoutly resisting.

"We have worked for 25 to 30 years on these programs," said Perkins, who left his poverty-stricken Appalachian district for Washington in 1949. "The school-lunch program is the greatest feeding program in the world. And these old people who carried us through two world wars—how can we cut their benefits? I hate to see these programs destroyed by people who don't know a damn thing about them."

In 24 days of carefully orchestrated hearings over the past few weeks, Perkins has gathered his flock: a pleading, protesting procession of wheezing coal miners, unemployed factory workers, crippled children, state education officials, impecunious college students, teachers, food service executives, family court judges, malnourished pregnant women—all testifying to the drastic effects of the Reagan budget.

And behind the scenes, Perkins has wheedled and cajoled nearly every member of the House Budget Committee, which is to set spending ceilings in a few weeks.

He accompanied each of his subcommittee chairmen before the budget panel to emphasize his personal interest in every program. At one hearing, he provided Budget Committee members with lists of schools in their districts that would likely shut down lunch programs under Reagan's proposal.

"Underneath that southern gentlemanly, Kentucky mountain-type approach, Perkins is a master politician and parliamentarian," said Rep. Leon Panetta (D-Calif.), a Budget Committee member. "You get taken in by the quiet approach—and the whistle—and before you know it, your pockets have been picked. But it's hard to take him on directly. His heart is in the right place."

Congress, creeping in the shadow of last November's election, is in the mood to cut heavily into social programs.

But while many Democratic chairmen in the House are looking for compromises, trimming their budgets here and there in hope of mercy, Perkins defiantly led his committee two weeks ago to recommend an increase in spending to $42.4 billion—$3.9 billion over President Carter's proposed budget, and $18 billion more than Reagan wants.

Republicans were furious. "He is one of the most bullheaded members of Congress," said John Erlenborn (R-Ill.), who sits on Education and Labor. "He smiles and clutches your arm, but watch out. He would do anything to get his way. Almost everyone in his district gets a benefit check. The more money he can shovel out, the more godlike he appears. He's considered a deity in eastern Kentucky. He has a deity complex."

In the hollows of Kentucky's 7th Congressional District, places with names like Feisty, Rowdy and Troublesome, "Carl D.," as they call him, is a legend.

When he grew up in Hindman in the '20s, the son of a local attorney, eastern Kentucky was still like a frontier. As a boy, he would drive his mules over the mountains to the railhead to pick up passengers and guide them across dirt roads to town at $1.50 a head.

He still drives mules, and the first picture a visitor sees on the wall of his Washington office is of Perkins, dressed in an oversized coat and floppy hat, holding the reins of a mule team with a cart of hay behind him. "I broke those mules myself," he says proudly. "Now I've about wore 'em out."

Nearly every weekend, Perkins goes to his district, often to his 86-acre farm in Hindman, where he chops wood, castrates hogs and visits with the neighbors. Sometimes he drives, as he did regularly until he retired his beat-up Ford Falcon a few years ago with 167,000 miles on the odometer.

Perkins' programs came not from the studies of social scientists, but from his own experiences. At 19, after two years at Kentucky's Alice Lloyd College he worked as a teacher for $50.62 a month.

"I had watched all the teachers leave for Detroit, where they could get better salaries," he said. "So I sponsored federal aid to education for years . . . My uncles were stonemasons, and I used to go up in the hills with them. I watched the youngsters in school who took manual training and got jobs. That's why I'm sold on vocational education."

And many of Perkins' neighbors were men who slept upright in their chairs lest they suffocate from the coal dust encrusted in their lungs. When he graduated from the University of Louisville Law School, he labored over workmen's compensation claims and found there was little reward for years of suffering in the mines.

"Perkins' Private Pension Plan," Erlenborn dubs it, recalling that when the benefits were first set up they were to cost no more than $50 million a year. Since then, however, Perkins pushed through amendments loosening eligibility—black lung is hard to prove without an autopsy—and the claims of 187,000 miners and dependents (15,000 of them in Perkins' district) will cost $2 billion next year.

The Reagan administration at first saw black lung as a juicy target, but officials have laid low since March 9, when 5,000 miners marched on the White House with signs saying, "Must Miners Die to Prove Black Lung?" It now seems likely that changes will be aimed at increasing contributions to the program from coal companies.

A Perkins campaign is an anachronism in an age of computers and media consultants. His main tactic is to drive madly around the district, usually alone, stopping at country stores and filling stations and often merely at a mailbox by the road and shouting up the hollow, "Mr. Jones? This is Carl Perkins. I'm running for Congress again."

A master at helping his people get their roads graded or their food-stamp applications approved, Perkins knows thousands of constitutents by name. While he's a little vague on the younger generation, his first question is always "Who's your daddy?" and he'll inevitably be friends with at least a second cousin.

He spends less than $5,000 per campaign, which means he doesn't have to file statements with the Federal Election Commission. But he does any way, ignoring FEC forms and sending in piles of itemized handwritten expenses on graph paper.

"Bruce Lockhart, Airport, Lexington, KY. 40501, candidate's car, dead battery—$5" is one item in his 1980 report. Another "Bailey's restaurant, Hazard, Ky. 41701, steak for candidate—$13.55."

But when it comes to the federal pork barrel, Perkins isn't stingy. His district is dotted with schools, courthouses, airports and reservoirs, all monuments to Perkins' ability to wring dollars out of Washington. However, his dams have shoved poor farmers off their ancestral lands, while Perkins ignored the fact that the floods the projects were designed to alleviate came largely from lax strip-mining laws.

Nonetheless, Perkins, with his ruddy complexion and beguiling off-center grin, wins elections by more than 70 percent of the vote. The last time, Republicans did not even bother to field an opponent.

In Congress, Perkins' more urbane colleagues call him "Pappy" behind his back, and snicker at his pronunciations, especially when he takes on government "raggalation."

On occasion, when he whistles into the microphone during a debate, congressmen leaning over the back rail start mimicking the whistle until, as one observer put it, the House chamber sounds like "the bird cage at the National Zoo."

Some are taken in by the down-home style. Benjamin F. Reeves, a Perkins aide, remembers that Perkins once told him, "'I'm a pretty fine feller to play dumb.' He trades on that," Reeves said. "But city slickers find themselves with one foot in the air, while Perkins and the train are long gone."

However, Perkins is widely admired for his honesty and, above all, his tenacity. He was the first committee chairman to hold open mark-up sessions. Reporters marvel that he runs his office like a country store—anyone can walk in and listen to whatever business he's conducting.

Perkins has never taken a junket, in fact he hasn't been abroad since he fought in World War II. "He's been here 33 years, but none of the Washington polish has tainted him," said one committee staffer. "He feels it would be disloyal to the people he represents if he weren't exactly like them."

Perkins arrives at the Rayburn building at 7 a.m. when the doors of other offices are still shut tight. He has been known to walk in to work from Alexandria after a blizzard, when the roads are closed.

Single-minded when he wants to pass a bill, his marathon hearings begin at 8 a.m. and last into the night over the feeble protest of fellow committee members.

During a 1972 House-Senate conference on student loans, which lasted for weeks of late-night sessions, he forced colleagues to stay up until 5 a.m. until he got his way. The day after the bill was reported he collapsed from exhaustion and was briefly hospitalized.

Panetta and other Budget Committee members who sparred with Perkins for months over spending cuts last year are bracing for the new battle.

"Perkins and his committee ought to be telling us where the legitimate cuts can be made," Panetta said. "But instead, he's is the trenches fighting a war. Perkins won't take no for an answer. No matter what doors you're closing, he's coming in a window or a side door."

Perkins, however, insists he's ready to compromise. "I don't want to be hoggish," he told a budget task force, adding that he'd accept "reasonable" cuts, perhaps 10 percent. But as for deeper cuts, Perkins confided in his soft Kentucky drawl, clutching a new acquaintance's elbow, "We're going to fight every inch of the way."●

THE UTILITIES AND NUCLEAR POWER: I. THE OIL DISPLACEMENT QUESTION

HON. MARILYN LLOYD BOUQUARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mrs. BOUQUARD. Mr. Speaker, one of the most important aspects of the energy supply issue is the question of prospects for electrical growth which are heavily dependent on the health of the regulated electric utilities. Recently a most thoughtful article on this question appeared which raises important issues about the trade off between new plant construction for additional supply and conservation measures. The Wall Street Journal article of March 11 "Oil Conservation and Utility Returns" also points out that the utility industry appears to be ignoring the new economics of petroleum displacement. Mr. Peter Navarro a researcher at Harvard University's Energy and Environmental Policy Center, is to be commended for an interesting and provocative article which concludes that our Nation's most rational energy choice is down the

smart path of economically rational petroleum displacement through conservation and new construction. I strongly recommend the following excerpts from the Navarro article to my colleagues; it makes a strong case for moving ahead with new nuclear powerplant construction:

OIL CONSERVATION AND UTILITY RETURNS

(By Peter Navarro)

When the price of oil hurdled past the $30 per barrel barrier in 1979, the electric utility industry crossed an important threshold: it became cheaper to build, operate and fuel new coal or nuclear power plants than it was to continue to operate and fuel existing petroleum power plants. Specifically, at $30 per barrel, it becomes economic to displace roughly two-thirds of utility baseload oil consumption with new coal or nuclear plants. When natural gas prices are decontrolled, the same will be true of baseload gas-fired power plants.

The national economic response of utilities to this sudden "economic obsolescence" of their petroleum plants should be feverish construction of new coal and nuclear plants to replace them or, where feasible, the conversion of these petroleum-guzzling economic dinosaurs to coal. Such a response would be most welcome both to national policymakers intent on reducing the three million barrels per day of utility petroleum consumption in the U.S., and to ratepayers, who would benefit by lower rates that will result from replacing petroleum with more economical coal or nuclear.

Instead, the industry appears to be largely ignoring the new economics of "petroleum displacement." Indeed, rather than accelerating new construction, it is delaying or canceling previously scheduled capacity. The National Electric Reliability Council (NERC) of Princeton, N.J., reports over half of the new capacity scheduled for 1979 through 1988 was delayed an average of 20 months. That could mean additional petroleum consumption of up to 2.2 billion barrels over the next decade. At the same time, fully two-thirds of economically feasible capacity has yet to be converted.

The obvious question is why has the industry failed to respond to the new ecocomics? Part of the answer is, undoubtedly, difficulties with permitting and environmental laws and uncertainty over petroleum prices. But unquestionably the single most important factor is the dramatic deterioration in the industry's financial health since the Arab oil embargo.

RELUCTANT MANAGEMENT

Whereas previously the industry was characterized by bond ratings predominantly AAA and AA, it now falls predominantly into the A and BBB category, indicating an over 200-basis point increase in its cost of debt capital at today's rates. At the same time the average market-to-book ratio has plunged well below one; thus any new equity issue implies a "dilution" of existing shareholders' stock. The result is that management is very reluctant to issue new equity shares for fear of diminishing the value of existing shareholders' stock and equally reluctant to issue new bonds because of the rise in its cost of capital. Moreover, the lower-rate utilities can't even issue new bonds because of indenture provisions or the "prudent man" rule, which prohibits institutional investors from buying bonds below BBB. The result is a severe capital constraint which has forced the industry to shift its planning objective away from its traditional mandate to provide least cost reliable service to a strategy of minimizing new power plant construction.

What accounts for the industry's dramatic fall from financial grace? Some suggest it is mismanagement, but such an explanation is too facile. While some utilities are in worse shape than others, all are in serious financial straits. Bad management could hardly be that pervasive.

But while inflation is a large part of the problem, the root of the problem is electric utility regulation. Regulation has not—and in some cases simply will not—allow utilities to earn a rate of return (ROR) commensurate with their current cost of capital.

The statistics are startling. Because of regulatory lag, no major regulated utility was able to realize its "allowed ROR" in 1980. Moreover, in almost every case, the realized ROR was below the utility's current cost of capital. But clearly, if a utility cannot earn a current return on new investment, then any capital expenditures subject it to a loss. Thus it is not surprising that utilities are reluctant to build. While such construction would reduce petroleum imports and lower electricity rates, it increases financial risk and reduces shareholders' real income.

Interestingly, many utilities are justifying their failure to build new capacity under a newly unfurled banner of conservation—signaling an apparent convergence between an industry formerly wed to the "hard path" of new construction and energy doves who advocate a "soft path" solution to the "energy crisis." But delaying new powerplant construction in the name of conservation ignores the economics of reducing oil use and will lead us not out of the import trap but deeper into it.

From the standpoint of national energy policy, the primary purpose of conservation is to reduce petroleum imports. To the extent that it achieves this goal, conservation is an undeniable "good." Conservation is "bad," however, when it is used as an excuse to curtail otherwise economically rational power plant additions to displace oil.

Unfortunately, many proponents of conservation mistakenly regard it as a substitute for new construction. But one must carefully differentiate between construction necessary to meet load growth and that undertaken to economically displace petroleum. To understand this distinction, observe the risks and rewards of believing the "hard" versus "soft" path forecasts.

NERC has projected an average annual increase in electricity demand of 4.1% over the next decade, implying a 50% increase in capacity. On the other hand, the Solar Energy Research Institute (SERI) has suggested that zero or slightly negative growth rate is possible, implying little "need" for new powerplants.

Suppose that utilities build to meet NERC's forecast, and NERC is right. Then, the lights stay on, and our petroleum problem may even improve slightly since the new economic non-petroleum plants will be used more and existing petroleum plants less. But if growth is actually less, then in many areas each new megawatt of non-petroleum capacity will replace a megawatt of petroleum plant; and petroleum consumption, along with electricity rates.

Suppose, however, that the industry believes SERI and builds less. If SERI is right, our petroleum problem gets no worse but neither does it get much better; and regions such as New England and states like California and Florida will continue to rely on petroleum for over half of their electricity.

But what if SERI's forecast turns out to be wishful-thinking conservation, and people simply don't respond? What if it underestimates the shift to electric heat or Detroit begins to mass produce electric cars? Unlike with overforecasting, the penalty for underforecasting is real. Both imports and electricity rates, will rise sharply as utilities run existing petrolueum plants at higher capacity factors to meet incremental demand. Moreover, as the threat of blackouts emerges, there will be a mushrooming of "short construction cycle" oil and gas combustion turbines—a response that will extend import dependence into the next century.

THE REAL POINT

The real point is not which forecast to believe but rather that new capacity does not necessarily trade off with the gains from conservation. While that tradeoff has some validity in regions like the Midwest that use little petroleum to generate electricity, it is equally true that in heavily petroleum-dependent areas the gains from conservation must go hand in hand with the gains from new capacity which produces electricity from non-petroleum sources.

The mistaken notion that conservation is always a substitute for new construction is most frequently heard in the regulatory arena as a dispute over "reserve margins," which measure the percentage of capacity a utility has over peak demand. The traditional rule of thumb has been 20%; margins above that "safe" level are supposed to signal "goldplating" to boost utility profits. But the new economics of petroleum displacement require a more modern view: The 20% rule should be viewed merely as a lower bound below which no utility should fall for reliability reasons, but above which a utility may want to go for economic reasons.

The Department of Energy's National Electric Reliability Study has brought this distinction into sharp focus. The study determined what reserve margins provided the least costs electricity to ratepayers in different regions. It found "economic reserve margins" to rise with the amount of petroleum in a region's generation mix. For example, if New England, which depends on oil for over 50% of its electricity, were to build to a 27% "reliability" reserve margin, the cost of electricity generation would be 9.9 cents/kwh; but that costs could be cut in half if it built to an "economic" 78% reserve margin. Similarly, DOE found the economic reserve margin for the Southern California-Nevada region to be 70%, and 49% for the Florida-Southern Companies region.

These results vividly illustrate that there is economic justification for building new power plants on the basis of petroleum displacement. There is then no difficult choice to make between the soft path of conservation and the hard path of new power plant construction. That is a false dichotomy. There is only a sprint as quickly as possible down the "smart path" that encompasses both options—the pursuit of economically rational petroleum displacement through conservation and new construction.●

EXTENSION OF PARENT'S BENEFITS UNDER SOCIAL SECURITY

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. GUARINI. Mr. Speaker, today I am introducing a bill which would amend title II of the Social Security Act to provide that the parent's insurance benefits may be paid to the parent who has care of a dependent, nondisabled child, until the child reaches age 19 or has finished high school, whichever comes first.

The problem which this bill is designed to correct was first called to my attention by a displaced homemaker from my district. Mrs. G is a widow who has been the sole support of her daughter. Unfortunately, her daughter celebrated her 18th birthday in December but did not graduate from high school until the following June. However, Mrs. G's parent's benefits were terminated when her daughter turned 18.

Mrs. G, at the time that she lost the parent's benefits, was employed part time at a local school and earned the minimum wage. She had tried to find full-time employment but had been unsuccessful. She had been a homemaker for 31 years until the death of her husband, 5 years ago.

Mr. Speaker, if the purpose of the parent's benefit is to provide assistance to those with dependent children, it seems unfair to penalize them because a child's 18th birthday falls prior to high school graduation.

Women like Mrs. G who have spent many years as homemakers are, as you know, at a severe disadvantage when they enter the job market late in life. They face a combination of age discrimination, lack of skills, lack of recent paid work experience, and competition from younger workers.

We have heard a great deal about how much progress women are making in the job market in terms of their earning ability. However, recent statistics from the Department of Commerce show that a woman today earns only 56 cents for each dollar a man earns. Currently, a woman, employed full time, year-round, earns on the average $9,929 compared to the $17,526 a man earns.

I ask my colleagues how a woman can be expected to support herself and her dependent child on a minimum wage, part-time job.

My bill will not help Mrs. G. Her benefits terminated last year, but it will help others like her who are struggling to raise their dependent children.

I would ask my distinguished colleagues to join me in supporting this compassionate measure.

Thank you.●

IS DEMOCRACY IN AMERICA DYING?

HON. JIM SANTINI

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. SANTINI. Mr. Speaker, Mr. Courtland Cline of Las Vegas is the Nevada winner of the Veterans of Foreign Wars voice of democracy scholarship program.

I am very proud of the efforts by Courtland and the other young people who participated in this contest. This young man has captured some important and vital thoughts in this essay. I want to share this impressive commentary on democracy with my House colleagues:

"Democracy in America is dying", or so you can read in almost any newspaper. My commitment to my country is the preservation and growth of a democracy that is far from dead! A philosophy created, honored, and defended for over two hundred years—a battle between freedom and slavery—a goal that is as changeable as its people, but yet attainable. An idea that is challenged daily and has never lost.

Preservation of democracy must begin on a personal level. We must respect and have faith in our system, or no one else will. Individual belief is the only true measure of the strength of a country. Military, political, and economic weapons are unable to defend a country without faith and love for its political ideals. By committing myself to the strengthening of this philosophy, I challenge others to join in this noble cause of freedom.

My personal faith in our system can be demonstrated on many levels. Through physical, mental and emotional sacrifices I will ensure the power and continuity of this belief.

I physically commit myself to the defense of my country against its enemies. I pledge myself to the preservation of peace, I challenge others to accept their democratic responsibilities and defend the rights they enjoy as citizens—for the sake of freedom.

Mentally, I commit my thoughts to society and the common good, but never forgetting the importance and rights of the individual. As Alexander Mieklejohn said, "Democracy is the art of thinking independently—together". At a time when our nation's thinking is so splintered, it is difficult to reach agreement, except in the case of democracy, where we should all be united as one. I challenge my peers to accept this philosophy, and to think towards a goal of unity, but not conformity. I will search for long-term solutions to the problems of our nation, remembering that the United States is the most creative nation of our time.

Emotionally, I will commit myself to the elimination of prejudice from my decisions. I will look beyond my fears and find the best solutions to our problems.

More important than anything else I can offer, I will give my faith to my country in any circumstance and my allegiance under any condition.

Our nation's future lies heavily upon the preservation and continuity of democracy. We are ultimately the creators and the destroyers of our own political system. As Alexander Woolcott stated, "I'm tired of hearing it said that democracy doesn't work. Of course, it doesn't work. We are supposed to work it." By providing this lasting ideal of freedom, my commitment will benefit future generations giving them a foundation of hope where dreams can be built into realities.

No, democracy is not dying: just being challenged; and, I am committed to win this challenge for mankind! As Franklin Roosevelt said, "The democratic aspiration is no mere recent phase of human history. It is human history". It is our only history!●

SOIL CONSERVATION INCENTIVES

HON. COOPER EVANS

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. EVANS of Iowa. Mr. Speaker, today I am introducing two pieces of legislation designed to provide incentives for farmland owners and operators to install soil conserving practices.

In many States, including my home State of Iowa, we currently are losing two bushels of soil annually for every one bushel of corn which farmers produce and harvest. This kind of loss of our most basic resource—the Nation's soil—simply cannot be permitted to continue. At the same time, our current budget pressures cannot provide massive financial assistance elements for landowners and operators to install soil conserving practices.

We must, however, in Congress provide some sort of necessary incentive for the installation of soil and water conserving practices, and the legislation I introduce today, coupled with H.R. 2515, the Soil and Water Conservation Incentives Act of 1981, are steps in that direction.

The legislation I am introducing today will permit the Secretary of Agriculture to provide incentive payments for a very small portion of farmland in each county for the purpose of taking land out of production to install necessary conservation structures during the normal crop season. Currently, in much of the Nation's heartland, farmers are prevented from installing conservation practices during any time of the year other than a brief period in the early spring, before planting begins, and a short period in the fall following harvest. This limitation exists because during much of the rest of the year the land is either frozen and impossible to move, or is covered with growing crops. My legislation would permit the Secretary of Agriculture to provide a payment to farmers equal to 50 percent of the typical annual per acre rent for similar cropland in the county, to retire land from production while soil conservation measures are

being installed. This could mean the installation of such things as terraces, diversion dams, and other soil conserving measures which require the movement of soil.

In order to prevent massive Treasury exposure, my legislation will permit the Secretary to retire not more than one-half of 1 percent of the croplands in an individual county each year. The rental rate for the land, as well as the lands to be designated for such construction practices, shall be determined by the county soil conservation board which has responsibility for soil and water conservation matters within a county.

A second item of legislation which I am introducing today would take effect only when the Secretary establishes a farmland set-aside or diversion program to limit agricultural production. This legislation would involve the local soil conservation board in the decision as to what land should be retired from production in event of such a set-aside. Currently, only production oriented committees within a county are involved in this decision.

Under my legislation the county soil conservation board would review proposals for lands to be retired from production. The board would have the power to disapprove the diversion of land which would not make a substantial contribution to soil conservation within a county, compared to other lands which an agricultural producer could set aside under these acreage retirement programs.

The legislation I introduce today, coupled with H.R. 2515 which has been introduced in the Senate by Senator JEPSEN as S. 569, will add to the incentives for farmland owners and producers to install soil conserving practices on their farms.

We clearly need strong incentives to conserve the soil. The House Subcommittee on Conservation and Credit, on which I serve, is currently in the process of completing action on legislative language to be included in the general farm bill. It is my intent to offer for inclusion in that legislative language the two elements of legislation which I am introducing today.●

FUSION ENERGY: WE MUST MOVE NOW

HON. MARILYN LLOYD BOUQUARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mrs. BOUQUARD. Mr. Speaker, fusion energy, the ultimate and unlimited domestic energy source of the future, is at our doorstep. We must now begin to develop the engineering capability to reap the benefit of our Nation's investment in the basic research as a basis for developing this technology. The worldwide technical community is united in the conviction that sufficient scientific evidence is presently available to warrant establishing an aggressive engineering program for fusion and undertaking the preliminary design work for the next major step in the fusion program—the construction of the so-called fusion engineering device.

The 96th Congress provided an overwhelming endorsement for this pathway to fusion energy by the passage of H.R. 6308, the Magnetic Fusion Energy Engineering Act of 1980, which was signed into law on October 7, 1980, Public Law 96-386. The elopement is a testament to both the 160 cosponsors in the House and 24 cosponsors in the Senate. This bill passed both congressional bodies essentially without opposition. The establishment of a national policy favoring fusion development brought together such a broad base of bipartisan support that the American public, as well as Congress, had expected a noticeable increase in momentum for fusion power development independent of which political candidate was elected to power. The new administration's Office of Management and Budget, consistent with this ground swell of support, actually wanted to put more money into the fiscal year 1982 magnetic fusion program than the Department of Energy was willing to accept. Oddly enough, the Department of Energy told OMB that this additional money in fusion was not warranted.

Many organizations and societies have endorsed moving ahead more aggressively with fusion. Most recently, the American Association of Engineering Societies has joined the ranks and has issued a national energy statement. The AAES is an umbrella organization representing the views and positions of 22 major engineering societies, for example, Institute of Electrical and Electronics Engineering, and so forth, whose collective membership rolls total over 700,000 engineers. Their statement is typical of the broad scientific and engineering community support for the approach enacted into law last year. I commend their statement for your review to reconfirm your commitment to this most important energy technology. Hopefully, the Department of Energy will wake up to reality of fusion's promise.

I freely welcome the views of my colleagues on this issue of advancing the pace of the fusion energy program. In order to move ahead with development of this virtually unlimited energy resource, the Congress must show its desire to have the administration implement last year's legislation, Public Law 96-386. Let us not overlook the opportunity to make fusion energy a reality.

The statement follows:

NATIONAL ENERGY STATEMENT

INTRODUCTION

The Coordinating Committee on Energy (CCE) is a working committee of members of 22 major engineering societies having a membership of over 700,000 engineers. The Committee released a National Energy Statement in March 1980 because its members recognized that the government has failed to establish an energy policy capable of providing a comprehensive energy source mix which can meet our requirements for the last portion of this century and the greater portion of the next.

The Committee believes that selected portions of the National Energy Statement require amplification and will issue supplements as the need is perceived. Included herein, is the Statement on Nuclear Fusion Energy.

STATEMENT ON NUCLEAR FUSION ENERGY

Nuclear fusion is a promising new energy source to which the U.S. may look to help meet its energy needs in the next century. The energy content of the fuel resources for fusion on the deuterium-tritium cycle is comparable to the energy content remaining in all fossil and uranium fuel resources. The energy content of the fuel resources for fusion on the more advanced deuterium-deuterium cycle is virtually unlimited.

Recent progress in fusion research has given researchers confidence that the scientific feasibility of magnetic-confinement fusion should be demonstrated in the next generation of large tokamak experiments which will begin operation in the early 1980s. Tokamak is the name given to a particular toroidal magnetic-confinement scheme which is the most advanced and is presently being developed worldwide. Other magnetic confinement and inertial confinement concepts also show promise but are at earlier stages of development.

The technological requirements for fusion power have been identified. In particular, the requirements for tokamak reactors have been examined in detail. Development programs for all of the major fusion technologies are underway. There is a good degree of confidence that the fusion technologies can be developed to the required levels. It is recognized that a substantial and sustained development program will be necessary.

Economic analyses indicate that in the next century the cost of producing electricity by fusion could be comparable to that using fission or coal. While such projections of the costs of all future energy systems are uncertain, they do provide an indication that fusion could be an economically competitive power source.

It seems technically feasible to develop fusion energy to the commercial stage within the first quarter of the next century. This development timetable would require a substantial expansion of the present research and development efforts in support of the construction of a tokamak engineering technology test reactor to operate in the early 1990s and a demonstration reactor to establish the reliability and economic feasibility of fusion early in the next century.

The status and prospects of magnetic-confinement fusion development have been extensively reviewed. During 1979 an International Atomic Energy Agency Workshop conducted an extensive assessment of the technical basis and feasibility of constructing a tokamak engineering test reactor. This workshop, which involved hundreds of leading fusion scientists and engineers from the U.S., USSR, Japan and Europe, concluded

that it was feasible to construct a tokamak engineering test reactor to operate about 1990, provided that the supporting research and development programs were intensified. They further concluded that this was the appropriate next major step in fusion power development. The Energy Research Advisory Board of the Department of Energy, consisting of senior industrial and university leaders in science and technology, has recently stated that the status of tokamak research and technology was sufficiently advanced that a major engineering oriented device should be undertaken as the next step.

To provide for the expeditious development of nuclear fusion as an energy source, the Coordinating Committee on Energy recommends that:

1. The tokamak research program should be intensified to provide the basis for building a fusion engineering test device and to investigate improvements of the concept.

2. The magnetic-confinement technology program should be intensified to provide the technological basis for building a fusion engineering test drive.

3. A commitment should be made to build a tokamak engineering test reactor to operate in the early 1990s. An organization should be created to manage this undertaking and to coordinate the directly supporting research and development.

4. A national goal should be established to have a demonstration of fusion reactor reliability and economic feasibility early in the next century with periodic reviews to give guidance to the program.

5. Research on other magnetic-confinement and on inertial-confinement concepts should be intensified so that their potential can be evaluated.●

NATIONAL GUARD ATTACKS ON PEOPLE OF EL SALVADOR

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. MARKEY. Mr. Speaker, last week, the Boston Globe reported another in a series of massacres perpetrated upon the peoples of El Salvador by the National Guard. The latest attack, occurring in the Rio Lempa, was similar in nature to the alleged massacre last May of an estimated 600 fleeing refugees slaughtered near the Salvador/Honduras border.

For the benefit of my colleagues, I am submitting for the RECORD two personal accounts of this previous attack made by peasants whose lives were spared. Their testimonies were published in Spanish in the June 22 issue of Solidaridad, international bulletin of Socorro Juridico, Legal Aid Office of the Archbishopric of San Salvador.

EL SALVADOR

TRANSLATION OF TESTIMONIES BY PEASANTS OF INCIDENTS WHICH OCCURRED NEAR THE SALVADOR/HONDURAS BORDER ON 13TH AND 14TH MAY 1980

1st Testimony

". . . I live in Jicaro, near Las Minas, Chalatenango Department. On Tuesday 13th May, as I was beginning to prepare a small plot of land for planting corn, I realised that an armed helicopter had been flying over the area since the early hours of the morning. A few minutes later, I saw about nine hundred National Guardsmen, soldiers and members of ORDEN coming into Jicaro. They were coming from three sides, Las Minas, Llano Grande and the village of Los Beltran, about three hundred in each group. A peasant named Salomon Alas was sowing corn. When they saw him, they shot him; then they killed José Melgar and his wife Josefina Guardado, Salvador Alas, Jesus Mena and two others. People began to flee towards the mountains in the direction of the valley of Los Brizuela. There the soldiers dragged Adrain Brizuela from his home and shot him in the street. They also took out his brother Hermenegildo, brutally beat him up and, thinking he was dead, left him lying in the street. There were about five hundred of us fleeing, including old people, women and children, but as we went along peasants from the villages of Corral Falso, Las Vueltas and Los Naranjos joined us, for they too were being repressed by the National Guard and the army. That day, in the village of El Cacao Concepción Quezaltepeque, they shot dead José Bruno Alas, 35 years old Alfonso Mejia, 30 years old, his brother Juan Mejia, 28 years old, and José Israel Orellano, 25 years old. In the village of Los Calles, they shot Sebastian Ortiz, an old man of 84, and Antonio Palma, 35. We arrived at the village of El Potrero at about two o'clock in the afternoon and from there we saw the guards pushing rocks down El Pajal hill in order to kill some women and children who were down below. Amongst our group, Amadeo Mejia and three children of eleven, seven and five years old were shot. We did not go on because we were afraid they were waiting for us so we decided to spend the night in the Jocote Redondo mountains, putting up with the cold, hunger and the heavy storm that broke out that night. A three-month old baby died from the cold. At dawn, we carried on in the direction of Los Naranjos, but a helicopter, the army and National Guard were following us closely. We passed through the village of Los Amates, where they had assassinated two old men, Carlos Calderon and Juan Lopez. When we arrived at El Zapotal, we heard heavy shooting coming from the direction of the Sumpul river and saw several helicopters flying over the area, so we again went up into the mountains and spent the night there. At dawn the next day, we realised we had been surrounded by another large contingent of guards and soldiers who were blocking our way to Los Naranjos. Fear, hunger and thirst made some of us break away from the group and go our own way. I returned to El Cacao but other peasants stayed to sleep in the mountains. . . ."

2nd Testimony

". . . I live in Jicaro, Las Minas, Chalatenango Department. On Tuesday 13th May at about seven in the morning, I went down from my refuge, which is up in the mountains because we are constantly being pursued by members of the Guard, ORDEN and soldiers, to have breakfast and realised that an olive-green helicopter was flying over the village. A few minutes later, about nine hundred National Guardsmen, soldiers and members of ORDEN entered the village, about three hundred from each side, and started shooting. They killed seven peasants. About five hundred of us, mainly old people, women and children, fled in groups into the mountains. My group, made up of about three hundred people, set off towards El Amatillo, next to Las Vueltas. From there we went to Portillo del Amate where we stayed until eleven o'clock that night. As the children could no longer stand the hunger, rain and thirst, we decided to go down to Yurique, where we stayed until five o'clock the next morning. There we met up with another five hundred peasants who spent their time cultivating unused land. Yurique is on the Sumpul river on the border of El Salvador and Honduras. We had been there for about an hour when we were attacked from all sides. Two olive-green helicopters attacked us from the air and more than five hundred National Guardsmen blocked all exits. The only way we could escape was by crossing the river Sumpul in the direction of Honduras. During this attack, more than twenty-five people were machine-gunned. When I entered the swollen river, I saw seven children who had drowned being dragged downstream by the strong current. One of them was about six or seven months old. Some children stayed on the Salvadorean side and the mothers watched from the Honduran side as a National Guard from our country threw several little children into the river, threatening to throw more if we did not return to the Salvadorean side. A Honduran soldier shot at the National Guard and said that what was happening was not the children's fault; that it was the fault of the National Guardsmen because they were provoking the peasants. About half an hour later, the Honduran authorities told us to swim back across the river to our country. When we returned, we were tied up by the thumbs and made to lie face down. We were kicked and beaten with rifles for eight hours. At about half past five in the afternoon we were told that the old people and some women and children would be set free. Those of us who were set free, about seventeen of us, went up into the mountains leaving about twenty-five people still captured. We had been up in the mountains for about fifteen minutes when we heard heavy shooting near the river. Without doubt the Guardsmen and soldiers assassinated those we had left behind. We carried on walking and arrived at a place called El Portillo del Amate at nine o'clock Thursday morning after walking all night without food. We heard more shooting nearby so we decided to flee to the highest mountain, the name of which I can't remember at the moment, and spent Thursday night and all of Friday there. On Saturday morning we decided to go down because the children were dying of hunger and cold. We returned to Jicaro, after being taken the same afternoon to San Salvador by social services. Thousands of peasant families are fleeing to the mountains in the department of Chalatenango, fleeing from the National Guard and the army . . ."●

OUR WATERWAY ARTERIES STARTING TO HARDEN

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. GAYDOS. Mr. Speaker, almost since the birth of our Nation, America's inland waterways have been major economic arteries. The industrialized strength of our earliest settlements

and cities was used to open up the remote areas to civilization.

Today, many of those arteries are hardening. The system of locks and dams which served this Nation so well in the past has deteriorated to the point where its future is threatened. The condition is serious. It must be treated. Now.

The importance of an immediate and massive improvement program was dramatically illustrated in a slide presentation put together by DINAMO, an association of business, labor and government leaders from four States most seriously affected by the critical condition of locks and dams on the Upper Ohio River System. The sole purpose of DINAMO—the association for the Development of Interstate Navigability on the Allegheny, Monongahela, and Ohio—is to expedite the modernization of the river system.

Mr. Speaker, I believe the script used in the association's slide presentation is most enlightening and I am inserting into the RECORD for the attention and consideration of my colleagues.

The script follows:

The Ohio River system is a major artery supplying economic lifeblood to one of the nation's most industrialized regions—Pennsylvania, Ohio, West Virginia and Kentucky.

Millions of jobs in our 4-state area are directly dependent on the Ohio River and its tributaries, and more than $100 billion dollars in development and construction has been invested in this region adjacent to its waterway. But, the artery is showing signs of hardening. The lock and dam system, which permits full navigational use of the Ohio River Basin waterway is in urgent need of improvement. The condition is serious and unless treatment is started soon, the economic health of our multi-state region will face extreme deterioration.

The lock and dam structures have provided ample warning signals: crumbling lock walls and extensive shutdown periods due to increasing maintenance repairs . . . but these symptoms have received only superficial treatment.

Positive action toward the proper solution is now necessary.

Before we suggest the remedy, let's review the Upper Ohio River system and its importance to our region.

Ever since the explorers came west, the importance of these rivers has been recognized.

The earliest settlers used flat-bottomed boats and manufactured goods were transported down the river by keelboats. Foreseeing the tremendous economic potential of the nation's inland waterways, the Congress of the United States, in 1824 charged the Corps of Engineers with the responsibility for waterway development, including the construction, operation and maintenance of lock and dam structures. By 1929, a system of locks and dams had been completed on the Ohio River, making the river navigable year round. The system worked and the rivers became the region's principal economic generator, providing a means of transportation, a recreational and cultural resource, a key element of national defense, a source of water for industry and municipal water systems, and a home for many.

For 157 years since assigned the responsibility, the Corps of Engineers has done an excellent job only to see in recent years a severe deterioration of the system. This deterioration has been caused primarily by the lack of financial support from the federal government for waterway projects.

The resulting problem is focused in our 4-state region, where improvements in lock and dam structures are urgently required. It is particularly serious in the Upper Ohio River system, above Greenup, Ky. This 600 miles of navigable waterway carries more tonnage than any other inland portion of the nation's inland river system.

The continued viability of this river system is endangered by the deterioration of the lock and dam structures and the obsolescence of their design.

When these lock and dam structures were build, they were projected to have an economic life of 50 years. But the average age of 20 of the 30 locks and dams on the Ohio, Allegheny, Monongahela and Kanawha Rivers exceeds 50 years, the oldest being 74 years of age.

The deteriorated condition and inadequate design of the locks and dams has already caused bottlenecks at key locations.

Let's take a closer look at the lock and dam structures at these locations, beginning with the Gallipolis structure on the Ohio River.

Locks above and below have lock chambers that are 1,200 feet long while the lock chamber at Gallipolis is only 600 feet long. This means that the standard 15-barge tow must be broken and double locked through the chamber. This increases the locking time drastically and reduces capacity, creating a backup of traffic in each direction. Although the magnitude of the problem was recognized in 1962, and a study initiated in the same year, approval for final design and construction has not yet been obtained . . . 19 years later.

Further upstream on the Ohio River, the three locks closest to Pittsburgh—Emsworth, Dashields and Montgomery—also have 600-foot lock chambers which are incompatible with the other structures on the Ohio River system.

The Monongahela River, with its origin in West Virginia, is a further example of deteriorating and obsolete lock and dam structures.

Five jumbo barges and a boat can be locked through the three modern navigational facilities at the head waters of the river.

However, the adjacent Locks and Dams Numbers 7 and 8, can accommodate only one jumbo barge and a boat, while Locks and Dams Numbers 3 and 4 provides space to lock three jumbos and a boat. These capacity constraints and inconsistencies in lock sizes are compounded by the fact that 5 of the 9 structures require either complete reconstruction or major rehabilitation due to age and excessive deterioration. It was recognized as far back as 1964 that Locks and Dams Numbers 7 and 8 would be constraints and studies were begun at that time. In 1973, the project was approved for construction by the Secretary of the Army but subsequent changes in federal procedures have eliminated the previously obtained approval, causing a regression in the status of the project.

On the Kanawha River, all the locks and dams are obsolete by today's standards. The average age of 48 years and the inadequate size of the present structures make improvement imperative. Winfield Lock and Dam, for example, located closest to the mouth, will have to be upgraded in the very near future if the Kanawha is to accommodate the anticipated increase in volume.

Similar conditions exist with respect to the locks and dams on the Ohio River's navigable tributaries, including the Allegheny, Kentucky and Green Rivers.

As we have shown, these two factors—deterioration and obsolete design—must not remain ignored. Dependent upon location, the failure of a deteriorated lock and dam structure would not only halt water transportation but, more importantly disrupt vitally needed water supply for both industry and communities.

We must ask the question . . . why are the locks and dams in this present serious condition? The Army Corps of Engineers has continually submitted plans to the federal government for major repairs as well as for complete modernization of waterway structures. However, federal funding . . . for other than emergency repairs . . . has failed to materialize due to red tape, monetary restraints, conflicting regulatory revisions and an unimaginable variety of other time consuming delays. The result . . . no waterway modernization project has been approved for construction in this region since the Hannibal Lock and Dam in 1964.

Even if the present practice of superficial rehabilitation in lieu of modernization is continued, serious problems remain. Inadequate capacities will inhibit future economic revitalization and development in each of our states. Therefore, the modernization of the Upper Ohio River system is imperative.

This modernization will permit continued use of the waterways . . . the most economical mode of transporting bulk cargoes. Economical because it offers the benefits of large volume movements. A single 15-barge tow carries as much cargo as two 100-car unit trains . . . or 900 trucks. These economies of scale are complemented by the energy efficiency of waterway transportation when measured in Btu's per ton mile, far less energy is required to move a ton of cargo by barge than by either rail or truck. This will become even more important in the future as the cost of fuel continues to increase.

The cost effectiveness of waterway transportation brought about by economies of scale and energy efficiency point to an optimistic future for bulk cargo movements by river and for the communities served.

Commercial transportation on the Ohio River System is projected to increase rapidly from the present level of 240 million tons per year to 300 million tons in 1985 . . . and up to 400 million tons by the year 2000.

Commodities such as petroleum and steel . . . chemicals and limestone . . . coke and fertilizers . . . salt and grain . . . sand and gravel, now play and will continue to play their vital roles in our regional economy.

It is the transportation of coal, however, that will benefit most from the modernization of the Upper Ohio River Basin. About 73 percent of the tonnage now carried on the Upper Ohio River System is coal and this percentage will continue to grow in the future.

Efficient transportation of coal to industries and power plants in our region is one objective. Exporting it from the region for use either domestically or in world markets is another.

Further market opportunities for coal within our 4-state region arise from the proposed synfuel plants, which are most likely to be located along navigable waterways.

Unless steps are taken to improve our locks and dams, however, we will not be able to take full advantage of these market opportunities for coal, our most abundant regional asset. The solution is clear: modernize the locks and dams. But the question remains: How can modernization best be accomplished?

The Corps of Engineers now reports it takes 25 years from the initiation of a preliminary study to completely construct a single lock and dam. Therefore, if we were to begin the upgrading process immediately, it would take an unacceptable amount of time under present procedures to complete the necessary modernization. We do not have the luxury of time.

Obviously, there is a need for change if the system is to be modernized in time. That is the reason for the formation of DINAMO. This association is comprised of representatives of the 4 states which are most seriously affected by the condition of the Upper Ohio River System.

We have but one purpose—to expedite the modernization of the system.

To accomplish this, there is a need for a political coalition of our 4 states to foster support and stimulate congressional action to authorize and fund navigational improvements. Successful efforts of the coalition will result in the modernization in the targeted area in less than 30 years at a cost currently estimated at $2.5 billion.

Our analysis shows that a multi-state agency will have the enduring qualities necessary to get Congress to act. It has been done before. An example is the Tennessee-Tombigbee Waterway Authority. Five southeastern states, with the support and leadership of their governors, joined together and convinced the federal government of the necessity to create a new waterway system between the Tennessee and Tombigbee Rivers. We're convinced this same approach can be successfully applied to the modernization of the navigational structures on the Ohio River system, started in 1824 and completed in 1929, a system which has been in existence for 51 years and on which the continuing economic health of our region depends.

DINAMO will coordinate the development of public support for such an agency. Ultimately, DINAMO will work itself out of existence, but only when an effective interstate agency, or a similar political coalition with the necessary enduring qualities, has been successfully formed.

Modernizing the navigational structures on the Ohio and the Monongahela and the other tributaries in the system is not just desirable, it is mandatory if our states are to retain their economic and commercial vitality. We cannot afford any more delay. We want to make it happen in this generation.●

H.R. 3073 INDUSTRIAL DEVELOPMENT BONDS—GOOD, BAD, OR INDIFFERENT?

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. GEPHARDT. Mr. Speaker, today my colleague JOHN DUNCAN of Tennessee and I are introducing legislation to amend the industrial development bonds (IDB's)

We hope this will help initiate a broad debate on the uses of such financing, its economic impact, and allegations of abuses. Our goal is a stronger, more effective program.

America's growth rate has been declining for the past decade. Productivity is lagging and unemployment is high. Partial responsibility for this problem lies with deferred investment caused by high inflation and financing costs. The need for greater capital formation is now unquestioned.

Small issue industrial development bonds can help solve this problem. They are a proven and effective way of encouraging additional industrial investment and creating new jobs. Projects financed with such bonds create additional tax revenues.

If America is to regain its international competitive leadership, we must reindustrialize. By making larger projects eligible for tax-exempt financing, we move toward this goal.

Small issue IDB's are essential to improving productivity because they provide an incentive to invest. Because the interest on them is tax-free, they can be sold at lower interest rates and reduce the cost of financing. Thus, the availability of IDB's has allowed sponsors to proceed with plans that would otherwise be pruned or postponed during a period of high interest rates.

But inflation now inhibits such financing. The dollar limits for small-issue IDB's are $1 million for any project, or $10 million on a project where the cost does not exceed that amount. In 1968, the upper limit was set at $5 million. But a factory that would have cost $5 million then costs $15 million now and may cost $20 million by 1985. With each passing year an increasing number of projects become ineligible for IDB financing because of the $10 million limit.

The bill we are introducing would raise the lower limit to $3 million and the upper limit to $15 million. The $10 million limit was set in 1978 despite a Senate decision to approve a $12 million limit. There is some indication that $10 million was an inadequate amount in 1978. There is no doubt that this is now the case.

As you know, section 103(b) of the International Revenue Code provides that interest on certain industrial bonds is exempt from Federal income tax if various requirements are met. These provisions are complex and explained more fully in our prepared appendix.

Increasing the dollar limits allowed by the Internal Revenue Code can actually increase Federal revenues. In his study, "Economics and Federal Revenue Effects of Changes in the Small Issue Industrial Development Bond Provisions," published last year, Dr. Norman B. Ture, now the Undersecretary of Treasury for Tax Policy, challenges assertions that the bonds result in a revenue loss. The net-of-feedback measure, which takes into account changes in economic activity in response to the tax change, indicates a significant revenue gain based upon increased capital formation and the resulting gains in output, expansion of the corporate tax base, and increased individual and payroll taxes.

Our proposal is complementary to other tax changes to promote capital formation, such as faster depreciation. Small issue IDB's reduce the cost of funds for plant construction while accelerated depreciation allows more rapid recovery of the overall investment. Together they provide a strong incentive to invest.

Our proposal would not change the special Urban Development Action Grant (UDAG) provision that allows a capital expenditure $10 million higher than would otherwise be permitted. Thus a UDAG project could cost up to $25 million and be totally financed by IDB's.

A new study by the Congressional Budget Office, "Small Issue Industrial Development Bonds," indicates that IDB financing is being utilized by a variety of firms. It gives large corporations a way of financing expansion while providing smaller firms with a way of getting tax-exempt loans at lower interest rates for longer periods. The CBO study also refutes the allegation that IDB financing is mostly used by Sun Belt States to lure jobs from other regions. The largest users are in the industrialized North and Midwest and have preserved existing jobs with this vital financing tool.

Small issue IDB's have also been used successfully to finance commercial facilities in nearly 30 States. Many of the allegations of abuse center on this area. It is our hope that they will be fully explored during the coming debate, and if abuses need to be ended, they will be.

The large increase in the dollar volume of IDB's issued recently indicates the stimulative effect a more realistic dollar limit would have. Low-cost financing provided by such bonds can help us out of the recession still injuring hundreds of communities.

The need to increase the limit on small-issue, tax-free IDB's cannot be overstated. Foreign competition is sapping a growing number of American industries. We must regain and retain our competitive edge. If we are to achieve our goals, both investment and productivity must grow. IDB financing can be an important tool, but

only if the limits are set at a more realistic level.●

EMPLOYEE FRUSTRATION DRAINING BEST BRAINS OUT OF GOVERNMENT

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Ms. OAKAR. Mr. Speaker, the Washington Post of Sunday, March 29, 1981, carried an excellent article by Mr. Haynes Johnson on a problem within the Federal Government that Mr. Johnson describes as "worse than waste and more serious than fraud": the departure of many of the most talented Government employees because of a breakdown in morale and motivation. Mr. Johnson ascribes the loss of employee morale to such factors as the administration's hiring freeze and the proposed cap of 4.8 percent on this year's pay raise. According to Mr. Johnson, the loss of employee morale is so bad that the retirement rate at the executive level V pay scale has increased from 17.6 percent of those eligible to retire during the 12 months ending in March 1978 to 57.1 percent during the 12 months ending in March 1980. Mr. Johnson's article suggests that unless the Federal Government can restore employee morale and stop the brain drain through fairness of pay and benefits, it will become increasingly difficult to attract outstanding individuals to hold high positions in the U.S. Government.

As chairman of the House Subcommittee on Compensation and Employee Benefits, I understand many of the concerns expressed by Mr. Johnson's article. The issues of Federal employee pay comparability, cost-of-living adjustment, and retirement will fall within my subcommittee's jurisdiction during this Congress. It is my hope that reasonable solutions can be found to the problems affecting employee morale and performance within the Federal Government.

Mr. Johnson's article is as follows:

EMPLOYEE FRUSTRATION DRAINING BEST BRAINS OUT OF GOVERNMENT

(By Haynes Johnson)

We've been through waste and fraud week, another president's attempt to capitalize on the public's fed-up feeling about government. And, yes, to do something about it.

Ronald Reagan's team says its campaign against waste and fraud will be led by a new group, "The President's Council on Integrity and Efficiency." Despite that stern Prussian-like title, the effort is worthy and the internal governmental problem real enough. But this highly publicized Reagan campaign, no less than others ordered by his presidential predecessors, masks a greater form of governmental waste.

What's happening inside the government today presents a problem worse than waste and more serious than fraud. The evidence points to a tragic breakdown of the government service itself. If the voices this reporter has been hearing recently are correct, the nation faces a governmental crises all the more dramatic and damaging because it seems so little understood or discussed. Even though it has been building for years, you don't hear presidents warning about this crisis. They are, you see, part of the problem.

The waste I'm talking about involves the loss of many of the government's best people; the crisis comes from the deterioration of morale and rising frustration at all levels of the U.S. workforce.

Last week the president of the largest union representing federal employes talked openly about a confrontational mood among his membership that could lead to wildcat strikes and slowdowns throughout the government. Even top management officials are discussing the possibility of forming executive unions. A sense of anger and anxiety comes through conversations with government employees of both high and low rank. And the flow of talent out of the government continues.

Stop any top U.S. official on the streets of Washington these days, one of them says, and ask when that person will complete the 25 years of service making him eligible for early retirement. "He'll immediately tell you, not down to the year or the month—but to the exact day," this official remarks. "I think the government is heading down the road to a disaster. Within five years the group of supergrade people that are now between the ages of 50 and 60 will all be gone. The best of them are gone already. . . . The next president of the United States will turn to his top government people and say, 'Do this,' and he'll find no one able to get it done."

That respected official, who entered government service under Eisenhower, found himself rather startled at the apocalyptic tone of his remarks, "but I just can't find any cause to feel other than deeply dismayed today." In that, he seems sadly typical of many others.

From New Year's Day through the first week in March, the federal Office of Personnel Management received 38,000 retirement papers from federal employes—twice the average monthly rate of retirements, according to the Bureau of National Affairs.

A government study completed before the new year provides disturbing evidence of the rapid departure rate in the government's key managerial echelon—officials who oversee two million civilian employees, a budget of more than $600 billion, and whose decisions have a profound effect on all American citizens.

"The retirement rate for career employees at the Executive Level V pay ceiling," the study says, "has increased from 17.6 percent of those eligible to retire during the 12 months ending in March 1978 to an astonishing 57.1 percent during the 12 months ending in March 1980."

Not even the dullest set of statistics about federal retirements can cloak an omnious trend—unless, that is, you are among those who believe all U.S. bureaucrats are as bad as recent presidential candidates have depicted them and think the answer to the woes of government is to dismantle it all.

The problem inside the government extends into every area of the workforce. "The bottom line is morale is very low and frustration is very high," says Kenneth Blaylock, national president of the American Federation of Government Employes, the largest federal workers' union. "Government employes—and that includes managers—feel they've been kicked and kicked and kicked. . . . Now they're forced to pay the price again with a 4.8 percent pay raise in a time of 12 percent inflation and cuts in retirement benefits."

His point about pay and benefits touches a sore nerve among all federal employes. A special commission that recently completed a study of executive government salaries found a direct link between low pay and increasing difficulties of attracting and retaining outstanding people for top U.S. positions.

The commission also found that salaries of key U.S. officials in the three branches of government have fallen dramatically behind the corresponding managerial groups in private business. In addition, in most cases Congress has not allowed annual increases called for in a salary-cost-of-living act for top officials, placing those people significantly behind what they had promised legally. "The resulting compression of salaries," the commission adds, "has created the anomalous situation in which up to seven tiers of management are now being paid identical salaries."

The complaints about pay and benefits are real enough, but the grievances within the government are more serious than economic issues—and they go beyond the present emotional state of fears, rumors and resentments spurred by the Reagan administration's blueprint for federal hiring freezes, pay caps, reductions in force and slashing or junking of government programs and agencies. Another top U.S. official, whose work has drawn praise from a number of presidents, both Democrat and Republican, and who is now highly placed within the White House operation, says we are approaching the end of "a decade of despondency for bureaucrats." He fears the period ahead could worsen.

Ronald Reagan was not the first candidate to run against the bureaucracy and then have to lead it as president. Richard Nixon and Jimmy Carter sounded similar themes, and encountered similar problems in power. Reagan's presidential task is even more delicate, for it is his fate to preside over the government at a time when respect for public officials has declined even further and the concept of public service continues to generate greater expressions of public cynicism.

Reagan's gifts for conciliation and leadership will be put to a critical test in his handling of the federal workforce. He can attempt to inspire it and begin rebuilding a national sense of public service or he can witness a further disintegration in an already dispirited federal establishment. Before Reagan took office, a veteran bureaucrat, Bertrand M. Harding, who headed the National Civil Service League, said he hoped the new president and his people would put aside all their campaign rhetoric about "faceless bureaucrats." As he said, "for better or worse, these 'faceless' persons belong to the president and for the moment are all the glue he has to keep the government together."

The danger is the glue is coming unstuck.●

OPPOSING ELIMINATION OF EDA PROGRAM

HON. WALTER B. JONES

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. JONES of North Carolina. Mr. Speaker, a few days ago I received a letter from a constituent, Mr. Merle Vaughan, chairman, Mid-East Commission, Washington, N.C., concerning the Economic Development Administration program. It contains such vital information that I think it only proper, regardless of how one might feel, to place in the CONGRESSIONAL RECORD.

The letter follows:

MID-EAST COMMISSION,
March 20, 1981.

Hon. WALTER B. JONES,
Congress of the United States,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN JONES: As Chairman of the Mid-East Commission and also as a citizen, I am vitally concerned about the complete elimination of the EDA program. As a long time supporter of you, Congressman, I wish to express my views to you regarding this matter. I disagree with such action because it will be detrimental to the rural areas, specially rural Eastern North Carolina. I believe EDA can be cut—perhaps as much as 40 percent—but it should not be eliminated entirely.

EDA has been a good and productive program as the following examples will indicate:

Since 1970 the City of Greenville has received $1,344,000 from EDA for expanded utility services and water, sewer, and gas lines. This investment played a major role in the relocation of eleven (11) major industries in Pitt County. These eleven industries have generated $61,000,000 in tax dollars; they have employed 2,500 people and represent an annual payroll of $23,000,000. Without these funds assisting the City of Greenville, it could never have kept pace nor provided the necessary support services needed by a growing city and growing university.

American Contract Packagers is a minority owned business in Williamston which required an EDA guaranteed loan last year to organize and start-up this, now thriving business. Private investment of $110,000 was induced and a private working capital EDA loan guarantee through a local bank for $347,000 will be repaid. This business is projected to employ 450 people with a payroll of over $1,000,000. It increased the county tax base by $1,500,000. This firm also utilizes CETA eligible people, turning them into productive citizens.

Here EDA triggered private investment by the United National Bank of Fayetteville; it gave a local developer a contract to build a $1,500,000 building employing many builders and workers and stimulating the economy; it is providing new jobs for 450 people in a town which recently lost two industries; and generally stimulate the regional economy. All of this with one guaranteed loan.

These two investments, as many others just like them, created jobs in the private sector; it generated and produced more revenue than it dispensed; it is not a give-away program—these are either matching grants or loans which must be paid back; it triggered private investment and encouraged industry to locate in these rural counties.

I urge you, Congressman Jones, to lend your influence toward retaining EDA—at a reduced level conforming to its original intent—but let's not throw the baby out with the dish water. Please consider the good it is doing. It is paying its way and we, in Eastern North Carolina, need it.

Sincerely,

MERLE VAUGHAN,
Chairman.●

TUITION TAX CREDITS, VOUCHERS, AND THE COLEMAN STUDY

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. DANNEMEYER. Mr. Speaker, last Friday's Washington Post carried a most interesting article entitled, "Private High Schools Are Better Than Public, Study Concludes." In it, the Post reports on a comprehensive study by University of Chicago sociologist James S. Coleman on private versus public schools. The reported conclusions are worthy of our close examination. Specifically, Coleman finds that private schools provide a better education than their public counterparts. In addition, he finds that private schools are less racially segregated than public schools in certain ways.

The Coleman study is also interesting because of the philosophical transformation of the author. The Coleman study on educational opportunity in 1966 was the linchpin in the argument of those who postulated in favor of forced busing as a means of achieving racial balance. Coleman later contradicted his own work and publicly came out against forced busing. In 1978 Coleman endorsed tuition tax credits for private schools.

Congress should carefully review the final version of the report when it is released because I believe it sheds light on these twin issues of forced busing and tuition tax credits. If Coleman is correct, we should be encouraging rather than resisting the tremendous growth of private schools in the last few years. As the study as reported documents, these schools are not the products of attempts to escape busing for racial reasons; instead, Coleman concludes that on a case-by-case basis, public schools are more segregated than private schools. Therefore, the move toward private schools reflects a desire on the part of parents and students alike to place educational excellence at the top of the list of priorities for education. In the recent past, we have attempted to use the schools for social engineering purposes while, at the same time, we moved away from basic educational techniques. The result has been alienation, tension, and declining performance. The continuous drop in SAT scores over the past 17 years simply reinforces that point.

In short, Mr. Speaker, just as private schools are not the problem, public schools have fallen victim to a confusion over goals. By our educational policies, we have penalized private educational efforts when in fact they are part of the answer to our current needs. I strongly urge the serious consideration of private tuition tax credits, the educational voucher system, and other measures that recognize the value of competition in our educational system between all schools. The Coleman study shows that this is possible without intensifying racial segregation or jeopardizing students' educational opportunities. On both counts the opposite is true.

I ask unanimous consent to insert the full text of the article at this point in the RECORD:

[From the Washington Post, Apr. 3, 1981]

PRIVATE HIGH SCHOOLS ARE BETTER THAN PUBLIC, STUDY CONCLUDES

(By Dan Morgan)

A major study by sociologist James S. Coleman concludes that Catholic and other private high schools provide a better education than public ones do, and in some respects are less racially segregated. The study is certain to cause controversy in U.S. educational circles.

Coleman, whose 1966 report on educational opportunity became one of the decade's most debated documents on schools, based his latest findings on data covering 58,728 students in 1,015 high schools.

The report was compiled for the National Center for Education Statistics, a branch of the Department of Education. It is one of the most extensive examinations of nonpublic schools ever sponsored by the federal government.

Although officials of NCES described the report yesterday as a "draft . . . still subject to change," it has been sharply attacked by supporters of public schools who fear that the findings could strengthen the case for tax credits to families paying tuition for private schools.

Coleman went on record in favor of tuition tax credits as early as 1978, saying they would widen the school options of low-income black parents.

President Reagan has promised to fight for tuition tax credits that would aid families that send their children to parochial or private schools. But a major storm is brewing over this, with public-school backers saying that Reagan's policy is to slash funds for schools serving poor and minority children and transfer the savings to middle-class families through tax credits.

David Sweet, assistant administrator of NCES, said yesterday that "we would not say we fully support each and every conclusion" reached by Coleman. and an internal NCES evaluation of the Coleman study obtained by The Washington Post "urges the author(s) to take less liberty with the data and provide a more complete picture" of one of the issues dealt with.

"The statistical techniques used here are out of date, and I think nearly every expert in the field would say that the method has

to overestimate the quality of private schools," said Robert L. Crain, an educational sociologist and author who now works at the Rand Corp. "If you took a high school student body which came from families of above-average income, those kids would do well in either a public or private school. There is no evidence in this report that makes me think they would do any better in private school."

Coleman, a University of Chicago sociologist, is affiliated with the National Opinion Research Center, which has the contract to gather data for a massive federally financed survey of high school sophomores and seniors.

About one high school out of four in the United States is non-public, but only about one of 10 students in grades 9 through 12 attends these facilities. By far the largest number of the private school students—900,000 of 1,359,000—attend Catholic parochial schools.

To gather the data, the National Opinion Research Center examined school records, tested thousands of students and interviewed administrators.

According to Coleman, "the evidence is that private schools do produce better cognitive outcomes than public schools. When family background factors that predict achievement are controlled, students in both Catholic and other private schools are shown to achieve at a higher level than students in public schools."

In a warning that critics already have seized on, however, Coleman acknowledges that factors other than family background could affect achievement.

"Coleman has mixed up cause and effect," a critic said. "These kids are in Catholic schools because they have high scores. They don't have high scores because they're in Catholic schools. This is not a minor problem; it's huge."

Also certain to provoke controversy is Coleman's finding that "Catholic schools more nearly approximate the 'common school' ideal of American education than do public schools," in that achievement levels of children with different backgrounds are more nearly alike in Catholic than in public schools.

Coleman also challenges a major contention of critics of tuition tax credits, who assert that the aid would intensify racial segregation. Coleman argues, on the basis of computer models, that there would be a slightly higher percentage of blacks and Hispanics in private schools after the first year of such aid than are there now.

He argues that this would be constructive because "the public sector is by far the most segregated" on a school-for-school basis.

In his analysis, Coleman concluded that individual private schools are less likely to be racially segregated than individual public schools, although public schools have a considerably higher percentage of black enrollment than Catholic schools nationally. Coleman reports that public and private schools now enroll about the same percentages of Hispanics.●

TENANT TAX EQUITY

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. GREEN. Mr. Speaker, there is great inequity and discrimination in the Internal Revenue Code. While the people who own their homes receive tax deductions at the Federal level for real estate taxes paid, tenants who pay real estate taxes indirectly through their rent receive no such benefit. In these difficult fiscal times of rising inflation, tenants too deserve a break, a tax break.

I am introducing a bill that would correct that inequity by amending the Internal Revenue Code of 1954 to permit tenants to take a deduction for real estate taxes now paid indirectly through their rent. If the State or local law provides that the landlord is the real estate tax collection agent for his tenants, then my bill would allow the deduction "above the line," that is as a deduction from gross adjusted income as opposed to itemizing the deductions. This would benefit those tenants who do not itemize their deductions as well as those who do.

In addition to putting the renter on a more equal footing with homeowners, my bill would also provide other benefits. It would—

First, make the tax system more progressive and lessen the tax burden on lower income taxpayers. For, according to the Department of Housing and Urban Development, in 1977 over 76 percent of the household rental units were occupied by families with incomes under $15,000. The median rental family income was $8,800 while the median owner-occupied income was $16,000.

Second, remove bias and enable individuals to decide whether to rent or purchase on considerations other than taxes. The current preferential tax treatment of homeowners distorts the choice between homeownership and rental housing and therefore interferes with economic efficiency.

Third, make it easier for individuals to live in rental housing and to some degree mitigate the need for housing subsidies.

Fourth, help stem the flight to the suburbs, which is partially responsible for the deterioration of our central cities, since it would no longer be cheaper from a tax standpoint to own a home in the suburbs than to rent in the city.

I urge the Ways and Means Committee to hold hearings on this important question as soon as possible and I urge all my colleagues to consider my bill:

H.R. 3079

A bill to amend the Internal Revenue Code of 1954 to allow a deduction for real estate taxes imposed on tenants

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 164 of the Internal Revenue Code of 1954 (relating to deduction for taxes) is amended by redesignating subsection (f) as subsection (g) and by inserting after subsection (e) the following new subsection:

"(f) REAL PROPERTY TAXES IMPOSED ON TENANTS.—

"(1) IN GENERAL.—If under any State law—

"(A) a person (hereinafter in this subsection referred to as the 'tenant') renting residential real property from another person (hereinafter in this subsection referred to as the 'landlord') is treated as having an interest in real property.

"(B) a tax is imposed on such interest based on the assessed value of the residential real property being rented,

"(C) the tenant is personally liable for the tax imposed on such interest, and

"(D) the landlord is treated as an agent of the State or local government for purposes of collecting the tax imposed on the interest of the tenant, then such tax collected from the tenant in accordance with such State law shall be allowable as a deduction under subsection (a) to the tenant.

"(2) TREATMENT OF LANDLORD.—In any case to which paragraph (1) applies, no amount shall be included in the gross income of the landlord by reason of any taxes collected by the landlord as an agent of the State or local government.".

(b) Section 62 of such Code (defining adjusted gross income) is amended by inserting after paragraph (15) the following new paragraph:

"(16) REAL PROPERTY TAXES IMPOSED ON TENANTS.—The deduction allowed by section 164(a) to the extent attributable to section 164(f)."

(c) The amendments made by this Act shall apply to taxable years ending after the date of the enactment of this Act.●

REQUIEM FOR CETA

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. HAWKINS. Mr. Speaker, critics of the CETA program often charge that all CETA jobs are make work and that CETA employees do not obtain training but simply substitute for regular public employees—these two misbeliefs are inconsistent and simply provide more fuel to the fire of erroneous criticism of a worthwhile program. CETA takes individuals off the unemployment lines and provides them training and job experience to enhance their skills and help them become more productive members of the labor market. In State and local governments throughout the country, CETA employees provide useful public services which benefit the community—much needed work in health and safety areas, public works and parks, and so forth.

No Federal program has been more condemned than the Comprehensive Employment and Training Act (CETA). Supporters of the act have generally not had a voice or media to tell the real facts. The Washington Post deserves a special tribute for an exceptional editorial in its March 29, 1981, edition under the caption "Requiem for CETA". In the hope that truth and simple justice may prevail over political expediency, the article is

inserted for those of my colleagues whose courage and convictions coincide.

The editorial follows:

REQUIEM FOR CETA

. Many people wonder what the future will be like when the administration's budget proposals take hold some months hence. But for the holders of public jobs under the Comprehensive Employment and Training Act (CETA), the future is now. All over the country, state and local governments have stopped filling vacancies among the 350,000 CETA jobs, and by the end of summer all current jobholders will be laid off. In some cities, Washington included, layoffs have already begun.

Not only jobs but also valuable services are being lost. In the District, there will be fewer playground supervisors, less parking enforcement and less help for elderly shutins, unemployed youths, alcohol and drug abusers and people who can't speak English. In Rochester, sidewalks won't be repaired, day care for the children of working women will be cut back and cops will be taken off the beat to do record-keeping now done by CETA workers. In rural Rio Grande communities, garbage will go uncollected and other municipal services will be curtailed.

These losses may come as a surprise to people who adhere to two widely held beliefs about CETA. One is that all CETA jobs are "make-work." The other is that CETA workers simply substitute for regular public employees who would otherwise be hired to do their jobs. Most people who profess these beliefs fail to note that they are mutually contradictory. If CETA jobs are make-work, then, we trust, local governments would not hire people to do them on their own. But if CETA workers replace regular government workers, what they do must be worthwhile.

In fact, for most CETA jobs neither of these views has been correct. CETA hired hundreds of thousands of disadvantaged people who would otherwise not have been hired to do useful work that would otherwise not have been done. Most of these people benefited from the experience so that, careful comparisons show, their subsequent earnings were substantially higher than those of people like them who didn't get helped. Thanks, moreover, to new requirements for mixing work and training, to closer coordination with private employers and to stricter eligibility limits, the usefulness of the program was increasing substantially.

CETA was an obvious first target for the administration because, unlike most social programs, it is not protected by an organized group of professional workers who stand to lose their own jobs. The people who hold CETA jobs don't organize letter-writing campaigns. The only way their loss will be detected is in higher welfare and unemployment counts, higher local taxes and fewer community services.●

NETWORK: THE SECOND DECADE

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. LEHMAN. Mr. Speaker, ever since I first came to Congress in 1973, I have had the pleasure of spending one or two evenings a year with Sister Carol Coston and her colleagues from Network, a Catholic social justice lobby. Each visit is a true learning experience as the Sisters are articulate and well informed.

More important than the information they provide, however, is the guidance they give. They help me to see the moral and social implications of the decisions I am called upon to make as a Member of Congress.

Last fall, our former colleague, Father Robert F. Drinan, wrote an article about Network which appeared in the October 18 issue of America. It describes the philosophy and work of Network as it enters its second decade of service.

The article follows:

NETWORK: THE SECOND DECADE

(By Robert F. Drinan)

On Dec. 19, 1971, 47 nuns from all over the country gathered in Washington to discuss the future of the social action programs of the Catholic Church. These religious women decided to form a political network of participation, information and communication. From that decision, there emerged the nation's first and only registered Catholic social justice lobby. Network has been organized nationwide by congressional districts largely, but not exclusively, by sisters. As Network looks forward to its 10th anniversary, it counts a full-time staff of 11 (nine women religious and two lay women), a national board of 22 (17 sisters and five laywomen), a membership of over 5,000 who pay annual dues of $18 to receive six issues each year of the Network publication, a 30-page fact-filled magazine devoted to social action issues pending in Congress.

Network each year publishes a rating of the votes of all 535 Members of the House and of the Senate. It is based on issues chosen not by the offices of Network but by its membership, a practice in line with the principles of Vatican II from which it claims parentage.

Network emphasizes in its literature that it is different from other public interest groups by its vision, which comes from "Scripture's call to justice and the Catholic Church's social encyclicals." Its overarching goal is to make a difference on "issues that afflict the poor and the powerless." Committed to the "transformation of societal structures into a more just world order," Network seeks to achieve this objective by lobbying for socially just legislation, educating for a political ministry and doing so with a "feminist perspective."

The principal architect of Network from the beginning has been Sister Carol Coston, O.P. She more than any other individual is the one who has brought the organization into 35 states and 245 congressional districts. It is she who will be supervising a year-long period of reflection on priorities for the 1980's.

Network is clear in its position on many issues. It opposes increased defense spending, supports SALT II, opposes the B-1 bomber and the MX missile system, favors the ratification of E.R.A. and the United Nations human rights treaties and endorses a moratorium on nuclear energy. In political terms, this would be called liberal, but Network regularly justifies its political positions by citing amazingly similar statements from the encyclicals, recent Popes or Vatican II. This is a part of its insistence that its political ministry is "a constitutive dimension of the preaching of the Gospel," as the 1971 World Synod of Bishops put it.

Network feels strongly that its involvement in politics fulfills the mandate of the Catholic bishops of the United States in their statement of Oct. 26, 1979: "All Christians have a call to citizenship and political life." Likewise, Network reminds its members of their duties in the political order as stated in the same document: "Make candidates declare their values, so that you can compare those values with your own. Take stands on the candidates and on the issues. If a campaign year is to engage the values of the American people, the campaigners and voters alike must share the responsibility for making this happen. Become involved in the campaign or party of your choice. . . "

Network relies also on the bicentennial statement of the administrative board of the U.S. Catholic Conference, where the bishops stated that the church must "relate positively to the political order since social injustice and the denial of human rights can often be remedied only through governmental action."

The words of the Latin American bishops at Puebla in January 1979 are also cited: "The Christian faith does not depreciate political activity. On the contrary, it values it and has a high regard for it. The Church perceives its duty and its right to be present in this arena, because Christianity ought to evangelize the totality of human existence, including the political dimension. Thus, it criticizes those who tend to reduce the sphere of faith to personal or family life, excluding the professional, economic, social or political order, as if sin, life, prayer and pardon do not have meaning there."

Network recognizes the hazards of endorsing political positions for religious reasons. In its newsletter in 1978, Network candidly admitted: "Political ministry is a somewhat recent phenomenon. Network members engage in this struggle out of convictions that are not necessarily articulated or even thoroughly understood as yet." But it is certain that "faith, political involvement and community life are a whole reality, not separated components."

Some of the least visible but most important work is accomplished by participation in the often influential coalitions in Washington. In 1978, for example, it established with Protestant and Jewish groups the Religious Committee for Salt II. Before that, it had joined forces with other religious groups in the formation of the Religious Committee for E.R.A. and is regularly in alliance with the Washington Office for Latin America (WOLA) and with a whole range of consumer-oriented public groups. At the same time, it is careful to preserve, deepen and articulate the theological and ecclesial roots of its own origins and ideals.

It is very difficult to assess the effectiveness of a lobby, especially when it is concerned with complex global issues. But in at least two dramatic instances, Network can take credit for a victory. By endorsing and working for the enactment of legislation creating the Consumer Cooperative Bank, Network expressed its belief that such a bank would enable the poor to have more control over their lives. The organization visited members of Congress known to be uncertain of the merits of the plan, testified in the Senate, contacted local cooperatives throughout the country and in other ways obtained support for a bill which otherwise might have died. The bill passed the House

of Representatives by one vote. Network can legitimately claim credit for that vote.

By working closely with the Coalition for a New Foreign and Military Policy, Network can likewise take some credit for the enactment of a bill appropriating $75 million for economic development in the post-Somoza Nicaragua. The bill finally passed the House on July 2, 1980 by a two-vote margin, 198 to 196.

The Christian Voice, a radical right-wing group that has endorsed Ronald Reagan recently published ratings for all members of Congress. The votes chosen relate to Panama, Taiwan, abortion, E.R.A., prayer in public schools, homosexual rights and similar issues. Political liberals, of course, received very low scores from The Christian Voice, and conservatives scored high. There was enormous resentment in Congress and in the main line churches over the simplistic and perhaps arrogant assumptions made by The Christian Voice that those who disagree with them on the resolution of complex legal/moral matters are less Christian than they are.

Network is very careful to safeguard against any such inferences being drawn from the ratings which it has issued over the past three years. Its publication notes: "A voting record illustrates only one . . . part of a Congressperson's official duties." But Network does state that the 13 House and 11 Senate votes which it selected in 1980 do provide a basis "to judge congressional behavior on behalf of global peace, economic justice and human rights."

In 1980, those issues also included proposals which Network opposed: funding for draft registration, $500 million for the MX Missile System, reduction in food stamps spending, cutting foreign aid and substitutes for the proposed budget that would bring about reductions in social welfare programs. Fiscally conservative Catholics in Congress do not rank high. To date, however, they have not protested like those who have criticized the rankings of The Christian Voice. This may be due to the fact that the rankings of Network have not been exploited politically as have the ratings of The Christian Voice.

In addition Network makes no pretense that it speaks authoritatively for the Catholic Church. It represents the views of its membership, made up of a majority of nuns but including significant numbers of priests, brothers and laity. Its positions do not, however, differ in any significant way from the official positions adopted by the U.S. Catholic Conference. Network, however, does not get involved in issues where a Catholic point of view reaches its constituency from other sources, like issues related to financial aid for church-related schools or laws regulating marriage or abortion. It obviously sees the moral aspects involved in these topics but concentrates on those issues on which there is no other organized Catholic voice. Once again, this stance is the result of a regularly reviewed agenda decided collegially by the members.

While seeking to advance its mission in the spirit and with the faith of those religious persons who fought in the 1960's and 1970's in the civil rights and anti-war movements, Network adds a new emphasis: the rights of women. there is a quiet, constant emphasis on the "feminist perspective," but the emphasis is not entirely clear. It is more a groping to discover the rights and the role of women religious and women in general. It echoes the tone of the National Women's Conference in Houston in 1977 and the World Conference of the United Nations Decade for Women, held in Copenhagen in July 1980. Sister Carol Coston attended the Copenhagen meeting and reported that she observed a "growing solidarity among women of all nations," but she added: "We have many steps to take before we have access to full development and participation at all levels and in all spheres of society." The group has labored diligently on behalf of the E.R.A. In Illinois in 1980, members visited parishes in key legislative districts to encourage E.R.A. supporters to sign postcards to Catholic legislators who claim Catholics in their district oppose it. In the 1980's Network will intensify its efforts to understand and to resolve the inequalities and oppressions imposed on so many women.

The political ministry of Network is difficult and carries few instant rewards but its potential is great. It counts among its members about 4 percent of America's 120,000 religious women, as well as committed priests, brothers and laity, and has a vibrancy and creativity which prompts it to conduct legislative and lobbying seminars all over the country. It has modest offices at 806 Rhode Island Street, NE., while many more affluent lobbies are nearer the Capitol and have greater access to the staffs of the subcommittees where crucial decisions are made. Network, furthermore, unlike a growing number of interest groups, does not possess a political action committee which can dispense campaign funds.

As Network begins its second decade as a Catholic social justice lobby, it will carry out the hope of Margaret Mead, quoted in a recent newsletter: "What we must present to every woman in this country today is that if we act unitedly, forget every other consideration on earth . . . we may be able to turn this world around and produce a world in which our children and other people's children will be safe."●

IN SUPPORT OF BYELORUSSIAN INDEPENDENCE

HON. DON BAILEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. BAILEY of Pennsylvania. Mr. Speaker, there are an estimated 1 to 1½ million Americans of Byelorussian descent in the United States. These Americans of first, second and third generation, who maintain contact with their relatives in the Soviet Union, are very anxious to have the Byelorussian language included in Voice of America broadcasts to the Soviet Union. I support their wishes and their resolution to incorporate Byelorussian language in Voice of America programing. Our national security interests and world peace are well served when nations within the Soviet Union are well informed of the nature of Soviet expansionism and the vitality of their respective cultural heritages in the United States. But, unfortunately and unfairly, Byelorussians in the Soviet Union have not heard any Voice of America broadcasts in their own language for many years.

Mr. Speaker, there is an even greater oppressive action to which I would like to direct your attention. The Byelorussian Soviet Socialist Republic with its population of 10 million has been transformed into the westernmost bridgehead of Russian expansionism. Consequently, Moscow has been conducting an intensive campaign of russification in Byelorussia aimed at the destruction of the sense of separate nationality that the Byelorussian people feel.

The proclamation on March 25, 1918, of the Byelorussian Democratic Republic was a highpoint in the political history of those people and marked a brief period of genuine national freedom and sovereignty for the country. While the Soviet's forceful establishment of the Byelorussian Soviet's Socialist Republic uprooted free and independent Byelorussia, it did not supplant the heartfelt independence of the people. Their love of democratic freedom is very much alive under the repressive Soviet regime. It is my sincere hope that the Byelorussians here and abroad will hold fast to their democratic principles and that our Nation will continue to support their determination.●

ROLE OF THE ATTORNEY GENERAL'S TASK FORCE ON VIOLENT CRIME

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Ms. OAKAR. Mr. Speaker, last week was a terrifying experience for the American public. We were shocked that citizens serving jobs vital to our Government were shot in a vicious act of violence. We sat in anxious suspense for their recovery. As we know, the President of the United States was one of these victims.

I am deeply distressed at the upsurge of violent crime in the United States. Violent crime in the United States last year increased 13 percent, the highest rate in 12 years. Crime, in general, increased by 10 percent.

Crime has no boundaries—it affects all parts of our society, rural areas and suburbs, as well as the inner city. It affects all segments of our society, the middle class and the rich, as well as the poor.

The fear and curse of crime dominates our daily lives. It is an outrage against our society when we cannot walk alone in our neighborhood and when our homes become fortresses.

I was deeply disturbed by the poll on crime, conducted by Newsweek magazine, which appeared in its March 23, 1981, issue. About 58 percent of the 1,000 people interviewed stated there was more crime in their area than

there was 1 year ago; 75 percent felt criminals today are more violent than they were 5 years ago, and 53 percent said there was an area within 1 mile of their home where they would be afraid to walk alone at night.

Cleveland's crime statistics are one of many shocking examples of crime in our cities. Last year almost 58,000 crimes were committed in this city alone. Although murder was down slightly, forcible rape, robbery, burglary, and arson increased by large percentages.

Unfortunately, no one seems to have the answer as to how to rid this evil. There are many theories of the cause of crime and its prevention. Our Government has tried to address this problem on numerous occasions. For example, in 1965, President Johnson created by Executive order the Commission on Law Enforcement and Administration of Justice. The report embodied the major findings drawn from the Commission's examination of all facets of crime and law enforcement in America. In 1968, President Johnson, by another Executive order created the National Commission on the Causes and Prevention of Violence. This Commission suggested what the Federal Government, State governments, and private associations and individuals can do to reduce the incidence of violence. In 1973, the National Advisory Committee on Criminal Justice Standards and Goals was established to set forth standards and goals for police, courts, corrections, the criminal justice system, and crime prevention.

Crime has caught the attention of the American people more vehemently than at any other time. Last month, Chief Justice Warren Burger outlined in a speech before the American Bar Association his recommendations for new fronts against crime, including recommendations for prompter court action, tougher judicial rules and bigger budgets.

At the start of the new administration, Attorney General William French Smith announced the formation of the Attorney General's Task Force on Violent Crime. The task force is mandated to review the present allocation of resources for Federal law enforcement efforts, Federal support of State and local law enforcement efforts and Federal exchanges of information and expertise with State and local entities. The second aspect of the task force is mandated to focus on changes in Federal statutes, funding, and allocation of resources.

The resolution I am introducing would authorize and require the task force to also do the following:

Study the underlying societal causes of violent crime along with the control of crime and make appropriate recommendations;

Review Federal research related to violent crime to determine the need for an increased Federal effort;

Study and consider the recommendations of previous Federal commissions established to study the causes and prevention of violent crime;

Insure that the task force is represented by a wide range of individuals involved in the understanding and prevention of violent crime, including psychologists, psychiatrists, historians, judges, sociologists, social workers, theologians, and educators, as well as law enforcement officials; and

Issue a preliminary report of its findings to Congress within 6 months from the date of its establishment and to issue a final report of its findings to Congress within 1 year from such date.

The passage of this resolution would confirm to the President and to the Attorney General that we wish this task force to take a new, fresh, and hard look at the problem of violent crime in America.

The following is the text of the resolution:

H. CON. RES. 110

Concurrent resolution to call on the administration to give certain instructions to the Attorney General's Task Force on Violent Crime

Whereas the Congress recognizes that violence is dangerous to our society and must be brought under control, and that life, liberty, and property must be safeguarded;

Whereas violent crime in the United States last year increased 13 percent, the highest rate in 12 years;

Whereas violent crime runs rampant in all parts of our country, in rural areas and the suburbs as well as in the inner city and affects all segments of society, the middle class and the rich, as well as the poor;

Whereas the President of the United States, his press secretary, a secret service man and a District of Columbia policeman have been victimized by violence, to the shock and horror of the American people;

Whereas the fear of crime by the American people dominates actions they take regarding their daily lives, making their homes fortresses, making citizens fear walking alone in their neighborhoods, and poisoning the trust in our societal institutions;

Whereas in the past, our Government has recognized the alarming occurrence of crime and has established such commissions and study groups as the Commission on Law Enforcement and Administration of Justice, established in 1965; the National Commission on the Causes and Prevention of Violence, established in 1968; and the National Advisory Committee on Criminal Justice Standards and Goals, established in 1973;

Whereas such commissions and study groups have made numerous recommendations with respect to the causes and prevention of crime; and

Whereas the Congress recognizes the establishment of the Attorney General's Task Force on Violent Crime in conjunction with a high Federal priority on fighting violent crime: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress calls upon the President and the Attorney General to authorize and require the Attorney General's Task Force on Violent Crime—

(1) to study the underlying societal causes of violent crime along with the control of crime and to make appropriate recommendations;

(2) to review Federal research related to violent crime to determine the need for an increased Federal effort;

(3) to study and consider the recommendations of previous Federal commissions established to study the causes and prevention of violent crime;

(4) to insure that the representation on the Task Force consist of a wide range of individuals involved in the understanding and prevention of violent crime, including psychologists, psychiatrists, historians, judges, sociologists, social workers, theologians, and educators, as well as law enforcement officials; and

(5) to issue a preliminary report of its findings to Congress within six months from the date of its establishment, and to issue a final report of its findings to Congress within one year from such date.

EXPORTING THE LIBERTIES

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

Mr. LAGOMARSINO. Mr. Speaker, we hear constant arguments about why the United States should not be involved in El Salvador. Yet there seems to be very little attention to what is considered to be international intervention in El Salvador on behalf of the leftist guerrillas in that country.

The Santa Barbara News Press published an editorial recently on the paradox of leftists bragging about the worldwide support for their efforts while, at the same time, condemning U.S. support for the government of President Duarte.

I hope my colleagues will give this editorial their serious consideration.

EXPORTING THE LIBERTIES

Leaders of the leftist revolutionary forces in El Salvador say they will solve the country's problems in time, but the first step toward the "solution" must be the withdrawal of U.S. aid to the governing junta. This, they say, is strictly a Salvadoran matter, and such intervention from outside is wrong.

Then they boast about the help they have begged and received from outside. They have been around the world soliciting help. They say they have received support from an impressive number of other nations.

They would not say specifically which countries have supplied them with weapons. They only specify that there is a large black market in arms in Central America. Ana Guadalupe Martinez, a leader of the People's Revolutionary Army, says this:

"Another thing you have to keep in mind is that we have been fighting for nearly 10 years, and one of our chief aims has been to get weapons any way we can."

The leftist coalition leaders, including Mario Aguinada of the Communist Party of El Salvador, also boast that they can count

on $50 million in funds from their friends around the world.

Not only that, they spoke freely in an interview with the Los Angeles Times about the way they also raise money by kidnapping people and holding them for ransom. They present this as a form of heroism on behalf of "the people."

But the North Americans, they insist, must stand back and let this revolution run its course.

The fact is that the Marxist movement has had success in arousing some sympathetic support through its propaganda in the United States. Several letters that have reached this desk from residents of Santa Barbara attest to that. Some of these writers see nothing wrong with the guerrilla movement, and they consider the government of President Jose Napoleon Duarte to be full of evil. They protest any U.S. aid to Duarte; we have no business there; this should not be blown up to be an international matter.

Yet strangely, through their own voluntary boastings of much help from abroad, the leftist leaders had already made this an international matter.

The only question, it seems to us, is what form U.S. aid to the Duarte government should take. Certainly we should not make the mistake of fighting Duarte's battles for him. Our aim must be a government in El Salvador that is economically strong enough to help the people of that impoverished country gain stability and security.

There is no doubt that, for a long time, Salvadorans suffered at the hands of a few extreme right-wing families who have owned much of the land, and from harsh military rule. But the people's release from those great problems does not lie in the extreme left wing which turns people into state slaves. The solution is between the extremes, where the Duarte government is struggling to strengthen its position.

Though it has its weaknesses and faults, the Duarte government represents the best hope for establishing human rights in San Salvador. Why shouldn't we export to it some of our expertise in the basic liberties?●

WORLD FOOD DAY

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr.

● Mr. SIMON. Mr. Speaker, today I am introducing, with my friend and colleague BEN GILMAN, a resolution requesting the President to declare October 16, 1981, as World Food Day. This day has already been declared by the United Nations, in an ongoing effort to bring the international community to grips with the ever decreasing availability of agricultural products and other food sources. The President's Commission on World Hunger, on which Representative GILMAN played a major role, has begun the necessary education process here at home. Designation of World Food Day, and full participation in the activites planned for that day by all of us, should help move us toward a greater domestic understanding of the problems and obstacles we will face in the years ahead to continue on the path to the elimination of hunger and malnutrition nationwide. I hope that my colleagues will join us in supporting this resolution.

H.J. RES. —

Joint resolution to authorize and request the President to issue a proclamation designating October 16, 1981, as "World Food Day".

Whereas hunger and chronic malnutrition remain daily facts of life for hundreds of millions of people throughout the world;

Whereas children are the ones suffering the most serious effects of hunger and malnutrition, with millions of children dying each year from hunger-related illness and disease, and many others suffering permanent physicial or mental impairment, including blindness, because of vitamin and protein deficiencies;

Whereas, although progress has been made in reducing the incidence of hunger and malnutrition in the United States, certain groups, notably among native Americans, migrant workers, and the elderly, remain vulnerable to malnutrition and related diseases;

Whereas the United States, as the world's largest producer and trader of food, has a key role to play in efforts to assist nations and peoples to improve their ability to feed themselves;

Whereas a major global food supply crisis appears likely to occur within the next twenty years unless the level of world food production is significantly increased, and the means for the distribution of food and of the resources required for its production are improved;

Whereas the world hunger problem is critical to the security of the United States and the international community;

Whereas a key recommendation of the Presidential Commission on World Hunger was that efforts be undertaken to increase public awareness of the world hunger problem; and

Whereas the 147 member nations of the Food and Agriculture Organization of the United Nations designated October 16, 1981, as "World Food Day" because of the need to alert the public to the increasingly dangerous world food situation: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating October 16, 1981, as "World Food Day", and calling upon the people of the United States to observe such day with appropriate activities.●

A TRIBUTE TO UNIVERSITY CITY, MO

HON. ROBERT A. YOUNG

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. YOUNG of Missouri. Mr. Speaker, this year University City, Mo., is celebrating the 75th anniversary of its incorporation by the State of Missouri. The city has scheduled a series of commemorative events as part of its diamond jubilee celebration. I am inserting a resolution honoring this fine city during its 75th anniversary:

RESOLUTION

Whereas, the City of University City will celebrate through a series of functions in 1981 the Seventy-fifth Anniversary of its incorporation by the State of Missouri, and

Whereas, the City of University City has consistently through the years been recognized as a leader in regard to devising progressive, innovative and successful responses to a perplexing number of municipal problems and issues, and

Whereas, the City of University City did pioneer work in the field of planning, having created a City Plan Commission in 1920 which secured for its residents the benefits of well-designed and functional parks, quiet tree-lined residential streets and a unique commercial Loop, and

Whereas, the City of University City was the first municipality in St. Louis County to adopt a home rule charter providing the council-manager form of government which has successfully met the challenge of urban change since 1947, and

Whereas, the City of University City has to good purpose and traditionally maintained a hospitable and choice community for its diverse racial, ethnic and religious residents whose heterogeneity has continued to distinguish University City throughout the state, and

Whereas, the City of University City is nationally recognized for its perceptive influence in fashioning policies resulting in fair and open housing, integrated schools and a far-reaching and compassionate program of service to its senior citizens: Now, therefore, be it

Resolved, That the City of University City, its officials and residents are hereby congratulated on their past achievements, that every best wish for success is extended for all the commemorative events scheduled during its Diamond Jubilee, and that University City be commended in its efforts to provide the best possible urban environment for its citizens.●

WOMEN IN CONSTRUCTION CHALLENGE CETA BUDGET CUTS

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. HAWKINS. Mr. Speaker, to the overworn myths that CETA is makework, does not place its graduates in unsubsidized private sector jobs, and has not proved to be a workable program, I am pleased to cite a typical success story of "Women in Construction Project" in Massachusetts.

It is but one of thousands of examples that refute those who fabricate false stories based on the occasional mismanaged programs that are tolerated by refusal to adequately enforce the 1978 amendments to the act.

The following testimony before the House Education and Labor Commit-

tee of Susan A. Brophy, director of "Women in Construction Project," Boston, Mass., sets the issue in proper perspective.

I urge my colleagues to consider these positive benefits of CETA before voting on the Reagan administration budget cuts to abolish what is succeeding as a cost-effective, anti-inflationary structural program.

The testimony follows:

WRITTEN TESTIMONY OF SUSAN A. BROPHY

Mr. Chairman, I have asked to speak before this committee in an effort to offer the Women in Construction Project (WICP) as an example of the profound and immediate impact of the Reagan budget cuts on employment and training programs.

WICP is a statewide, pre-apprenticeship, skills training program for women seeking careers in construction. The project is a subsidiary of the Massachusetts State Building and Construction Trades Council, AFL-CIO and is the only program of its kind in the country with such an affiliation. Additionally, WICP has memoranda of agreement with such private trade organizations as the Associated General Contractors, the Building Trades Employers Association and the Massachusetts Council of Construction Employers.

WICP operates three training sites and offers its participants a comprehensive course of skills training and physical conditioning in all seventeen of the building trades: carpentry, plumbing, electrical work, painting, operating engineering, ironwork, glazing, roofing, bricklaying, cement masonry, pipefitting, sheet metal work, plastering, boilermaking, laboring, pipe covering and sprinkler fitting.

WICP was developed in response to a specific set of federal regulations establishing goals and timetables for women's participation on federally assisted construction projects (41 CFR 40.4). WICP's mandate was to assist unions and contractors in the state in meeting their federal construction compliance obligations. To that end WICP has succeeded. In less than three years of operation WICP has trained and placed over 265 low-income women in the construction industry in Massachusetts in positions averaging $6.00/hour as a starting salary.

Initial funding for WICP came from the Massachusetts Balance of State CETA Administration. This funding configuration precluded WICP from serving women from the larger urban areas of Boston, Worcester and Springfield. In an effort to serve more low-income, urban dwellers, WICP applied on a yearly basis to local Prime Sponsors in the aforementioned cities. Funding was applied for under CETA Titles IIB, IID and VII. Due to a continually shrinking pot of funds under those Titles of CETA, WICP, a national training model with an 85% placement rate and strong private industry ties to both labor and management, was regularly rejected for funding by the Boston, Worcester and Springfield CETA Prime Sponsors.

In an effort to continue operation and serve the urban poor, WICP was forced on two occasions to seek funding directly from the Department of Labor. WICP was awarded $250,000 in operating funds from Title VI of the Secretary's Discretionary Fund in January, 1980 and was again awarded operating funds in October, 1980. With these funds WICP was able to offer its training services to CETA-eligible women across Massachusetts. Matching funds were than awarded by the CETA Prime Sponsors in Boston, Worcester, Springfield, Cambridge, Fall River and Lowell.

On February 9, 1981 I was informed that the funds awarded in October, 1980 for a contract period ending on August 21, 1981 were frozen. I was subsequently informed that half of the grant ($125,000) would be reallocated to allow the program to complete its present and final training cycle on April 10, 1981.

On May 20, 1981 WICP will close its doors for good, a casualty of the Reagan budget cuts. The plight of WICP is not a typical, yet it is a clear and dramatic example of a very successful, nationally recognized and replicated training program squandered by the present Administration's meat cleaver approach to budget reductions, made without consideration of the program's merit or value to communities.

I speak to you on behalf of the women who are now working in construction as a result of their participation in WICP. Women who WICP has assisted, in some small measure, in breaking out of the devastating and humiliating cycle of poverty and welfare. Women who are now wage earners and taxpayers. Women with new found dignity and pride.

I also speak for the women who might have participated in WICP. Women who we collectively might have offered hope for their future economic independence. I speak for the hundreds of women who have been informed that WICP will not be offering its services again. Women who don't have alternatives. Women in need.

On behalf of these women I ask for your compassion and understanding in assessing and acting on the proposed budget reductions.

Let us not reassess our national priorities to exclude our most valuable national resource, our people. And let us not turn our back on those who need us most, those without the resources with which we are blessed, our poor.

Finally, it has been said by the Administration that the only people who are speaking out against the budget cuts are those of us who are losing our jobs. I will state unequivocally that I would happily give up my job to save even one-tenth, one-hundredth of the WICP. We who are speaking out have visions beyond our own programs. Visions that these days cannot be achieved without the collective attention of a sympathetic and concerned Congress.

Mr. Chairman, I would like to thank you for the opportunity to address this committee.●

ST. MARY'S PARISH 25TH ANNIVERSARY OF PASTOR'S ORDINATION

HON. WILLIAM J. STANTON

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. STANTON of Ohio. Mr. Speaker, on May 17, 1981, in the city of Painesville, Ohio, the parishioners of St. Mary's Parish will assemble for a very happy occasion.

On that Sunday, the parish will celebrate the 25th anniversary of the ordination of their pastor to the service of God.

Father Robert Hanzo was born in Cleveland on November 10, 1929. Following studies at St. Mary's Seminary in Cleveland, he was ordained to the priesthood at St. John's Cathedral in Cleveland on May 19, 1956.

Following his ordination, he was assigned as an assistant to the Immaculate Heart of Mary Church, Cuyahoga Falls. Over the next 19 years he served with distinction as assistant at Nativity Parish in Cleveland and St. Gregory's in South Euclid. Father Hanzo was assigned as pastor at St. Mary's, Painesville, on May 7, 1975.

Mr. Speaker, any chronological recitation of Father Hanzo's service to the people of the Cleveland Diocese fails to express the high personal regard and esteem that the parishioners of these parishes have for Father Hanzo.

One of our own parishioners, John Monroe, expressed it well when he said recently:

Under your leadership we have seen St. Mary's Parish grow in spiritual vitality. The Parish Renewal Program, which you introduced several years ago has brought many men and women closer to Christ and to each other. Your annual parish missions have inspired parishioners to become more vigorous in the Faith and more solicitous to their Christian duties.

Attendance at daily Mass has increased substantially over the past five years at our parish. Our Sunday Masses have involved many more lectors, commentators, lay ministers, ushers, song leaders and musicians than ever before and frequently we hear visitors to our Sunday liturgy remark how we have reached a higher level of community participation and Christian spirituality at our weekly celebrations of the Eucharist than felt by these visitors in their home parish. One of the highlights at St. Mary's is the availability to the people of the sacraments always at the times when most needed and appreciated.

Mr. Speaker, a true pastor is really a shepherd. It is around the pastor that the community of parishioners are linked. It is through the pastor that we have an association with the diocese and, ultimately, with the Church in Rome.

On the occasion of Father Robert Hanzo's 25th anniversary in the priesthood, I can think of no greater compliment to pay him than to say that he is, in the best meaning of the word, the true shepherd of the Parish of St. Mary's of Painesville, Ohio.●

AMEND MINERAL LEASING ACT OF 1920

HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. MARRIOTT. Mr. Speaker, today I am introducing a bill to amend the oil, gas, and tar sand provisions of the Mineral Leasing Act of 1920. This bill will remove the obstacles to tar

sand leasing which have virtually forestalled tar sand development on Federal lands to date.

Tar sand is a bituminous—oil impregnated—sand which constitutes the largest known, nonfluid petroleum resource in the United States, with estimates ranging from 15 to 30 billion barrels of oil. Over 90 percent of this resource occurs in the State of Utah. Prior to this time, the Interior Department has not successfully leased tar sand deposits on Federal lands, leading toward development, because of the legal necessity of making a distinction between tar sand and oil prior to leasing.

The bill I am introducing today will remove the necessity for making that distinction by providing for the issuance of a combined hydrocarbon lease under which both oil and tar sand can be developed. In order to do this, the bill will redefine "oil" to include all nongaseous hydrocarbon substances—including tar sand—other than coal, oil shale, or gilsonite and remove all references to tar sand from section 21 of the act, which provides for oil shale leasing.

The bill will place oil, gas, and tar sand leasing on similar footing by providing for competitive leasing in "designated tar sand areas," which is defined as those areas already identified by the Secretary as well as those which he may identify in the future as containing "substantial deposits of tar sand."

Further provisions of my bill are alined to accommodate combined hydrocarbon leasing. Among these provisions, the Secretary will be permitted to establish a lower aggregate acreage limitation for leases in designated tar sand areas; the lease tract size will be limited to 5,120 acres for such leases; and the royalty will be 12½ per centum on production removed or sold from them. A lease in a designated tar sand area may be extended for not less than 5 years beyond its primary term where the lessee has diligently pursued an approved plan of operations leading toward commercial recovery of tar sand deposits.

By virtue of the redefinition of the term "oil," the bill will permit the Secretary to reduce the statutory 12½-percent royalty on tar sand production under his existing authority to reduce royalty on all minerals subject to the Mineral Leasing Act. However, in light of the technological and economic uncertainties which will accompany tar sand development, special provision is made for the Secretary to review, prior to commencement of commercial operations, the royalty rates applicable to tar sand production. This review will be to determine whether a different royalty rate would better accomplish and encourage the maximum development and production of tar sand.

In order to enable the Secretary to distinguish oil production from tar sand production solely for the purposes of this special royalty review, "tar sand" is defined for royalty purposes by incorporation of a scientifically and industry-accepted definition. The use of such a definition for purposes of the Mineral Leasing Act is only feasible in this context because it will be applied only after exploration and development have occurred and prior to commencement of commercial recovery. Only at that point does it become feasible to evaluate whether the resource to be recovered is oil or tar sand.

Since for many years tar sand deposits have been overlain by Federal oil and gas leases, my bill will provide for the owner of such a lease to convert his existing rights to a combined hydrocarbon lease. The new lease would have a primary term of 5 years and be issued only upon submission by the lessee of an application for conversion containing an acceptable plan of operations for recovery of the tar sand resources. Valid claims under the 1972 mining law for tar sand deposits may similarly be converted to a combined hydrocarbon lease. All existing rights of an oil and gas lessee will be protected.

In recognition of the potential compatibility of conventional oil and gas production with tar sand development and the fact that a hydrocarbon lessee may not have an interest in or be capable of developing both resources, the bill will give the Secretary discretion to permit the horizontal segregation of a combined hydrocarbon lease.

Further, the bill will amend the Mineral Leasing Act for acquired lands in conformity with these amendments to the Mineral Leasing Act of 1920.

Finally, additional provisions will insure that nothing in the bill will change or affect the taxable status of oil production from tar sand under the Crude Oil Windfall Profit Tax Act of 1980 or reduce the depletion allowance or existing tax status of such production.

This bill will finally clear the way for tar sand development, which has been too long delayed in light of our national need for domestic sources of energy.●

REPEAL SOCIAL SECURITY OFFSET

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. GUARINI. Mr. Speaker, today I am reintroducing legislation which I sponsored in the 96th Congress to repeal the offset against social security benefits which is presently imposed in the case of some individuals receiving Government employee pensions.

The public pension offset was included in the Social Security Amendments of 1977. In general, the law requires the reduction of a spouse's or surviving spouse's social security benefits by the amount of that person's Government pension. Divorced men and women, married 10 years but not 20 years and eligible for benefits in January 1979 or later, are now affected by this change in the law. All others have until December 1, 1982, before the offset takes effect.

While the concept was well intended in its objective of shoring up the financially ailing social security system by preventing what was perceived to be a windfall for some workers, the offset was structured and timed to take effect in such a way that it can only work a hardship against significant numbers of workers, particularly women in their fifties who will be eligible for retirement in the next few years.

It is impossible for these women to change their plans at this late date. Many of them have been preparing for retirement based on the assumption that they would be eligible for full spouse's benefits under social security.

I would further note that for many of these women, low pay and years out of the paid work force while they raised their children, have prevented them from building up the reserves necessary for an adequate retirement. And, despite the perception that women are moving up in the paid labor force, many are locked into low-paying jobs. Current Commerce Department statistics show that a woman, employed full time, year round, earns on the average $9,929 compared to the $17,526 a man earns. The slogan that a woman earns only 59 cents for each dollar a man earns has been reduced—in spite of double-digit inflation—to 56 cents.

It is understandable that Congress wished to provide some relief for the social security system, but it is also clear that in practice, the law will work a harsh and clearly unintended effect upon thousands of families. Caught in the middle of this unexpected change in the law, these hard-working men and women look to Congress to remedy the unfortunate and unforeseen consequences of that legislation.

I urge my colleagues to join with me in eliminating the offset. In the alternative, I would recommend that an additional 10-year grace period be permitted which would have the effect of sparing workers who are nearing retirement while providing those about to enter Government employment that are not covered under social secu-

rity to be fully informed at the outset of their retirement benefits.●

DEAF SHOULD BE HEARD

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. FINDLEY. Mr. Speaker, today I am introducing two pieces of legislation to provide the deaf citizens of our country the means to become more involved in the political process, an involvement now blocked by high costs and our own lack of understanding for the problems of our deaf constituents.

My first bill would provide income tax credits for the purchase of teletypewriters and long distance phone use by deaf individuals of these magnificent machines. A teletypewriter, or TTY, is a typewriter attached to a phone. It is capable of transmitting a message over telephone lines to any other TTY in the country.

The cost to the deaf of purchasing a teletypewriter can be prohibitive. An adapter unit attached to a television set which prints out communications on a screen can cost anywhere from $250 to $800 or more. In today's difficult economic times this is more than many deaf citizens can afford. Many are elderly persons living on fixed incomes, and generally their income is only 84 percent of that of normal hearing families. My bill would allow a 50-percent-tax credit for purchase of a TTY, with an upper limit of $200 per family.

The cost of using a teletypewriter is also high, with phone charges as much as three times higher than the charge paid by people with normal hearing. The reason is the vastly longer time it takes the deaf to communicate by phone. Those who speak and hear well can complete an average conversation in 1½ to 2 minutes. The same call made with a TTY can take 5 minutes or longer, depending upon the skill of the typist. Thus, the cost for long distance calling by the deaf with a TTY can be prohibitive. The average family with a deaf household head can ill afford the additional phone expense. My bill would allow for a 75-percent deduction of qualified toll telephone service, easing this unfair burden.

The second piece of legislation I am introducing is a necessary corollary to the first. It is a resolution providing for installation of a TTY unit in the House of Representatives for use by Members on a shared basis so that they can communicate with their deaf constituents. People with hearing impairments would be able to place a toll-free call into this machine from one of the thousands of TTY's located across the country. A special operator would then contact the appropriate congressional office to arrange for a reply. Members of Congress or staff members would then transmit the reply back to the constituent through this same installation.

This would not be the first TTY installed for use by the Federal Government. Our colleagues in the Senate presently have three TTY's in service for communication with their deaf constituents. Also, Government offices such as the Federal Communications Commission and the Internal Revenue Service have TTY's. These have proved to be of value to those deaf persons in need of routine assistance from Federal agencies. In the past year the IRS, for example, received nearly 2,000 TTY communications, and TTY use at the IRS is increasing every year.

The House of Representatives needs to encourage deaf citizens to become a more vocal part of the legislative process. Passage of the legislation I am now introducing would insure that our deaf population will truly be heard.●

TO CELEBRATE SILVER JUBILEE OF PASTOR'S ORDINATION

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. SKELTON. Mr. Speaker, on Sunday, May 24, 1981, the people of St. Mary's Parish of Glasgow, Mo., will celebrate the silver jubilee of the ordination of its pastor, Father Richard C. Hunkins.

In his 25 years as a priest, Father Hunkins has endeared himself to many people. His service included service to his country as a chaplain to the 1st Marine Division of the U.S. Marine Corps in Vietnam.

It is a pleasure for me to join Father Hunkins' parishioners and friends in congratulating him on the occasion of his silver jubilee.●

SMALL BUSINESS INNOVATION RESEARCH

HON. JOSEPH M. McDADE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. McDADE. Mr. Speaker, I am today introducing, with Representative JERRY LEWIS, legislation designed to promote the role of small businesses in federally funded research and development. The enactment of this bill will stimulate technological innovation by using a small portion of Federal research and development budgets to fund research conducted by small business.

Small business is the source of much technological innovation in this country today. A lengthy series of studies has shown that small, high technology companies are more innovative than any other segment of our economy. A review of Federal research development and small businesses by the Office of Federal Procurement Policy concluded that small firms have compiled a striking record of innovation. Other studies have shown that these small innovative firms create many of the new jobs in the private sector.

In spite of the excellent record which small business has created in this regard, the vast majority of federally funded research and development is conducted by large businesses, universities, and Government laboratories. It is estimated that less than 4 percent of all Federal research and development money goes to small business. In order to more effectively target R. & D. expenditures, we are today introducing the Small Business Innovation Research Act of 1981. This bill is intended to stimulate technological innovation by using a small portion of Federal R. & D. budgets in a way similar to the successful small business innovation research program at the National Science Foundation.

The bill would require Federal agencies with R. & D. budgets of more than $100 million to make available 1 percent of their R. & D. money to small businesses through a small business innovation research program. The program requires no additional funds but rather a more direct targeting of the funds to small businesses. Funding of small high technology firms would be a three-phase process:

First, small firms would be invited to submit research proposals related to planned agency R. & D. activities. The most promising would be funded to determine if the research is technically feasible.

Second, if the initial research proves successful, larger funding would be provided from substantive research and prototype construction. Proposals that have attracted the attention of outside private capital would be given special consideration.

Third, commercial applications research and actual production would be financed by private capital. Agencies with R. & D. budgets between $20 million and $100 million in size would be required to set goals for awards to small businesses.

The SBIR program would be phased in over 3 years. During this time, the Office of Federal Procurement Policy would be required to promulgate regulations which simplify the paperwork required from small businesses for solicitations and proposals. Agencies also would be required to coordinate solicitation releases with SBA to avoid conflicts which might limit small business opportunities to submit proposals. Agencies also would report to SBA on

the number of R. & D. contracts awarded to small business and their amounts.

This program will directly fund feasibility testing for new ideas developed by small business. Because each agency would select its own research topics, the agencies would continue to direct their resources into the most useful projects. Although it involves only a small portion of agency research funds, it will have a major impact on small high technology businesses. I urge my colleagues to cosponsor this important legislation.●

BUDGET CUTS

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. HUBBARD. Mr. Speaker, I would like to bring to the attention of my colleagues a letter addressed to you from my constituent, Dr. C. F. Burnett, Jr., Morgan-Haugh Professional Service Corp., Mayfield, Ky., expressing his support for the President's plans to cut the Federal budget and reduce the number of unnecessary Government regulations. Mr. Speaker, as the House begins to consider these measures, I submit the following:

One of life's great frustrations is that little people like myself have such little voice in our government, while we are told that our government is "of the people and by the people." The vast majority of the people of this country voted for a change in the policies of our government, especially in relation to uncontrolled spending and uncontrolled taxation. In electing Mr. Reagan president, the people begged for a change and for relief from the inflationary policies of previous administrations. I realize that in your position of power you can further frustrate us by blocking the measures we so ardently desire.

Mr. O'Neill, I would like to add my small voice to the millions who are begging you to cooperate with our president and not deny us the representation we have sought. We want unreasonable expenditures stopped and stopped now. We also want unreasonable taxation stopped and stopped now. We want our dollar to have some definitive value so that a dollar this year will be the same as a dollar five years from now. The past policies of debasing our currency so that we are robbed of our savings by inflation must stop.

I have great faith in our system of government, and I believe you are a man of integrity who will allow the people of this nation to have a voice in government and will not deny us our rights. It was frightening to see and hear you speak on television indicating that you would "not let them tear down the programs we have built up." While many of these programs may be good, we cannot afford them and they must be "torn down." Why shouldn't the people who earn the money have some right in determining how it is spent?

Sincerely yours,

C. F. BURNETT, Jr., M.D.●

STANDARD OF LIVING AND GOVERNMENT SPENDING

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. DANNEMEYER. Mr. Speaker, in the current debate on the Federal budget, I wish to bring to the attention of my colleagues an eloquent letter addressed to Senator CRANSTON from my constituent, Mr. Richard C. Fahrni. Mr. Fahrni sent me a copy of this letter and gave me permission to make it public.

His letter makes clear the link between the size of Government spending and taxing and our standard of living. The Senate has voted 88 to 10 for the President's budget. The House must still vote on the budget, and hopefully, initiate a reduction in the tax burden.

Mr. Speaker, I submit the full text of Mr. Fahrni's letter to be reprinted at this point in the RECORD:

SANTA ANA, CALIF.,
March 5, 1981.

DEAR SENATOR CRANSTON: I am sure that past Congresses have had the best interests of our country in mind when they went about their tasks. But, they obviously did not properly evaluate whether the taxpayer could afford the expensive programs they felt were needed.

Please take a few moments out of your busy schedule and look at what government has done to my recent merit raise.

	Old	New	Difference	Percent gain or loss
Biweekly gross	$1,175.00	$1,325	$150.00	+13
Federal income tax	222.00	281	59.00	+27
California income tax	56.00	65	9.00	+16
California disability insurance	7.50	8	.50	+7
FICA	72.00	88	16.00	+22
Total taxes	357.50	442	84.50	+23.6
Net pay after taxes	817.50	883	65.50	+8
Inflation				−13
My standard of living				−5

As as producer, I received the smallest net increase in net pay (next to disability insurance) of all the taxing agencies.

Please, Senator Cranston, support President Reagan in his efforts to reduce government spending by eliminating useless government programs, by reducing government waste and the systematic reduction in personal income tax.

Also, Social Security as it is financed today is nothing short of insanity. For those who truly need this service, they should continue to receive it. The system, otherwise, should be phased out. People cannot continue to plan their future retirement around Social Security. It is a rip-off of the younger generation. Please, help get the government out of the retirement business and please help get government off our backs.

Respectfully yours,

RICHARD C. FAHRNI.●

SHORT-TIME COMPENSATION ACT OF 1981

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mrs. SCHROEDER. Mr. Speaker, last week I introduced the Short-Time Compensation Act of 1981. Since I have already received inquiries about it, I thought it would be helpful to submit the bill into the RECORD.

H.R. —

A bill to encourage States to provide unemployment benefits to certain partially unemployed workers.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Short-Time Compensation Act of 1981".

SEC. 2. STATEMENT OF PURPOSE.

It is the purpose of this Act to encourage States to provide partial unemployment benefits to individuals whose workweek is reduced pursuant to an employer plan under which such reductions are made in lieu of total layoffs.

SEC. 3. DEVELOPMENT OF STATE PROGRAMS.

(a) RESPONSIBILITIES OF THE SECRETARY OF LABOR.—

(1) The Secretary of Labor (hereinafter in this Act referred to as the "Secretary") shall develop legislative language which may be used by States as a model in developing and enacting short-time compensation programs.

(2) The Secretary shall provide technical assistance to States to assist in developing, enacting, and implementing short-time compensation programs.

(3) The Secretary shall make grants to States which enact short-time compensation laws that meet the guidelines established by this Act for extraordinary administrative costs and for evaluation of the State short-time compensation programs.

(4) The Secretary shall conduct a study or studies for purposes of evaluating the operation, costs, effect on State insured rate of unemployment, and other effects of State short-time compensation programs developed pursuant to Sec. 3 of this Act.

(5) Since this Act creates a three year experiment, the provisions of the Act regarding guidelines and grants shall terminate three years following enactment.

(6) States are encouraged to experiment in carrying out the purpose and intent of this Act. However, to assure minimum uniformity, the Secretary may require the provisions contained in subsections (b) and (c).

(b) SHORT-TIME COMPENSATION PROGRAM.—For purposes of this Act, the term "short-time compensation program" means a program under which—

(1) individuals whose workweek has been reduced pursuant to a qualified employer plan by at least 10 per centum will be eligible for unemployment benefits,

(2) the amount of unemployment benefits payable to any such individual shall be a pro rata portion of the unemployment benefits which would be payable to the individual if the individual were totally unemployed,

(3) eligible employees may apply for and collect short-time compensation or regular

unemployment compensation benefits, as needed; but no employee may collect more than the maximum entitlement during any benefit year to which he or she would have been entitled for full-time unemployment, and

(4) eligible employees will not be expected to meet the availability for work or work search test requirement while collecting short-time compensation benefits. However, they must be available for their normal workweek.

(c) QUALIFIED EMPLOYER PLAN.—For purposes of subsection (b), the term "qualified employer plan" means a plan of an employer under which there is a reduction in the number of hours worked by employees rather than total layoffs if—

(1) the employer's short-time compensation plan is approved by the State agency,

(2) the employer certifies to the State agency that the aggregate reduction in work hours pursuant to such plan is in lieu of total layoffs which would have affected 10% of the employees in the unit or units to which the plan would apply and which have resulted in an equivalent reduction of work hours,

(3) the plan shall remain in effect for no more than 1 year and employer shall reapply to the state agency to be recertified for another year,

(4) the employer continues to provide health and retirement benefits in accordance with the terms of those plans for employees who are already entitled to these benefits, and

(5) in the case of employees represented by a union, the appropriate official of the union (or union hall) has consented to the plan.

(d) FINANCING OF SHORT-TIME COMPENSATION BENEFITS.—Short-time compensation benefits must be charged in a manner which insures that the benefits are financed by the employers to whom those benefits are attributable.

(e) STATE.—For purposes of this Act, the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, and the Virgin Islands.

SEC. 4. DEMONSTRATION PROJECTS.

(a) GENERAL RULE.—The Secretary shall establish a three year experiment and conduct one or more controlled demonstration projects for purposes of evaluating the effectiveness of short-time compensation programs. These projects shall be designed to measure, inter alia, the following:

(1) the impact of the project upon the Unemployment Trust Fund, and a comparison with the estimated impact on the Fund of layoffs that would have occurred but for the existence of the project;

(2) the extent to which the project has protected and preserved the jobs of workers, which special emphasis on newly-hired employees,

(3) the impact of the availability of short-time compensation in geographic areas which historically have differed in the extent to which they are affected by economic downturns;

(4) the extent to which layoffs occur in the unit subsequent to initiation of the project and the impact of the project upon unemployment insurance entitlement of employees;

(5) where feasible, the effect of varying benefit levels to employees and varying methods of administration; and

(6) the effect of partial unemployment benefits to employers' tax rate, on both users and non-users of short-time compensation, on a state-by-state basis.

(b) PROJECTS CONDUCTED IN COOPERATION WITH STATE AGENCY.—Any demonstration project under subsection (a) shall be conducted in cooperation with the State agency which administers the unemployment compensation law for the State in which such project is conducted.

(c) COSTS PAID BY SECRETARY.—The costs of administering any demonstration project conducted under subsection (a) shall be paid by the Secretary. The benefits shall be financed through the state unemployment compensation fund in States which have amended their statutes to permit the payment of short-time compensation benefits for partial unemployment.

SEC. 5. REPORTS.

(a) INTERIM REPORTS.—The Secretary shall submit to the Congress an interim report on the implementation of this Act. The interim report shall be submitted on or before October 1, 1983.

(b) FINAL REPORT.—Not later than October 1, 1984, the Secretary shall submit to the Congress and to the President a final report on the implementation of this Act. Such report shall contain an evaluation of short-time compensation programs and shall contain such recommendations as the Secretary deems advisable, including recommendations as to necessary changes in the Department's statistical practices.

SEC. 6. AUTHORIZATION OF APPROPRIATIONS.

For the fiscal year beginning October 1, 1981, and the two succeeding fiscal years, there are authorized to be appropriated from the general fund of the Treasury such sums (not to exceed a total of $10,000,000) as may be necessary to carry out the purposes of this Act.●

IS IT SOCIETY'S FAULT?

HON. RICHARD BOLLING

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. BOLLING. Mr. Speaker, the article which follows appeared in the Sun of Baltimore, Md. in its perspective section on Sunday, April 5, 1981.

In my opinion it truly provides important perspective on the problem of assassination attempts on our Presidents, crime in America, and a variety of other related subjects.

I happen to believe that handgun control is well worth trying on a national basis. It would appear to help at least in a generalized way in other countries where crime statistics seem relatively accurate.

Also, I believe it very important that soon a President of the United States lead the way to a national acceptance of the idea that our Presidents should be more effectively protected from assassination attempts than is now possible.

That is not a criticism of the Secret Service. Under the circumstances they do an extraordinary job. No one needs to comment on the courage and self-sacrifice of Secret Service agents. Not once but several times in my experience agents have placed their own lives second to the life of the person they were charged to protect.

But if I am correctly informed and my own limited observations confirm the information I have received, heads of state and heads of government in other free societies are more systematically and successfully protected from danger by tighter control of the environments through which they move. That is especially true in times of political campaigns and other public appearances.

President Charles de Gaulle of France was the almost constant target of fanatic and highly professional assassins, but he survived in a free and sometimes turbulent France because he was himself willing to accept the disciplines of security measures which limited his direct personal exposure to potential assassins no matter their motivation.

The President of the United States who takes the steps I am suggesting will make a real contribution to the future of this country and even to that of the world.

Of course, our society has and, if it happens again, will survive the assassination of a President, but it would be better if the already difficult political process were not so often put to that particular dreadful strain. It is clear to me that on at least two occasions the assassination of a President of the United States almost surely changed our history and not for the better.

IS IT SOCIETY'S FAULT?

(By Fred Barnes)

WASHINGTON.—The reaction is always the same: a rush of emotionalism that borders on national self-flagellation. Our society is sick or mad, it is said. People are too apathetic to insist on gun control. Sprees of violence are now characteristic of America, and we are all responsible. The authority of our government is fragile.

"The shooting of President Reagan, White House Press Secretary James Brady and two security officers," wrote columnists Jack W. Germond and Jules Witcover, "is yet another replay of the national nightmare and madness that peculiarly afflicts American society . . . . Assassination attempts against presidents of course generate national attention and concern, but they are only the most prominent exhibits of the country's special sickness."

Charles J. Orasin, executive vice president of Handgun Control, Inc., was even more emotional. "Are people just exhausted by all this violence?" he asked. "What is it? Are they so inured to violence in their neighborhoods that they expect it? Are they so used to seeing national leaders fall they don't react anymore?

"Have we accepted shootings as a way of life? Do we have to bury another president? Is that what it's going to take to get people angry enough to do something about it? What's going to get them angry enough to pick up the phone, call their congressman and demand they pass a gun control law now and stop this madness?"

David S. Broder, the temperate and respected political reporter, added this fearful note: "The fragility of our governmental structure to the assassin's bullet has been demonstrated again."

Such comments—outbursts, really—have become a common phenomenon. They were voiced after President John F. Kennedy was shot to death in 1963, and after the assassinations of the Rev. Martin Luther King, Jr., and Robert F. Kennedy in 1968, and once more but less loudly in the aftermath of the two failed attempts to assassinate President Gerald R. Ford in 1975.

But at the core, there is something wrong with these emotional reactions. It is not that American society is so well. It is arguable that the nation's mental health has deteriorated in recent years. Nor is it that gun control is an inappropriate goal. A compelling case exists, for instance, for banning handguns like the one used to shoot Mr. Reagan.

The problem is that the excited conclusions drawn from the assault on Mr. Reagan and from the earlier assassinations do not flow logically from the particulars of those cases. The actions and the participants in them are said to be reflective of alarming national trends, but in truth they are not.

Four general themes have emerged in the wake of the Reagan shooting. Each manifested itself after the earlier attacks. And each is misguided at least in the sense that it does not fit with the facts.

The first is that American society is sick. Maybe so, but how do the actions of a young loner, undergoing psychiatric treatment, buttress the point? The man accused of shooting Mr. Reagan left behind letters suggesting he acted in order to prove his love to a movie actress.

Similarly, the four men who succeeded in assassination attempts on a president were strange, isolated figures. John Wilkes Booth, born illegitimate, was a supporter of the Confederacy and psychologically unstable at the time he shot Abraham Lincoln in 1865.

Charles J. Guiteau, the assassin of James A. Garfield in 1881, was a wandering evangelist and sometimes attorney. He had spent six years, unhappily, in a Christian-communist community.

Leon Czolgosz, who killed William McKinley in 1901, was a recluse and an anarchist, but he was unable to get along with other believers in anarchism. And Lee Harvey Oswald, who short President Kennedy in 1963, was a Marxist who found no solace in the Soviet Union and returned to lead a marginal existence in the United States.

"Ambitious out of all proportion to their prospects, they were lonely and alienated from their immediate community of friends and sought their private solution in a massive assault on the head of the Republic," said Lawrence Z. Freedman, a psychiatrist and chairman of the University of Chicago's Institute of Social and Behavorial Pathology.

Periodic assaults on a national leader are not peculiar to the United States among civilized nations, though Europeans tend to think of America as especially violence-ridden. In placid Nineteenth Century England, there were five attempts to kill Queen Victoria, most of them perpetrated by disturbed young men.

In France, President Charles de Gaulle was the target of numerous assassination tries. In Germany, the left-wing Baader-Meinhoff gang murdered prominent businessmen and terrorized government officials. In Italy, the Red Brigades have claimed credit for many killings, including that of one leading political figure.

Certainly, this country is beset by social disorders that range from a high crime rate to economic troubles to a national sense of rootlessness. "However," Mr. Freedman wrote last week, "presidential assassins do not reflect these social problems."

The second theme is that national leaders are jeopardized by the absence of stiff gun control laws. This assumes that potential assassins will act only if they can obtain a gun legally.

The man alleged to have shot Mr. Reagan had three guns confiscated last October when he was arrested in Nashville. Several days later, he purchased two new guns. It seems highly unlikely that he would have given up his effort to acquire guns simply because they were unavailable legally. A black market in handguns thrives.

Nonetheless, politicians have jumped to claim that their brand of gun control law would have deterred the alleged Reagan assailant. "Under the legislation we are proposing, he would not have been able to purchase or carry that handgun in New Jersey," said the president of the New Jersey state Senate, Joseph P. Merlino.

On the other side, John M. Snyder of the Citizens Committee for the Right to Bear Arms made an equally specious argument. "What happened to [Mr. Reagan] proves the point we've been making all along," he said. "Here in the District of Columbia you've got the strictest gun control laws in the country and this happens."

A third theme is that we are all responsible. This lament first cropped up after the assassination of President Kennedy. It was not immediately clear how there was a collective responsibility for the shots fired by Lee Harvey Oswald, whether or not he had accomplices. It is still not clear.

A stronger argument can be presented for national responsibility for the slaying of Dr. King. Racial segregation, which Dr. King was seeking to uproot, was indeed part of American life. But his assassin, a racist drifter named James Earl Ray, struck not to abet a national trend but in defiance of the progress toward racial toleration and desegregation.

If Americans are responsible at all for the shooting of Mr. Reagan, it is not for the reason normally given. It is because they insist on maintaining a free and open society. Those under psychiatric care, like the suspect in the Reagan case, are not automatically incarcerated.

Thousands of immigrants flow into the United States every year, including Sirhan B. Sirhan, who was convicted of shooting Robert F. Kennedy to death. Should the marginally disturbed be locked up? Should immigration be halted? Few Americans would answer yes to either.

"The fact that we live and work in a democracy has to be taken into consideration," said Jack Warner of the Secret Service as he tried to explain how a gunman could have slipped within a few yards of Mr. Reagan. "We live literally in a free society."

The fourth theme is that the authority of the national government is vulnerable to an assassin's bullet. The opposite of this is manifestly true. After the four presidential assassinations, there were no difficulties in staging an orderly succession. There were no coups. There were no challenges to the right of a vice president to take over.

As Mr. Reagan underwent surgery for his chest wound last Monday, the government continued to operate. Social Security checks were mailed. The military manned its posts. The Internal Revenue Service kept on with tax collections.

Cabinet members assembled in the Situation Room at the White House. Most agreed with the decision by Alexander M. Haig, Jr., the Secretary of State, to take charge, though his assertiveness irritated some. Vice President Bush was summoned back to Washington from Texas, and he was in constant communication with the White House during his flight.

In short, the nation was thrown into shock by the shooting of the president but the government was not destabilized. Had the shot been fatal to Mr. Reagan, a peaceful transition of power was certain.

And yet Americans seem to be tormented, despite the irrationality, by the thought that a horribly corrupt streak in our way of life was laid bare by the attack on Mr. Reagan. Mr. Freedman, the psychiatrist, explained it best in an article last week:

"Magazines, newspapers, radio and television reflect the nation's mood: What is happening to us? Are we a sick people? Is the violence a symptom of a rotten, corrupt society? For many, the questions seem rhetorical. The answer springs from the dead and wounded of our leaders, from the crime statistics of our cities, the afterdark fears of most Americans in their own neighborhoods.

"The mood is understandable. The justification for it, however, is not self-evident. In fact, when most of us recover from our latest shock and horror, the answers to these questions will be seen to justify, if not unalloyed optimism, a temperate but solid sense of the strength of our community, the tenacity of our governmental structure."●

BUREAUCRACY: CIRCA 1935

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. PHILIP M. CRANE. Mr. Speaker, the struggle to contain our monstrous Federal bureaucracy is not a new one, as evidenced by the following article, which was printed in an Atlanta newspaper in the 1930's. Bishop Candler begins his article by lamenting the fact that Americans of his era have not learned from experience what our Founding Fathers endeavored to teach: that government is a corrupting force that necessitates strict limitation.

Let us hope that 50 more years of bitter experience have succeeded where the previous 150 failed, and that we will have no cause to echo Bishop Candler's sentiments after another 50 years have passed.

CONTINUED RELIEF AND ULTIMATE REVOLUTION

(By Bishop Warren A. Candler)

We are accustomed to say that men learn by experience, but it is far more true that men have no experience of their own nor can they use the experience of others until it is too late.

This is equally true of nations as of individuals. Every nation as every individual, runs to ruin in pretty much the same way that all others before them have run.

To popularize themselves the Roman rulers were accustomed to make large gifts to the people; and the more they gave the more people wanted them to give. At last

their gifts could do nothing to bring peace and prosperity to the nation.

Our own country is now taking the same course, and will reach the same result. Great schemes of relief are devised for distributing funds to the people, who are called the unemployed and are declared to be in great need.

But there is no country in the world that possesses as abundant resources as our country possesses, and no land under the sun where industry rightly directed falls short of the needs of the industrious.

As it was in the Roman commonwealth the large sums given to those claiming to be in need and unemployed will cause them to demand larger sums; and there will come a time when their demands cannot be met. Then they will cry as did the Roman citizens, "give us bread and games, or revolution will follow."

There is a delusion that the Civil Government has somewhere a mysterious and miraculous fund from which to draw all manner of money for those who cry most vociferously for it.

But the Government has no money which it does not get from the people, and if great sums are given to one class they have to be taken from the other class.

In the end we reach the point of revolution. It is now time for needless schemes of relief to be abandoned and the people exhorted to go to work and live by self-respectful industry.

The cities are overcrowded because men are seeking to escape toil. Such was the case in ancient Rome. As the country became depopulated the large cities became overcrowded.

There is today in our land abundant territory in which profitable farming can be conducted, or at least good livings made; but multitudes are flocking to the cities hoping they can find compensation without work and toilless support by the Government. Multitudes should go back to the country instead of depending upon support by the Civil Government.

The springtime is now on when crops could be planned and labor devoted to fruitful efforts.

But as long as relief schemes maintain thousands of people, the state supported multitudes will not go back to the country. They will remain in the cities where relief will give them maintenance and all manner of diversions will furnish them entertainment.

Our cities are overgrown and much of the surplus population is supported by the taxation of the more industrious and fortunate citizens.

There must be a return of the people to the soil or distress will overtake multitudes and disaster befall the nation.

The divine decree, after the fall of man, was that by the sweat of his brow he should live.

But now multitudes wish to change that decree and make it read by the sweat of other people's brow we will live. This seems to be a selfish view that the Almighty never designed, and which can never bring peace and prosperity to a nation.

Modern inventions have made more fruitful human toil, and less labor may be required to support our nation than was required in the time of our ancestors, but there will never come a time when multitudes can remain idle without demoralization to themselves and damage to the Republic.

Relief schemes will become ruinous as they result more and more in idleness.

If a man can make a living more easily now than during any former time in the history of our country, let him devote his leisure time to doing good to others instead of seeking alms and assistance from others.

No man can be self-respecting who constantly holds out his hands for the doles from the public treasury. No matter how well meant such doles may be they will ultimately lead to dire results.

Benevolence based upon the really needy is a Christian act; but doles handed down to idle beggars destroy all public good.

The sick and suffering must, of course, be relieved; but the idle who are not sick must be left to suffer or sent to work.

It in no sense belongs to the Civil Government to degrade itself to the level of a charity and relief association. There is too much of that sort of thing all over the land.

The evil disposition communicates itself to the legislative bodies who vote the public funds to all sorts of needless objects. Unnecessary appropriations relieve nothing, but damage everything.

Often appropriations are designed to win political favor and secure public office.

The Roman rulers gave large gifts to win public favor and modern demagogues do the same.

It is an easy thing to vote away funds contributed by other people by enforced taxation. Any observant man can see around him many of these vicious appropriations and note their evil effects.●

ECONOMIC EQUITY ACT INTRODUCED IN HOUSE AND SENATE

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mrs. SCHROEDER. Mr. Speaker, today I am introducing the Economic Equity Act on behalf of myself and Representatives HECKLER, FERRARO, CHISHOLM, BOGGS, MIKULSKI, and OAKAR.

The Women's Economic Equity Act of 1981 proposes reforms in a variety of legislative areas, including public and private pension law, tax policy, Government regulations, insurance and enforcement of alimony and child support. The administration is focusing on economics this year, and women's issues are economic issues.

This bill addresses problems of working women who earn 59 cents for every $1 earned by male workers. It also addresses the economic dilemma faced by homemakers who have never worked for pay outside the home. While the bill does not encompass all the economic problems facing women, it is a coordinated first step to enacting legislation for women during the 97th Congress.

This bill includes 12 separate titles, many of which have already been introduced in the House by individual Members. An identical bill is being introduced today in the Senate by Senator DURENBERGER, for himself, Senator MARK HATFIELD, and Senator BOB PACKWOOD.

The hour is late. The faltering economy has had its most chilling effect on women. Three out of every five people with incomes below the poverty level are women. Over 80 percent of all single parent households are headed by women. One-third of these live in poverty. Poor women who work are employed in the lowest paying kinds of jobs with few opportunities for increasing their income and frequently without fringe benefits.

The time to start changing these statistics is now. I have attached to my statement, for my colleagues' interest, a summary of the Economic Equity Act.

The statement follows:

SUMMARY OF THE ECONOMIC EQUITY ACT

TITLE I—TAX AND RETIREMENT

PRIVATE PENSION REFORM

This section of the bill would:

Lower the minimum age requirements for participating in a qualified pension plan from age 25 to age 21.

Require plans to pay a survivor's annuity to the spouse of a vested plan participant who died before the earliest retirement age.

Abolish the unilateral right to waiver of survivorship benefits and require the spouse to waive her survivor rights in writing.

Eliminate the two-year waiting period for enforcement of the election of joint and survivor's options.

Require prorated retirement and survivor's benefits to be granted to divorced spouses unless contrary provisions are included in the divorce decree.

Alter breaks in service rules so that parents who wish to take leave for child-rearing purposes are entitled to the same rights as veterans who leave employment for military service and return to the same employer.

INDIVIDUAL RETIREMENT ACCOUNTS FOR SPOUSES

This section of the bill would: Allow a married individual with no income or an income lower than that of his or her spouse to use the spouse's income to calculate the amount that the individual can contribute to an IRA, so long as all other conditions for an IRA are met.

This section also allows alimony payments to be included in computing a person's total income for purposes of determining their maximum allowable contribution to an IRA.

HEADS OF HOUSEHOLD—ZERO BRACKET AMOUNT

This section of the bill would: Amend the IRS Code to raise the zero bracket amount for heads of households to $3,400 from the current level of $2,300. It would adjust the tax table by $1,000 to maintain the same marginal rates and income boundaries for inclusion of this increase for heads of households. It would allow a head of household to elect additional zero bracket allowance when determining the number of withholding exemptions on a payroll check. And it would require that only the heads of household with incomes greater than or equal to $5,400 would be required to file a tax return.

MILITARY RETIREMENT: EX-WIVES AND SURVIVORS

This section of the bill would: Provide former spouses of military personnel, both male and female, married at least 10 years, a pro-rata share of the retirement and survivor's benefits, subject to court review. The

exact amount of the former spouse annuity would depend upon the number of years of marriage that overlap with the creditable years of service toward retirement. The formula for calculating the former spouse annuity is:

Number of years of marriage during creditable service divided by number of years of employment multiplied by .50 multiplied by total retirement annuity equals former spouse retirement annuity.

This section would also make survivor's benefits mandatory, unless the spouse and former spouse (if any) agree in writing to opt out of the survivor's benefits plan.

CIVIL SERVICE RETIREMENT: EX-WIVES AND SURVIVORS

This section of the bill would: Provide former spouses of civil service personnel, both male and female, married at least 10 years, to a pro-rata share of the retirement and survivor's benefits, subject to court reviews. The exact amount of the former spouse annuity would depend upon the number of years of marriage that overlap with the creditable years of service toward retirement. The formula used for calculating the former spouse annuity is:

Number of years of marriage during creditable service divided by number of years of employment multiplied by .50 multiplied by total retirement annuity equals former spouse retirement annuity.

This section of the bill would make survivor's benefits mandatory unless the spouse and former spouse (if any) agree in writing to opt out of the survivor's benefits plan.

DISPLACED HOMEMAKERS: TAX CREDITS

This section of the bill would: Provide a $3,000 first year, $1,500 second year tax credit to employers who hire displaced homemakers.

TITLE III — WOMEN IN THE ARMED SERVICES

This section of the bill would:

Eliminate gender-based distinction in the United States Code provisions relating to military service, promotion, appointment, separation and retirement.

Eliminate a statutory preference for male surviving relatives to receive the personal effects of deceased service personnel.

Require the Secretary of Defense to issue an annual report to the Congress on the status of women in all branches of the military.

This bill does not deal with the issue of women in combat.

TITLE VI—REGULATORY REFORM

This section of the bill would: Codify a Presidential Directive of August 26, 1977, requiring all Executive departments and agencies to identify "regulations, guidelines, programs and policies which result in unequal treatment based on sex and to develop proposals to change any laws, regulations and policies which discriminate on the basis of sex."

TITLE VIII — STUDY ON ENFORCING ALIMONY AND CHILD SUPPORT

This section of the bill would: Direct the Justice Department to conduct a one-year study of varying State laws and jurisdictional divisions in national enforcement of child support, alimony and property settlement decrees; and to define the scope of the problem, analyzing the issue and making policy recommendations to appropriate Congressional committees.●

ENVIRONMENTAL SUFFOCATION

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 7, 1981

● Mr. PHILIP M. CRANE. Mr. Speaker, our industrial community, which has contributed enormously to the high standard of living Americans enjoy, can no longer endure the unreasonable regulatory burden that has been placed on it in the interest of environmental protection. Surely we must strive to maintain a pure environment, but concerns of this nature must be balanced with, and not override, our need for continued economic growth. An excellent example of the frustration caused by the zealous overregulation in this area can be found in an excerpt from an address delivered by Mr. George B. Munroe, chairman and president of Phelps Dodge Corp., to the Copper Club at its annual meeting in New York.

ENVIRONMENTAL SUFFOCATION

The 1970s in the United States was a decade in which our government lost sight of the need for a strong and growing economy as a base for the provision of employment, prosperity, national security and social programs. A torrent of regulations, especially in the environmental area, descended on the business community in general and the mining industry in particular. Crash programs to reduce the perceived environmental impact of our operations, especially our smelters, were mandated and carried out at huge cost. These programs, which have added some 15 cents per pound to the cost of producing copper, overlapped with the copper industry depression that began in 1974 and, except for a modest upturn in 1979, continues today. The result has been heavy borrowing by the industry, declining profitability and deteriorated balance sheets.

Now, no one of us would take the position that there is no place for environmental protection in our society. But for a decade we have had a massive imbalance of emphasis. As a result, domestic industry today is regulated under the Clean Air Act, and the Water Pollution Control Act, and the Water Quality Improvement Act, and the Safe Drinking Water Act, and the Ocean Dumping Act, and the Soil and Water Resources Conservation Act, and the Resource Conservation and Recovery Act, and the Coastal Zone Management Act, and the Toxic Substances Control Act, and the Environmental Pesticide Control Act, and the Noise Control Act, and the National Forest Management Act, and the Federal Land Policy and Management Act, and the Endangered Species Act (of snail darter fame), and the Historic Preservation Act and the Wilderness Act, and the Surface Mining Control Act, and the National Environmental Policy Act. And that is an incomplete list. This is environmental suffocation. With the guidance and participation of the environmental movement, Congress has painstakingly crafted a complex of statutes which are strangling our nation's ability to grow and which; if unchanged, will continue to weaken our security and ultimately bring down our economic system. This need not happen, and I believe last year's elections were a strong vote by our citizens for a much needed change.

I think it is clear that if we see a continuation of Federal governmental policies affecting our industry of the sort we have seen in the '70s, then the domestic mining and minerals processing industries will continue to decline and the US will become increasingly dependent on foreign sources for minerals and metals.●

HOUSE OF REPRESENTATIVES—*Wednesday, April 8, 1981*

The House met at 3 p.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

With gratitude, O God we offer our praise for all the gifts from Your good hand. Especially this day we thank You for the freedoms we enjoy and which too seldom we appreciate—the freedom to speak and to listen, the freedom to open doors to the glory of Your world, the freedom to choose the way we wish to go, the freedom to read and to learn, the freedom to worship You in truth. We thank You that we are blessed to live in a nation where we share a tradition of liberty, and can experience our freedoms anew each day. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed a concurrent resolution of the following title, in which the concurrence of the House is requested:

S. Con Res. 9. Concurrent resolution revising the Congressional Budget for the U.S. Government for the fiscal years 1981, 1982, and 1983, to include reconciliation.

The message also announced that the Senate agrees to the amendment of the House to the bill (S. 840) "An act to continue in effect any authority provided under the Department of Justice Appropriation Authorization Act, Fiscal Year 1980, for a certain period."

STUDENTS COME TO CAPITOL HILL TO TALK ABOUT FINANCIAL AID

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, I want to take this opportunity to let my colleagues in the House know on both sides of the aisle that on April 13, this coming Monday, we will have approximately 1,000 college students from around the country coming into the Capitol. They will be meeting in the Cannon caucus room at 10 o'clock in the morning.

Then their program is to fan out and talk to Members who are here and also to their legislative assistants about their needs for financial aid.

Mr. Speaker, our former colleague, John Brademas, now of New York, was here today and met with us. He is the president-designate of New York University. He was pointing out as the president of the largest private independent school in the country the problems that they would be facing and their students would be facing if we did not go ahead and restore these moneys to the student-aid programs.

Mr. Speaker, I yield back the remainder of my time.

BANKS EXCEPTED FROM SECTION 265(2)

(Mr. HOLLAND asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HOLLAND. Mr. Speaker, the Subcommittee on Select Revenue Measures of the Committee on Ways and Means today held a hearing on revenue procedure 80-55, relating to the deductibility of interest paid on certificates of deposit issued to State and local governments which are collateralized by tax-exempt securities. In light of the considerable interest among my colleagues and the public in this revenue procedure, I would like to present to you, on behalf of Chairman COTTER, the results of the administration's review of revenue procedure 80-55. Assistant Secretary John E. Chapoton, accompanied by Commissioner Roscoe Egger, testified before the subcommittee today that the Internal Revenue Service is withdrawing revenue procedure 80-55. Therefore, interest paid by banks on short-term deposits of State and local governments which are collateralized with tax-exempt obligations will generally be deductible.

The Treasury Department indicated that it will continue to study closely the extent to which banks should be excepted from section 265(2), the provision interpreted by revenue procedure 80-55. Depending on the conclusions of the study, Assistant Secretary Chapoton stated that they may propose legislative changes to the Congress in the future.

THE STRENGTH OF THE BUDGET PROCESS

(Mr. PANETTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PANETTA. Mr. Speaker, the real strength of the budget process since its enactment has been the opportunity of Republicans and Democrats alike to openly debate, disagree, and resolve the budget priorities of the country.

That is the nature of our democratic system, it is the nature of our constitutional responsibility, and it is the history of the budget process.

I know of no mandate, electoral or otherwise, that has changed the nature of that responsibility.

And yet, there are now efforts to convert this process and this debate into a nonprocess and nondebate. It is take it or leave it. Do not consider the latest estimates? Do not consider the size of the deficit? Do not worship, in the words of JACK KEMP, at the altar of the balanced budget? Do not amend, do not question, do not think. In the words of the administration—any amendment, any compromise is unacceptable.

I doubt there has ever been a budget proposal that pure and I doubt there ever will be. The reality is that there will and should be honest differences that need to be debated and need to be resolved. The fact is that we are not just dealing with numbers but with the lives and the futures and the security of millions of Americans.

Our goals are hopefully the same: To reduce the deficit; to use the most realistic economic assumptions we can get; to balance the sacrifices that have to be made; and to provide equity in tax policies.

I believe the chairman's proposed budget makes a better effort at achieving those goals than the administration's. But I am willing to listen, to strengthen, to amend if necessary, and to compromise if necessary.

But one thing we must never be willing to compromise is our responsibility to our country and our constituents to question what is questionable, to debate what is debatable, and to amend what is amendable. That is the nature of the democratic process, and hopefully it will continue to be the nature and strength of the budget process.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

ADMINISTRATION IGNORES NEED FOR WELFARE WORK INCENTIVES

(Mr. SYNAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SYNAR. Mr. Speaker, the administration deserves to be commended for its efforts to eliminate the problems of waste, fraud, and abuse in Federal programs while maintaining our commitment to protect America's truly needy. However, I am a little concerned over the impact of some administration proposals on the system's work incentives and, quite frankly, I fear some will actually discourage recipients from seeking employment.

Let me offer a few examples: the administration proposes to reduce aid to families with dependent children (AFDC) benefits after the parent has been employed for 4 months, it proposes to count earned income tax credit as income, and it proposes to reduce existing disregards for work-related expenses and child care in determining benefit levels.

How will these proposals discourage work? Well, the typical working mother receiving AFDC in Oklahoma can earn $237 gross income each month. This is less than full-time minimum wage. The administration proposals would reduce the disposable income of working AFDC mother of two from $459 per month to $391 after 4 months employment. That is only $9 more in monthly income than a nonworking mother in similar circumstances.

Mr. Speaker, it has become clear that in more than one instance the stated goals of the administration are not in synch with the actual effects of the specific proposals. It is important that we do more than provide lipservice to the needs of the truly needy while in fact pursuing legislative goals which would work against their well-being and serve as hindrances to their future self-sufficiency..

ADMINISTRATION'S BUDGET RECOMMENDATIONS AFFECT AFDC WORKING MOTHERS

(Mr. GEPHARDT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEPHARDT. Mr. Speaker, one of the messages of last year's election is that the American people agree on the need for a healthier economy. I think they are correct and agree with the President that we must all work to come up with policies that put more Americans into productive, meaningful jobs so that they can support their families without Government assistance. The Government should do all it can to create an economic climate that creates new jobs and insure that the unemployed are able to take them.

That is why I question some of the administration's budget recommendations that would actually make it harder for people to work. I am speaking here of plans to reduce deductions for child care and work-related expenses, count the earned income tax credit against benefits, and reduce benefits for the poor who have been working for at least 4 months.

Mr. Speaker, in my home State of Missouri fully 40 percent of the mothers in single-parent families receiving aid to families with dependent children work. This is nearly triple the national average of 14 percent. If we enact the President's plan, a mother of two who is working full time at the minimum wage will have only $15 more at the end of a month than a woman in a similar situation who refuses to work. Thousands of working mothers would lose their AFDC and medicaid benefits after 4 months of employment. This will endanger the health of their families.

Cutting the budget is a good idea. So is putting people to work. But cutting the budget in a way that will discourage people from working must be considered very shortsighted at best.

SECRETARY HAIG ENCOURAGES FRENCH GRAIN SALES TO THE SOVIET UNION

(Mr. FITHIAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FITHIAN. Mr. Speaker, I am here to report a rather sad event. Secretary Haig is now reported conclusively to have encouraged the French grain sales to the Soviet Union in the amount of what is reported to be 2 million metric tons. This is the same Secretary of State who has been the dominant influence in this administration's failure to lift the embargo, thereby isolating the American farmer, now the only producer of agricultural grains in the world taken out of the Russian market.

I would urge this administration to take two necessary steps: First, to lift the embargo; and second, to initiate those negotiations which would lead to a follow-on grain agreement to succeed the one now in force which will expire on September 30 of this year.

I find it incredible that a high official of this administration in the face of the President's own pledge to lift the embargo would not only counsel and win in the councils of this administration a fight against lifting that embargo, but would turn around on this trip abroad and encourage our competitors, the French wheat and grain farmers, to enter the Russian market, and then compliment them for their entry as being helpful to the world situation.

IF THERE IS NO BALLOT, SOME VOTE WITH THEIR FEET

(Mr. LANTOS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANTOS. Mr. Speaker, the police state just does not work. Three outstanding trainers of Olympic-class gymnasts from Romania are the latest in that never-ending caravan of women and men who opt for strange lands, unfamiliar languages, different customs, and an unknown future for the one certainty that they can live in a free society. They leave behind family and friends, all their worldly goods—everything that has been a part of them through childhood, youth, and adulthood—to be able to speak and think and act and travel freely as men and women ought to in the 20th century.

These three outstanding trainers from Romania—who incidentally are members of the Hungarian ethnic minority in that country—are the most recent among the millions who vote with their feet and leave behind their country of origin. I salute them and assure them from personal experience that they will not regret their decision.

UNFREEZING STUDENT AID GRANTS

(Mr. RATCHFORD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RATCHFORD. Mr. Speaker, I rise today to express my sense of relief in learning that the administration has resumed processing of Pell grant applications for the coming academic year.

As many of my colleagues are aware, the administration has seriously threatened the ability of students and their families to plan for postsecondary education by refusing to process Pell grant applications earlier this year. This decision to halt grant processing was made in blatant disregard for statutory procedures required by the Congress, and reflected an unwarranted step by the administration to usurp the legislative authority of this Congress.

I am relieved that the processing of Pell grant applications has resumed, and I commend my colleague from Illinois (Mr. SIMON) and Secretary Bell for their efforts to resolve the situation so that students can plan for the future. This spirit of compromise and willingness to discuss areas of genuine disagreement is certainly refreshing.

79-059 O - 84 - 77 (Pt. 5)

Yet we must not fail to notice that needy students and their families have been the losers as a result of the administration's tactics which led to this compromise. In essence, the administration has simply succeeded in redefining "need"—by refusing to take realistic account of increases in the cost of living for needy families, the administration simply ignores the full extent of financial need which already exists. While we can debate the merits of individual budget cuts affecting student-aid programs, it is wrong to suggest that we are meeting the financial needs of students when we are only refusing to determine need in a manner which is honest and equitable.

Mr. Speaker, the entire crisis precipitated by the refusal to process Pell grant applications raises some disturbing questions about this administration's approach to spending reductions and about the strength of its so-called safety net for the truly needy. The financial needs of students and their families do not disappear simply because we refuse to acknowledge them, because we pretend that their costs of living are lower than they really are. By closing our eyes, we can pretend we are saving money without hurting students, and yet we will open them to discover that we are quietly closing the doors of higher education for thousands of students across the Nation.

We can applaud the fact that students will receive the information they need to decide whether or where to attend college. We can hardly approve of the tactics which the administration has used to force reductions in Federal support for student aid, nor its implicit refusal to admit that we will fall short of meeting the financial needs of students and their families. I can only hope that the upcoming debate on the Federal budget is more honest in its treatment of spending cuts affecting the truly needy.

GOVERNMENT BINDING: IT IS OUT OF CONTROL

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, I have been making quite a fuss about what is spent printing and binding publications for those of us here on Capitol Hill, and I intend to keep harping on that until something is done. But it is not just the Congress. Printing and binding waste seems to be everywhere you look in the Federal Government.

Just last week I received a hard bound copy of the final report of the National Alcohol Fuels Commission of which I was a member during the last Congress. It had my name specially embossed on the cover. My staff member who worked on matters relating to the Commission received a similar personalized copy. Just a couple of months ago, the Commission printed thousands of soft-bound copies of that same report.

I just could not believe it. I certainly did not request the personalized, hard-bound copy, and I do not need it. But the taxpayers paid for it. Relatively speaking, it is a minuscule part of the Government spending problem.

But with this kind of nonsense going on, it is no wonder that the Federal Government has a printing and binding expense that now runs in the billions. We have simply got to bring this under control, and the only way that is going to happen is for Congress to demand it and for us to set an example for the rest of the Government. I hope I can count on some support in my efforts to stop this wasteful use of tax dollars.

WE NEED MORE DEFENSE CIVILIAN PERSONNEL

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, were we to go on an Army base somewhere in America and see a uniformed soldier raking the leaves, we might ask: Why is that young man not taking parachute training or working as a mechanic on a tank? Why is that soldier not doing something constructive so that we as a nation may be better militarily prepared?

The reason is that this uniformed soldier is doing the work ordinarily done by a civilian employee.

An often overlooked aspect of a strong military is the need for defense civilian personnel. So that we do not forget this important issue, I will repeat it: We need more defense civilian personnel.

The President is asking for additional thousands of such workers. Today civilians perform some of the most critical tasks in insuring that our military forces are ready to fight. But since the pre-Vietnam days, civilian employment in the Defense Department has decreased by almost 200,000 people. At the same time, Government workers outside of the Department of Defense grew by more than a quarter of a million. These days it is not very attractive to ask for more civilian employees, but when these select workers build naval ships and keep much of our combat equipment running and ready for action, I say we desperately need them.

THE NEED FOR RURAL ELECTRIC CO-OPS

(Mr. DYSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DYSON. Mr. Speaker, I applaud the President's initiative to curb Federal spending and the growth of the Federal Government. But I must ask that we, as a unified legislative body, consider what is at stake as we cut the budget.

President Roosevelt's concept of the Rural Electrification Administration was to bring electricity into the homes of every farmer in America at a time when kerosene lamps barely illuminated their homes. Although the times have certainly changed the need for rural electric co-ops has not changed.

Representing one of the most beautiful rural areas in the world—the Eastern Shore, southern Maryland and northeastern Maryland—I know what REA backed loans mean to the rural co-ops. The two co-ops that serve the First Congressional District of Maryland—Choptank and Southern Maryland Electric Co-ops—have bent over backward to provide the kind of service and reliability to its rural customers that they deserve. At present rural customers pay a higher rate than urban users. By reducing funding for REA, rural users will be forced to pay even higher rates.

Additionally, the co-ops that the REA serves have the best record of repayment of loans in the entire structure of the Federal Government. In fact, the Federal Finance Bank, which provides the loans for the REA, is able to pay for its own administrative costs and return money to the Treasury.

Mr. Speaker, the administration's cutback in funding for the REA is a blackout for rural America. As long as there are rural energy needs, there will be a need for Rural Electrification Administration.

WHAT MADE AMERICA GREAT?

(Mr. WILLIAMS of Montana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILLIAMS of Montana. Mr. Speaker, a couple days ago I informed this House of a dialog which took place last Thursday in the House Education and Labor Committee between myself and Secretary of Labor Donovan. We were discussing what made America great. The Secretary said that he thought it was new machinery and profit and reinvestment and I said, "Well, I thought that is what made a few Americans rich, but, really, what made America great was this country's ability to extend and to distribute that great richness across this country to the people of this country."

And Mr. Donovan responded, "No, that is what Russia is all about."

I told this House at that time that I would present the entire transcript for the RECORD. I am doing that today, and I hope that the significance of the Secretary of Labor's statement will not be lost upon this House.

The transcript is as follows:

Mr. WILLIAMS. Another instance was during a dialogue between Congressman Ford and you, Mr. Secretary. And the statement was made that new machines and increased capital formation made America great. And it was asked if anyone disagrees with that. Yes, I disagree with that. Increased capital formation, new machines, made a few Americans rich. It was when the public began to demand the distribution of wealth and the Federal Government stepped in to do it that this country became not only rich, but great, Mr. Secretary.

Secretary DONOVAN. Would you like me to comment on that? There has not been a statement made in this room today that I more wholeheartedly disagree with than that statement. The Americans demanded of who? Of whom for a redistribution of wealth?

Mr. WILLIAMS. This Congress, every member of this Congress.

Secretary DONOVAN. I doubt that very much.

Mr. WILLIAMS. This Congress did precisely what the American people asked for. We want to see wealth in this country distributed and this Congress did it.

Secretary DONOVAN. By the Congress, under the Constitution, you have that right.

Mr. WILLIAMS. In those days we had Presidents who also heard and agreed and they signed the bills.

Secretary DONOVAN. What you have done is you have taken the incentive away from industry and from the individual worker in this country to the point where he does not see the value in work. That is what redistribution of wealth has done to the country, and you have tinkered with the free enterprise system, and I am proud to use the term, because that is what made America great.

Mr. WILLIAMS. It made a few Americans rich.

Secretary DONOVAN. Who is against the rich? Are you?

Mr. WILLIAMS. Pardon me?

Secretary DONOVAN. You seem to be for wealth, but you don't like rich people.

Mr. WILLIAMS. No, that's your statement, Mr. Secretary, not mine. My statement is that we ought to have capital formation in this country. We ought to increase productivity in this country in a way that the wealth that emanates from that enormous American productivity is shared——

Secretary DONOVAN. By the stockholders.

Mr. WILLIAMS [continuing]. With some equality across all the people in this land. That is what America is all about.

Secretary DONOVAN. No, that's what Russia is all about.

Mr. WILLIAMS. My friends, you can see, in my judgment, the difference between this Administration's view of what America is all about and those of us of another political persuasion think America is all about. I suggest that this nation is at a dramatic crossroads, and nothing portrays it more clearly than the Secretary's just saying, no, no, that is what Communism and Russia is all about.

Secretary DONOVAN. We are at a crossroads, and the American people put us in the driver's seat at that crossroads and we are going down the correct path for once.

MOTOR VEHICLE HEALTH AND SAFETY STANDARDS

(Mr. WAXMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WAXMAN. Mr. Speaker, I am very concerned by press reports that the administration wants a massive relaxation of motor vehicle health and safety standards.

The proposed program includes postponement of implementation of the passive restraint standard. This will mean 9,000 Americans will be killed and several hundred thousand injured unnecessarily. The package includes deferral and weakening of emission standards for trucks. This will mean a postponement of the day when over 140 million Americans will be able to breathe healthful air. It will also force passenger vehicles and nonautomotive industries to bear the burden of our efforts to assure healthful air. The package also includes relaxation of controls on particulate emissions from diesel vehicles. This change will benefit only General Motors, the only American producer of full-sized diesels, and will unnecessarily expose urban residents to cancer-causing compounds. Finally, the administration wants to relax enforcement of all emission standards.

The claim is made that these changes will help put American autoworkers back to work. I support that goal. But I challenge the administration to show Congress how this sacrifice of public health and safety will meet that goal. I fear that these changes will merely reward mismanagement in Detroit, without addressing the underlying causes of the auto industry's troubles.

THE MAINTENANCE ASSISTANCE ACT OF 1981

(Mr. EDGAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. EDGAR. Mr. Speaker, today I am introducing a bill to address the maintenance needs and problems of our Nation's transit systems. Entitled, "The Maintenance Assistance Act of 1981," my proposal would establish a formula grant program for the maintenance of mass transportation equipment and facilities. This program would become effective in fiscal year 1983 and would totally replace the existing operating subsidy program contained in section 5 of the Urban Mass Transportation Act of 1964, as amended.

The cost of operating public transit systems has escalated from $2.5 billion in 1973 to an estimated $5.5 billion in 1979. In 1974, Congress expanded the Federal role of providing funding for capital projects to include an operating subsidy program. This program, section 5, was enacted to help hold down transit fares. As a result, Federal, State, and local governments now pay about 50 percent of transit's operating expenses, with the rest coming from the farebox. The Federal share alone is about 14 percent. In dollars, the Federal subsidy has grown from $300 million in 1975 to $1.1 billion.

The current administration opposes funding for operating subsidies because it feels the subsidies have encouraged overexpansion of transit service, discouraged the recovery of realistic fares, and promoted inefficient labor-management contracts. The administration also objects to the current formula which provides 30 percent to 50 percent of the operating funds for many small urbanized transit programs, but only about 10 percent of the operating funds for large metropolitan systems.

I agree that systems must retrench and stop providing service that is heavily subsidized by other taxpayers. Because of high capital expenses, public transportation is most cost effective in densely populated areas; most suburban areas can be served adequately by providing paratransit services to the city's transportation network.

The Federal Government can no longer affort to heavily subsidize commmuter fares, either. Transit systems are well aware of this change in Federal policy and have moved to raise fares nationwide 19 percent in the last 18 months. The Southeastern Pennsylvania Transportation Authority (SEPTA) increased its transit fares 30 percent last year and its commuter rail rates 55 percent in two phases. While SEPTA will continue to increase rates steadily, it must do so carefully to avoid a loss of ridership. The financial results so far in fiscal year 1981 indicate that the revenue generated by the commuter rail increases has been significantly less than anticipated because of a corresponding drop in ridership.

Finally, it is clear that the current formula for distributing Federal operating subsidy funds is inequitable. Last year, the Congress labored mightily to develop a service-based formula which would provide Federal dollars to systems based on actual service rather than population factors. The formula in my proposal is similar to the service-based formula adopted by the House in the closing days of the 96th Congress. In addition, this new proposal contains a cap on the amount of Federal dollars that any transit operator can receive, thereby equalizing

among systems Federal dollars as a percentage of operating expenses.

The Federal Government should not subsidize fares or relieve State and local governments from primary responsibility for funding transit operation expenses. I am convinced, however, that the Federal Government does have an interest in seeing that its capital investment in buses, rolling stock, and related facilities is maintained. Federal dollars are already wasted on capital projects because of poor maintenance programs. A 1977 study funded by UMTA found that only a dozen or so systems—out of 1,000—had formal maintenance training programs. The maintenance that is done is often inadequate. Another UMTA survey showed that 35 percent of all repairs performed on buses are done improperly.

The biggest casualty of tight transit budgets has been maintenance. Deferred maintenance can be hidden for years while saving money for escalating wages, expanded service, and rising fuel bills. Ultimately, however, service is brought to the brink of collapse. In November 1979, SEPTA's Broad Street subway rush-hour schedule required 108 cars but only 26 were operable. Despite more aggressive improvements, SEPTA still fields only about 60 cars on this line. The mean distance between failures is another indicator of vehicle productivity. In 1968, Philadelphia's buses traveled an average of 8,477 miles between mechanical breakdowns. In 1979, that figure had declined to 757 miles. The mean distance between failures on the trolley buses went from 1,740 miles to 643 miles in the same time period. Broad Street subway cars broke down after 6,462 miles on the average, instead of after 265,860 miles, 11 years earlier.

Along with inadequate budgets, SEPTA's deferral of maintenance was attributable to anticipated replacement vehicles. This tendency to overcapitalize—to buy new equipment instead of increasing the lifespan of existing equipment—will be promoted under the administration's plan to retain a capital program only.

Establishing a program of assistance for proven maintenance programs has obvious advantages to the Federal Government. UMTA did an analysis to show what it would take to replace by 1990 all buses over 15 years of age as of October 1980. It was determined that about 3,580 buses would have to be replaced each year. Assuming a more realistic bus lifespan, the American Public Transportation Association (APTA) surveyed the transit industry to determine the number of new buses needed to replace vehicles over 13 years of age. APTA's result showed a need for an average annual purchase of 4,720 buses. Thus, if we could extend the useful life of buses by 2 years through improved maintenance, the number of new buses needed every year nationwide would drop by 1,140.

A program for transit maintenance has a precedence in the Federal aid highway program. Under current law, there is a separate program for rehabilitating, restoring, and resurfacing the Nation's interstate highways. In recognition of the overwhelming maintenance needs of the Interstate System, the current adminstration has proposed expanding this 3R program into a 4R program—to include reconstruction. At same time program dollars are slated to increase from $275 million in fiscal year 1982 to $800 million in fiscal year 1983, $1.3 billion in fiscal year 1984, and $2 billion in fiscal year 1985. In addition, the administration proposes to increase the Federal share from 75 to 90 percent of project cost. It does not make sense for the Federal Government to recognize a role in maintaining our Interstate System but not our mass transit networks.

Let me provide some specific details about my proposal. Subsection (a) authorizes the Secretary to make grants to assist local public bodies in financing maintenance expenses of mass transportation systems. The authorization levels in billions are: $1.105 for fiscal year 1983; $1.215 for fiscal year 1984; $1.336 for fiscal year 1985; and $1.469 for fiscal year 1986. Urbanized areas with population under 200,000 receive 10 percent of these funds for apportionment to the Governor of each State on the basis of population and population weight by density. The remainder of the funds are available for apportionment to urbanized areas with a population of 200,000 or more on the basis of bus and rail revenue vehicle-miles and fixed guideway route miles. Revenue vehicle-miles are to be adjusted to reflect the age of a transit system's fleet.

The Federal grant for maintenance expenses for any urban system cannot exceed 15 percent of the operating costs of that system for the same fiscal year. In addition, the Secretary is instructed to develop a system of measuring improvements in transit systems resulting from maintenance programs. The Secretary will submit recommendations to Congress on a method of apportioning funds which will reward those transit systems which show improved performance.

Subsection (b) authorizes the Secretary to make grants for the purchase of buses and related equipment and the construction of bus-related facilities. This is essentially the same program as the current "Tier IV" provision in section 5. The amounts apportioned to urbanized areas will be based on bus vehicle revenue-miles, however, instead of the current population density formula. The purpose of this change is to more closely link Federal assistance with actual service. Authorization levels for this section are those proposed by the administration: $400 million for fiscal year 1983; $450 million for fiscal year 1984; $500 million for fiscal year 1985; and $550 million for fiscal year 1986.

Subsection (c) provides that in the case of urbanized areas with population under 200,000, the Governor of each State shall be the recipient of Federal grants. The Governor is then encouraged to distribute the funds among small urban areas in his or her State in an equitable fashion, preferably using service-based factors. In the case of urbanized areas with population of 200,000 or more, the transportation authority or regional agency can receive the Federal grants directly.

Subsection (d) states that appropriations pursuant to the bill will be available for obligation for 3 years. Funds not obligated in that time will be reapportioned among the transit systems.

Subsection (e) provides that the Federal share for any maintenance program cannot exceed 75 percent of the cost of the program. The Federal share for the bus capital program will remain at 80 percent.

Subsection (f) requires that applicants for Federal grants have a program of maintenance which is approved by the Secretary.

There is a separate section of the bill for reauthorizing the existing section 18 program for nonurban transit programs. Authorizations start at the administration's level of $85 million for fiscal year 1983, but then increase 10 percent every year instead of remaining at the same level. Currently, section 18 money can be used for capital purposes or for operating assistance. The administration proposal prohibits the use of Federal funds for operating assistance after fiscal year 1985. My bill would allow the Federal grants to be used for capital purposes or maintenance expenses in conformance with the treatment of all other transit systems.

In conclusion, I believe the Maintenance Assistance Act of 1981 will greatly benefit the Nation. In the first place, it will introduce some control over the Federal section 5 program by targeting funds to maintenance only. Riders and State and local governments will have to cover the remainder of operating expenses. They will, therefore, be encouraged to improve efficiency of service, hold down labor costs, and raise fares over time.

Second, the proposal will lead to stronger maintenance programs throughout the Nation. The provision for establishing a financial bonus program for improved equipment performance will reward systems—and indirectly transit employees and users—that build quality programs. In addi-

tion, transit systems will no longer defer or ignore maintenance needs because Federal dollars are available solely for maintenance purposes rather than any operating expenses.

Finally, this legislation is a compromise between current law and the administration's proposal to entirely phase out the operating subsidy program. It addresses the criticisms of existing law by relating Federal assistance to actual service, equalizing the distribution of funds, and establishing greater control over the program. While it establishes a program to help transit systems maintain capital purchased with Federal dollars, it does not relieve users and State and local governments from primary responsibility for operating public transportation. The legislation is intended to introduce a new concept into the debate over the future of public transportation and is amenable to improvements and changes.

H.R. 3143

A bill to amend the Urban Mass Transportation Act of 1964 to authorize appropriations to assist local public bodies in maintaining mass transportation systems, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Mass Transportation Maintenance Assistance Act of 1981".

SEC. 2. (a) The Congress finds—

(1) that the operation and maintenance of mass transportation service has become so financially burdensome as to threaten the continuation of this essential public service;

(2) that the termination or curtailment of such service is undesirable from an energy and social perspective;

(3) that the responsibility for financing operating expenses rests primarily with State and local governments and transportation users; and

(4) that responsibility for maintaining the Federal investment in mass transportation equipment rests, in part, with the Federal Government.

(b) The purposes of this Act are—

(1) to assist in the development of improved maintenance of mass transportation equipment; and

(2) to provide assistance to State and local governments and their instrumentalities in financing such maintenance.

SEC. 3. Section 5 of the Urban Mass Transportation Act of 1964 is amended to read as follows:

"MAINTENANCE PROGRAM

"SEC. 5. (a)(1) The Secretary is authorized to make grants under this section to assist local public bodies in financing maintenance expenses of mass transportation systems. There is authorized to be appropriated for such grants $1,105,000,000 for the fiscal year ending September 30, 1983; $1,215,000,000 for the fiscal year ending September 30, 1984; $1,336,000,000 for the fiscal year ending September 30, 1985; and $1,469,000,000 for the fiscal year ending September 30, 1986.

"(2) Of the amount appropriated under paragraph (1) of this subsection for a fiscal year, 10 percent shall be apportioned to States in accordance with paragraph (3) of this subsection and shall be available for expenditure only in those urbanized areas with populations of less that 200,000 which have approved maintenance programs under subsection (g) of this section. The remainder of any amount so appropriated shall be apportioned in accordance with paragraph (4) of this subsection to those urbanized areas with populations of 200,000 or more which have approved maintenance programs under subsection (g) of this section and shall be available for expenditure in such areas.

"(3) The amount apportioned to a State shall be an amount equal to the sum of—

(A) 50 percent of the amount available for apportionment to States under paragraph (2) multiplied by the ratio which the population of all urbanized areas with populations of less than 200,000 in the State which have approved maintenance programs under subsection (g) bears to the population of all urbanized areas with populations of less than 200,000 which have approved maintenance programs under subsection (g), as shown by the latest available Federal census, and

"(B) 50 percent of the amount available for apportionment to States under paragraph (2) multiplied by a ratio for such urbanized areas with populations of less than 200,000 determined on the basis of population weighted by a factor of density, as determined by the Secretary.

"(4) The amount apportioned to an urbanized area with a population of 200,000 or more which has an approved maintenance program under subsection (g) of this section shall be an amount equal to the sum of—

"(A) 80 percent of the amount available for apportionment to urbanized areas with populations of 200,000 or more under paragraph (2) multiplied by the ratio (as adjusted under this paragraph) which the number of revenue rail and bus vehicle miles directly serving such urbanized area bears to the total number of revenue rail and bus vehicle miles directly serving all urbanized areas with populations of 200,000 or more which have approved maintenance programs under subsection (g), and

"(B) 20 percent of the amount available for apportionment to urbanized areas with populations of 200,000 or more under paragraph (2) multiplied by the ratio which the number of fixed guideway system route miles in such urbanized area bears to the number of fixed guideway system route miles in all urbanized areas with populations of 200,000 or more which have approved maintenance programs under subsection (g).

The ratio determined for an urbanized area under subparagraph (A) of this paragraph shall be adjusted, in accordance with regulations prescribed by the Secretary, by a factor reflecting the age of the buses and rolling stock serving such urbanized area compared with the average age of buses and rolling stock serving all urbanized areas with populations of 200,000 or more which have approved maintenance programs under subsection (g).

"(5) The amount of a grant for a fiscal year to an urbanized area under this subsection for maintenance expenses for a mass transportation system shall not exceed 15 percent of the operating costs of such system for such fiscal year.

"(6) The Secretary shall develop a system of measuring improved efficiency of mass transportation systems resulting from approved maintenance programs. The Secretary shall make recommendations to the Congress with respect to methods of apportioning funds which reward improved efficiency of mass transportation systems.

"(b)(1) The Secretary is authorized to make grants under this section for the purchase of buses and related equipment and the construction of bus related facilities. There is authorized to be appropriated for such grants $400,000,000 for the fiscal year ending September 30, 1983; $450,000,000 for the fiscal year ending September 30, 1984; $500,000,000 for the fiscal year ending September 30, 1985; and $550,000,000 for the fiscal year ending September 30, 1986.

"(2) Of the amount appropriated under paragraph (1) of this subsection for a fiscal year, the Secretary shall apportion to each urbanized area with a population of 200,000 or more for expenditure in such area an amount equal to the amount so appropriated multiplied by the ratio which the number of bus revenue vehicle miles directly serving such urbanized area bears to the total number of bus revenue vehicle miles directly serving all urbanized areas. Of the amount so appropriated, the Secretary shall apportion to each State for expenditure in urbanized areas with populations of less than 200,000 in such State an amount equal to the amount so appropriated multiplied by the ratio which the number of bus revenue vehicle miles directly serving all such urbanized areas in such State bears to the total number of bus revenue vehicle miles directly serving all urbanized areas.

"(c)(1) The Governor, responsible local officials, and publicly owned operators of mass transportation services, in accordance with the planning process required under section 8 of this Act, with the concurrence of the Secretary, shall designate a recipient or recipients to receive and dispense the funds apportioned under subsection (a) or (b) that are attributable to urbanized areas with populations of 200,000 or more. In any case in which a statewide or regional agency or instrumentality is responsible under State laws for the financing, construction, and operation, directly, by lease, contract or otherwise, of public transportation services, such agency or instrumentality shall be the recipient to receive and dispense such funds. The term 'designated recipient' as used in this section shall refer to the recipient selected according to the procedures required by this paragraph.

"(2) Sums apportioned under subsection (a) or (b) to a State for expenditure in urbanized areas with populations of less than 200,000 in such State shall be made available to the Governor of such State for expenditure in such urbanized areas in accordance with the planning process required under section 8 of this Act and shall be fairly and equitably distributed. The Governor of each State is encouraged to take into account service based factors, such as revenue vehicle miles, in distributing such funds. The Governor shall submit annually a report to the Secretary concerning the allocation of such funds.

"(3) In the case of any urbanized area which is in more than one State, amounts apportioned for such area under subsection (a) or (b) of this section shall be apportioned to the Governor of each such State in the case of an urbanized area with a population of less than 200,000, or to the designated recipient in the portion of the urbanized area in each such State in the case of an urbanized area with a population of 200,000 or more.

"(d)(1) Appropriations pursuant to this section shall be available until expended.

"(2) Sums apportioned under subsection (a) or (b) of this section shall be available for obligation by the Governor or designated recipient for a period of three years following the close of the fiscal year for which such sums are apportioned. Any amounts so apportioned remaining unobligated at the end of such period shall be added to the amount available for apportionment under subsection (a) or (b), respectively, of this section for the succeeding fiscal year.

"(e) The Federal share for any project for the payment of maintenance expenses under subsection (a) of this section shall not exceed 75 percent of the costs of such project. The Federal share for any project for the purchase of buses and related equipment or the construction of bus-related facilities under subsection (b) of this section shall not exceed 80 percent of the net cost of such project.

"(f) The Secretary shall not approve a grant for a project under this section unless he finds that such project is part of the approved program of projects required by section 8 of this Act and that the applicant or responsible agency has or will have—

"(1) the legal, financial, and technical capacity to carry out the proposed project;

"(2) satisfactory continuing control, through operation or lease or otherwise, over the use of project facilities and equipment; and

"(3) in the case of grants under subsection (a) of the section, an approved program of maintenance under subsection (g) of this section.

"(g)(1) The designated recipient (in the case of an urbanized area with a population of 200,000 or more) or the Governor (in the case of an urbanized area with a population of less than 200,000) shall submit to the Secretary for his approval a program for maintenance of mass transportation facilities and equipment in such urbanized area.

"(2) As soon as practicable after approval of a maintenance program the Secretary shall enter into a formal agreement with the Governor or the designated recipient of the urbanized area for the payment of the Federal share of maintenance costs under such program.

"(3) The Secretary is authorized, notwithstanding the provisions of section 3648 of the Revised Statutes (31 U.S.C. 529), to make advance or progress payments on account of any grant made pursuant to this section, on such terms and conditions as he may prescribe.

"(h) The Secretary shall issue such regulations as he deems necessary to administer this section.".

SEC. 4. (a) The first sentence of section 4(e) of the Urban Mass Transportation Act of 1964 is amended by striking out the period at the end thereof and inserting in lieu thereof the following: "; $75,000,000 for the fiscal year ending September 30, 1983; $82,500,000 for the fiscal year ending September 30, 1984; $90,750,000 for the fiscal year ending September 30, 1985; and $99,825,000 for the fiscal year ending September 30, 1986.".

(b) The second sentence of subsection (c) of section 18 of the Urban Mass Transportation Act of 1964 is amended by striking out "including" and all that follows through the period at the end of such sentence and inserting in lieu thereof the following: "including projects for the payment of maintenance costs to private providers of public transportation service in areas other than urbanized areas.".

(c) The second sentence of subsection (e) of section 18 of the Urban Mass Transportation Act of 1964 is amended to read as follows: "The Federal share under this section for any project for the payment of maintenance costs shall not exceed 75 percent of the cost of such maintenance project.".

SEC. 5. (a) Section 3(a)(1)(B) of the Urban Mass Transportation Act of 1964 is amended by striking out "5(a)(4)" and inserting in lieu thereof "5(b)".

(b) Section 3(h) of the Urban Mass Transportation Act of 1964 is amended by striking out "5(a)(4)" and inserting in lieu thereof "5(b)".

SEC. 6. This Act and the amendments made by this Act shall apply only with respect to amounts apportioned for fiscal years beginning on or after October 1, 1982, under section 5 or section 18 of the Urban Mass Transportation Act of 1964.

TERRORIST ACTIVITY IN EL SALVADOR

(Mr. LEWIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEWIS. Mr. Speaker, I have just taken off of the UPI wire outside an item regarding El Salvador, and I wish to share a bit of that with you.

Security forces shot to death 24 civilians in a dead-end street of a San Salvador slum in what relatives said was a mass execution but the Defense Ministry called an "armed confrontation"* * *

Journalists who saw the bodies said that many were shot execution style and that some had their hands tied behind their backs.

Mr. Speaker, a short time ago the Subcommittee on Foreign Operations had a very serious debate and a very close vote on a matter of reprograming military assistance for El Salvador. Many of us supported that position, largely because our country had just committed itself to $125 million of economic aid designed to provide assistance and progress in El Salvador.

These continued reports would indicate that we still have very serious problems of terrorism from both the left and the right in that country. I for one am calling upon the administration to review these actions and to give the Congress an analysis of exactly what took place in El Salvador in this instance.

Those of us who have supported the administration's request for reprograming of military aid for the Duarte government are intensely interested in the survival of the moderate center in El Salvador and concerned about achieving a political solution to the crisis present in the land of our neighbor to the South.

As I voted for reprograming it was in large part a result of evidence of shipments of arms from the Soviets and Castro to leftist terrorists.

As I expressed support for $125,000,000 in economic assistance, I did so with great concern for the need for assurance that our help would be on the side of freedom and eventually would be a benefit to the people of El Salvador. As I review such votes in the future, I will look for evidence that such assistance does not end up in the hand of terrorists on the right and become of benefit to those who seek a military dictatorship and the distruction of the dream for democracy in El Salvador.

CANADIAN SAVINGS BONUS WORKS

(Mr. MOORE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOORE. Mr. Speaker, as we consider tax cuts for individuals and seek to encourage personal savings in a second tax bill, I think we ought to consider the Canadian experience of the last decade during which their savings rates have doubled while ours have almost been cut in half. Savings as a percent of disposable income now stands at 11 percent in Canada while it is less than half that level in the United States.

Why are Canadians saving while we do not?

Canada has registered retirement savings plans similar to our individual retirement accounts. There are two distinct and important differences, however. One difference is that Canadians can contribute nearly four times as much as we can to an IRA and have these contributions tax deferred until withdrawn at retirement. The maximum annual IRA contribution our Tax Code now allows is $1,500. This figure is $5,500 in Canada if individuals have no other form of retirement plan and it is $3,500 if employees also participate in an employer-sponsored retirement plan at work. The other difference is that any citizen in Canada can have such a plan while we limit that right to only those not covered by a pension plan.

The results of the Canadian experience in savings is most encouraging. In 1977 almost three-quarters of those participating in registered retirement savings plans had incomes of $25,000 or less. The number of these RRSP's doubled between 1973 and 1977.

During the period between 1967 and 1977 individual saving in Canada grew from 6.2 to 7.8 percent of disposable income while individual saving in the United States declined from 7.5 to 5.1 percent. This period corresponds with the period of substantial growth in savings in RRSP's.

Therefore, we ought to profit by the Canadian experience and change our tax laws accordingly. H.R. 1250 accomplishes this end and I invite my colleagues' cosponsorship.

RESPONSIBLE GOVERNMENT MANAGEMENT OF TAXPAYERS' MONEY

(Mr. HARTNETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HARTNETT. Mr. Speaker, one of the primary concerns expressed by the American taxpayers is excessive and wasteful spending by the Federal Government. One policy that is both costly and confusing is Public Law 93-462 which is found in section 59a of title II of the United States Code. This law allows a Member of Congress who is leaving office to purchase office furniture and furnishings from one of his or her district offices.

Also the departing Member of Congress can wait until the last day in which he/she holds office to decide whether or not to purchase all, some, or none of the furnishings. This practice is not only expensive but also creates extreme confusion for the incoming Member.

I was notified approximately 2 weeks before I took office that my predecessor planned to purchase all but seven items of the furniture from his district office. GSA placed the value of the office items at $4,120.80. It cost my office over $9,400 to purchase replacement furnishings from GSA. The difference in these two amounts could have been saved by the Government.

It is my belief that most Members of Congress are willing to supply their district offices with existing Government furniture as long as it is in good condition—which is the procedure by which our Washington offices are furnished. GSA should keep all Government furniture on hand and replace it as the furniture wears out.

Today I am introducing legislation that would allow an outgoing Member of Congress to purchase only a desk and chair from his office. The outgoing Member would have to notify the incoming Member of this decision within 30 days after he/she is elected to office.

I believe this policy represents responsible Government management of the taxpayers' money.

INTRODUCING LEGISLATION TO MODIFY BELLE FOURCHE IRRIGATION PROJECT IN WESTERN SOUTH DAKOTA

(Mr. ROBERTS of South Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROBERTS of South Dakota. Mr. Speaker, today, I am introducing legislation to modify the existing Belle Fourche irrigation project in western South Dakota. The project is in need of modernization and updating of the existing water delivery system. Approximately one-third of the diverted water is lost due to the current outmoded delivery system. This is a loss that an arid State like South Dakota cannot tolerate. The needed modifications include construction, improvement, and updating of works, water conservation, fish and wildlife conservation, recreation, and general modernization of the existing system. As modified, the general plan will be reauthorized under the designation "Belle Fourche unit" of the Pick-Sloan Missouri Basin program.

I urge favorable consideration of the bill and its speedy approval.

□ 1530

PREFERENTIAL WORK AND EDUCATION QUOTAS

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, 17 years ago Congress passed the Civil Rights Act of 1964 and it became illegal to discriminate in employment on the grounds of race, color, religion, sex and national origin. The concept of equality of opportunity was made a matter of legal right for all Americans and has now become a readily accepted element of American tradition. What has now come to be an accepted part of American life is the practice of some Federal agencies to use the Civil Rights Act to promote discrimination and race consciousness in the workplace or school. The terms "equal opportunity" and "affirmative action" have become euphemisms for racial quotas. Somehow, flagrant race counting and numerical requirements have become the practice of, of all things, the Government itself.

Once again, Mr. Speaker, we are reminded that our Government's policies do not reflect the views of the American people, including those who, in the minds of many of our civil servants and political spokesmen, should be benefiting from those policies. The Washington Post series on national racial attitudes, reports that the recent ABC-Washington Post poll reveals strong disapproval by both whites and minorities of preferential treatment on the basis of race. This administration has recognized the need to review Government policies that result in preferential work and education quotas. The American people would seem to be solidly behind those efforts.

THE PEOPLE WANT THE PRESIDENT'S ECONOMIC RECOVERY PLAN

(Mr. BETHUNE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BETHUNE. Mr. Speaker, already today several of our friends from the Democratic side have been here in the well to try to convey the impression that the Republicans are somehow not open to ideas and improvements to our budget proposal. That is just not so. I have been sitting on the Budget Committee now for a couple of months and we are open to any ideas. But the budget proposal that the Democrats have proposed is not a proposal to amend what we are trying to do. It is a proposal that intends to destroy the President's economic recovery program.

These are not minor changes that are being offered. These are changes that go to the very heart of what the President hopes to accomplish. The President is proposing a long-term economic recovery program for this country, a 3-year plan to cut taxes, cut spending, stabilize the monetary policy, and get the regulatory burden off the backs of the people, a fundamentally different course of action.

The Democrats, on the other hand, are offering up a short-term plan, a 1-year plan. Under it, the taxes will go up next year, spending will go up. There will be more Government involvement, not less. That is not what the people want. What we have had in the past does not work. The people want a new plan, a plan they can have faith in. The people want the President's economic recovery program, not this stopgap, 1-year device and then back to politics as usual in the election year of 1982.

THE REPUBLICANS DO NOT HAVE A BUNKER MENTALITY

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, as we sit here and listen to the speeches made during the 1-minute period of time, there are obviously some differences of opinion. But I would like to draw some attention to some of the statements that have been made that seem to me a little off base.

We are not here afraid to debate the debatable. We are not here afraid to question the questionable. But we have to realize that some of us in this House are less equal than others; that it is difficult to get some of our proposals even to be considered on the floor of this House because of decisions that were made by the leadership already in this session. When you take the Ways and Means Committee and you decide the Republicans will be given 37 percent of the positions on that committee when we have 47 percent of the Members of the House, you have drastically reduced our op-

portunity to present the President's plan on tax cuts.

Then to come here and suggest that we have a bunker mentality, is entirely incorrect. We do not have a bunker mentality but we realize the rules that are being drawn that make it more difficult for us to play in this game. If that is going to occur, we are going to have to respond as best we can.

I also suggest that it is rather ironic for some leaders on the other side of the aisle to suggest we have a bunker mentality—that is a military term—very ironic when they present us their plan, since one of the major features of their plan is to cut the President's proposal by $4.3 billion in national defense.

THE PARTY OF THE PEOPLE?

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLOMON. Mr. Speaker, for the past 2 months this Congress—with the full participation of the American people—has been discussing and debating the President's economic program.

We have examined its merits here on the floor and in our committees. We have conversed freely with our constituents through correspondence, phone calls, meetings, and interviews with the press.

I think this has been a very healthy debate, Mr. Speaker. This is the way policy should be made in a great democracy like ours. But unfortunately, the Democratic leadership does not agree. On Monday, the leadership announced that it had come up with its own budgetary plan for this Nation. And on Tuesday, the Democrats on the Budget Committee, with one lone exception, summarily dismissed the President's plan which has been discussed and examined by this Nation for 2 months and voted for its own plan which had been kept secret from the American people until just 24 hours before that committee vote.

No debate, no discussion, no input by the American people. And this comes from the party that likes to call itself the party of the people.

Mr. Speaker, I urge all my colleagues on both sides of the aisle to close ranks behind the President and his plan, as the American people want us to and to reject the Democrat leadership's plan which was slapped together in the cloakroom 2 days ago.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. RATCHFORD). The Chair desires to announce that pursuant to clause 4 of rule I, the Speaker signed the following enrolled joint resolution earlier today:

S.J. Res. 61. Joint Resolution to authorize and request the President to issue a proclamation designating April 9, 1981, as "African Refugee Relief Day."

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed a concurrent resolution of the following title, in which the concurrence of the House is requested:

S. Con. Res. 17. Concurrent resolution providing for an adjournment of the Congress from April 10, 1981, to April 27, 1981.

APPOINTMENT OF CONFEREES ON H.R. 31, CASH DISCOUNT ACT

Mr. ANNUNZIO. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce be discharged from further consideration of the Senate amendment to the bill (H.R. 31) to amend the Truth in Lending Act to encourage cash discounts, and for other purposes, and that the House disagree to the Senate amendment to H.R. 31 and request a conference with the Senate thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. WALKER. Reserving the right to object, Mr. Speaker, would the gentleman explain to the House what it is that he is attempting to do here in some detail so we would have a better idea as to what the procedure is?

Mr. ANNUNZIO. Mr. Speaker, if the gentleman will yield, the Senate cash discount bill, like the House version, will deregulate cash discounts and reactivate the ban on surcharging credit cards until February 27, 1984. The current ban expired Friday, February 27.

There are six differences between the House and Senate bill:

First. The Senate bill has removed the authority in the cash discount provision for the Federal Reserve Board to issue new regulations after the current ones are repealed.

Second. The Senate bill removes a cash discount requirement in the House bill that would have required disclosure of the availability of a cash discount clearly and conspicuously "to all prospective buyers." Under the Senate bill the cash discount's availability only needs to be disclosed clearly and conspicuously.

Third. The Senate bill calls for the Federal Reserve Board to submit a study to Congess in 2 years on the effect of charge card transactions on card issuers, merchants, and consumers.

Fourth. The Senate bill makes a technical amendment to the Truth in Lending Simplification and Reform Act so that if a creditor wants to comply with it before its April 1, 1982, effective date the creditor will be subject to the simplified civil liability provisions rather than the civil liability provisions of the existing Truth in Lending Act.

Fifth. The Senate bill amends the National Banking Act to provide a 2-year moratorium under certain circumstances on the current requirement that national banks divest themselves of certain real estate within 5 years. The need for the moratorium is that the Comptroller of the Currency now wants to require divestiture, but in the past had not uniformly required it. Immediate divestiture of such real estate now might cause some banks financial hardship.

Sixth. Finally, the Senate bill amends the Public Health Service Act to permit the President to appoint an individual who is 64 years old or older to the office of Surgeon General.

Mr. WALKER. I appreciate that, Mr. Speaker, and I thank the gentleman for explaining it.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Illinois? The Chair hears none, and appoints the following conferees:

Soley for consideration of all the provisions of the Senate amendment in the nature of a substitute except section 303, and modifications thereof committed to conference, the following Members on the part of the House: Messrs. ST GERMAIN, ANNUNZIO, GONZALEZ, MINISH, STANTON of Ohio, EVANS of Delaware, and WYLIE; and

Solely for the consideration of section 303 of the Senate amendment in the nature of a substitute, and modifications thereof committed to conference, the following Members on the part of the House: Messrs. DINGELL, WAXMAN, SCHEUER, BROYHILL, and MADIGAN.

PERMISSION FOR COMMITTEE ON INTERIOR AND INSULAR AFFAIRS TO HAVE UNTIL 5 P.M. FRIDAY, APRIL 10, 1981, TO FILE REPORT ON H.R. 2330, NUCLEAR REGULATORY COMMISSION

Mr. ANNUNZIO. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs may have until 5 p.m., Friday, April 10, 1981, to file a report on the bill (H.R. 2330) to authorize appropriations for the Nuclear Regulatory Commission.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

ADJOURNMENT OF THE CONGRESS COMMENCING FRIDAY, APRIL 10, 1981

The SPEAKER laid before the House the Senate privileged concurrent resolution (S. Con. Res. 17) providing for an adjournment of the two Houses from Friday, April 10, 1981, to 12 o'clock noon on Monday, April 27, 1981.

The Clerk read the title of the Senate privileged concurrent resolution.

The Clerk read the Senate privileged concurrent resolution, as follows:

S. CON. RES. 17

Resolved by the Senate (the House of Representatives concurring), That when the two Houses adjourn on Friday, April 10, 1981, they stand adjourned until 12 o'clock noon on Monday, April 27, 1981.

The SPEAKER. The question is on the Senate concurrent resolution.

The question was taken; and the Speaker announced the ayes appeared to have it.

Mr. SOLOMON. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 241, nays 73, not voting 118, as follows:

SYRIA'S ROLE IN LEBANON WARRANTS SEVEREST CONDEMNATION

(Mr. DERWINSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DERWINSKI. Mr. Speaker, the deteriorating situation in Lebanon could provoke an all-out war in the Middle East.

Syria is continuing its efforts to realize its historical objective to absorb all or part of Lebanon into a "Greater Syria." Given Syria's close ties with the Soviet Union, we should assume that the Soviet military would move swiftly to exploit Lebanon's strategic port facilities on the Mediterranian coast. If such a development occurs, it will create a problem on that flank for Israel and will have obvious reprecussions.

Throughout the 6-year war in Lebanon, the Palestine Liberation Organization, with the primary backing of Libya and Syria, has been conducting terrorist/guerrilla operations against the citizenry of Lebanon and neighboring Israel. All of these activities have been launched from heavily fortified enclaves that are maintained in disregard of central government authorities.

Syria's role in Lebanon warrants the severest condemnation. Whatever can be said about its original peacekeeping intentions as the predominant element of the Arab deterrent force (ADF), it is clear that over the past several years, Syrian forces have been shielding PLO terrorist activities directed against Israel and the Christian community within Lebanon. The PLO is a Soviet-influenced radical force which is not truly representative of Arab as-

pirations. The PLO also represents a threat to moderate Arab governments.

The removal of external forces would enhance the prospects of Lebanon to once again become a viable, pro-Western democracy. Such a turn of events would serve our national interests.

Therefore, I believe there must be an immediate cease-fire and the termination of the Syrian seige of Zahle; reaffirmation of the historic United States-Lebanon relationship and our insistence on the freedom, sovereignty and integrity of Lebanon. This includes the preservation of a free, secure and deeply rooted Christian community, as well as the historic Moslem, Druze, Armenian, and Jewish communities; restoration of Lebanon's sovereignty free from outside domination and Syrian occupation. There also must be opposition to an outside imposed solution to the Lebanese problem, and support for free and open national elections which are scheduled for mid-1982. To this end, the U.S. Government should work to restore the authority of a government in Lebanon that reflects the will of the people and to strengthen the Lebanese army so that it can control illegal military and terrorist activities.

This crisis must have priority U.S. attention. For too long the tragedy of Lebanon has been allowed to go on until its very independence is threatened.

PERSONAL EXPLANATION

Mrs. SMITH of Nebraska. Mr. Speaker, yesterday I was unavoidably detained at the White House at a meeting with Vice President GEORGE BUSH during rollcall 22. Had I been present, I would have voted in the affirmative.

INTRODUCTION OF PAY REFORM LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. DERWINSKI) is recognized for 5 minutes.

● Mr. DERWINSKI. Mr. Speaker, I am today introducing legislation proposed by President Reagan to reform the system of adjusting Federal civilian pay, and I urge its prompt consideration by the responsible committee leadership and the Congress.

The importance of this legislation is evident. It is estimated that the enactment of this proposal would reduce payroll costs in fiscal year 1982 about $3.7 billion below the costs that would be incurred under operation of present law. Savings in future years would be even greater. I believe that all of us who have had any experience with the Federal pay structure agree that the existing method of adjusting Federal pay is out of sync with reality, and has long been in need of an overhaul.

This legislation also is the next logical step in the comprehensive civil service reform, after having enacted the first phase of that plan in 1978. I believe that the proposals recommended by the President will stabilize the pay procedure to the long-range benefit of both employees and the Federal taxpayer.

I include with my remarks the letter of transmission of the legislation and a sectional analysis explaining its provisions:

OFFICE OF PERSONNEL MANAGEMENT,
Washington, D.C., March 24, 1981.

Hon. THOMAS P. O'NEILL,
Speaker of the House of Representatives.

DEAR MR. SPEAKER: The Office of Personnel Management submits herewith the enclosed legislative proposal, "To amend title 5, United States Code, to strengthen the principle of comparability as the basis for setting Federal pay and benefits, and for other purposes." We respectfully request that this proposal be referred to the appropriate committee for early consideration.

This proposal is submitted as a part of the President's program to eliminate unnecessary expenditures from the Federal budget. The proposal would rectify a number of long-standing flaws in the system by which compensation is determined for Federal employees, in order to ensure that Federal employment will be truly comparable with employment outside the Government. The provisions of the proposal are as follows:

PAY COMPARABILITY REVISIONS

The first part of the legislative proposal deals with the pay fixing process for the General Schedule and the other statutory pay systems. There would be three major changes in this process:

(1) the pay comparability standard would be revised to require the inclusion of employee benefits in the comparison process, and, in view of the differences between the Federal Government and non-federal employers with regard to relevant conditions of employment (including such factors as job security, promotion potential, portability of benefits, etc.), to require Federal pay and benefits to be comparable with 94 percent of non-Federal pay and benefits;

(2) the comparison base would be broadened to include State and local government as well as the private sector; and

(3) General Schedule pay (but not the pay for the other statutory pay systems) would vary by locality, in keeping with the relationship between non-Federal pay in each locality and national average non-Federal pay.

The process would continue to involve the President, the Pay Agent, the Federal Employees Pay Council, and the Advisory Committee on Federal Pay, playing the same roles they now play, both with their scope expanded to deal with the new issues of locality pay and the inclusion of employee benefits in the comparison. The Pay Council would have its membership broadened to include employee organizations such as professional organizations, as well as unions. General Schedule employees would be paid locality rates unless they are in a location where the President decides to apply the national average General Schedule instead. (This might be done for employees assigned to foreign areas, for example.)

The existing special rate authority for the General Schedule would be broadened and made more flexible. Special rates could be established whenever necessary to recruit or retain well-qualified employees in an area, an occupation, or any subdivision thereof. A special rate could not exceed the maximum rate of the regular rate range by more than twice the amount of the regular rate range.

With the few flexibilities provided by locality pay and the broader special rate authority, the authority for cost-of-living allowances in Alaska, Hawaii, Puerto Rico, and U.S. territories and possessions will no longer be necessary and would be repealed.

FEDERAL WAGE SYSTEM REVISIONS

The second portion of the legislative proposal deals with the Federal Wage System.

First, the pay fixing process for Federal wage employees would be revised to parallel the changes made by the first part of the proposal for General Schedule employees. The comparison standard would be broadened to include employee benefits, and to require Federal pay and benefits to be comparable to 94 percent of non-Federal pay and benefits, and the comparison base would be broadened to include State and local government. (The change in the comparison standard would not apply to nonappropriated fund employees.) Further, whenever the President decides that national emergency or economic conditions affecting the general welfare make it necessary to invoke an alternative plan for General Schedule employees, the Office of Personnel Management would be required to impose a comparable limitation on Federal Wage System employees. Such a limitation would apply to appropriated fund and nonappropriated fund employees, to crews of vessels, and to certain groups of Federal wage employees who have traditionally negotiated their wage schedules.

Second, the legislative proposal would repeal certain existing provisions of law which now require that Federal wage employees be paid more than their counterparts outside the Federal Government. These aberrant provisions of current law are a provision requiring the use of out-of-area wage rates in certain situations (the "Monroney Amendment"); provisions establishing rate ranges and fixing the relationship between those rate ranges and the prevailing wage; and provisions fixing in law shift differentials and making those differentials part of basic pay. Under the proposal, rate ranges and shift differentials would be fixed in accordance with prevailing non-Federal practices.

PRESIDENTIAL BENEFITS AUTHORITIES

The third part of the legislative proposal would give the President a new authority to adjust certain Federal employee benefit programs. These adjustments would be made in concert with the process by which employee benefits are taken into consideration in the setting of Federal pay.

First, the President would be authorized to modify the leave program for Federal employees, including sick and annual leave and certain other forms of leave. He could exercise this authority in order to make the Federal leave program more consistent with non-Federal leave programs, to broaden flexibility and employee freedom of choice in the program, or to improve the administration of the program.

Second, the President would be authorized to modify the Government contributions to the cost of Federal Employees Group Life Insurance, although the present Government contribution of one-third of the cost of basic insurance would be fixed as

the minimum possible Government contribution.

Third, the President would be authorized to change the Government contributions to premiums under the Federal Employees Health Benefits program. Here again, the present Government contribution would be fixed as the minimum possible.

SAVINGS PROVISIONS

The proposal includes savings provisions for employees who might otherwise be adversely affected.

First, employees would be guaranteed that pay schedules would go up at least two percent a year for the first five years, despite the changes in the comparison standard and the comparison base, the repeal of the Monroney Amendment, etc. Of course, it is expected that most employees would get considerably more than this minimum.

Second, employees now receiving cost-of-living allowances in Alaska, Hawaii, etc., would not suffer any cut in the amount of allowance they are now receiving, but the allowances would be reduced in the future by one-half of any other pay increases the employees receive.

UNIFORMED SERVICES PAY AMENDMENTS

Because it is not the intention of the legislative proposal to apply the change in the comparability standard to the uniformed services, the legislative proposal would amend the provision of law now linking military pay adjustments to the General Schedule to instead provide that military pay would be increased each October by the amount of the increase in non-Federal pay. In addition, the President would be authorized to provide an alternative adjustment, subject to Congressional review, if he decided that national security conditions, national emergency, or economic conditions affecting the general welfare made such an alternative appropriate.

EFFECTIVE DATE

Finally, the legislative proposal would authorize the President to phase the provisions of the bill into effect over the three years following enactment.

It is estimated that the enactment of this proposal would reduce payroll costs in fiscal year 1982 about $3.7 billion below the costs that would be incurred under operation of present law. Savings in future years would be even greater.

The Office of Management and budget advises that enactment of this proposal would be in accord with the program of the President.

A similar letter is being sent to the President of the Senate.

Sincerely yours,

DONALD J. DEVINE,
Director.

SECTION-BY-SECTION ANALYSIS (TO ACCOMPANY A DRAFT BILL)

"To amend title 5, United States Code, to strengthen the principle of comparability as the basis for setting Federal pay and benefits, and for other purposes."

The first section titles the bill as the "Federal Pay Comparability Reform Act of 1981."

STATUTORY PAY SYSTEMS

Section 2 contains various amendments to subchapter I of chapter 53 of title 5, United States Code, designed to improve the method of fixing and adjusting rates of pay for employees covered by the General Schedule and the other statutory pay systems.

Paragraph (1) of section 2(a) amends section 5301 of title 5 to revise and restate the policy objectives under which pay will be fixed for the General Schedule and the other statutory pay systems.

Under subsection (a) of the amended section 5301, pay for General Schedule employees will be fixed in accordance with four principles:

The first principle continues the principle in current law that there be equal pay for substantially equal work, but modifies this principle to make clear that it will apply only within each local pay area, as pay will vary from area to area under the bill.

The second principle continues the principle in present law that pay distinctions be maintained in keeping with work and performance distinctions.

The third principle establishes the new comparability standard for pay fixing. General Schedule pay, when considered together with Federal employee benefits, will be fixed at a level of 94 percent of what non-Federal employers provide in pay and benefits for the same levels of work. This will replace the present provision of law under which the comparison is made on the basis of pay only, rather than pay and benefits together, and the comparison is made with private enterprise alone, rather than with the entire non-Federal sector, including State and local government.

The fourth principle is entirely new, and provides that General Schedule pay rates in the various pay areas will vary in proportion to the differences in non-Federal pay between those areas.

Under subsection (b) of the amended section 5301, pay rates for the other statutory pay systems—the Foreign Service pay system and the pay system for certain employees in the Department of Medicine and Surgery of the Veterans' Administration—will be fixed at a level comparable with national average General Schedule pay. There will not be any locality variations for these two pay systems.

Subsection (c) of the amended section 5301 provides that pay shall be fixed in accordance with the principles established in subsections (a) and (b) and the applicable provisions of the rest of the subchapters.

Subsection (d) restates the present definition of statutory pay systems as being the General Schedule, the Foreign Service pay schedule, and the pay schedules for certain employees in the Department of Medicine and Surgery of the Veterans' Administration. Subsection (d) also makes clear that Merit Pay System employees shall be included with General Schedule employees in the pay and benefits analysis and comparison, since their pay is tied to General Schedule pay by law.

Paragraph (2) of section 2(a) redesignates section 5305 as section 5302, and inserts the redesignated section after section 5301. The redesignated section is amended to require the pay agent's report to the President to compare General Schedule pay and benefits, rather than pay alone, with pay and benefits outside the Federal Government for the same levels of work. The comparison will be based on appropriate annual pay surveys and appropriate benefits surveys conducted by the Bureau of Labor Statistics, and on other sources of benefits information. Adjustments in pay rates for the statutory pay systems are to be based on the principles on section 5301(a)(1)-(3) and (b). the locality pay principle in section 5301(a)(4) will not enter into this part of the pay fixing process).

The membership of the Federal Employees Pay Council will be broadened to include such organizations as professional associations, as well as labor unions. The Pay Council will deal with the new issues presented by the inclusion of benefits in the comparison process, along with all the other issues the Council has dealt with in the past.

Paragraph (3) of section 2(a) replaces the present section 5303 with an entirely new section establishing locality pay rates for the General Schedule. The President will designate General Schedule pay areas and establish locality rates of pay for those areas. If he determines it is inappropriate to establish locality rates for a particular area (such as foreign countries) he can deem the national General Schedule rates established under section 5302 to be the locality rates for that area. The locality rates in each area will be determined by adjusting the national General Schedule rates established under section 5302 upward or downward to reflect the relationship between non-Federal rates of pay in the area and national non-Federal rates. The adjustment could be different for different grade levels. The pay agent, the Advisory Committee on Federal Pay and the Federal Employees Pay Council will all play a role in the process paralleling their roles in establishing the national General Schedule rates. Locality rates will apply to each General Schedule employee whose permanent duty station is in a pay area. The appropriate minimum and maximum locality rates will also be used as minimum and maximum rates for Merit Pay System employees whose permanent duty station is within the pay area. Locality rates will be effective on the same day as a pay adjustment under section 5302. The locality rates will be printed in the Federal Register, and will have the force and effect of law. An increase in locality pay will not be an equivalent increase for the purpose of determining within-grade increase eligibility later. The President or an agency designated by the President will prescribe conversion rules under which new locality pay rates will be applied.

Paragraph (4) of section 2(a) replaces the present section 5304 with a new section similar to the present section 5303. It authorizes the establishment by the President of special rates of pay for the various General Schedule pay areas for one or more areas, grades, occupations, or subdivisions thereof, upon a finding by the President that the Government is experiencing significant difficulty in recruiting or retaining well-qualified individuals. Special rates will be able to exceed the maximum locality rate for a grade by no more than twice the amount by which the maximum exceeds the minimum locality rate for that grade. The President will establish rules for applying special rates to affected employees consistent insofar as possible with the normal pay administration rules for General Schedule and Merit Pay System employees. The President will review special rates annually and revise or abolish them if appropriate. Special rates will be printed in the Federal Register and have the force and effect of law. The President will be able to delegate authority granted by this section to the Director of the Office of Personnel Management.

Paragraph (5) of section 2(a) amends section 5306 to expand the role of the Advisory Committee on Federal Pay to include assisting the President in carrying out his responsibilities under the locality pay section, and in such other matters as he may request.

Section 3 of the bill amends the merit system principle in section 2301(b)(3) to replace "employers in the private sector" with "non-Federal employers," thereby conforming to earlier changes in the bill which broaden the comparison base.

Section 4 amends section 5332(a) to eliminate the obsolete table of pay rates and to describe the General Schedule by prescribing the number of grades and the number of rates of basic pay in each grade; to specify that the locality rates fixed under the amended section 5303 will be the General Schedule rates in each pay area; and to require the application of those rates to each employee with a permanent duty station in the pay area, except a merit pay employee.

Section 5 repeals section 5941 relating to allowances based on living costs and conditions of environment for employees stationed in Alaska, Hawaii, Puerto Rico, and U.S. territories and possessions.

Section 6 makes a conforming change to section 104 of title 3, section 5318 of title 5, section 461(a) of title 28, and section 601(a)(2) of the Legislative Reorganization Act of 1946 (2 U.S.C. 31), as amended, by striking out "section 5305" and inserting in lieu thereof "section 5302."

FEDERAL WAGE SYSTEM

Section 7(a) retitles subchapter IV of chapter 53 by striking out "Prevailing Rate" and inserting in lieu thereof "Federal Wage." This terminology change is made throughout subchapter IV by section 7 of the bill.

Section 7(a) also amends section 5341 to broaden the comparison base used in pay fixing to include all non-Federal employers and to alter the comparison standard used for appropriated fund Federal wage employees so that their pay will be comparable with 94 percent of non-Federal pay in the local wage area, when benefits for both groups are taken into account in the comparison.

The "Monroney Amendment" in section 5343(d) is eliminated by the bill, as are the current provisions of section 5343(e) on step rates, and the provisions of section 5343(f) establishing shift differentials and making night shift differential part of basic pay. The Office of Personnel Management will establish a step-rate structure and appropriate shift differentials.

A new section 5343(d) requires that, in any year in which an alternative plan goes into effect for employees under the statutory pay systems, the Office of Personnel Management will develop and implement a plan to provide comparable treatment for Federal wage employees. Under section 8 of the bill this comparable treatment will also apply to certain Federal wage employees who are excluded from the regular Federal Wage System because they traditionally negotiate pay.

PRESIDENTIAL BENEFITS AUTHORITIES

Section 9 of the bill adds a new subchapter III to chapter 63 of title 5. This new subchapter authorizes the President to modify any provision of chapter 63 (which includes the provisions of law governing annual and sick leave and certain other kinds of leave) in order to make the Government's leave system more comparable with non-Federal leave programs and practices; to provide greater flexibility and freedom of choice to employees; or to improve the administration of the leave program. The President will be required to report to Congress on any changes he makes in the leave program under this new authority, and to publish notices in the Federal Register and the Code of Federal Regulations.

Section 10 of the bill amends chapter 87 of title 5 to authorize the President to change the contribution the Government makes to the cost of coverage under Federal Employees Group Life Insurance. At present, the Government contributes one-third of the cost of basic insurance, while the employee pays the remainder of the cost of basic insurance and the full cost of the various optional insurance coverages. This present Government contribution is preserved as a minimum, but the President will be able to modify the Government's contribution above this amount. Various technical and administrative provisions relating to this new Presidential authority are included in the bill.

Section 11 of the bill amends chapter 89 of title 5 to authorize the President to modify each year the Government's contribution to health benefits premiums for Federal employees, though here again the present contribution rate of 60 percent of the average premium, and not to exceed 75 percent of the premium for any plan, continuous as a minimum below which the contribution cannot be reduced. Various technical and administrative provisions relating to this new authority are included.

SAVINGS PROVISIONS

Section 12 of the bill guarantees pay increases of at least two percent a year for the first five years after enactment for employees who might otherwise get less because of the implementation of the new comparability standard, locality pay for the General Schedule, and the changes in the Federal Wage System. Of course, whenever the implementation of the new provisions results in increases higher than two percent a year, those higher increases will be paid.

Section 13 protects persons now receiving cost-of-living allowances under section 5941 of title 5 (which is repealed by section 5 of the bill), by freezing the present dollar amount of allowance they are receiving and reducing it in the future only by one-half of any pay increases these individuals receive.

Section 14 of the bill prohibits the President from reducing or making less generous any provision of the Government's leave program for five years after the date of enactment of the bill.

UNIFORMED SERVICES PAY AMENDMENTS

Section 15 of the bill amends section 1009 of title 37, which currently provides for increasing military pay by the same percentage amount General Schedule pay is increased each year. As amended by the bill, section 1009 will instead link military pay increases only to the year-to-year change in non-Federal pay shown by the Bureau of Labor Statistics survey.

Section 15 also authorizes the President to propose an alternative adjustment for the military if he decides it would be appropriate because of national security considerations, national emergency, or economic conditions affecting the general welfare. The alternative plan for the military will become effective unless both Houses of Congress disapprove. If the President vetoes their disapproval, the alternative plan will become effective unless the President's veto is overruled by a two-thirds vote of both Houses.

EFFECTIVE DATES

Section 16 of the bill provides that the bill will be implemented at such times and in such phases as the President decides. All of the provisions will have to be fully implemented no later than three years after enactment.●

PRODUCTIVITY AND SMALL BUSINESS LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 30 minutes.

● Mr. LAFALCE. Mr. Speaker, I rise to offer a comprehensive package of five bills designed to launch a frontal attack on our poor productivity record and problems confronting this country's many small businesses.

OUR PRODUCTIVITY RECORD

This country emerged from the Second World War with an industrial base which was considered to be the most formidable in world history. The United States managed to win two wars in the Atlantic and Pacific theaters and to supply our Allies with invaluable assistance. In 1950, it took four Italian or seven Japanese or three German workers to match the output of one American worker.

Since that year, the American position vis-a-vis our major trading partners has steadily eroded. While the Germans and the Japanese have compiled productivity growth rates of 5 or 6 percent per annum, the situation in the United States has become grim. However, during a good part of the postwar era, productivity was not really a problem, because until 1965 the rise in annual productivity remained comfortably above 3 percent. After that point, a decline set in, which has steadily worsened from year to year. From 1965 to 1973, productivity gains slipped to 2 percent on an annual basis. From 1973 to 1977, those annual gains dropped to 1.2 percent; and in 1978, the gain did not even reach 1 percent. During the last 2 years, productivity has actually declined in this country.

While the United States still enjoys an advantage over our international competitors, that lead has declined sharply during the past decade. In fact, in testimony before my Small Business Subcommittee on General Oversight, Dr. Richard L. Boyce, the former chief economist at the Council on Wage and Price Stability, told me that "the level of technology in the United States may be lower than that of Japan," which is a telling indication of how far we have slipped. The much wider use of robotics in Japan threatens to make that situation a long-term trend.

RAMIFICATIONS

Mr. Speaker, this at first lagging and now declining rate of productivity is of tremendous importance for the overall state of the economy. A healthy rate of productivity growth plays an essential role in improving real living standards, because a healthy rate of produc-

tivity allows the economy to grow without increasing inflationary pressures.

The direct relationship between inflation and productivity was for too long overlooked. Only since 1979 has that important correlation been made and stressed by economic experts and congressional committees, and that correlation is significant. For example, every increase of 1 percentage point in productivity reduces by 2 percent the rates of increase in unit cost and inflation.

Another consequence of declining productivity is the increasing inability of U.S. businesses to compete either at home or abroad. Month after month, quarter after quarter, the statistics from the Department of Commerce reveal an alarming international trade performance by the United States. Although prompt passage of H.R. 1648, my Export Trading Company Act of 1981, which has been endorsed by the administration, would help rectify this situation, a long-term solution must include the restoration of a healthy rate of productivity growth.

On March 12, 1981, I joined with my distinguished colleague from New York (Mr. LUNDINE) to introduce H.R. 2412, the Productivity Improvement Act of 1981. This bill would provide an overall framework for improving productivity by establishing a National Productivity Council and mandating a sweeping and meaningful national productivity improvement plan. The bills which I am introducing today will supplement that initiative on a number of fronts, and I will discuss them a bit later.

THE ROLE OF SMALL BUSINESS

As chairman of the Small Business Subcommittee on General Oversight, I am extremely aware of the fact that small businesses are very important to boosting productivity. For example, studies have demonstrated that small businesses are disproportionately responsible for technological breakthroughs which directly contribute to improved productivity. In addition, the creation of improved employment opportunities is more likely the result of small business activity than of our large multinational conglomerates. Therefore, I believe that all Government policies and most important, Federal tax policies must be carefully crafted, in order to encourage the economic vitality of this country's small business sector.

RESEARCH PROMOTION ACT

Professional research has proven the linkage between industry financed R. & D. and productivity growth, and smaller companies contribute significantly to this ongoing innovative process. Yet, capitalizing on new innovations is difficult for small businesses, because financial resources are not always adequately available to them. Improving cash flows within these businesses will yield productivity, export, and employment gains. One highly effective way to increase cash flows is to provide innovative firms with tax offset credits for R. & D. expenditures that are currently expended.

This bill provides an incentive for innovation and productivity growth by creating a 10-percent tax credit toward current R. & D. expenditures. This credit is sharply limited to companies with less than $250 million in sales, which devote an amount more than 2.5 percent of sales toward R. & D. The credit is also limited in size to 10 percent of these firms' R. & D. expenses in excess of 2.5 percent of sales, which would encourage increased R. & D. activities by small businesses.

RESEARCH TAX INCENTIVE ACT

Mr. Speaker, this bill provides tax incentives for investment in R. & D. structure and equipment and complements the first bill in stimulating R. & D. expenditures by making R. & D. a more attractive use of business capital.

This bill gives eligible taxpayers the option of applying either a 20-percent tax credit with a normal life depreciation or a 5-year straightline amortization with the present 10-percent investment tax credit to investments in research equipment. For investments in research structures, the bill establishes the option of either a 5-year straightline amortization or a 10-percent tax credit with normal life depreciation to such investments. These investments are not at the present time generally eligible for tax credits.

This bill provides a tax stimulus parallel to that already existing for energy conservation and pollution abatement equipment. Nevertheless, this stimulus is not open ended and is only available to small businesses with less than $250 million in annual sales, which spend more than 2.5 percent of their sales revenues on research and development. These firms are much more likely to be innovative and to have their future planning processes be affected by these types of tax incentives. This bill then provides companies the option of choosing the tax credit most suited to their own individual needs.

LABOR PRODUCTIVITY AND TRAINING ACT

The introduction of new machinery and productivity improvement programs invariably creates new employment opportunities for Americans. However, some job dislocations may occur if workers are not trained to function in this new employment situation. For example, foundry workers are not always able to make the transition to the complex world of transistors and silicon valleys.

The most effective solution to this problem is to retrain the affected workers before they become unemployed because of productivity improvement programs and initiatives. Although the Government has instituted various training programs, they have been targeted toward veterans, the handicapped, the young, and the unskilled. Only recently has CETA been authorized to retrain laid-off workers.

This bill would formalize that program by requiring that 5 percent of CETA training funds be directed to the retraining of workers unemployed due to productivity enhancement programs. The bill emphasizes the sharing of on-the-job retraining costs by both the Federal Government and employers and would target reduced CETA funds in the most productive and cost-effective manner. The bill also requires the Secretary of Labor to review all Federal labor training programs and submit recommendations to the Congress for revisions to promote increased labor productivity and to retrain workers before they become unemployed because of these productivity improvement programs.

SMALL BUSINESS TAX REDUCTION ACT OF 1981

The existing corporate income tax rates are graduated, in order to provide tax incentives for small businesses, but the existing degree of graduation has become insufficient in recent years, as inflation takes its toll on small businesses.

This bill would deal with this inequity, by doubling the amounts at each percentage of graduation. The 17-percentage rate would be extended to income below $50,000, rather than the present $25,000 level. The 20-percentage rate would cover income between $50,000 and $100,000, rather than between $25,000 and $50,000. The 30-percentage rate would be extended to income between $100,000 and $150,000, rather than between $50,000 and $75,000. The 40-percentage rate would cover income between $150,000 and $200,000, rather than between $75,000 and $100,000. Finally, the 46-percentage rate would be in effect for income exceeding $200,000, rather than the existing $100,000 level.

This bill would improve the general business climate for small businesses which are indeed responsible for most technological breakthroughs and increased employment opportunities in the private sector.

FAMILY ESTATE TAX ACT OF 1981

One of the major problems confronting small businesses in this country is the increasing inability of small businesses to remain in the family after the death of the initial proprietor. All too often, the heirs do wish to maintain the business but are unable to because of the excessive burden of estate taxes.

This bill would increase the unified estate and gift tax credit from $47,000 to $75,000, which would result in an increase in the estate exemption from

$175,000 to $260,000. This would more adequately reflect existing economic realities and would allow seasoned and experienced personnel to maintain their control over family-funded businesses.

Mr. Speaker, I believe that small businesses can play a very meaningful and effective role in the battle for improved productivity and that changes in the Tax Code would help them fulfill that role.●

CONDITIONS ON AID FOR EL SALVADOR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 15 minutes.

● Mr. BINGHAM. Mr. Speaker, on April 2, the gentleman from New York (Mr. SOLARZ), and I introduced a bill which places strict conditions on any military aid or advisers provided to El Salvador.

Like many of my colleagues, I have been greatly concerned about current U.S. policies in El Salvador. The huge increase in military aid to the Salvadoran Government—from the modest $5.5 million authorized by Congress for fiscal year 1981 to $35.5 million, with a request for $25 million more in fiscal year 1982—without any conditions on its use or disposal is sending the wrong signal to the murderous rightwing paramilitary forces, to our friends in Latin America, and to the rest of the world. Although I do not deny that there is an international dimension to the conflict, nevertheless its roots are internal. Even without the flow of arms aid from Communist nations to the guerrilla insurgents, El Salvador would be undergoing a social revolution. The fundamental cause is a long history of feudal domination of the country's wealth and political power, which is now being challenged by legitimate demands for more equitable distribution and social justice. Since the problem originates from within the society, the solution cannot be militarily imposed from outside.

I have spent many hours during the past 3 months listening to and speaking with Salvadorans and Americans who are knoweldgable about the tragic and complex situation in El Salvador. They included officials from the administration and from the Catholic Church, advocates of the right and of the left, members of special interest groups, businessmen, journalists, labor leaders, and private citizens. One of the most impressive of all was the acting head of the Roman Catholic Church in El Salvador, Archibishop Arturo Rivera y Damas. I was heartened when he agreed with me that the moderate political forces in the country, who are attempting to implement economic and political reforms, must be strengthened to withstand the assault from both the extreme right and the extreme left. In his opinion, the left proved, by the failure of its final offensive, that it does not command popular support. He believes, therefore, that the time may be ripe for political negotiations between the centrist elements of the ruling junta and opposition groups, which would isolate both extremes.

It is my hope that, if the United States places strict conditions on military aid to the Salvadoran Government, President Duarte and other moderates in the civilian/military junta can be sufficiently strengthened to exert control over the renegade security forces, to continue to implement reform programs such as land redistribution, and to reach the political reconciliation which Archbishop Rivera y Damas believes is now possible. A complete prohibition of military assistance would rob us of this important leverage.

Our bill, H.R. 3009, provides that all military assistance will be suspended and military advisers withdrawn unless the President is able to certify within 30 days that the Salvadoran Government:

First, is not engaged in a consistent pattern of gross violations of internationally recognized human rights;

Second, has achieved substantial control over its own security forces, so as to bring to an end the indiscriminate torture and murder of Salvadoran citizens by these forces;

Third, is making continued progress in implementing essential economic and political reforms, including the land reform program;

Fourth, is committed to the holding of free elections at an early date; and

Fifth, has demonstrated its willingness to negotiate an equitable political resolution of the conflict with opposition groups.

Furthermore, the bill states that no military aid may be provided until good faith efforts have been made both to investigate the murders of six U.S. citizens and to bring to justice the responsible individuals. It also contains a legislative veto clause, which enables the Congress to disapprove the Presidential certification by passing a concurrent resolution within 30 days.

If the civilian/military coalition government in El Salvador is able to conform to the strict conditions enumerated in our bill, this will be a firm indication that the moderate, centrist elements have exerted control.

H.R. 3009 will be considered by the Foreign Affairs Committee as an amendment to the fiscal year 1982 Foreign Assistance Act.●

UPDATE ON LEGISLATIVE SAVINGS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, the following is the latest status report on the cost-saving legislation being proposed by the administration. Of 77 bills, 44 have been received by the Congress. The specific status is as follows:

ADMINISTRATION COST-SAVING LEGISLATION—HOUSE STATUS REPORT

House committee/Number of bills	Target date for transmittal	Referred to committee	Bill number, sponsor
Agriculture Committee/10 bills:			
1. FmHA water and sewer and community facility loans	Sent Mar. 10	Mar. 17	
2. User charges for grading and classifying cotton, tobacco, and naval store and for warehouse inspection.	Sent Mar. 10	Mar. 17	
3. User charges for supervision of grain inspection	Sent Mar. 10	Mar. 17	
4. REA electrical distribution facilities loans	Sent Mar. 10	Mar. 17	
5. Food stamp program	Apr. 3		
6. Dairy support price indexing	Sent Feb. 13	Feb. 19	H.R. 1986, introduced Feb. 23 by Findley—H.R. 2594—related bill.
7. Interest rates on FmHA farm ownership loans and emergency loss loans, and SBA disaster loans (Small Business Committee).	Sent Mar. 25	Mar. 26	
8. Interest rates on CCC farmer-held reserve loans	Sent Mar. 20	Mar. 24	
9. Nutrition block grant for Puerto Rico (Education and Labor)	Apr. 6		
10. Aid to land grant colleges	Apr. 2		
Armed Services/2 bills:			
1. Elimination of dual compensation	Apr. 3		
2. National stockpile sales	Sent Mar. 19	Mar. 23	H.R. 2412, introduced Mar. 30 by Price.
Banking, Finance, and Urban Affairs/4 bills:			
1. Termination of National Consumer Cooperative Bank	Sent Mar. 20	Mar. 23	
2. HUD-Community development support assistance	Apr. 10		
3. HUD-Subsidized housing rent contribution	Apr. 10		
4. Interest rate on FmHA housing loans	Sent Mar. 23	Mar. 24	

ADMINISTRATION COST-SAVING LEGISLATION—HOUSE STATUS REPORT—Continued

House committee/Number of bills	Target date for transmittal	Referred to committee	Bill number, sponsor
District of Columbia Committee/1 bill: 1. D.C. court support (H.R. 1253, introduced Jan. 23 by Fauntroy—administration will propose amendments).			
Education and Labor/9 bills:			
1. Higher education amendments	Signed Mar. 11, sent Mar 20	Mar. 23	
2. PHS Commissioned Corps bonuses	Apr. 10		
3. Education block grant	Apr. 6		
4. Social service block grant (Ways and Means Committee)	Apr. 9		
5. Federal employees injury compensation program	Apr. 17		
6. Black lung program	Schedule uncertain		
7. Impact aid	Signed Mar. 11, sent Mar. 20	Mar. 23	
8. School lunch and child nutrition	Apr. 1		
9. Nutrition block grant for Puerto Rico	Apr. 6		
Energy and Commerce Committee/12 bills:			
1. Medicaid cap and medicaid/medicare amendments and PSRO's	Apr. 10		
2. Medical services for merchant seamen	Mar. 27		
3. PHS Commissioned Corps bonuses and National Research Services Awards	Apr. 10		
4. Repeal of 1981 benefit increase	Sent Mar. 10	Mar. 11	
5. Rail pension assurance amendments (Ways and Means Committee)	Sent Mar. 10	Mar. 11	
6. Health services block grants (2 bills)	Apr. 6		
7. Health professions education	Apr. 16		
8. Health maintenance organizations	Apr. 10		
9. Solid Waste Act amendments	Signed Mar. 11, sent Mar. 19	Mar. 23	
10. Amtrak subsidies	Sent Mar. 17	Mar. 18	
11. Conrail subsidies	May 1		
12. Bankruptcy trustees, and U.S. Marshalls service of process (Judiciary, Foreign Affairs, and Intelligence).	Sent Mar. 19	Mar. 23	
Foreign Affairs/3 bills:			
1. Foreign Service pay for domestic workers (Post Office Committee)	Apr. 6		
2. Passport duration and fees (included in State Department authorization bill for fiscal year 1982 and 1983).	Sent Mar. 11	Mar. 12	
3. Bankruptcy trustees, and U.S. Marshalls service of process (Energy and Commerce, Judiciary, and Intelligence).	Sent Mar 19	Mar. 23	
Permanent Select Committee on Intelligence/1 bill: 1. Bankruptcy trustees, and U.S. marshalls service of process (Energy and Commerce, Judiciary, and Foreign Affairs Committee)	Sent Mar. 19	Mar. 23	
Judiciary Committee/2 bills:			
1. Bankruptcy trustees, and U.S. marshalls service of process (Energy and Commerce, Foreign Affairs, and Intelligence Committees).	Sent Mar. 19	Mar. 23	
2. INS overtime pay	Apr. 6		
Merchant Marine and Fisheries/2 bills:			
1. Coast Guard user fees	Sent Mar. 17	Mar. 18	
2. Deepwater port user charges (request pending for joint referral—Public Works and Transportation Committee).	Sent Mar. 25		H.R. 2959, introduced Apr. 1 by Howard, Clausen
Post Office and Civil Service Committee/4 bills:			
1. OPM compensation reform	Sent Mar. 25	Mar. 26	
2. Annual indexation of civil service retirement annuities	Sent. Mar. 17	Mar. 17	
3. Foreign Service pay for domestic workers (Foreign Affairs Committee)	Apr. 8		
4. Intergovernmental Personnel Act	Apr. 6		
Public Works and Transportation/8 bills:			
1. Airline subsidy program reduction	Sent Mar. 31		
2. Airport construction grants, aviation taxes and trust (Ways and Means Committee and Science and Technology Committee).	Sent Mar. 19	Mar. 25	H.R. 2930, introduced Mar. 31 by Howard, Clausen, Mineta, Snyder—H.R. 2643—related bill.
3. Inland waterway user charge (Ways and Means Committee)	Sent Mar. 25	Mar. 25	H.R 2962, introduced Apr. 1 by Howard, Clausen.
4. Municipal waste water construction grants reform	Mar. 27		
5. FEMA-Disaster relief	Sent Mar. 19	Mar. 23	H.R. 2958, introduced Apr. 1 by Howard, Clausen.
6. Highway construction and safety grants (Ways and Means Committee)	Sent Mar. 17	Mar. 18	
7. Mass transit programs	Sent Mar. 17	Mar. 18	
8. Deepwater port user charges (Merchant Marine requesting joint referral)	Sent Mar. 25		H.R. 2959, introduced Apr. 1 by Howard, Clausen.
Science and Technology Committee/1 bill: 1. Airport construction grants, aviation taxes, and trust (Public Works and Transportation, and Ways and Means Committees)	Sent Mar. 19	Mar. 25	H.R. 2930, introduced Mar. 31 by Howard, Clausen, Mineta, Snyder—H.R. 2643—related bill.
Small Business Committee/2 bills:			
1. Business loans	Sent Mar. 24	Mar. 24	
2. Disaster loan programs (part of bill covering FmHA farm ownership and emergency loss loans) (Agriculture Committee).	Sent Mar. 25		
Veterans' Affairs Committee/4 bills:			
1. GI bill: end payments for general flight training and correspondence courses	Sent Mar. 16		H.R. 1903—related bill.
2. Termination of class II dental treatment	Sent Mar. 16		H.R. 2048—related bill.
3. Reduction in beneficiary travel reimbursement	Sent Mar. 23	Mar. 24	H.R. 2947—introduced Mar. 24, 1981 by Montgomery (by request).
4. Physician and dentist bonuses	Sent Mar. 23	Mar. 24	H.R. 2846—introduced Mar. 25, 1981 by Montgomery (by request).
Ways and Means Committee/12 bills:			
1. Medicaid cap and medicaid/medicare amendments	Apr. 10		
2. Social Security; major reforms and other proposals	Apr. 3		
3. AFDC and child support enforcement, supplemental security income and assistance to immigrants.	Apr. 7		
4. Trade adjustment assistance	Sent Mar. 28		H.R. 2922—introduced Mar. 31 by Conable.
5. Unemployment insurance extended benefits and work test and unemployment compensation for ex-service members.	Sent Mar. 10	Mar. 12	H.R. 2880—introduced Mar. 26 by Conable.
6. Inland waterway user charges (Public Works Committee)	Sent Mar. 25	Mar. 25	H.R. 2962—introduced Mar. 1 by Howard, Clausen.
7. Hardship assistance block grant	Apr. 6		
8. Airport construction grants, aviation taxes and trust (Public Works Committee)	Sent Mar. 19	Mar. 25	H.R. 2930—introduced Mar. 31 by Howard, Clausen, Mineta, Snyder—H.R. 2643—related bill.
9. Highway construction and safety grants (Public Works Committee)	Sent Mar. 17	Mar. 18	
10. Customs Service overtime pay	Apr. 10		
11. Social services block grant (Education and Labor Resources)	Apr. 6		
12. Rail pension assurance amendments (Energy and Commerce Committee)	Sent Mar. 10	Mar. 11	

THE INFORMATION SCIENCE AND TECHNOLOGY ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. BROWN) is recognized for 5 minutes.

● Mr. BROWN of California. Mr. Speaker, today I am introducing the Information Science and Technology Act of 1981. This legislation is a revised version of a bill I introduced late in the 96th Congress, H.R. 8395. I would like to explain why I think legislation is needed in this area and why I favor the particular approach of this bill.

In presenting the case for legislative action I think it will be helpful to review the role that information products and services now play in our economy and, increasingly, in our schools, homes, and leisure activities. I will also discuss the status of policy development in information-related issues in a number of other nations as well as in the United States.

Mr. Speaker, there can be little doubt that America is well advanced into the information age. As we continue our rapid transition from an economy based on industrial production to one based increasingly on information products and services, infor-

mation and the ability to access it quickly and reliably becomes a vital source of political and economic power. Information technology now permeates nearly every aspect of industry and commerce, and its importance is felt not only in the dollar value of information products and services themselves, but also in the central role of information technology in increasing productivity and promoting innovation in other sectors of industry and commerce.

THE INFORMATION INDUSTRY

By any measure, the American information industry is impressive in size and scope. The electronic data processing industry had worldwide revenues of over $60 billion in 1979; the share of this market for U.S. industry was about $46 billion. By one informed estimate, more than half of the U.S. labor force now makes its living from information-related jobs. In 1976 there were 1.2 million computer terminals in the United States; now there are over 3 million. The percentage of GNP spent on computer usage was 2.1 percent in 1970; it is expected to be 8.3 percent by 1985.

The information and communications industry has had and continues to have a remarkable record of productivity. In a Harvard study, productivity increase in this industry accounted for 25 percent of the total productivity increase of American industry.

By one estimate, information and communication equipment and services are now second only to agricultural products as our leading export category. American computer firms now derive nearly 50 percent of their revenues from overseas sales.

INFORMATION TECHNOLOGY AND PRODUCTIVITY

Mr. Speaker, the reason why marketing of information technology is big business is that this technology has proven to be cost-effective in a great variety of tasks. The Industrial Revolution replaced human muscle power with energy-powered machines; the information revolution allows us to make industrial processes "smart" through control theory and automation. Modern industrial processes, and much of our advanced military technology, are now deeply dependent on computer control.

Just as earlier machines replaced muscle power, information technology offers great possibilities for augmenting the human intellect. Computers now aid in the design of complex systems; we will soon see industrial products that can diagnose their own failures and make repairs.

One of the areas in greatest need of productivity increase is white-collar work; here again the clever use of information technology could produce great gains. We are all acquainted with automation of clerical tasks through word processors and related equipment; but even greater productivity gains here may yet come from a restructuring of managerial jobs to permit information technology to simplify and coordinate tasks and to eliminate redundancy.

COMPETITION IN THE INFORMATION ARENA

Mr. Speaker, I hope I have made clear my view that the stakes are high in the information game, both in terms of international trade in information products and services and in increasing our overall domestic productivity. The rapid rate at which the technologies are changing and interacting means that there is a relatively short time in which to recoup large investments in new products and services before they become obsolete. It is therefore vital to establish distribution channels into key world markets, a fact which other nations have not been slow to recognize.

International trade in information products and services has become highly competitive, and American superiority can no longer be taken for granted. Japan has now captured a significant share of the semiconductor market, and is the world leader in fast text transmitting devices. The terminal systems of Satellite Business Systems, and IBM-Comsat-Aetna joint venture, include three key components of Japanese manufacture. France and West Germany are now our sole suppliers of traveling wave tubes, an essential component of satellite communications systems. The French firm CIT-Alcatel is setting up an experimental fiber optics link in New York; the teletext system soon to be tested by WETA-TV here in Washington is the Canadian-made Telidon.

Nor is this competition limited to hardware. On the contrary, many experts believe that the decisive competitive arena of this decade will be software—including software for processing text, graphic images, and digitized voice—and in services. Several nations have taken or are contemplating steps to limit foreign access to data transmission facilities or to place restrictions on entry of markets. My colleagues on the Government Operations Committee have explored these developments quite thoroughly in hearings, and I commend them for calling attention to this important problem. The adoption of these policies abroad represents an important step in the formulation of comprehensive national information strategies on the part of these nations.

NATIONAL INFORMATION POLICIES ABROAD

Mr. Speaker, I would like to examine briefly the efforts of four foreign nations in formulating national policies regarding information issues: Japan, France, West Germany, and Great Britain. In all of these countries the expressed concerns go far beyond the economic preservation of their information industries to delve deeply into the profound effects that information technology will have on their respective societies.

Japan: As early as 1972, the Japanese Government published "The Information Society: A Year 2000 Japanese National Goal." This report provided a long-range plan for developing an information society in Japan but with an intermediate goal of establishing "the computer mind" by 1985; it included goals not only for the manufacture of semiconductor chips, office equipment and robots, but also for general mass education for computer literacy. Later plans called for the improvement of science information systems, upgrading of data bases, and extensive networking of libraries. Last year, an advisory committee to the Ministry of International Trade and Industry published the JIPDEC report, a preliminary plan for "fifth-generation" computers; that is, computers needs for the 1990's. This document was aimed at identifying and formulating policy for research and development needs and at anticipating some of the social impacts of future information systems. The JIPDEC report makes clear Japan's intention to assume the mantle of information leadership:

> The obligation now is for Japan to lead the world in this area, by means of the development of new technology based on original concepts.

France: The publication of the Nora/Minc report, "The Computerization of Society," commissioned by President Giscard in 1978, signaled France's intent to compete vigorously for a share of world information markets. The report is unequivocal on the future importance of the computer: "Mass computerization will take hold, becoming as indispensable to society as electricity." It emphasizes the importance of policy decisions in determining how information technology is to be used:

> Depending on the policy into which it is incorporated, computerization will bring about changes for the better or for the worse; there is nothing automatic or preordained about its effects, which will depend on how relations between the government and French society develop in the coming years.

Among the many suggestions of the Nora/Minc report was the establishment of a research institute to study the long-term effects of communications, particularly its economic, sociological, and cultural consequences.

The French Government has been very active in promoting the use of computers and telecommunications. France has developed a videotex system, Antiope, and plans to replace the phone book's "Yellow Pages" with an Antiope-based information retrieval system by 1987. Earlier this year, France initiated a program called 10,000 microcomputers in schools. The micros are being placed in schools at

Government expense; already 1,500 teachers are trained to use them, with a program in place to train 1,000 additional teachers each year.

West Germany: In 1975 the Federal Republic of Germany launched an ambitious program for the advancement of information and documentation with the goal "of creating an efficient capability to satisfy the information needs of society." This plan included the establishment of 16 specialized information centers, and computer networks joining the centers with libraries. In 1977 the Society for Information and Documentation was created, integrating several Government agencies dealing with information, and was given the task of coordinating research and development in the information field and dissemination of scientific and technical information. In September of 1979, the Government announced a $500 million information technology program for 1980-83 aimed at improving the understanding of the social impact of the technology, increasing the country's capability in the skills needed to create products using the technology, and improving the country's communications infrastructure.

Great Britain: In 1978 then-Prime Minister Callaghan asked the Advisory Council for Applied Research and Development (ACARD) to set up three working parties to examine the social, industrial, business, and social impacts of semiconductor technology. The ACARD report on semiconductor applications was published in September 1978 and became the basis for the $140 million microindustry support programme, the $110 million microapplication project, and other support schemes.

In 1980 another ACARD report recommended creation of a Ministry for Information Technology. The report stated:

> One Minister and Government Department should be responsible for coordination of Government policies and actions in the promotion and development of information technology and its applications through awareness, education and training, sponsorship of industry, provision of risk capital, public purchasing, publicly funded R&D, national and international regulations and standards, legislation, communications, and related programmes.

The British Government has moved swiftly to implement this recommendation and has appointed a minister with prime responsibility for information and communications issues.

Following the lead of other European nations, Britain has mounted a significant effort to exploit the potential of computers in education and training. The Government recently committed $25 million to setting up a national center for computers in education, and the BBC plans to run a TV series next year that will teach viewers how to use computers.

Mr. Speaker, I could go on with these examples, but I think the message is clear. In each of these countries there is a firm perception that information technology is rooted in an economic and cultural context, and in particular that a coherent approach to information issues must involve mutual support and cooperation, rather than antagonism, between industry and Government. This is perhaps most clearly seen in Japan, where, for example, in a program to develop very large-scale integration (VLSI) technology, the Government channeled $100 million in research funding through an intraindustry committee which allocated funds and research tasks, and arranged sharing of the results. Japan has also had, since 1967, a nonprofit independent organization, funded by business and government, called the Research Institute of Telecommunications and Economics. This was established to conduct socioscientific research and study of telecommunications. Its mission is to forecast social needs for telecommunications, to anticipate the role of telecommunications in the future society, and to contribute to systematic telecommunications theories and policies.

An analogous structure in the computing field, the National Computing Center Ltd., has existed in Great Britain since 1966. A nonprofit organization financed by industry, commerce, and government, it provides information, advice, and training; promotes standards and codes of practice; and cooperates with and coordinates the work of members and other organizations concerned with computers and their use.

INFORMATION POLICY IN THE UNITED STATES

Where, then, does the United States stand in its development of information policies?

Let us agree at the outset that our political and economic traditions prescribe some fundamental differences in our information posture from that of most other countries. The first amendment prohibits the Government from interfering with the free flow of information, except in limited circumstances, and we have a strong commitment to private ownership and operation in information and communications, unlike most developed countries. These political and economic traditions and the highly pluralistic nature of our society make a coordinated treatment of information policy concerns a difficult and delicate task. We tend to take information and the tools used to process and transmit it for granted, and to think of it as ancillary to the real business at hand, be it energy, health care, banking, or whatever. In addition, unlike most countries, we do not have the motivation for policy development of being under foreign domination in information products and services.

When all possible excuses have been made, however, I still think that the United States is doing an inadequate job of planning for the information future. The decisions we make about this future will have profound implications, not only for our economic well-being, but for the size and structure of the work force, for the evolution of our educational institutions, for personal privacy and civil liberties, and for many other concerns central to our personal and societal values. Yet at the present time responsibility for Federal research, development, and policy activities concerned with information is uncoordinated and fragmented throughout numerous agencies, and there is no effective forum where Government and private interests may cooperate in consideration of policy issues. An integrated approach would require that information technology and its development be considered together with the potential economic and social impacts of this technology and with policy issues regarding information access and delivery. It would not require that all these functions be performed under the same roof or even by the same agency; but it would require coordination of activities and high-level planning and direction.

It does not seem possible to do this under the present structure. As currently organized, civilian research and development in information science and technology is primarily supported by the National Science Foundation (NSF) basic research and some policy research and analysis and by the National Bureau of Standards (NBS) research on network architecture, standards and protocols, security. The National Telecommunications and Information Administration (NTIA) is charged with providing policy advice to the President on information and telecommunications issues. NTIA, a small agency, has had to struggle—not always successfully—for visibility and influence within the Department of Commerce. NSF, NBS, and NTIA all have their own mechanism—s for eliciting outside advice from the information community.

Within the Executive Office of the President (EOP), where ultimate policy responsibility must reside, OMB has assumed the primary responsibility for Federal information policy and management, a role greatly strengthened by the passage last year of the Paperwork Reduction Act. General information policy issues have been addressed elsewhere in the EOP, and the Office of Science and Technology Policy (OSTP) has had a nominal concern with scientific and technical information.

Mr. Speaker, what is plainly missing in this picture is some mechanism for connecting concerns for the develop-

ment of this powerful technology (primarily scientific and technological questions) with consideration of the policy issues which the employment of this technology inevitably raises (primarily economic, political, and social questions). Technology development cannot be permitted to be the sole determinant of political and social values, but neither can it be made to conform to predetermined dogma concerning its proper use. Profound technological advances change the way we think about the world. We need to develop conceptual approaches broad enough to appreciate the potential of this technology and to anticipate and plan for the changes to come, before the rush of events forecloses some of the options now available to use in developing and managing this technology.

THE INSTITUTE FOR INFORMATION POLICY AND RESEARCH

It seems to me that a successful approach requires at least these ingredients: (1) a better understanding of the potential impacts and the limitations of information technology; (2) the joint development by the public and private sectors of guidelines to translate this understanding into a consensus for future action; and (3) a mechanism with the authority and resources to refine and implement the policy guidelines thus arrived at. The legislation which I am introducing today attempts to provide these ingredients.

Title I of the Information Science and Technology Act establishes an Institute for Information Policy and Research as an independent agency in the executive branch. The Institute has a lifetime of 10 years, unless extended by Congress and is viewed as a transitional mechanism to facilitate our Nation's evolution into an information society. The Institute is not intended to conduct basic research in information science and technology or development of hardware. It would not itself determine policy, nor would it have any regulatory authority. Its purpose is to provide ingredients (1) and (2) preceding:

To investigate and provide assessments of current and projected future developments in information science and technology, and of potential applications and their impacts, to serve as a basis for policy determination in information-related issues; and to provide a forum for considering the information concerns of government, industry and commerce, educational interests, and the public.

The intent behind the independence of the Institute is to allow it an unconstrained perspective on such issues as institutional structure and regulatory policy. Placement of the Institute within an existing department or agency could easily skew the Institute's view toward that agency's particular mission and involve it in bureaucratic squabbles.

The independence of the Institute, its degree of freedom in hiring practices, and its association with academic and commercial institutions should enable it to assemble and maintain a staff of the highest intellectual and leadership capacity.

STRUCTURE OF THE INSTITUTE

Under section 105 of the bill, the Institute would operate under the general supervision and policy control of a 15-member National Information Science and Technology Board, to be appointed by the President for 5-year terms. The Board would include policy-level Federal officials with information responsibilities; representatives of private sector businesses providing information products or services, or trade associations comprised of such businesses; representatives of scientific or professional associations and of educational institutions. Board membership would represent the variety of different functions involved in information processing and transfer, including technology development and marketing, provision of access to information, and consumption of information.

Section 106 provides for a Director of the Institute, appointed by the President with the consent of the Senate, and such staff as necessary.

The Institute would have a procedure by which organizations and institutions with a serious interest in information issues could become affiliates (section 104). Along with the diversity of viewpoints represented by the Board, this provision is designed to promote cooperative interaction among government, industrial and commercial interests, and scientific and educational institutions. In developing the programs of the Institute, the Director is instructed to consider the concerns of the affiliates, as well as to consult with the Board.

In addition to the initial 3-year appropriation for the Institute, the Board would set a fee schedule for affiliates. The Institute would evolve toward a joint public-private funding arrangement somewhat analogous to that of Japan's Research Institute for Telecommunications and Economics, or England's National Computing Center, mentioned earlier.

FUNCTIONS OF THE INSTITUTE

A fundamental assumption in the Information Science and Technology Act is that in some areas we do not yet understand information and information technology well enough to formulate optimal policies. Extending and deepening our base of understanding is a fundamental mission of the Institute for Information Policy and Research.

There is a broad spectrum of research and analysis involved in information issues, from basic research in information science through hardware and software development to research on applications and their effects and on the policy options for providing access. While it is difficult to make a clean cut in these functions for purposes of clarifying responsibility, the Institute's emphasis is on policy and research issues which are of overall national import and which transcend particular agency missions. Not surprisingly, these are precisely the kinds of issue which everyone assumes that someone else is looking after. In the words of the Nora/Minc report, which recommended a similar structure in the French Government, the Institute's task "would be to analyze, warn, alert, propose, and persuade". It would not replace or duplicate the research programs of the National Science Foundation or the National Bureau of Standards.

The Institute would be expected to develop a cadre of highly qualified experts to perform studies and analysis in-house when possible. Section 109 of the bill explicitly charges the Director with coordinating its programs with other agencies and with funding any basic research and technical studies it deems essential through NSF, NBS, and the Institute for Telecommunications Studies, where appropriate. The Institute could, through contracts or cooperative agreements, conduct studies and analyses for other agencies or nongovernmental organizations.

Mr. Speaker, section 104 of the act charges the Institute with 11 specific functions. I will mention several of these, which give a good indication of the scope of the Institute's duties.

MONITORING OF DEVELOPMENTS IN INFORMATION SCIENCE AND TECHNOLOGY

The Institute is to collect, assess, and make available to the Federal Government and to Institute affiliates data and information about developments and trends in information science and technology throughout the world. The collection process would draw on existing sources where possible and would be coordinated and supplemented when necessary by the Institute's own efforts.

RESEARCH OF IMPACTS OF TECHNOLOGY

More research into the economic and social impacts of information technology is needed as a foundation for building policy. The Institute's study areas would include potential impacts on the size, structure, and training needs of the work force; development of better measures of the effectiveness of information technology in enhancing productivity, especially in the services sector; and research into the psychological and sociological effects of human interaction with information technology.

EDUCATION AND TRAINING NEEDS

In hearings held last year by the Science and Technology Committee jointly with the Education and Labor Committee, the importance of widespread "computer literacy" for increasing productivity and for national security

was repeatedly emphasized. It was also pointed out that the United States now lags behind many other nations in teaching of computer skills. In a recent Army testing of 1,663 computer programers, 77 percent failed to meet minimum standards. The Institute is directed to conduct studies and make recommendations directed at citizen preparation for the information age, with particular attention to the difficult question of equality of opportunity for information access.

BACKGROUND OF REGULATORY DECISIONS

The convergence of computing with telecommunications and the resulting emergence of "hybrid" technologies raise regulatory issues and protection-of-property issues with serious consequences. By virtue of its independent status, the Institute would be in a unique position to analyze potential impacts of regulatory decisions and patent and copyright policies on the development of new technology configurations, and on their uses for such purposes as electronic mail systems and electronic funds transfer. The Institute could aim at developing model codes and regulations responsive to new or novel applications of information technology and telecommunications. It could also provide direction in future disputes arising from public-private competition in the provision of data and information services.

SUPPORT OF SCIENTIFIC R&D

The Institute is directed to identify areas of overall national importance in future technical research and development. Of particular concern are future needs for large-scale computing capabilities and networks for scientific research, where the needs transcend the missions of individual agencies and require coordinated action among a number of scientific disciplines to prevent duplication and to allocate limited resources wisely. Because of its unique cooperative nature the Institute would be in an ideal position to, for example, catalyze industrywide joint research in the development of VLSI technology, or to encourage further industry-university cooperation in computer science research and development.

INTERNATIONAL INFORMATION CONCERNS

International issues such as transborder data flows are of increasing concern to American firms doing business abroad. The Institute could contribute both by collecting needed data on the nature and extent of these flows and in developing a better understanding of the underlying economics, for example, of how to put a value on different categories of information. It could also play a key role helping less developed countries (LDC's) to acquire needed information by working with the private sector to improve access to existing data and by contributing to the development of international information systems suited to the needs and capabilities of LDC's.

IMPROVING FEDERAL INFORMATION PRACTICES

The Institute could have a major impact on Federal information practices by conducting studies and recommending specific policies and methods for the use of information technology by the Federal Government to improve overall administrative effectiveness and to reduce costs through improved productivity. The foundation here has been laid by the Paperwork Reduction Act. What is needed now to improve Federal Government productivity is not simply more and bigger computers, but a critical examination of task structures and administrative hierarchies and a restructuring of jobs to take advantage of the simplifying and coordinating capabilities offered by flexible new technologies. The Institute is directed to set a standard in its own functioning for the productive and humane use of information technology.

SCIENTIFIC AND TECHNICAL INFORMATION

Another area in which the Institute could have an important effect is in developing and assessing policy options for improving the dissemination of scientific and technical information (STI). Particular needs include better coordination of STI activities among agencies and the elimination of institutional barriers to improved STI flows; integration of data bases and elimination of unnecessary duplication through increased networking capabilities; and some kind of centralized indexing system for STI generated within the Federal Government or under grant or contract with the Federal Government. The problems in this area are, for the most part, institutional rather than technological; they will require coherent planning and high-level support.

TRANSFER OF FUNCTIONS

In order to carry out the program outlined above, section 108 of the legislation provides for transfer to the Institute of the Office of Policy Analysis and Development of NTIA and of information-directed programs in the Division of Policy Research and Analysis of NSF. In both cases these are programs which fit naturally with the Institute's responsibilities. In particular I believe that the services which the NTIA's Office of Policy Analysis and Development was designed to perform would be more effectively rendered within the Institute than in the program's present niche in the Commerce Department.

The President may, in addition, transfer to the Institute any other policy research and analysis conducted within the Federal Government, provided that such programs are of overall national import and transcend individual agency missions. Candidates for transfer would include such programs as the "computer vulnerability" studies now being performed by the Institute for Computer Science and Technology of NBS.

REPORTS

Under section 105 of the act, the Board of the Institute is instructed to submit an annual report to the President, for transmission to the Congress, describing past, current, and proposed activities of the Institute. In addition, the Board is to submit biannually a 5-year outlook on public policy issues concerning information and the application of information technology. This 5-year outlook is expected to anticipate future issues of signal importance.

AUTHORIZATION OF APPROPRIATIONS

Section 110 authorizes appropriations for fiscal years 1983, 1984, and 1985 of $6, $8, and $10 million respectively. These would of course be offset in future budgets to the extent of amounts appropriated to the programs being transferred to the Institute, so that the net cost of the Institute would be considerably less than the above figures. The appropriations would be augmented by fees paid by Institute affiliates and by any additional fees received for particular research projects.

SPECIAL ASSISTANT FOR INFORMATION TECHNOLOGY AND SCIENCE INFORMATION

Mr. Speaker, the Institute for Information Policy and Research is the heart of the Information Science and Technology Act, but the Institute is not itself a policymaking body. As I remarked earlier, ultimate responsibility for policy determination in the information area must rest within the Executive Office of the President. I believe that the Office of Management and Budget has an important role in this policymaking, and section 105 of the act makes the Director of the OMB Office of Federal Information Policy a member of the National Information Science and Technology Board.

However, I also believe that an effective future-oriented policy for information and information technology requires much more active participation by the Office of Science and Technology Policy than has been the case in the past. As I have noted, decisions about the future direction of research and development in information science and technology will influence, and be influenced by, very important questions concerning information access and delivery. For this reason title II of the Information Science and Technology Act provides for a new position in OSTP, that of Special Assistant for Information Technology and Science Information. This individual would be a member of the National Information Science and Technology Board, and would assist the Director of OSTP in "formulating policy and

providing advice within the executive branch on scientific and technical information and the technologies involved with its collection, processing, and dissemination."

It is my hope that the presence of this Special Assistant within OSTP would provide a strong link between the Institute for Information Policy and Research and the Exceutive Office of the President, a link reinforced by the presence on the Board of the Institute of the Director of the Office of Federal Information Policy of OMB. The Special Assistant is explicitly directed to establish a suitable mechanism to coordinate the activities of the Institute with those of executive branch agencies having significant responsiblities for research, development, and application of information science and technology. He is further directed to explore and make recommendations concerning a Federal information locator system for scientific and technical information generated under Federal auspices, and for improving dissemination of this information both domestically and internationally.

CONGRESS MUST ADDRESS ISSUES

Mr. Speaker, we are dealing here with a very complex area, and I would not claim that the bill I am introducing today represents any ultimate wisdom. Others may have better ideas, and I am open to suggestions for alternatives. I am convinced, however, that Congress must move quickly to address some of the important concerns arising from the information revolution. A concerted effort is needed, and I look forward to working with other Members and other committees to meet the legislative challenges presented by these exciting new advances.

National information policies will evolve whether answers are arrived at consciously or unconsciously, deliberately or haphazardly. The question is whether our Government, and Congress in particular, will be foresighted enough to take a considered and coordinated approach. I hope and believe that Congress will, and I invite my colleagues to join with me in working to make that hope a reality.

SUMMARY

Rapid advances in microelectronics and telecommunications technology, and the convergence of computers and telecommunications, have created new opportunities for economic growth, increased export markets, and gains in productivity, and will permit increased public access to all kinds of useful information. At the same time, these advances have important implications for the size and structure of the work force, for the evolution of educational institutions, for personal privacy and civil liberties, and for many other concerns central to our personal and societal values. If we are to take advantage of the opportunities made possible by the new information technologies and minimize potential negative impacts, our social and governmental institutions must come to grips with the important policy questions raised by these scientific and technological developments.

Information and communications technologies are still in a stage of rapid development, and this development will be a dominant feature of the coming decade. The Information Science and Technology Act establishes an Institute for Information Policy and Research, with a lifespan of 10 years. This independent Institute in the executive branch would be a transitional mechanism to facilitate our Nation's evolution toward a society based increasingly on information products and services. This mechanism would make possible cooperative planning among the Federal Government, business, educational interests, and State and local governments, for the productive and humane use of information technology in the workplace, school, and home.

The independence of the Institute would allow it a broad and integrated perspective on such issues as institutional structure and regulatory policy, a perspective not subject to the political or bureaucratic constraints on the several dispersed agencies now concerned with information issues. As structured in this legislation, the Institute would not be engaged in hardware research and development, nor would it have any regulatory authority. Its primary purpose would be to provide a focal point for policy research and analysis and a forum for consideration of the information interests of Government, business, and education.

The Institute would be governed by a 15-member National Information Science and Technology Board representing all functions involved in information generation and transfer, and administered by a Director. It would conduct policy research and analysis, develop and recommend policy options, and propose goals and methods in support of policy development for scientific and technical R. & D.; dissemination of scientific and technical information; international information issues; regulatory issues; and impacts of information technology on education and training needs and on the workforce. The Office of Policy Analysis and Development of NTIA would be transferred to the Institute, and other policy research and analysis programs which are of overall national importance and transcend particular agency missions may be transferred.

The bill requires close coordination between the Institute and other agencies, including the National Science Foundation and the Department of Commerce. Appropriations of $6, $8, and $10 million are authorized for fiscal years 1983, 1984, and 1985 respectively.

Title II of the bill establishes the position of Special Assistant for Information Technology and Science Information in the Office of Science and Technology Policy. The Special Assistant would be a member of the Board of the Institute and would have responsibility for coordinating the Institute functions with other agencies of the executive branch and with assisting the Director of OSTP in formulating policy on information technology and on scientific information.●

WHO BEARS THE TAX BURDEN?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. LEVITAS) is recognized for 15 minutes.

● Mr. LEVITAS. Mr. Speaker, it has long been my contention that the person who bears the heaviest relative burden of the Federal income tax bill in this country is the middle-income taxpayer. As the cost of running the country goes up, both in real dollars and inflated dollars, the largest portion of those extra dollars comes from this middle-income group.

As we consider tax cut proposals in this Congress, I believe we should concentrate on providing some tax relief and tax equity to this group of productive citizens who largely bear the burden of financing government at all levels.

Is it fair to continue to sock it to these same people and groups? Are we creating disincentives to this productive segment of our society? When we talk of tax relief, should not these people be the recipients of some relief rather than the bearers of additional burdens?

Everyone should pay his fair share of the cost of government, but it is not right for some people to escape paying any significant tax while others pay more than their fair share. For that reason I favor the concept of a minimum tax formula which assures that each person pays something to support the Government regardless of deductions, writeoffs, allowances, and shelters. This is only fair to those hard-working wage earners who pay the maximum of tax for their bracket but cannot avail themselves of special tax shelters to avoid paying taxes. A minimum tax assures equity and that everybody pays a share of the cost of government.

We also need a tax structure which encourages the formation of capital for investment in the private sector of the American economy. It is this vibrant, productive private sector that provides the jobs, the material wealth, and the standard of living for all of us. It also provides the tax base that supports all the Government. We must

provide incentives—not disincentives—for people to save and to invest. In the long run that is where the real hope of our economy lies.

I would like to share with my colleagues a report by the Tax Foundation, a nonpartisan research organization, which demonstrates that the middle-income taxpayer is in fact footing the largest portion of the bill. I am inserting in the RECORD a portion of the results of a national opinion survey conducted by the Roper Organization. This report illustrates the perceptions of taxpayers feelings on the fairness of the amount of income taxes paid by the poor, middle class, and wealthy; and, their perceptions of the lower limits and upper limits of middle income. I want to bring these reports to my colleagues attention because they are important for us to be aware of as we undertake new tax legislation in this session of Congress.

I offer for the RECORD the report of the Tax Foundation, followed by the report of the Roper Organization, at this point:

TOP HALF OF EARNERS PAY 90 PERCENT OF TAX BILL; NUMBER OF MILLIONAIRES UP IN 1978

Those who earn more pay higher tax rates. That the Federal income tax system is sharply progressive should surprise no one. However, Tax Foundation economists say that the price for some taxpayers can get very high indeed. Based on Treasury data for 1978, just released, Foundation researchers find that the top 50 percent of earners pay 93.5 percent of the Federal income tax bill, and this concentration of the tax burden in the upper end of the income spectrum is on the increase, the Foundation reports. In 1973, the richer half of the taxpayers carried 91.6 percent of the Federal income tax burden.

The Federal income tax bill for calendar year 1978 came to $188.6 billion. Over $176 billion of the total was picked up by the 45 million taxpayers with incomes at or above the median level. Moreover, a large part of the tax bill—nearly half—was shouldered by the 9 million taxpayers who comprise the richest 10 percent.

Those earning $29,414 or more in 1978 paid 49.7 percent of all U.S. income taxes. Five years earlier, earners in the top 10 percent were footing 47.5 percent of the Federal income tax bill.

By contrast, the lower half of U.S. earners (those making $10,959 or less in 1978) paid 6.5 percent of all Federal income taxes in 1978. Earners in the lowest 25 percent income group—those making $5,039 or less per year—paid 0.4 percent of the Federal income taxes in 1978.

Tax Foundation economists also detect an increase in the progressivity of the Federal income tax. The average tax for all taxpayers in 1978 was $2,098, an increase of 57 percent from 1973. For the top 10 percent of earners, the tax in 1978 came to $10,430, or 64 percent more than five years earlier.

For the richer half of the taxpayers, the average tax of $3,924 in 1978 increased slightly less, by 60 percent. For the lower half, however, there was an average tax increase of only 21 percent—from $225 in 1973 to $272 in 1978.

Other trends in the past five years included:

The number of "millionaires"—those reporting income of $1,000,000 and over—increased by 1,189—from 903 returns in 1973 to 2,092 in 1978. This group paid an average tax of $934,863 in 1973 and $998,144 in 1978, or 64.7 percent of taxable income in 1973 and 65.4 percent in 1978.

Population at the same time rose by less than 4 percent, adjusted gross income tax collections by 74 percent. Federal income taxes claimed 13.1 percent of adjusted gross income in 1973 and 14.5 percent in 1978.

The table below supplies details on Federal income tax payments by earners at various levels.

FEDERAL INCOME TAXES PAID BY HIGH- AND LOW-INCOME TAXPAYERS 1973 AND 1978

Adjusted gross income class	Income level		Percent of tax paid		Average tax	
	1973	1978	1973	1978	1973	1978
Highest 10 percent	$20,138 or more	$29,414 or more	47.5	49.7	$6,362	$10,430
Highest 25 percent	$13,929 or more	$19,860 or more	70.5	73.8	3,777	6,208
Highest 50 percent	$8,081 or more	$10,960 or more	91.6	93.5	2,454	3,924
Lowest 50 percent	$8,080 or less	$10,959 or less	8.4	6.5	225	272
Lowest 25 percent	$3,594 or less	$5,039 or less	0.6	0.4	32	32
Lowest 10 percent	$2,348 or less	$1,988 or less	(1)	(1)	3	6

[1] Less than 0.1 percent.

[From 1979 Tax Study by the Roper Organization]

FAIRNESS OF AMOUNT OF INCOME TAXES PAID BY POOR, MIDDLE CLASS, WEALTHY

When the public is asked which income groups pay too much or too little in taxes, they explain once again what they mean when they say the tax system is unfair. The majority of the public considers itself middle class and middle class families, they think, are taxed too much. High income families, on the other hand, pay far too little. And they're not all that sure the low income families pay too much, if it comes down to that.

Question 10. Here is a list of some different types of people or groups. (Card shown respondent) Would you go down that list, and for each one tell me whether you think they have to pay too much in income taxes, or too little in income taxes or about the right amount?

	Total public 1979	Under $7,000	$7,000 to under $15,000	$15,000 to under $25,000	$25,000 and over	Total public 1978
Number of respondents	1,502	272	429	507	279	2,007
	Percent					
Low income families:						
Pay too much	45	61	53	36	32	47
Pay too little	5	4	3	5	7	4
About right	38	26	34	46	46	37
Don't know/no answer	12	8	10	14	16	13
Middle income families:						
Pay too much	71	58	69	77	78	74
Pay too little	2	6	3	1	(1)	2
About right	22	28	23	19	20	20
Don't know/no answer	4	9	5	3	1	4
High income families:						
Pay too much	8	7	7	7	13	7
Pay too little	75	75	72	79	74	76
About right	9	8	11	8	10	9
Don't know/no answer	8	10	10	7	3	7

[1] Less than 0.5 percent.

But again, note that the percentage of people who think that lower income and middle income families pay too much has declined, further evidence suggesting that the "Tax Revolt" is dying down.

The table above explains something else about what unfair taxes means. People whose families are low income feel more strongly than the public at large that low income families pay too much in taxes. The same is true for people whose families are in

high income brackets: They too feel, more so than the average, that high income families have taxes which are too high. This is not to say that the overwhelming majority of high income families don't (surprisingly) feel that such families pay too little, nor that they and everyone else doesn't think that middle income families pay too much. It merely means that everyone has a tendency to feel that he is being treated a little bit more unfairly than the next man.

This logic also works for middle class families, but not without a careful explanation of terms. If one considers a middle class family to be one which makes a total annual income somewhere between $7,000 a year and $25,000 a year, then 73% of such people think middle income families pay too much to the IRS, a very modest, almost imperceptible increase over the general average of 71%. But how widely does the definition of middle class extend on either side of a median annual family income of some $16,000 to $17,000 a year according to latest estimates of the Bureau of the Census? Or, more precisely, how far do people think the boundaries of the middle class extend?

LOWER LIMIT OF "MIDDLE INCOME" AND UPPER LIMIT OF "MIDDLE INCOME"

Once again, as was done last year, this study asked respondents to say how much they thought a family would have to make before it would be considered middle income and also before it would be considered high income.

Question. 30. Now, let me turn to another subject. Thinking of a family of four, that is, a couple with two children, how high would their annual income have to be before you would describe them as a middle income family rather than a low income family?

Question 31. And, again, thinking of a family of four, how high would their annual income have to be before you would describe them as a high income family rather than a middle income family?

	Total public		Total annual family income is:							
			Under $7,000		$7,000 to under $15,000		$15,000 to under $25,000		$25,000 and over	
	1979	1978	1979	1978	1979	1978	1979	1978	1979	1978
Number of respondents	1,502	2,007	272	375	429	648	507	606	279	358
Average (median) answer dividing lower income from middle income	$20,679	$19,702	$18,066	$17,372	$19,496	$18,836	$21,162	$19,844	$22,887	$22,907
Average (median) answer dividing middle income from upper income	$42,939	$39,719	$39,236	$34,789	$40,946	$34,888	$42,901	$39,818	$49,213	$51,056

The results from this year's study confirm the wildly exaggerated conception that the public entertains about how much a middle income family makes (or, to put it the other way, what the word "middle" means). There are no responsible estimates of the average (median) family income today that go as high as $20,000 a year, and yet this is where the nation thinks low income ends. Amusingly, the richer you are, the richer you think everyone else is. According to these findings, upper income people have little difficulty thinking of a family that makes $22,000 a year as "low" income (although in their defense, it must be said their lower limit of middle income is down an average of $20 from last year).

The upper limit of middle income is seen by the public as a fantastic $42,939 a year, an income that actually is reported by less than six percent of the respondents to this survey.

This statistically incredible estimate of the dollar boundaries of "middle income" goes a long way to explain what the public means when it says that one group or another is overtaxed. It seems difficult to imagine that very many people misjudge their own annual family income by $10,000 a year or more. It seems more probable that these people are mainly misjudging what other people make. If this is the case, then more than half of the public must see itself as lower income, a group that is not judged to be very much overtaxed. Conversely, the strong sentiment for more taxation of upper income families now can be read as referring to those which earn $43,000 a year or more.●

NATIONAL DIALOG FOR THE BUSINESS SECTOR: WHITE HOUSE CONFERENCE ON THE AGING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 5 minutes.

● Mr. PEPPER. Mr. Speaker, on March 6, 7, and 8, there was held at Palm Springs, Calif., a National Dialog for the Business Sector—White House Conference on the Aging. The chairman of this very significant conference was the Honorable Robert Anderson, chairman of the board and chief executive officer of Atlantic Richfield Co.; and the cochairman was the Honorable Marshall McDonald, chairman of the board and chief executive officer of the Florida Power & Light Co. This conference was a kind of miniconference among leaders of the business sector in preparation for the participation of the business sector in the coming White House Conference on the Aging. Gathered at this conference were an outstanding group of the business leaders of America who over a period of 3 days surveyed all aspects of the part that the business of our country should play in respect to the employment, assistance, and care of the aging.

It was gratifying to me to see, in general, the sincere desire of American business leadership to play a proper and worthy part in providing employment and assistance to the increasing portion of our population which is above 65 years of age. All aspects of the relationship of our aged population to our economy and our national life, including the special needs of the elderly and also the potential of the elderly in the service of the Nation's economy and the Nation's life were considered. The two chairmen, Chairman Anderson and Cochairman McDonald gave magnificent leadership, not only in convening, but in conducting this most significant dialog. Both delivered outstanding addresses to the conference. Cochairman McDonald in his able and warmly received address treated the problem as a whole and dealt knowledgeably and ably with the various phases of it. His outstanding address was, I think, typical of the sentiment of the business leaders of our country, who were assembled there—indeed, of the business leaders of our country in general. I am sure every Member of the Congress and those who read this RECORD who share the general concern about our duty to the elderly and about our expectations from them will profit immeasurably from reading Cochairman McDonald's address. We in Florida are very proud of Mr. McDonald as an eminent business leader who is equally distinguished for his civic leadership and his contribution toward his serving of the public interest.

Mr. Speaker, I include at this point in the RECORD the commendable address of Cochairman McDonald:

THE AGING OF AMERICA: IMPLICATIONS FOR CORPORATE POLICY

(By Marshall McDonald, Chairman of the Board and Chief Executive Officer, Florida Power & Light Co.)

After listening to Dr. Eisdorfer, Mr. Anderson, Mr. Samuel and Senator Pepper, none of us can doubt that the aging of America's population presents both challenges and opportunities. Before we consider some implications for corporate policymakers, I'd like to emphasize the overriding opportunity which this meeting—and this entire subject—offers to us in American business. It is an opportunity which we must not lose by default.

Through this business dialogue and the resulting recommendations to the White House Conference on Aging, we in business have the opportunity to contribute to national policymaking on this issue at a point early in the day. Whatever national policies grow out of the White House Conference, they will have major impacts upon our businesses. Starting right here—right now—we can help influence the direction and shape of these future policies in ways that will be constructive for our customers of all ages. For our employees and shareholders, for our nation and its economic health.

If we fail to make constructive use of this opportunity we shall leave a vacuum which others will be happy to fill. Among these others there are those who do not love us—militant enemies of private enterprise who preach that central government control is the medicine for every illness.

We are all grownups here, and we know that these other voices will be heard. We know that we are not going to get our way—whatever that may be—in every issue and

decision. But we have a great deal to contribute to both making and carrying out sound national policies for the aging. And we have a great deal at stake in making these policies effective for the general good.

Let us face the fact, right at the start, that these are political issues—and rightly so. National policymaking is, by definition, political—a never-perfect and never-ending attempt to define and serve the many interests of a large and marvelously diverse population. And while politics is often referred to as a "Game", there are times when the game isn't much fun. This may be why many business people have been reluctant to involve themselves deeply in matters political.

And yet, we live and work in political times. Consider the number and variety of areas in which we once made purely business decisions, which have now become highly political. Hiring practices, plant siting, work rules, product design, supplier relations and distribution channels, advancement practices, pricing, public communications—in all these activities and many more, where we once measured time and distance and dollars, today we must also weigh pressure groups and count votes. Trained in production, finance, marketing or law, as many of use are, we have now come to realize we must also study politics.

We could spend the day discussing whether this turn of events is good or bad. But that would be pointless. Like it or not, we do live in political times. It is our business to become active in the political arena.

This is why the opportunity here presented to us—the opportunity to help shape America's policy on aging—is one we must accept. In fact, let me list that first among the implications for corporate policy presented by the aging of America's population. Corporations must concern themselves with the issues of aging, even though the subject is fraught with, political considerations.

This willingness to include the issues of aging in our corporate policymaking should be, then, the first statement that goes forth from this dialogue to the White House conference. But, right alongside it, in my opinion, should go another statement, and the substance of this second statement should be: Let business meet the issues of aging in those areas, and in those ways, that are appropriate for business.

Permit me to expand on this thought. As we have already heard, and will explore further during the remainder of this dialogue, the issues of aging have many ramifications—economic physiological, psychological, sociological, moral and legal, to mention a few. Corporate business—as business—is not always and in all aspects the appropriate mechanism for addressing all these ramifications.

For example, we must recognize and adapt to the physiological realities of aging. But business—as business—is not the appropriate mechanism for providing health care.

Similarly, business must always deal with aging workers and customers on a high moral plane. Indeed, business should always be sensitive to moral issues, and I would hope the vast majority of us have always been so. But business is not the appropriate mechanism for redressing moral wrongs done to the aging in other spheres of life.

Among those dedicated to the destruction of private enterprise, some may say statements like these prove that business is heartless and unfeeling. Even among the well-meaning, some simple souls seem to believe you can lick problems with slogans. They too may claim we are abdicating our social responsibilities.

To these people, I suggest a line of thought borrowed from one of my associates, who recalled a college professor's discussion of the concepts "good" and "bad." His professor pointed out that a watch is designed for telling time, and a hammer is designed for driving nails. You can use a watch for driving nails, if you are so inclined. But it isn't very good for the purpose. Nor will you do much good for the watch's function as a timepiece. Similarly, if the Nation tries to use business for purposes not appropriate to business, we will not achieve the desired good results . . . and in the process, we will lessen the ability of business to do the good which it is best fitted to do.

This leads us to the "good" things—the desirable things—that business is best fitted to do. In our economic and social system, private enterprise business provides the mechanism for making available to people the goods and services they want . . . and to do this, business employs the resources of society—human and material—in the most efficient socially acceptable ways that are practically achievable.

In a very literal sense, these are the social responsibilities of business. And despite what you hear from the Ralph Naders and the Barry Commoners and the academic socialists and the parlor marxists, despite our own human shortcomings and occasional lapses, one unarguable fact stands out: At no other time in history, and under no other economic system ever tried by mankind, have these social responsibilities been discharged as well as they have been by American private enterprise in our lifetime.

What we must explore during this dialogue—and what we must address in our corporate policymaking in the years ahead—is how in doing its work, business can meet the conditions created by the aging of America's population.

It is for you to discuss the specifics. My role is to suggest lines of thought and stimulate discussion. With regard to the first of those twin business responsibilities providing—the goods and services needed and wanted by aging Americans—I would suggest that the structure and methods of corporate business are already well designed to do the job.

We have all heard and read that America's older people, considered as a market, are becoming significantly more numerous. We see the older American looming significantly larger as a segment of the total market. And we learn that older Americans control the spending of significantly greater sums of money than ever before. In a market economy, these facts alone guarantee that corporate policymaking will pay great heed to older Americans when forming decisions about products and services.

Now, however, we come to that second social responsibility and function of business—employing the resources of society. And specifically the human resources of society, in the most efficient socially acceptable ways that are practically achievable. Here we do indeed have work for corporate policymakers. Together with the aging of the American population we see the aging of the American work force. And this does present policy challenges and opportunities for corporate business.

If business is to meet these challenges and turn these opportunities to the advantage of our society as a whole, one thing we do not need is the development of an adversary relationship between business and government or between business and single-issue pressure groups. We have seen too much of that in the past, and it has hindered the nation's progress in meeting earlier challenges. As someone has said, there is a world of difference between the poor and the poverty activist, between the nature-lover and the militant environmentalist, between the consumer and the professional consumerist. In each instance, the former needs a problem solved, while the latter needs the problem.

We must not allow that to happen in addressing the issues of aging and the aging worker. We must have sincere good will and perceptive recognition of its own best interests on the part of business. We must have understanding, realism and a sense of partnership on the part of the aging and their advocates. We do not need—the aging will not benefit from—a battle of slogans or a fog of poorly written law and regulation.

For its part, business must learn a great deal that will be new to us. We must be willing to change some policies and practices that have become enshrined in custom. We shall have to reexamine the whole structure of retirement, social security and pensions.

Just a week ago we heard a special commission recommend that every business be required by law to fund pension plans for all employees to the extent of three percent of the total payroll. It is neither my task nor my intention to delve into all the complexities implicit in this seemingly simple proposal. Just let me pose a question: What effects will this have on companies like my own, which already offers an employee benefit package—including pensions—that raises total payroll costs about 40 percent above wage costs alone?

While we speak of pensions and retirement, consider the matter of keeping older people in the work force. In many ways this would be a great opportunity for business. Much as we abhor generalizations, there is evidence that older workers can be more reliable, more productive, more quality-conscious.

But the general statistical trend of recent decades shows workers choosing to retire at ever-earlier ages. Some studies show one or two years of variation from this younger-retiring trend. But are they just incidental blips in a downward line?

If so, if people are choosing to retire earlier, what are the implications? Can business develop policies that will keep these workers productive longer? Should we try to do so? With the well-known bulge from the "baby boom" passing upward through the age ranks, should it become a national priority to keep older workers in the work force? And if so, will Government adopt constructive policies that encourage corporate attempts to achieve this goal?

From these broad, national issues we can move to questions at the individual level. The scientific experts tell us that different people age at different rates, that we make a serious mistake when we generalize about "people over 60" and "people past 65."

But these same scientists tell us they are a long way from having reliable methods for detecting and measuring these differences in aging rates among individuals. And this is precisely the sort of information business must have if we are to make the best use of older workers—the best use from their own point of view, from the corporation's point of view and from society's point of view. We must know whether this man at 60 can no longer handle his stressful job, whether

that woman at 65 is sharper than ever, and getting better rather than older.

You need only read the job ads in the Wall Street Journal, or skim a few issues of business magazines, to see that human resources management is one of the liveliest areas of corporate concern today. Dealing with the challenges and opportunities presented by aging will make it more so. Every well-managed firm has programs and policies to identify rising talents in their 20s and 30s. We go to great lengths to place these people where they can best use and develop their abilities.

Now we may want to consider making human resources assessment a continuing process, throughout a worker's career. Corporate policy may seek to identify the point at which an individual needs retraining. And—again presuming that the joint interests of society and the firm indicate keeping workers on the payroll longer—what should be our policy when assessment shows that a worker is no longer rising in capability?

It has been the almost universal assumption that an individual's career—measured in worth to the company, pay and assigned responsibilities—could be graphed in a relatively straight line that keeps ascending from left to right. What if this imaginary graph shows a peak around age 45 or 50, and a decline in abilities after that?

Can we, should we, move this worker's pay and responsibilities downward to match his or her declining value to the firm? Will the employee stand for it? Will society stand for it?

Would everyone be better off if we discharged the employee, because the present workplace climate seems to stigmatize one who is perceived as moving downward? Alternatively, should corporate policy seek to change the internal climate—at every level from chairman to charlady—so that there is a stigma only when worker, job and pay do not match?

We've touched upon only a few of the corporate policy questions that will be raised as we meet the issues of aging. Other policy areas that must be examined—or perhaps, reexamined—will include the possibility of greater reliance on part-time workers.

We shall have to learn more about the motivations that stimulate older employees, more about the frictions that may develop between a growing force or older workers and a smaller number of younger workers, eager to advance in pay and position, more about what happens when older employees have younger supervisors, and whether something different happens when older male workers get a younger female supervisor. We may have to revamp our views on absenteeism, perhaps learning that there are different kinds of absenteeism.

We may have to abandon completely the tacit policy in many firms of "carrying" the employee whose capabilities decline after age 55 or 60. When we find people in our organizations holding positions beyond their abilities, and holding those positions solely by length of service, we must acknowledge that the organization has failed these employees. Here, again, the answer may be a policy of continuing reassessment, of retraining and reassignment.

This brief review makes it clear that the issues of aging will present the U.S. corporation with many questions . . . and no easy answers. But we in business are not alone in this predicament. As America's population ages, equally difficult questions will face government, labor and all our social institutions. In meeting the needs of aging Americans, we must not ignore the needs of all Americans—and this includes the needs of future Americans.

Looking to the future, however, is nothing new for Americans, nor for American business. What we must now learn—and this is new—is to look to a future in which older Americans will play a much more important part than they have in the past. It is my conviction that business will do its share in preparing for this future. We shall do so, if for no other reason than that it is good business to face reality. And the aging of America is a reality.●

ON COLLISION COURSE: MX MISSILE AND ENERGY DEVELOPMENT IN WEST

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. BEDELL) is recognized for 5 minutes.

● Mr. BEDELL. Mr. Speaker, one of the most significant—but least publicized—objections to the MX/MPS missile system is the harm it will cause to numerous energy projects in the West. For this reason, I wish to call my colleagues' attention to a March 31 article in the Christian Science Monitor entitled "On Collision Course: MX Missile and Energy Development in West."

The article points out that despite "head-to-head competition for limited manpower, capital, and materials to an extent unprecedented in U.S. history * * * (there is) little apparent recognition of the potential conflicts and adverse effects of 'fast-tracking' both." The Rocky Mountain region is already gearing up for intensified oil and gas production, coal mining, and synthetic fuels development. If the region is then forced to cope with the MX/MPS basing mode—the largest construction project ever attempted—the social and economic strain would be prohibitive.

The Western Governors' Policy Office (WESTPO) has now completed, a first time study of the joint impact of MX and new energy projects. In the words of Nevada Gov. Robert F. List, the study confirms "important and sobering facts regarding * * * problems that could result in inflated wages, play havoc with cost estimates and budgets, and result in costly construction delays."

I urge my colleagues to read the WESTPO study and to reevaluate their MX positions in light of its important conclusions.

I also recommend a Christian Science Monitor editorial also published in the March 31 edition. The editorial is entitled "The MX Monster—Doubts From Those in the Know." It reviews the doubts expressed by both President Reagan and former CIA Director Admiral Stansfield Turner; then concludes that—

The burden is on the Defense Department's new review committee to come up with overwhelming reasons—currently not evident—if it is to recommend going ahead with the project.

The article and editorial texts follow:

[From the Christian Science Monitor, Mar. 31, 1981]

ON COLLISION COURSE: MX MISSILE AND ENERGY DEVELOPMENT IN WEST

(By David F. Salisbury)

LAS VEGAS, NEV.—Energy development and the proposed MX missile deployment are on a collision course: The two would be in head-to-head competition for limited manpower, capital, and materials to an extent unprecedented in US history if the multibillion-dollar weapons system were given the final go-ahead.

Yet efforts to promote the twin national goals of energy independence and national defense are proceeding independently in Washington, with little apparent recognition of the potential conflicts and adverse regional effects of "fast tracking" both.

This, at least, was the general feeling among those attending a conference here on MX and energy sponsored by the Western Governors' Policy Office (WESTPO). More than 300 representatives from state and federal agencies and the private sector met last week to define the problems that can be expected and come up with recommendations on how best to deal with them.

"We are dealing with an unbelievable, with a profound problem, the true size and character of which we are just beginning to understand," proclaimed Utah Gov. Scott Matheson (D).

The Rocky Mountain region, which emerged in the 1970s as the fastest-growing area in the country, faces the prospect of coping with the largest construction project in the history of mankind, the basing of the MX missile system and greatly intensified oil and gas production, coal mining, and synthetic fuels production.

For some time local leader's such as Colorado Gov. Richard D. Lamm (D) have been worried that the region is "willing but not ready" for the added pressures of synthetic fuels production. With this conference, which concentrated on manpower issues, Western leaders grappled for the first time with the joint impact of MX and new energy activities. They found the picture overwhelming.

The conflict in demand for labor—should all the projects currently being planned in this area proceed as scheduled—was outlined by Nevada Gov. Robert F. List (R) He summarized the results a just completed manpower supply and demand study for WESTPO.

"We have discovered some important and sobering facts regarding the manpower issue in the West. We face problems that could result in inflated wages, play havoc with cost estimates and budgets and result in costly construction delays—unless we plan for meeting our manpower needs early in the process of development and deployment," Governor List told those attending.

According to this study, direct employment demands in the region for all energy activities will grow by 66 percent, from 147,000 to 247,000 people in just five years. Currently, nonenergy mineral mining and smelting employs about 135,000 and also is expected to grow substantially. On top of this, MX missile deployment will require another 28,000 workers in 1986.

In total, the WESTPO study projects a demand of 128,000 new jobs by 1986, grow-

ing to 2.4 million in 1990. This is far more than the regional population can provide. "In the future, two out of three new workers may have to be recruited from outside the region," List anticipates.

Competition for people with certain skills between MX and energy projects will be particularly acute. WESTPO analysts see demand for engineers increasing by 15 percent as a result. Yet, engineers are already in short supply nationally. Experienced managers, draftsmen, electricians, operators of earth-moving equipment, carpenters, and iron workers are likely to be needed in record numbers as well.

List is particularly concerned about the "whirlpool effect" that accompanies a project that absorbs a large percentage of the available work force. This is the tendency of these "superprojects" to vacuum up all available workers in the area. Local businesses, farmers, and ranchers cannot compete with the wages offered by the construction projects. They are forced to hire unskilled transients attracted to the area for inflated salaries or go out of business. At the least, the situation is inflationary. At worst, the area's permanent economic base withers away under the pressures of the project.

And competing for workers may not be the worst problem local businesses face. They also could find themselves competing for capital, with the cost of borrowing money driven up substantially.

Says Bruce Rockwell, chairman of the Colorado National Bank: "We are now asking ourselves who the nation's No. 1 enemy is: the Soviet Union or inflation?"

Simultaneous construction of the MX and development of a synthetic fuels industry will put tremendous inflationary pressures on the entire US economy, Mr. Rockwell believes. "If I ever saw built-in inflation, energy development and MX are it," he says.

Public control of these large construction projects will monopolize large amounts of capital and drive the cost of money up for all other forms of enterprise, he pointed out. Delays in these projects caused by manpower limitations or other problems will only increase their inflationary effect.

THE MX MONSTER—DOUBTS FROM THOSE IN THE KNOW

"It's so elaborate, so costly, and I'm not sure that it is necessary or would be effective."

Thus did President Reagan sum up the doubts of many about the huge MX siting plan bequeathed to him by the Carter administration. His words were reported in a Washington Post interview on the same day that the New York Times Magazine carried a persuasive article, "Why We Shouldn't Build the MX," by Stansfield Turner, retired US Navy admiral and former director of the Central Intelligence Agency.

Presumably no two people in the United States have had more information on the Soviet arms buildup available to them. When they question the MX project as a way to counter the Soviets, who is prepared to contradict them? The burden is on the Defense Department's new review committee to come up with overwhelming reasons—currently not evident—if it is to recommend going ahead with the project. Meanwhile, taxpayers are shelling out $4 million a day for what could turn out to be the kind of white elephant no Republican would want to be remembered for.

Though Mr. Reagan favors the MX (missile experimental) weapon itself, it was good to see him confirm that the siting of it is still a wide-open question. The present basing mode would shuttle each of 200 missiles among 23 launching shelters for a total of 4,600 shelters in Utah and Nevada.

Admiral Turner warns that it is not only the magnitude and cost of the project that must be closely examined but the question of whether it will be suitable for US needs in 1989 or 1990 when it would be operational. No alternative should be overlooked, including those that do not require a new missile.

"At the very least," the admiral argues, "the MX should be scaled down so that we could deploy it in more ways than just in fixed shelters. It is, literally, a case of smaller is not only cheaper but better."

It is hard to gainsay the Turner preference for a diverse mix of missile systems. They could include new intercontinental cruise missiles (with greater accuracy and penetrating power than ICBMs), mobile ICBMS (for trucks, ships, planes), and existing SLBMs (submarine-launched ballistic missiles). Any new ICBM should be small and light enough to be carried on various vehicles.

Such a program would not only address such MX aims as reducing the vulnerability of ICBMs to surprise attack, increasing US ability to eliminate hardened targets, and enhancing the perception that the US is doing something decisive to deter the Soviets. It would also address what ought to be the overriding purpose of US military policy: to stabilize rather than destabilize the strategic balance between the US and the Soviet Union. To go for the mix rather than the MX would be less threatening to Moscow, would be less of an invitation for Moscow to proliferate warheads, and would lessen the "feeling that hair-trigger responsiveness is necessary"—which the admiral calls perhaps the single most important element to keep out of the design of a weapons system.

If the MX is a mistake it would be a whopper—up to $70 billion by General Accounting Office estimate; much more, according to some critics.

The President's caution is wise.●

REQUESTING MODIFIED CLOSED RULE FOR FIRST BUDGET RESOLUTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. JONES) is recognized for 5 minutes.

● Mr. JONES of Oklahoma. Mr. Speaker, I take this occasion to advise my colleagues that I intend to request a modified closed rule for the consideration of the first budget resolution for fiscal year 1982.●

MR. PETERSON'S WARNING

(Mr. LAFALCE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. LAFALCE. Mr. Speaker, the Reagan administration is charging full speed ahead with an economic program that it promises will end inflation and restore America's economic vigor. I wish the President Godspeed in his endeavor. I do that even more so after reading a speech that Peter G. Peterson, chairman of Lehmann Bros. Kuhn Loeb Inc., and Commerce Secretary during the Nixon administration, gave last month to the Women's Economic Roundtable in New York City that raises serious questions about the assumptions on which President Reagan's economic game plan is based and the plan's intended results. The criticisms are all the more compelling because they are voiced by a highly respected member of the financial community and a former Republican Cabinet Secretary.

Let me briefly summarize his main points. Although Mr. Peterson noted the "remarkable consensus that currently exists to fight inflation and spur investment," he expressed doubts that the President's program really meets the country's needs. "Amidst all the excitement, there are growing signs of disquiet—however respectful and discreet—and growing doubts that somehow the Reagan program really fits the Reagan consensus," he said. Along with "its great promise," he added, the program has "potential for disappointment."

A major weakness, according to Mr. Peterson, is that the economic measures are linked together "with assumptions stretched tight to the point of snapping apart." The reason, he suggested, is that the President has not considered that the public "might well support" stronger measures that "would not have been thinkable" during the campaign. Those measures include dealing with inflation-indexed social security and other transfer payments. By exempting those payments along with defense and debt interest expenditures from cutting, the President severely limits those areas in the budget that can be cut, he warned. The result is that the administration will be cutting an array of "terribly popular" or "terribly essential" outlays "fully in half" by 1984. Thus, "the President will be climbing a steep hill of ever-decreasing budget savings at ever-increasing political costs," he predicted.

Moreover, Mr. Peterson questioned the overall economic goals of the administration. Each of the goals, taken separately, is not implausible, he said, but taken together, they strain the imagination. "Never in history * * * have we accomplished rapid economic expansion together with rapidly declining inflation," he said. He found "a long and disturbing shadow" is cast by the variety of things that can go wrong.

On tax policy, Mr. Peterson called for shifting the emphasis to investment incentives from personal income tax cuts. Following is the text of Mr. Peterson's speech:

ANOTHER VIEW: THE REAGAN CONSENSUS VERSUS THE REAGAN PROGRAM

(By Peter G. Peterson)

Both the alumni and we drop-outs of the Nixon Administration will have to admit we were never overly offended by hyperbole, never reticent to announce still one more "historic first". We were even more reluctant to admit that some of our bloated historic firsts were nothing more than MEGO's, the Nixonese aphorism for "my eyes glaze over". Our critics—there were a few even we admitted—would say that perhaps our only "historic firsts" were our MEGO-like aphorisms.

This President, on the other hand, has coalesced a remarkable group of constituencies—a new and unmistakable Reagan consensus—a true historic first, and the most sweeping reversal in the direction of national economic policy since the New Deal.

As broad and deep as this consensus is, and as relieved and enthusiastic as the country is about a more honest sense of its past and a more hopeful sense of its future, one can nonetheless sense an unexpected mix of conflicting emotions. Amidst all the excitement, there are growing signs of disquiet, however respectful and discreet, and growing doubts that somehow the Reagan program really fits the Reagan consensus.

Let me try to put it more generously and perhaps more fairly. Could it be that the Reagan consensus of Campaign 80 had such momentum that a new consensus, the consensus of 1981, has since emerged? I sense that growing numbers of Americans—enormously grateful that this President defined and led this remarkable new consensus—wonder if last year's program is up to this year's consensus, whether the political commitments of Campaign 80 are really adequate to the new consensus of the Spring of 1981.

Even those who admire the general trust ask: Does the program go far enough—is it too cautious—in some critical respects? Does it go too far—is too much an all-or-nothing gamble, too much a high wire act—in others? I guess I am among those who ask these questions. And yet as I do, I wonder if I am sufficiently appreciative of the political achievement that the Reagan consensus represents.

Let's first analyze the Reagan consensus and then let's analyze the Reagan program against that consensus. In so doing, I shall define what I see as its great promise as well as its potential for disappointment.

May I say at the outset that I am a noneminent, non-economist. I know I am not an economist because I wouldn't know a model if it shook hands with me. From my standpoint, my demise in Washington was premature, untimely, and inelegant—but all would agree I clearly established myself as nonpolitician—fat calves and all.

My only defense for being here is that a charming woman, Maria Rolfe, asked me. I can't imagine what your defense is for being here—unless it's that if the economists and politicians got us where we are, what can we lose by listening to someone who is neither?

Let's start not simply by thanking this President but by defining the elements of his remarkable new consensus, one that no politician—other than perhaps he—really thought possible, at least this soon.

Reagan Consensus Number 1: Inflation. Clearly, the most basic consensus is that inflation is truly Public Enemy Number 1: our long national ambivalence, like other nightmares of earlier years, is over.

Sure, inflation discourages households from saving; businesses from investing; and lowers returns on productive investments. But most of all, it has made zero growth a reality. This used to be almost romantic to talk about, but I don't hear anyone celebrating now that it is here. No wonder the public insists that inflation be halted, even if it costs us all in the meantime; no wonder the consensus diagnosis is that inflation is the ultimate disease of our society at home and our dwindling credibility abroad.

Reagan Consensus Number 2: Government Spending. This most basic Reagan consensus has led to a further consensus: that if inflation is public enemy number one, then government spending (and its kissing cousin federal deficits and federal borrowing—now about one-quarter of all credit borrowing) is the number one cause of it all. Total government spending has ballooned from about one-quarter in 1965 to over one-third of our gross national product in 1980. It all happened despite declining relative military expenditures and does not include the recent explosion in federal off-budget credit activity. Since 1965 nondefense federal spending has increased 44 percent per year faster than our GNP. And federal transfer payments have increased 67 percent per year faster than GNP.

Ironically, this fastest-growing category has been excluded from the Reagan budget cuts. In fiscal year 1981, for example, the directly and indirectly indexed transfer programs account for more than 40 percent of all federal spending. When we consider that defense spending accounts for another 25 percent of the budget and that interest payments on the federal debt for almost 10 percent, it quickly becomes apparent that—if the indexed programs are excluded—the vast majority of the budget cuts will come from less than 30 percent of the budget.

While this is a significant enough problem in fiscal year 1982, it becomes extraordinarily difficult in future years. President Reagan expects to increase defense spending, after adjusting for inflation, by more than 8 percent per year. If one assumes that the indexed programs and interest on the debt maintain their current shares of the budget, than the remaining 30 percent must be cut by 10 percent per year simply to keep federal spending in pace with inflation. The President's goal, of course, is to keep federal spending growth substantially below the rate of inflation. This would require that this 30 percent of the budget be cut fully in half by fiscal year 84.

So well has OMB already plundered this corner of the budget, however, that this 30 percent remainder is either terribly cut-up already (such as state and local grants), terribly popular (such as national parks) or terribly essential (such as the FBI and CIA). The President will be climbing a steep hill of ever-decreasing budget savings at ever-increasing political costs.

Small wonder, given the exclusion of the major transfer payment programs, that it is necessary to slash highly sensitive programs by draconian percentages. Even I—a "compassionate conservative" if you will forgive the oxymoron—twitched the other night when a compassionate liberal—perhaps that's a redundancy, not an oxymoron—made the argument that she assumed that we Republicans knew big slashes in sex education, for example, would result in big increases in illegitimate children, unwanted by mothers, unwanted by society, and enormously costly to us all. Was this, she asked, a supply side effect we supply siders were after? It doesn't take many questions like that to get me thinking hard indeed about some of our enormous transfer payment programs.

Reagan Consensus No. 3: Savings and Investment. The third Reagan consensus, it seems to me, is that we are sadly behind the world in savings and investment. Today, the American voter sees the connection between the Japanese auto worker who saves up to 25 percent of his earnings, unparalleled levels of automation and robotics, and Toyotas multiplying not on the docks of Tokyo, but on the streets of America. Japan, believe it or not, with an ecomony half the size of ours, began in 1980 to spend more in absolute terms on plant and equipment than the U.S.

I believe the American voter could also be persuaded that our stagnating investment in human capital, especially in research and development, is a lamentable development as well.

You know the trends as well as I on the declining share of our GNP going to R&D and the growth of the R&D investment in Japan and West Germany. You may not know some of these numbers. In the last fifteen years, Japan and West Germany have more than doubled their output of scientists and engineers. We have gone down 5 to 10 percent. On the other hand, I am something less than profoundly reassured to read the other day that our output of lawyers has gone up 83 percent in the 1970's.

The Commerce Department has analyzed the patent numbers between 1968 and 1978. You might be interested in knowing that whereas U.S. patents declined about 10 percent in that period of time, Japanese patents went up 372 percent during that period. And in four major high-technology fields, the trends are if anything stronger. Now of course you would have expected a higher relative Japanese rate of growth, given our large base. But it is certainly not clear to me that I would have expected our patents to have declined in absolute terms. As a matter of fact, if we look at what we call the patent balance—that is, the number of patents being issued to them versus us, the counterpart of the trade balance—you may be interested to know that beginning in 1975 the patent balance also shifted in the direction of Japan.

Finally, at the Commerce Department we spent a lot of time looking at something called technology-intensive products which were the products in which America has typically been the world leader. This last year it is interesting to me to see that Japan has the largest absolute surplus of high-technology products of any country in the world, including the United States.

And finally a statistic that a few of you at least may remember. Something that has always intrigued me in the study of innovation has been the role of the small entrepreneurial companies which classically have accounted, in our country at least, for about 50 to 70 percent of the major commercial innovations. I'm talking about the Xeroxes, Polaroids, Texas Instruments, Hewlett Packards and so forth. I went back to get the numbers of the firms that have come to the public market for funds and to see how many are in this small category. In 1970 we had 548. In 1978 (which came up a bit from

its low point) we had 29 sadly enough. No wonder I have to squint hard to see the budding Xeroxes, Texas Instruments and Hewlett Packards of the eighties.

Small wonder that responsible analysts of our economic malaise tell us to find 4 to 5 percent more of our GNP for investment in our economic future.

Reagan Consensus No. 4: Defense. The fourth Reagan consensus concerns increased national defense. I understand its inevitability, but that doesn't stop me from being saddened. As the U.S. Cabinet officer responsible for negotiating a comprehensive commercial and trade agreement with the Soviet Union, I felt, and still do feel, that a litmus test of the effectiveness of detente has reduced Soviet and U.S. military spending.

I've always gotten confused about rubles and related extrapolations—it's all Russian to me. I asked by new colleague in the firm, Jim Schlesinger, if he could give me the numbers in more tangible terms. In this set of charts, we show numbers of tanks and armored vehicles and tactical fighters and helicopters and submarines and virtually every other major category. Both the current inventory and the production rate for the last five years is somewhere between one and a half and three to one in favor of the Soviet Union. I can assure you that a place where even the experts acknowledge our limited intelligence is the Soviet Politburo. Thus, for us to try to speculate on all the Politburo scenarios on why this vast increase in Soviet defense spending is going on, given their urgent need for non-defense resources, is not a risk that I think any leader of a free world country can take. Again, I say this as a non-eminent, non-defense expert. I will pass on whether some savings may not be possible from the current defense projections. But we should all assume that the numbers will be up dramatically.

Now, against this Reagan consensus, what might be said about the Reagan program?

How confident are we that budget deficits will be as "low" as they are projected? Even given my enormous respect for the magnitude of the current and indispensable budget cutting effort, I say the risks of a much larger budget deficit are unacceptably large.

A government friend of mine—off-the-record as they say—gives me the scenario by which the government deficit with the proposed program could hit $100 billion? Even the thought of it sent shivers down more than my spine. How did he get that grotesque number, you might ask? First, he simply made the plausible (should I say optimistic?) assumption that just a few budgetary miscalculations and just a few failures to pass all of the cuts through Congress will reduce next year's budgetary savings to $35 billion. Second, he assumed that the Fed would hang tough in its current program to control monetary growth, a program fully supported by both Mr. Volcker and President Reagan. By reducing the inflation rate slightly from current projections, the tax cut revenue losses would increase from $44 to $65 billion. Third, given the tax cuts, the increased defense expenditures, and the upward trend in GNP growth, he supposed that interest rates might not decline as rapidly as hoped—adding $5 billion more to federal interest payments on the national debt. Finally, he added a few, normal military overruns and a slightly higher unemployment rate, adding $4-5 billion in outlays per percentage point. There we are: facing a deficit in excess of $100 billion, by far the largest in history. What effect, one might ask, would such an event have on the growth expectations which this administration so rightly emphasized?

In my business, I have learned to respect the cruel implications of compound probabilities. Each of the program goals alone—a high real growth rate of 4-5 percent per year, a rapidly declining inflation rate to 5.5 percent in 4 years, a decline in interest rates from 11.5 percent to 7.0 percent in 4 years, or a drop in the unemployment rate from 7.8 percent to 6.4 percent—is not implausible. We have accomplished each before. Never in history, however, have we accomplished rapid economic expansion together with rapidly declining inflation. Morever, I don't believe we have ever achieved the record rates of money turnover that are implied if the rigorous money supply growth targets are to be met.

I would never presume to say that all this could not happen. I think I understand the supply-side contentions that lower marginal tax rates will serve to expand our real output and feed tax sheltered and underground income back into the taxable, productive economy. It's just that the list of "what ifs" casts a long and disturbing shadow.

Can anyone really guarantee, for example,

That all present and presumed future budget cuts will make it through Congress?

That the federal government program cuts will not significantly increase the burden to other federal, or state and local programs?

That enough of our ailing heavy industries, outcompeted in the world market, will immediately and sufficiently contribute to reduced unemployment?

That the rigidity of long-standing labor and credit contracts may not slow the decline in inflation?

That the rapid rise in direct military expenditures may not exert a unique inflationary pressure?

That international events do not shock our economy with unexpected price hikes? Most importantly, even a minor cut-off in oil imports?

This leads me painfully but inescapably to the requirement that we need even larger and more substantial budget cuts. We need them to protect us against the distinct and even likely possibility that at least some of the budget bets are over-optimistic. We are, after all, not betting Chrysler; we are betting the country.

As I contemplated where one might look for such cuts—given the extraordinary job Mr. Stockman has already done—my eyes fell on a sentence in the President's Economic Program that I at least did not include in the Reagan consensus. "The highest priority will be given to defense and social security benefits, including cost of living protection."

My general suggestion is that we should—we must—reconsider seriously the untouchability of indexed increases in entitlement transfer programs. Minor indexing revisions here can yield enormous savings. The public, as I have said earlier, is generally aware that these payments constitute the fastest-growing portion of federal expenditures and thus are logical candidates for any fair, across-the-board cutting. This year their size has grown to more than half the entire budget, and the fact that most of them are indexed accounts for why now more than 76 percent of the federal budget is considered "uncontrollable" in more than just a legal sense. They are, in other words, susceptible to yearly increases without any congressional action.

On the question of fairness, most economists seem to agree that the Consumer Price Index, the legal basis of indexing, has thus far generally risen at a pace exceeding the true cost of living—in particular, the cost of living of senior citizens. Certainly, the recent 14.3 percent tax-free increase in the case of social security retirees far outpaced the wage gains of the average worker, which went up only 9 percent pre-tax. May I remind you that only an insignificant percentage of industrial workers have fully indexed pensions. Most have no indexing at all, or only partial indexing, and usually ad hoc, after the fact.

Just for the sake of illustration, let us assume that 85 percent of the CPI, rather than the full CPI, would be a fair compromise to both equity and affordability. If only the current $195 billion in formally-indexed federal entitlements were adjusted to this 85 percent of CPI rule, then (assuming an ongoing 10 percent inflation) nearly $3 billion would be saved in fiscal year 1982 alone, and an accumulated $18.7 billion by 1984.

This line of budget thinking should extend, in my view, to Medicare, veterans benefits, and federal employee pension plans. As Chairman of the Quadrennial Commission on Federal Pay, I was appalled to find that the levels of unfunded pensions were not only enormous but had not even been estimated. We stopped counting at $100 billion.

A critical item for Consensus 1982 is major reform of our virtually bankrupt social security system—age limits, taxing, and very important, private savings oriented retirement alternatives. I have seen estimates of our social security unfunded deficit that push $1 trillion—enough to fund much of what this country needs in terms of increased investment and R&D.

There is another area in which major additional "budgetary" savings may be possible even though much of it does not appear in the federal budget, i.e., regulatory costs. I think it is obvious that ad-hoc, executive-level evaluations of thousands of regulations will take more time than we really have. We are dealing here, after all, with enormous bureaucracies which are entrenched behind rigid enabling statutes and which, on the basis of mountains of statistics, are not just allowed but required to develop, draft and supervise thousands of new rules yearly. I humbly submit that regulatory reform necessitates that general priorities be spelled out and that Congress be asked to formulate some form of a regulatory budget. This done, it might be possible, for example, as part of this national effort to release resources to the private sector, for the executive branch and the Congress to agree to across-the-board regulatory savings target of $25 billion were this effort carried out, I suspect that few of you would doubt that, say 25 percent of private sector compliance costs could be cut without material harm to our safety, health, or environment. But some of you might be surprised to learn that this would save our economy over $25 billion, and release for example, enough funds to nearly double private sector research and development expenditures by all companies.

Now, let us move to another critical leg of the Reagan consensus; the need to save and invest much more—I would say 4 to 5 percent more of GNP.

Against this standard, 78 percent of the proposed tax cut is provided to individuals and only 22 percent for business investment. There is little reason to believe, at least if history is a prologue, that across-the-board income tax cuts will provide the stimulus needed to reach that 4 to 5 percent investment goal.

Now you might say, well, here's a Wall Street fat cat—or maybe just a fat calf—arguing for more investment-oriented tax cuts. How predictable! First, let me say that I would only advocate this at the expense of reduced personal income tax cuts, and that the only difference between the two is that one you can enjoy now and the other you must wait and enjoy later. Let me assure you that fat cats don't like to wait more than anyone else. Second, may I report that the Democratic membership of the Joint Economic Committee of Congress—hardly an appendage of Wall Street—has recommended that fully half of the tax cut be oriented toward savings and investment, so disturbed were they by what current investment trends will do to us over the long haul.

Many have wondered why the President has decided to tie together the different parts of his program with assumptions stretched tight to the point of snapping apart. My own guess is not that he overlooked more plausible spending and investment incentive alternatives. My own guess is that he decided it was the best he could do, particularly in the context of the 1980 political campaign.

But then is then and now is now. And I believe the Reagan Consensus of 1981 might well support savings and investment tax incentives that would not have been thinkable in the summer of 1980. And I think further that President Reagan would welcome the political license to go much further than used to be thought possible.

Even what a live and active Secretary of Commerce—if that is not an oxymoron—thinks on tax matters is not terribly important.

But what if a bipartisan group of ex-Secretaries of Treasury and Chairmen of the Federal Reserve Board (similar perhaps to the composition of the Committee to Stop Inflation) were to be invited by the chairmen and ranking members of the Ways and Means Committee and Senate Finance Committee—working with the executive branch of course—to explore immediately the appropriateness of alternative incentives to attain mutually agreed savings and investment goals? Such a bipartisan group could explore questions such as these:

Why a penalty for unearned income? Our international competitors have never heard of such a thing.

What about a capped personal tax deduction for ordinary interest income? France has one. Japan has a very generous one. We do not.

What about a more integrated corporate tax, whereby investors receive a personal deduction or credit on dividend income to compensate for the corporate tax already paid? Most of our industrial competitors have moved in this direction. We have not.

What about, for that matter, a somewhat lower corporate tax rate? The best, most recent calculations, taking into account inventories, depreciation, and so forth, indicate that ours is among the highest in the industrialized nations. Or what about permitting corporations to depreciate at levels that reflect current replacement cost?

Why not an even further reduction or at least an indexation of our capital gains tax? Germany has no long-term securities gains tax. Japan has no securities gains tax at all. In our system, an investor can be taxed even for a long-term loss.

What about a capped personal tax deduction for net new investments, or a general exemption for rolled-over investments? France has these.

And while we are on the subject of investment and in the mood for rhetorical questions, why, I would ask, are we not doing more to revive the stagnation of our research and development efforts? Since every economist tells me that the economy's return on basic, innovation-related R&D is far higher than the investor's, shouldn't a serious reappraisal of our tax and patent laws be in order?

Could we permit more accelerated write offs of laboratory equipment? Could we provide incentives for small, technologically-based enterprises?

ENERGY THREAT—A CONSENSUS FOR 1982

On the subject of energy policy, we have to recognize that the answer here, like in football, is a good offense and a good defense, President Reagan's decontrol of domestic oil prices, a spur to more exploration and a deterrent to consumption, is an absolutely necessary first step on both counts. Unfortunately, the last time I looked, our domestic reserves were still declining and our oil imports were still flowing in to the recession-adjusted tune of some 8 million barrels a day or 40 percent of our total supply. A strong U.S. posture in the Mideast may also help, but let's face it: our oil lifeline of lumbering tankers still snakes its way through some of the most politically unstable areas in the world. So numerous are the possibilities for trouble that experts on Mideast politics tell me that we would need a miracle to get through the next decade without a minor import disruption, and that we would be very lucky to get by without a major one. Yet the CBO has recently estimated that just a 2 million barrel per day cut-off in 1984 would cost us $146 billion, or 3½ percent of our current GNP. I think you must agree that such a blow would send even the most brilliantly successful economic plan into a tailspin. Even my two esteemed colleagues, George Ball and Jim Schlesinger, agree on the likelihood of future Irans, Iraqs, or worse. I say "even" because they have been known to have different views.

I will now demonstrate my hopeless future as a politician and suggest that a consensus must be built, hopefully by 1982, to move toward a major gasoline tax . . . perhaps phased in over a period of years. Such a tax, I believe, would have enormous advantages. By greatly reducing oil consumption, perhaps by two million barrels a day, it would greatly reduce our vulnerability to future Irans and Iraqs; it would reduce our fierce balance of payments deficits by perhaps 25-30 billion dollars, greatly strengthening the dollar and reducing inflation, and providing funds for indispensable emergency storage or recycling to those who need it. Perhaps it would also finance some of the additional savings and investment incentives that I consider a must.

There is no single major program that is now less popular nor more important. Yet, the same might have been said about capital formation proposals: so popular today, but also unthinkable just a few years ago.

I would strongly commend it to the Women's Economic Roundtable.

INCREASED EXPORTS: DOES ANYONE CARE?

Another high priority but MEGO subject on the nation's economic agenda is the challenge of increasing our world share of exports. This subject of exports reminds me of the philosophy professor who asked his class one day which was worse, apathy or ignorance? A sleepy student groaned, "I don't know and I don't care."

Still, look at the sacrifice being asked of our people in our current economic malaise—living with negative fantasies of a "hopeless" situation with our oil imports and OPEC and how that explains all our problems. I was struck by the obvious fact that between '70 and '78, Japan increased their trade surplus. And as I recall, they import a "little" bit of oil themselves. So I thought it would be interesting to take '70 and '78 and look at how the Japanese economy did it. Sure enough, their oil deficit went up an extraordinary amount in relation to their GNP—some $31 billion in that period of time versus $34 billion in the United States with a much larger economy. However, in addition to the oil deficit, Japan had a food deficit that was roughly $10 billion higher than it was in 1970, and of course that's the area that our country has shown remarkable surpluses. Then we come to resources. Here I was reminded that Japan also had an $8 or $9 billion increase in their resource deficit during that eight year period. Now as you aggregate these, you will see that Japan between '70 and '78 absorbed something like an extraordinary $45 to $50 billion of more deficits than they had in 1970 from oil, food, and resources, And yet they showed a larger trade surplus than when they started.

How did they do it? The answer is clear: their manufactured goods surplus went from $12.9 billion in 1970 to an astounding $76.5 billion by 1978. There are roughly (when we used to count it) 40 to 50,000 jobs per billion export dollars as well as other anti-inflationary implications. And think of how that improvement of some $63 billion—you're as capable of high mathematics as I am—would affect both unemployment and exchange rates, as well as the federal deficit.

We hear almost nothing these days about exports. Even an urgent program to remove endless export disincentives would have a multibillion dollar payoff to our economy.

This President has demonstrated remarkable leadership in creating a uniquely Reagan consensus.

Let's help him and our country by developing bipartisan political support for a comprehensive program that does justice to the principles that underlie that remarkable and very new consensus—broader cuts in spending, including currently exempt transfer payment programs; increased tax incentives for savings and investment, including most emphatically increased research and development, jointly supported major regulatory budget reductions. And let us begin to confront our energy vulnerability by building a new consensus for a major gasoline tax, a much larger emergency oil storage, and a major export drive.

As remarkable as the Reagan consensus is, it could be fleeting, it could evanesce.

The time is now.

APPENDIX.—TAX RATES[1] ON SAVINGS FOR FAMILY (2 CHILDREN) HAVING INITIAL EARNED INCOME OF $40,000 PER YEAR

Calculation as of March 1979	Statutory tax rate on gain inflation-adjusted tax rate on real gain (percent)			
	United States (California)	United Kingdom	West Germany	Japan
Tax on capital gains:				
Stocks and bonds sold now for $3,000 bought for $2,000 in April 1979	54.0	[2]0	[2]19.7	0
Stocks and bonds sold now for $3,000 bought for $2,000 in 1970	21.6	[2]0	0	0
Stocks and bonds sold now for $10,000 bought for $2,000 in 1970	21.6	11.2	0	0
Tax on interest income:				
Past year's interest income on $10,000 of savings, where interest rate equals inflation plus 2 percent	54.0	74.1	[2]0	[3]0
Past year's interest income on $10,000 of savings, where interest rate equals inflation minus 2 percent	54.0	74.1	[2]0	[3]0
Total tax on dividend income (Example: on $2,000 of distributed corporate earnings):[4]				
Payable or witheld by corporation	46.0	52.0	36.0	40.9
Payable by family	[2]26.5	22.1	33.6	17.7
Total	72.5	74.1	69.6	58.6
Tax on estate or inheritance:				
Parents deceased, $200,000 net financial wealth bequested to two children	[5]16.4	[6]25.0	1.8	6.1

[1] Assuming all standard deductions; including both central and local taxation; California residency for U.S. current dollar amounts are converted at current exchange rates; prior dollar amounts are domestic currency fractions of current dollar amounts.
[2] Due to or including theshold deductions.
[3] Interest from savings up to $15,000 in postal savings or current deposit accounts, time deposits, and National Government bonds are tax exempt.
[4] Not inflation adjusted.
[5] Plus State tax and donee's income tax.
[6] Plus donee's income tax.●

WHEN WILL WE FACE UP TO IT AND BAN HANDGUNS?

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. SEIBERLING. Mr. Speaker, I am sure that all Members of Congress, whatever their philosophy and political affiliation, were profoundly shocked and grieved by the attempted assassination of President Ronald Reagan, and I am sure that we all share a sense of joy and relief at his survival and apparent successful progress toward complete recovery. President Reagan is not only a fine human being but, as the highest elected official in our democracy, a living embodiment of our democratic system.

Any violent assault with a deadly weapon on any individual is not only a tragedy for that individual but strikes at the rule of law, which is the foundation for a peaceful and civilized society. But such an assault on the President is an attack on every American.

Even when such an assault is unsuccessful, it rocks our democratic system and our national security to its foundation. How long will we continue to tolerate the free and easy approach toward easy access to the kind of weapons which put the possibility of such an assault in the hands of any unbalanced or evil person who wants to employ them?

It was said of Mr. Colt, the inventor of the revolver, that he made all men the same size. The handgun is not only deadly at a distance, but also easy to conceal and quick to use. Because of this combination of qualities, it is radically different from a shotgun, rifle, knife, or other deadly weapon.

Many of the articles written and speeches made since the latest Presidential assassination attempt have stressed the importance of tightening up security procedures surrounding the President. Undoubtedly, this is desirable. However, most people would agree that Presidential security should not be tightened to the point where the President is totally isolated from contacts with the public. This would be intolerable in a democratic society and would probably be intolerable to most Presidents. So, unless we can make it a lot tougher for people to acquire handguns, the risk is going to continue largely unchanged.

The Wall Street Journal of April 2 contains an excellent article by Hodding Carter III on the subject of handguns. He points out that the traumas of the past 18 years—the successful as well as unsuccessful assassination attempts, the growing street crime, the mounting number of accidents in the home involving guns—affront one's deepest convictions about the nature of our society. As he puts it:

We are not some Balkan enclave of the late 19th century and we should not govern ourselves as though we were.

Hodding Carter points out:

Ours is the only nation in the world in which any cretin, criminal or conscientious citizen with the price of a tank of gas is entitled to buy the rest of us a ride to oblivion. Not surprisingly, we as a nation have one of the world's highest murder rates and the highest death-by-pistol rate.

Mr. Carter points to the irony that although the majority of Americans want handguns brought under strict control and have wanted it for years, the Congress is still intimidated by the organized gun lobby and that portion of our population who still hang on to the mystique of a frontier society or simply refuse to face the urgent necessity of getting rid of the handguns. He notes that it apparently does not matter to these folks that the trusted sidearm is more likely to bring death or injury to a loved one than to an anonymous intruder nor that more guns are stolen from homes by criminals than are used within those homes against criminals.

I have sympathy for the individual who feels that, in a world where the criminals all carry guns, he may need one for self-defense. However, the answer is not to go back to frontier days when it was necessary to carry a gun for protection. The answer is a massive campaign to get rid of the handgun and rely for protection on law enforcement, made stronger by the disarming of the kooks and the crooks. For those who still feel the need for protection against intruders, a shotgun or rifle will be just as effective, or ineffective, for that purpose as a handgun.

Mr. Speaker, how may more Presidents, public officials, and just plain citizens will be assaulted, wounded, or killed by handguns before Congress is ready to carry out the will of the majority on this issue and ban the handguns, except for police and military personnel.

The full text of the Hodding Carter article follows:

[From the Wall Street Journal, Apr. 2, 1981]

VIEWPOINT

(By Hodding Carter III)

The unsuccessful attempt to assassinate President Reagan, accompanied by the gunning down of three other men around him, inevitably raises anew the debate about national handgun control. We should spare ourselves the sterile ordeal, which is prescripted and preordained.

The arguments are familiar and the positions of most people, including politicians, predictable. After publicly agonizing to a greater or lesser degree, Congress will be persuaded by the gun lobby yet again that popular opinion is not half as important as private persuasion. Besides, why should those men and women tempted to translate the people's will into legislation ask for campaign troubles by doing so? Two organized enemies are always more potent than a dozen unorganized friends.

The prospect would be laughable if it were not so obscene.

Congress will finally buck the gun lovers when Congressmen become the primary targets for would-be assassins. No one should hold his breath waiting for that day. It isn't going to arrive for the simple reason that most people, including nuts, don't think the average Congressman makes enough of a damn to bother shooting.

If this sounds bitter, the angry lament of a middle-aged liberal, so be it. Avoidable bloodshed still has the ability to enrage me. The traumas of the past 18 years—the successful as well as unsuccessful assassinations, the growing street crime associated with handguns, the explosion of accidents in the home involving guns—are an affront to my deepest convictions about the nature of this society and its proper behavior. We are not some Balkan enclave of the late 19th Century and we should not govern ourselves as though we were.

The figures are there to point the way toward remedy. Pistols, cheap or expensive, figure prominently in domestic mayhem and street murder. They are surreptitiously peddled to 12-year-olds eager to use them to mug us and are openly sold to 25-year-olds looking for bigger game. They are sold over the counter, under the counter and all around the country.

Ours is the only nation in the world in which any cretin, criminal or conscientious citizen with the price of a tank of gas is entitled to buy the rest of us a ride to oblivion. Not surprisingly, we as a nation have one of the world's highest murder rates and the highest death-by-pistol rate.

Most Americans don't like it, want it changed and scream their convictions at every opportunity. They have been doing so for over 40 years. They are whistling in the wind.

For one thing, they are bucking a passionate tradition, born of the frontier and nurtured by the myths of novel and screen.

It doesn't matter that the trusted side arm is more likely to bring death or injury to a loved one than to an anonymous intruder. It doesn't matter that more guns are stolen from homes by criminals than used within those homes against criminals.

What matters is that, weaned on the notion of cold steel and steady eyes, a number of Americans cannot easily divorce themselves from its hold.

There is also the question of what the Constitution does or does not say on the subject. The framers of the Bill of Rights spoke to conditions as they knew them in demanding that the right of the people to bear arms not be abridged. They did not envision a nightmare world of cities held hostage to medieval street gangs and freelance killers. They had no thought of a nation in which the number of handguns—which are of no use except for close-up murder—would rival the number of adult citizens.

But that is essentially irrelevant also. Constitutional scholars of impeccable credentials can and do argue both sides of the question. It can finally be resolved only by a court test of appropriate national legislation, although it seems clear to me that the Supreme Court would never invalidate a tough gun control law.

But the Supreme Court won't have the opportunity to decide. Congress will not act. Chief Justice Burger will continue to feel that prudence demands that he meet unannounced visitors at night, pistol in hand. Our children, knowing that they live in a world of madness, will arm themselves as their parents have done and kill each other, as their parents have done.

The President who was shot on Monday opposes gun control. He is still enthralled by the belief that, as he put it in a recent newspaper interview, there is a higher rate of violent crime in New York, which has a tough gun control law, than there is in places where anyone can legally carry a gun in plain view through the streets. He is wrong. The people of the Sun Belt, where such legal laxity exists, know their crime statistics better than does their President, and they know better.

But how the President does or does not feel is not central to this matter. The last President to be assassinated felt one way. The one who is shot next time may well feel another.

Next time? Of course.

There should be no doubt about it. There will be a next time and yet another next time, for those of us still alive to see it. It will come sooner rather than later, if the trend lines of the past 18 years mean anything at all.

We're keeping the government out of our lives on this one, and the result is murderous anarchy. There are limits to the limits-to-government argument, and they are reached and passed when society is made more vulnerable to the depredations of its dangerously deranged.

We have a diagnosed disease and won't take effective medicine.

Instead, we swallow placebos. "Guns don't kill; only people kill." What fatuous, sickening nonsense.

But it is nonsense enshrined where it matters most—in Congress—and so it remains not nonsense but the law of the land. What law; what order.●

RULES OF THE SELECT COMMITTEE ON NARCOTICS ABUSE AND CONTROL FOR THE 97TH CONGRESS

(Mr. ZEFERETTI asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. ZEFERETTI. Mr. Speaker, pursuant to rule XI, clause 2, I present for printing in the RECORD the "Rules of the Select Committee on Narcotics Abuse and Control," adopted at the committee's organizational meeting on March 26, 1981:

RULES OF THE SELECT COMMITTEE ON NARCOTICS ABUSE AND CONTROL

RULE 1. RULES OF THE HOUSE

The Rules of the House of Representatives, insofar as they are applicable, shall be the rules of the Committee. The following rules, insofar as they are consistent with the Rules of the House, shall apply to the Committee.

RULE 2. MEETINGS

(a) The regular meeting day of the Committee for the conduct of its business shall be on Thursday of each week while the Congress is in session.

(b) Additional meetings may be called by the Chairman and a regular meeting of the Committee may be dispensed with when, in the judgment of the Chairman, there is no need therefor.

(c) Special meetings may be convened as provided for by clause 2(c)(2) of Rule XI of the Rules of the House.

(d) At least 24 hours (excluding Saturdays, Sundays, and legal public holidays) before each scheduled Committee meeting, each member of the Committee shall be furnished a list of the subjects to be considered or acted upon at such meeting.

RULE 3. HEARINGS

(a) Members of the Committee shall be advised and a public announcement (published in the Daily Digest) shall be made of time, date, place, and subject matter of any hearing to be conducted by the Committee at least one week before the commencement of such hearing, unless the Chairman determines that there is good cause to begin such hearing at an earlier date, in which event the Chairman shall make public announcement (published in the Daily Digest) at the earliest possible date.

(b) Unless authorized by the Chairman, a witness shall not be permitted to testify or present evidence at a hearing of the Committee, and such testimony or evidence may not be included in the Committee hearing record, unless 50 copies thereof have been delivered to the Committee at least 48 hours prior to such hearing.

(c) A Committee member may question a witness only when recognized by the Chairman for such purpose. In accordance with clause 2(j)(2) of Rule XI of the Rules of the House, each Committee member shall be allowed 5 minutes to question a witness until each member who so desires has had such opportunity. The Chairman shall, insofar as practicable, recognize alternately on the basis of seniority those majority and minority members present at the time the hearing was called to order and others on the basis of their arrival at the hearing. Thereafter, additional time may be extended at the discretion of the Chairman.

(d) At any hearing the minority party members of the Committee shall be entitled, upon request to the Chairman by a majority of them before the completion of the hearing, to call witnesses selected by the minority to testify with respect to the subject matter of such hearing during at least one day of hearing thereon.

(e)(1) The Chairman at an investigative hearing of the Committee shall announce in the opening statement the subject of the investigation.

(2) A copy of the Rules of the Committee and clause 2 of Rule XI of the Rules of the House shall be made available to each witness.

(3) Witnesses at an investigative hearing may be accompanied by their own counsel for the purpose of advising them concerning their constitutional rights.

(4) The Chairman of the Committee may punish breaches of order and decorum, and of professional ethics on the part of counsel, by censure and exclusion from the hearing; the Committee may cite the offender to the House for contempt.

(f) Any witness may obtain a transcript copy of his or her testimony given at a public session or, if given at an executive session, when authorized by a majority of the members voting a majority being present.

RULE 4. COMMITTEE PROCEDURE

(a) Unless otherwise required by these rules, one-third of the members of the Committee shall constitute a quorum for the transaction of Committee business, except that two members shall constitute a quorum for the purposes of taking testimony and receiving evidence.

(b) Meetings for the transaction of business and hearings of the Committee shall be open to the public or closed, in accordance with clauses 2(g)(1), 2(g)(2), or 2(k)(5) of Rule XI of the Rules of the House. No evidence or testimony taken in executive session may be released or used in public session unless authorized by a majority of members voting, a majority being present.

(c) A vote by any member of the Committee with respect to any matter being considered by the Committee may be cast by proxy if the proxy authorization is in writing, asserts that the member is absent on official business or is otherwise unable to be present at the meeting of the Committee, designates the member of the Committee who is to execute the proxy authorization, and is limited to a specific matter (except that a member may authorize a general proxy for motions to recess or adjourn, or for other procedural matters). Each proxy to be effective shall be signed by the member assigning his vote and shall contain the date and time that the proxy is signed. No proxy may be counted for the purpose of constituting a quorum.

(d) Every motion made to the Committee and entertained by the Chairman shall be reduced to writing upon the demand of any member, and a copy made available to each member present.

(e) In the absence of the Chairman of the Committee at any meeting or hearing of the Committee, the ranking member of the majority party on the Committee who is present shall preside at such meeting or hearing.

(f) A complete record of all Committee action, including a record of all votes on any question on which a rollcall vote is demand-

ed, shall be maintained by the Committee. The result of each such rollcall vote shall be available to the public for inspection at the offices of the Committee during normal working hours.

(g) Any member of the Committee may demand and the Chairman shall order a rollcall vote on any matter considered by the Committee.

RULE 5. COMMITTEE REPORTS

(a) Not later than January 2 of each year the Committee shall report to the House on the activities of the Committee during the previous calendar year. Such report shall be approved by a majority of the members voting at a meeting at which a quorum is present.

(b) Every investigative report shall be approved by a majority of the members voting at a meeting at which a quorum is present.

(c) Supplemental, minority, or additional views may be filed in accordance with clause 2(l)(5) of Rule XI of the Rules of the House. The time allowed for filing such views shall be 3 calendar days (excluding Saturdays, Sundays, and legal public holidays) before the consideration of such proposed report in the Committee.

(d) If hearings have been held on the matter reported upon, every reasonable effort shall be made to have such hearings available to the members of the Committee before the consideration of the proposed report in the Committee.

RULE 6. POWERS AND DUTIES OF COMMITTEE

(a) For the purpose of carrying out any of its functions and duties, the Committee is authorized to sit and act at such times and places within the United States, including any Commonwealth or possession thereof, or elsewhere, whether the House is in session, has recessed, or has adjourned.

(b)(1) The Committee may require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memorandums, papers, documents, and other exhibits and materials, as it deems necessary.

(2) A subpena may be authorized and issued by the Committee in the conduct of any investigation or series of investigations or activities, only when authorized by a majority of the members voting, a majority being present.

(3) Notwithstanding subparagraph (b)(2) of this rule, a subpena may be authorized and issued in the conduct of any investigation or series of investigations or activities by the Chairman of the Committee upon the concurrence of the ranking member of the minority party on the Committee.

(4) Authorized subpena shall be signed by the Chairman of the Committee or by any member designated by the Committee, and may be served by any person designated by the Chairman or such member.

(c) The Chairman, or any member of the Committee designated from time to time by him, shall report on the meetings, hearings or other activities of the Committee to any other committee of the House which has subject matter jurisdiction therein.

RULE 7. BROADCASTING

(a) Whenever any hearing or meeting conducted by the Committee is open to the public, the Committee may permit such hearing or meeting to be covered, in whole or in part, by television broadcast, radio broadcast, and still photography, or by any of such methods of coverage, under the rules established by paragraph (b) of this rule.

(b)(1) If television or radio coverage of any hearing or meeting of the Committee is to be presented to the public as live coverage, such coverage shall be conducted and presented without commercial sponsorship.

(2) No witness served with a subpena by the Committee shall be required against his or her will to be photographed at any hearing or meeting or to give evidence or testimony while the broadcasting of such hearing or meeting, by radio, or television, is being conducted. At the request of any such witness who does not wish to be subjected to radio, television, or still photography coverage, all lenses shall be covered and all microphones used for coverage turned off.

(3) Not more than 4 television cameras, operating from fixed positions, shall be permitted in a hearing or meeting room. The allocation among the television media of the positions of the number of television cameras shall be in accordance with fair and equitable procedures devised by the Executive Committee of the Radio and Television Correspondents' Galleries.

(4) Television cameras shall be placed so as not to obstruct in any way the space between any witness giving evidence or testimony and any member of the Committee, or the visibility of such witness and such members to each other.

(5) Television cameras shall not be placed in positions which obstruct unnecessarily the coverage of the hearing or meeting by other media.

(6) Equipment necessary for coverage by the television and radio media shall not be installed in, or removed from the hearing or meeting room while the Committee is in session.

(7) Floodlights, spotlights, strobelights, and flashguns shall not be used in providing any method of coverage of the hearing or meeting, except that the television media may install additional lighting in the hearing or meeting room, without cost to the Government, in order to raise the ambient lighting level in the hearing or meeting room to the lowest level necessary to provide adequate television coverage of the hearing or meeting at the then current state of the art of television coverage.

(8) Not more than 5 press photographers shall be permitted to cover a hearing or meeting by still photography. In the selection of such photographers, preference shall be given to photographers from Associated Press Photos and United Press International Newspictures. If request is made by more than 5 representatives of the media for coverage of the hearing or meeting by still photography, such coverage shall be made on the basis of a fair and equitable pool arrangement devised by the Standing Committee on Press Photographers.

(9) Photographers shall not position themselves at any time during the course of the hearing or meeting between the witness table and the members of the Committee.

(10) Photographers shall not place themselves in positions which obstruct unnecessarily the coverage of the hearing or meeting by other media.

(11) Personnel providing coverage by the television and radio media shall be then currently accredited to the Radio and Television Correspondents' Galleries.

(12) Personnel providing coverage by still photography shall be then currently accredited to the Press Photographers' Gallery.

(13) Personnel providing coverage by the television and radio media and by still photography shall conduct themselves and their coverage activities in an orderly and unobstrusive manner.

RULE 8. AMENDMENT OF RULES

The Rules of the Committee may be modified, amended, or repealed, by a majority of the members voting, a majority being present. Written notice of any proposed change shall be provided to each member of the Committee not less than 2 calendar days (excluding Saturdays, Sundays, and legal public holidays) before the meeting date on which such change is to be discussed and voted upon.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. DERRICK (at the request of Mr. WRIGHT), for today, on account of medical reasons.

Mr. TAUKE (at the request of Mr. MICHEL), for April 8 through the balance of the week, on account of official business.

SPECIAL ORDERS GRANTED

My unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. HARTNETT) to revise and extend their remarks and include extraneous matter:)

Mr. DERWINSKI, for 5 minutes, today.

Mr. COLLINS of Texas, for 45 minutes, on April 9.

(The following Members (at the request of Mr. DORGAN of North Dakota) to revise and extend their remarks and include extraneous matter:)

Mr. LAFALCE, for 30 minutes, today.

Mr. BINGHAM, for 15 minutes, today.

Mr. WILLIAM J. COYNE, for 5 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. PANETTA, for 5 minutes, today.

Mr. BROWN of California, for 5 minutes, today.

Mr. LEVITAS, for 15 minutes, today.

Mr. PEPPER, for 5 minutes, today.

Mr. BEDELL, for 5 minutes, today.

Mr. JONES of Oklahoma, for 5 minutes, today.

Mr. RODINO, for 20 minutes, on April 9.

Mr. DE LUGO, for 10 minutes, on May 4.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. LAFALCE, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,920.

(The following Members (at the request of Mr. HARTNETT) and to include extraneous matter:)

Mr. RAILSBACK in two instances.

Mr. GREEN.

Mr. YOUNG of Florida.
Mr. GILMAN.
Mr. HILLIS.
Mr. SOLOMON.
Mr. BROWN of Ohio.
Mr. RUDD.
Mr. DERWINSKI.
Mr. SENSENBRENNER in two instances.
Mr. GOLDWATER.
Mr. NAPIER.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to an enrolled bill and a joint resolution of the Senate of the following titles:

S. 840. An act to continue in effect any authority provided under the Department of Justice Appropriation Authorization Act, Fiscal Year 1980, for a certain period; and

S.J. Res. 61. Joint resolution to authorize and request the President to issue a proclamation designating April 9, 1981, as "African Refugee Relief Day."

ADJOURNMENT

Mr. DORGAN of North Dakota. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 6 minutes p.m.), the House adjourned until tomorrow, Thursday, April 9, 1981, at 11 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1047. A letter from the Secretary of Agriculture, transmitting the annual report on animal welfare enforcement for fiscal year 1980, pursuant to section 25 of the Animal Welfare Act, as amended; to the Committee on Agriculture.

1048. A letter from the Deputy Secretary of Defense, transmitting eight reports of violations of the Anti-Deficiency Act, pursuant to section 3679(i)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

1049. A letter from the Acting Administrator of General Services, transmitting a report on a violation of the Anti-Deficiency Act, pursuant to section 3679(i)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

1050. A letter from the Secretary of Housing and Urban Development, transmitting a draft of proposed legislation to amend and extend certain Federal laws relating to housing, community and economic development, and related programs, to provide an improved and expedited mortgage foreclosure procedure with respect to multifamily mortgages held by the Secretary of Housing and Urban Development pursuant to title II of the National Housing Act or section 312 of the Housing Act of 1964, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

1051. A letter from the Chairman and Chief Executive Officer, Consolidated Rail Corporation, transmitting the annual report of the Corporation, covering calendar year 1980, pursuant to section 301(h) of Public Law 93-236, as amended, together with the Corporation's response to section 703(c) of the Staggers Rail Act of 1980; to the Committee on Energy and Commerce.

1052. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a copy of an agreement entered into by the American Institute in Taiwan, pursuant to section 12(a) of Public Law 96-8; to the Committee on Foreign Affairs.

1053. A letter from the Assistant Secretary of State for Congressional Relations, transmitting reports on political contributions made by Ambassador-designate John A. Burroughs, Jr., and by members of his family, pursuant to section 304(b)(2) of Public Law 96-465; to the Committee on Foreign Affairs.

1054. A letter from the Assistant Secretary of State for Congressional Relations, transmitting reports on political contributions made by Ambassador-designate John A. Gavin, and by members of his family, pursuant to section 304(b)(2) of Public Law 96-465; to the Committee on Foreign Affairs.

1055. A letter from the Assistant Secretary of State for Congressional Relations, transmitting reports on political contributions made by Ambassador-designate Deane R. Hinton, and by members of his family, pursuant to section 304(b)(2) of Public Law 96-465; to the Committee on Foreign Affairs.

1056. A letter from the Assistant Secretary of State for Congressional Relations, transmitting reports on political contributions made by Ambassador-designate Arthur H. Woodruff, and by members of his family, pursuant to section 304(b)(2) of Public Law 96-465; to the Committee on Foreign Affairs.

1057. A letter from the Vice President for Corporate Communications, National Railroad Passenger Corporation, transmitting a report on the Corporation's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

1058. A letter from the General Counsel, Securities and Exchange Commission, transmitting notice of a proposed change in an existing records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1059. A letter from the Chairman, U.S. International Trade Commission, transmitting a report on the Commission's activities under the Government in the Sunshine Act during calendar year 1980, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

1060. A letter from the Executive Director, Navajo and Hopi Indian Relocation Commission, transmitting a report on the plan to implement the relocation of Navajo and Hopi families, pursuant to Public Law 93-531, as amended; to the Committee on Interior and Insular Affairs.

1061. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a draft of proposed legislation to amend title 18, United States Code, to implement the Convention on the Physical Protection of Nuclear Material, and for other purposes; to the Committee on the Judiciary.

1062. A letter from the Acting Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation under the authority of section 244(a)(1) of the Immigration and Nationality Act, together with a list of the persons involved, pursuant to section 244(c) of the act; to the Committee on the Judiciary.

1063. A letter from the Chairman, Select Commission on Immigration and Refugee Policy, transmitting the final report of the Commission, pursuant to section 4(d) of Public Law 95-412; to the Committee on the Judiciary.

1064. A letter from the Acting Administrator, United States Environmental Protection Agency, transmitting a draft of proposed legislation to revise and extend certain provisions of the Federal Water Pollution Control Act, as amended, for 1 year, and for other purposes; to the Committee on Public Works and Transportation.

1065. A letter from the Acting Administrator of General Services, transmitting a prospectus for alterations at the Federal Center, Alameda, Calif., pursuant to section 7 of the Public Buildings Act of 1959, as amended; to the Committee on Public Works and Transportation.

1066. A letter from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to amend title II of the Social Security Act, and related provisions of that act to improve the program of Old-Age Survivors, and Disability Insurance, and other purposes; to the Committee on Ways and Means.

1067. A letter from the Secretary of Energy, transmitting notice of a delay in submission of the comprehensive plan for municipal waste energy development, required by section 231(b) of Public Law 96-294; jointly, to the Committees on Energy and Commerce, and Science and Technology.

1068. A letter from the Acting Comptroller General of the United States, transmitting a report on the Small Business Administration's implementation of the 8(a) procurement program (CED-81-55, April 8, 1981); jointly, to the Committees on Government Operations and Small Business.

1069. A letter from the Chairman, U.S. Nuclear Regulatory Commission, transmitting a report on the status of emergency response planning for nuclear powerplants, pursuant to section 109(b)(5) of Public Law 96-295; jointly, to the Committees on Interior and Insular Affairs and Energy and Commerce.

1070. A letter from the Acting Assistant Attorney General for Legislative Affairs, transmitting a draft of proposed legislation to repeal certain provisions applicable to compensation for the overtime inspectional services of employees of the Immigration and Naturalization Service, and for other purposes; jointly, to the Committees on the Judiciary and Post Office and Civil Service.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANNUNZIO:

H.R. 3132. A bill to amend the Truth in Lending Act to encourage cash discounts, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. BARNARD (for himself and Mr. ANNUNZIO):

H.R. 3133. A bill to provide for the minting of half dollars with a design emblematic of the 250th anniversary of the birth of George Washington; to the Committee on Banking, Finance and Urban Affairs.

By Mr. BINGHAM:

H.R. 3134. A bill to authorize appropriations for the fiscal years 1982 and 1983 to carry out the purposes of the Export Administration Act of 1979, and for other purposes; to the Committee on Foreign Affairs.

By Mr. BINGHAM (by request):

H.R. 3135. A bill to authorize appropriations for implementation of the Export Administration Act of 1979; to the Committee on Foreign Affairs.

By Mr. BINGHAM (for himself, Mr. LAGOMARSINO, and Mr. PRITCHARD) (by request):

H.R. 3136. A bill to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation; to the Committee on Foreign Affairs.

By Mr. BROWN of California:

H.R. 3137. A bill to maintain and enhance U.S. leadership in information science and technology by establishing an Institute for Information Policy and Research to address national information policy issues; to provide a forum for the interaction of government, industry, and commerce, and educational interests in the formulation of national information policy options; to provide a focus and mechanism for planning and coordinating Federal research and development activities related to information science and technology; and to amend the National Science and Technology Policy, Organization, and Priorities Act of 1976 to create a new position of Special Assistant for Information Technology and Science Information; to the Committee on Science and Technology.

By Mr. PHILIP M. CRANE:

H.R. 3138. A bill to amend the Internal Revenue Code of 1954 to increase the amount of the annual exclusion from taxable gifts to compensate for inflation since the enactment of such exemption and to provide an automatic increase in such amounts to compensate for future inflation; to the Committee on Ways and Means.

H.R. 3139. A bill to amend the Internal Revenue Code of 1954 to increase the personal exemption amount to compensate for inflation since 1944 and to provide an automatic increase in such amount to compensate for future inflation; to the Committee on Ways and Means.

By Mr. DERWINSKI (by request):

H.R. 3140. A bill to amend title 5, United States Code, to strengthen the principle of comparability as the basis for setting Federal pay and benefits, and for other purposes; jointly, to the Committees on Post Office and Civil Service and Armed Services.

H.R. 3141. A bill to authorize an Under Secretary of Commerce for Economic Affairs; to the Committee on Post Office and Civil Service.

By Mr. DINGELL:

H.R. 3142. A bill to amend the Internal Revenue Code of 1954 to provide that, for purposes of computing the residential energy credit, the taxpayer may take into account qualified energy conservation expenditures with respect to any dwelling unit which is owned by the taxpayer and which is the principal residence of any individual other than the taxpayer; to the Committee on Ways and Means.

By Mr. EDGAR:

H.R. 3143. A bill to amend the Urban Mass Transportation Act of 1964 to authorize appropriations to assist local public bodies in maintaining mass transportation systems, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. FAZIO (for himself, Mr. CLAUSEN, Mr. BEILENSON, Mr. PHILLIP BURTON, Mr. CHAPPIE, Mr. DELLUMS, Mr. DORNAN of California, Mr. DYMALLY, Mr. GOLDWATER, Mr. MATSUI, Mr. MINETA, and Mr. STARK):

H.R. 3144. A bill to provide for the conveyance of certain lands to the D-Q University in the State of California; to the Committee on Education and Labor.

By Mr. FINDLEY:

H.R. 3145. A bill to establish a price support program for soybeans; to the Committee on Agriculture.

By Mr. FUQUA:

H.R. 3146. A bill to authorize appropriations to the Department of Energy for civilian research and development programs and projects for fiscal year 1982, and for the continuation in fiscal year 1982 of prior year research and development projects; to the Committee on Science and Technology.

By Mr. GILMAN:

H.R. 3147. A bill to authorize the Secretary of the Interior to conduct a study to determine the manner in which the area known as the Goshen Historic Tract in Goshen, N.Y., can be protected; to the Committee on Interior and Insular Affairs.

By Mr. GUARINI:

H.R. 3148. A bill to amend the Internal Revenue Code of 1954 to exclude from the gross income of individuals the interest on series EE U.S. savings bonds; to the Committee on Ways and Means.

H.R. 3149. A bill to amend the Internal Revenue Code of 1954 to exclude $9,000 of income from the gross income of each individual who has attained age 65, and to reaffirm the fact that benefits payable under title II of the Social Security Act are exempt from Federal taxation; to the Committee on Ways and Means.

By Mr. GUARINI (for himself, Mr. DUNCAN, Mr. HOLLAND, and Mr. SCHULZE):

H.R. 3150. A bill to amend the Internal Revenue Code of 1954 to provide that the investment tax credit shall be allowable for up to $100,000 of the cost of any horse; to the Committee on Ways and Means.

By Mr. HILLIS (for himself, Mr. BROOKHEAD, Mr. DINGELL, Mr. BROYHILL, Mr. TRAXLER, Mr. SHELBY, Mr. CORCORAN, Mr. FORD of Michigan, Mr. RITTER, Mr. BROWN of Ohio, Mr. BROOMFIELD, Mr. BLANCHARD, Mr. PURSELL, Mr. WHITTAKER, Mr. TAUKE, Mr. GRAMM, and Mr. COATS):

H.R. 3151. A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 to provide for the equal application of any automatic occupant restraint standard to all manufacturers of passenger cars on the same effective date; to the Committee on Energy and Commerce.

By Mr. HARTNETT:

H.R. 3152. A bill to limit purchases of office furniture by departing Members of the House of Representatives, and for other purposes; to the Committee on House Administration.

By Mr. HEFTEL:

H.R. 3153. A bill to amend title XVIII of the Social Security Act to provide for an independent Provider Payment Review Board to review disputes on cost reimbursement under the medicare program between providers of services and the Secretary of Health and Human Services, and for other purposes; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. HYDE:

H.R. 3154. A bill to amend the Public Health Service Act to remove the arbitrary age restrictions applicable to appointments to the Office of Surgeon General; to the Committee on Energy and Commerce.

By Mr. LAFALCE:

H.R. 3155. A bill to provide a program within the Comprehensive Employment and Training Act to retrain workers about to be laid off due to productivity improvement programs, and for other purposes; to the Committee on Education and Labor.

H.R. 3156. A bill to amend the Internal Revenue Code of 1954 to increase the unified credit against estate and gift taxes; to the Committee on Ways and Means.

H.R. 3157. A bill to amend the Internal Revenue Code of 1954 to reduce corporate income tax rates; to the Committee on Ways and Means.

H.R. 3158. A bill to amend the Internal Revenue Code of 1954 to permit small research-oriented firms to reduce income taxes by an amount equal to 10 percent of eligible research and development expenditures; to the Committee on Ways and Means.

H.R. 3159. A bill to establish a 10-percent tax credit for investment in research and development for small businesses; to the Committee on Ways and Means.

By Mr. LEATH of Texas:

H.R. 3160. A bill to prohibit the conversion of civilian or industrial-type functions of the Department of Defense from performance by civilian employees to performance by contractors when such conversion would have a significant adverse effect on defense readiness; to the Committee on Armed Services.

By Mr. MINISH:

H.R. 3161. A bill to authorize appropriations for the Legal Services Corporation for fiscal years 1982, 1983, and 1984; to the Committee on the Judiciary.

By Mr. MYERS:

H.R. 3162. A bill to provide for the establishment of a commission to study revision of the Federal tax laws; to the Committee on Ways and Means.

By Mr. RAILSBACK:

H.R. 3163. A bill to require the Secretary of Health and Human Services to arrange for an independent epidemiological study of persons exposed to the chemical dioxin, used in the herbicide known as agent orange; to the Committee on Energy and Commerce.

By Mr. ROBERTS of South Dakota (for himself and Mr. DASCHLE):

H.R. 3164. A bill to reauthorize the Belle Fourche project under the Pick-Sloan Missouri Basin program, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. STANGELAND:

H.R. 3165. A bill to authorize the use of community development funds with respect to the construction of certain public hospitals located in nonmetropolitan areas; to the Committee on Banking, Finance and Urban Affairs.

By Mr. STUMP:

H.R. 3166. A bill to authorize the Secretary of the Interior, through the Chief of Engineers, to acquire certain lands above Painted Rock Dam, Ariz.; to the Committee on Interior and Insular Affairs.

H.R. 3167. A bill to authorize the licensing of Hualapai Dam, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 3168. A bill to authorize the Secretary of the Interior to assist the Yuma County Water Users' Association, Ariz., to relocate the headquarters of such association; to the Committee on Interior and Insular Affairs.

By Mr. BIAGGI:

H.J. Res. 226. Joint resolution designating of the second week in May as "Senior Center Week"; to the Committee on Post Office and Civil Service.

By Mr. GUARINI:

H.J. Res. 227. Joint resolution designating the week beginning June 21, 1981, as "National Deaf Awareness Week"; to the Committee on Post Office and Civil Service.

By Mr. ROE:

H.J. Res. 228. Joint resolution to designate April 24, 1981, as "National Day of Remembrance of Man's Inhumanity to Man"; to the Committee on Post Office and Civil Service.

H.J. Res. 229. Joint resolution designating May 1 through May 7, 1981, as "Days of Remembrance of Victims of the Holocaust"; to the Committee on Post Office and Civil Service.

By Mr. PRITCHARD:

H. Con. Res. 111. Concurrent resolution expressing the sense of the Congress that the Government of the Soviet Union should cease its imprisonment of Yuriy Shukhevych and permit him and his family to emigrate from the Soviet Union; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

34. By the SPEAKER: Memorial of the Legislature of the State of New York, relative to the U.S. Public Health Hospital at Clifton, Staten Island, N.Y.; to the Committee on Energy and Commerce.

35. Also, memorial of the Legislature of the State of New York, relative to Memorial Day; to the Committee on Post Office and Civil Service.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DORGAN of North Dakota:

H.R. 3169. A bill for the relief of Juan Esteban Ramirez; to the Committee on the Judiciary.

By Mr. RATCHFORD:

H.R. 3170. A bill conferring jurisdiction upon the U.S. Court of Claims to hear, determine, and render judgment upon the claim of James W. Brundage; to the Committee on the Judiciary.

By Mr. WOLF:

H.R. 3171. A bill for the relief of Dr. David Pass; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 822: Mr. ROUSSELOT.

H.R. 934: Mr. BONIOR of Michigan.

H.R. 980: Mr. GOODLING.

H.R. 981: Mr. DANIEL B. CRANE.

H.R. 985: Mr. JOHNSTON.

H.R. 1110: Mr. MCDADE, Mr. MINETA, Mr. JAMES K. COYNE, and Mr. PATTERSON.

H.R. 2980: Mr. FISH, Mr. ANTHONY, and Mr. LOWERY of California.

H.J. Res. 128: Mr. FASCELL, Mr. HARKIN, and Mr. PANETTA.

H. Res. 48: Mr. ROUSSELOT, Mr. SPENCE, and Mr. PHILIP M. CRANE.

SENATE—*Wednesday, April 8, 1981*

(Legislative day of Monday, February 16, 1981)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., offered the following prayer:

We give thanks to Thee, O God; we give thanks; we call on Thy name and recount Thy wondrous deeds.—Psalms 75: 1.

We thank Thee for the complete recovery of the President and the miraculous healing of Mr. Brady. We thank Thee for the restoration of Mr. McCarthy and Mr. Delahanty.

We thank Thee for our wives and our children, our neighbors and our friends. We thank Thee for the dedicated men and women who support the Senate in its great responsibility—for the office staffs—for the police—for elevator operators and those who maintain buildings and grounds. We thank Thee for the doorkeepers, the secretaries, the clerks, the administrators, the pages. Help us never to presume upon these gifts of service or take them for granted.

We thank Thee for each other, for the friendships which begin and mature among us. We thank Thee for the privileges we enjoy—for comfort, food, pleasure, work, and rest.

We thank Thee for our Nation—for its vast resources, its people, its freedom, and for those who sacrificed to build it and preserve it.

We thank Thee for Thyself, O God, for Thy grace and love. Receive our gratitude in the name of the Saviour and Lord. Amen.

RECOGNITION OF THE ASSISTANT MAJORITY LEADER

The PRESIDENT pro tempore. The assistant majority leader is recognized.

THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER DESIGNATING PERIOD FOR ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that following the time allocated to the two leaders under the standing order, and the series of special orders that have been entered for this morning, the Senate proceed to a period for the transaction of routine morning business not to exceed 20 minutes in length, with Senators permitted to speak for not more than 5 minutes each, and that in no event should extend beyond 12:30 p.m.

The PRESIDENT pro tempore. Without objection, it is so ordered.

HOUSE MAJORITY BUDGET PACKAGE

Mr. STEVENS. Mr. President, the House Budget Committee has concocted a substitute for President Reagan's budget proposals. This program states that it provides more funds for social programs while reducing defense spending and tax-cut levels that were proposed by the administration.

The House majority contend that their program is $4.3 billion less than President Reagan's. They come to this conclusion by simply revising the Reagan budget estimates upward $22 billion until they exceed their own, claiming that the Reagan assumptions were wrong. As Mr. Stockman said:

The Democrats are changing their words, but still singing the same old tune—

Higher taxes and higher spending. The tax relief proposed by the House majority is $21 billion less in fiscal 1982 than the President proposes and only half as much tax relief over the next 3 years. This "high tax budget" would destroy the purpose of the President's economic recovery program. It would continue the type of spending and tax programs which have caused inflation, declining productivity, and other related economic problems, such as persistent high interest rates.

Although the House majority claims that their program results in less spending than the administration proposal, the fact of the matter is that their package would result in spending of $132 billion more than the President proposed between now and 1984. Their program has more spending because they insist upon more taxes with more revenues to the Federal Government.

Mr. President, as an editorial in the Wall Street Journal points out, the alternative offered by the House majority is simply a rehash of the sort of things we were getting in the late 1970's. It restores moneys for programs which have been proven failures and undermines the President's effort to consolidate, streamline, and simplify Federal grant programs. Given the failure of this approach over the last 4 years, it is truly amazing that the House majority has the nerve to try it again.

I do not believe that they read the road signs of the 1980 elections. They seem to think that the American people will be fooled by a sleight of hand once again and will not demand the change envisioned in the 1980 elections.

I feel it is absolutely essential that the President's economic package be approved. We do have leeway in terms of how we meet the goals enunciated by the President. However, increased defense spending is essential to our security and large tax cuts are necessary to restore the purchasing power that is necessary to revitalize our economy.

The commitment to the second and third years of the tax cuts are also commitments to fiscal discipline in those years. The spending cuts are necessary to slow down the tremendous rate of growth in the Federal Government that comes from the ever-increasing spiral of Federal spending and taxation.

Mr. President, I do hope that the President is sincere and will stick to his commitment to veto a bill that will not bring about the tax reduction that is necessary to restore our economy. The tax cuts and the overall budget cuts are a package that must be, I believe, approved by Congress in order to give this approach a chance to restore our economic future.

Mr. President, I ask unanimous consent that an editorial entitled "$80 Billion More" in this morning's Wall Street Journal be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

$80 BILLION MORE

While Americans are pondering their tax returns this week it might be interesting to ponder as well the alternative budget Democrats on the House Budget Committee have just concocted. It calls for increasing the federal tax burden by another $80 billion in the 1982 fiscal year. That's $850 more in total burden for every individual who files a tax return.

The Democrats, of course, say they are actually cutting taxes by $38 billion but such claims are an old and tired story. Those niggling little cuts don't begin to offset the rising burden brought about by "bracket creep" as inflation moves taxpayers up to higher marginal rates, plus the programmed rise in Social Security payroll taxes and inflation-related increases in business taxes that are passed along, one way or another, to the public. During the Carter years, these automatic increases boosted the tax burden $200 billion or roughly 50%, not only a huge amount in itself but sharply greater than the rate of inflation or the rise in personal income.

Indeed, during the Carter years, when the federal budget went literally out of control and double-digit inflation became chronic, we saw this game played over and over again. The Democrats would come forth with what they described as a lean, responsible budget, promising the country that they were laboring mightily to bring it into balance. Mr. Carter forecast a balanced budget over and over again, while $190 billion in deficits piled up and the tax burden continued to rise.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

The alternative the Budget Committee Democrats have dreamed up is just another of the sort of things we were getting in the late 1970s. It calls for restoring major portions of the cuts the Reagan administration is trying to make in federal spending. The Reagan cap on Medicaid costs, something governors of states want badly, would be thrown out. Food stamps would be allowed to continue their merry rise. The various ripoff programs that Democrats have used to buy political backing over the years, such as handouts to public interest lawyers, would be saved from the Republican ax.

To try to make all this look like a responsible exercise, House Budget Committee Chairman James Robert Jones indulged in a remarkable ploy. He simply revised the Reagan budget estimates upward $22 billion until they exceeded his own, claiming that Reagan "economic assumptions" were wrong. Thus, the Democrats came out with a "responsible" budget, up only $58 billion from fiscal 1981, and the Reaganites were credited with an "irresponsible" budget, up $62 billion.

Now, this kind of game with economic assumptions has been going on for some time and is part of the reason that federal budget projections have come to be almost meaningless. The real point of the Democratic exercise is not to responsibly balance the budget or make more correct economic assumptions but to save social programs.

After the colossal failures of this approach over the last four years, we are amazed at the effrontery of the Budget Committee Democrats in trotting it out again, particularly at just the time when working Americans are trying to come up with cash to pay their taxes. It can only reflect the fact that the Democrats have nothing to offer as an economic program but more of the same.

Despite the transparency of all this, there are still a few people, including some congressional Republicans, who profess to believe that the Democrats really are serious this time about balancing the budget and don't want to surrender tax revenues for that reason. We would urge them to review once more the last four years, when Democrats controlled the White House and Congress. How many chances do they get?

The genuine tax cuts in the Reagan economic program would begin the process of stopping the rise in the federal tax burden. And, coupled with meaningful budget cuts of the type the Senate already has made, they also would begin bringing government under control. If the Budget Committee Democrats should happen to succeed, which doesn't seem likely, taxpayers can expect to be sweating even harder a year from now and two years from now to pay for the handouts the Democrats refuse to give up.

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, there is a special order entered in my name. I wish that that time be transferred to the control of the distinguished minority leader.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, have I any time remaining in the majority leader's time?

The PRESIDING OFFICER (Mr. HAYAKAWA). Four minutes remain.

Mr. STEVENS. Mr. President, I yield the remaining time to my good friend from South Carolina to use when he is recognized under his special order. I ask the Chair to now recognize the acting minority leader.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDING OFFICER. The acting minority leader is recognized.

Mr. ZORINSKY. Mr. President, I believe the Senator from Wisconsin wanted a couple of minutes, but he has left the Chamber. I will yield back to the acting majority leader.

Mr. STEVENS. Does the Senator wish to reserve the minority leader's time until such time as he may use it?

Mr. ZORINSKY. Yes.

Mr. STEVENS. Mr. President, I ask unanimous consent that the minority leader's time be reserved and be available to the minority leader or his designee following the special order of the distinguished Senator from South Carolina.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR THURMOND

The PRESIDING OFFICER. Under the previous order, the Senator from South Carolina is recognized for not to exceed 19 minutes.

S. 907—A BILL TO MAKE IT A FEDERAL OFFENSE TO KILL, KIDNAP, OR ASSAULT A CABINET OFFICER OF THE UNITED STATES

Mr. THURMOND. Mr. President, I am introducing a bill today for myself and Mr. ZORINSKY, to make it a Federal crime to kill, kidnap, or assault a Cabinet officer of the United States. The events of the past few days remind us again of the dangers the President and other high Government officials are exposed to every day.

In the past, we have waited for some tragic event to motivate us to action. It took the tragic deaths of President John F. Kennedy and Senator Robert Kennedy to shake the Congress into enactment of 18 U.S.C. 351 and 1751 to cover assassination, kidnaping, and assault with respect to the President and Members of Congress. The Federal interest in also protecting Cabinet-level officials is equally clear.

Mr. President, I ask unanimous consent for the bill I am introducing to be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 907

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 18 of title 18, United States Code, is amended as follows:

(a) Subsection (a) of section 351 is amended by inserting ", or a member of the executive branch of government who is the head of a department listed in section 101 of title 5" following the words "Member-of-Congress-elect".

(b) The section heading for section 351 is amended to read:

"§ 351. Congressional and Cabinet assassination, kidnapping, and assault; penalties".

(c) The chapter heading is amended to read as follows:

"Chapter 18.—CONGRESSIONAL AND CABINET ASSASSINATION, KIDNAPING, AND ASSAULT".

(d) The table of contents to "PART I.—CRIMES" of title 18 is amended by striking out the chapter reference and inserting in lieu thereof the following:

"18. Congressional and Cabinet assassination, kidnaping, and assault".

S. 908—A BILL TO PROVIDE A CONSTITUTIONAL PROCEDURE FOR IMPOSITION OF THE DEATH PENALTY IN THE DISTRICT OF COLUMBIA

Mr. THURMOND. Mr. President, I am introducing today, for myself and Mr. ZORINSKY, a bill to provide a constitutional procedure for imposition of the death penalty for first degree murder in the District of Columbia.

In 1972, the Supreme Court held, in *Furman* v. *Georgia,* 408 U.S. 238 (1972), that the imposition of the death penalty under procedures then employed in the States of Georgia and Texas was cruel and unusual punishment under the eighth amendment. The District of Columbia death penalty provisions for first degree murder were recognized to be unconstitutional under the Furman decision in *United States* v. *Lee,* 489 F.2d 1242, 1247 (D.C. Cir. 1973). No action has been taken in the interim, either by the Congress or the City Council, to meet the requirements of the Supreme Court. Indeed, on December 17, 1976, the District of Columbia Council adopted a "Resolution Against the Death Penalty" and, on December 17, 1980, rather than enacting a constitutional procedure to meet the objections of the Supreme Court, the Council adopted a proposal to repeal the otherwise ineffective reference to the death penalty and related provisions in the District of Columbia Code. In due course, the proposal went into effect in the absence of a veto by the Senate or House, pursuant to the District of Columbia Self-Rule Act.

Mr. President, the events of the last week in March involving attempted assassination of the President bring into sharp focus the dual interests in effective law enforcement in the District of Columbia. Out of one incident—primarily directed at assassination of the President—came injury to the President, the President's press secretary, a Secret Service agent, and a District police officer. All four easily could have been killed, but only assault on the President and Secret Service agent are prosecutable under provisions of the United States Code. The other two are prosecutable under the District of Columbia Code.

Mr. President, I believe the death pen-

alty should be applicable not only to appropriate Federal first-degree murder cases but those arising under the District of Columbia laws. Accordingly, the bill I am introducing is patterned after S. 114, introduced by Senator DECONCINI and myself, to provide a constitutional procedure for imposing the death penalty for Federal murders. The bill would provide for capital punishment only for the crime of first-degree murder. The determination of guilt and appropriate sentence would be made in a bifurcated proceeding. A person found guilty of murder could only be sentenced to death in a separate hearing in which the factfinder would consider statutory mitigating and aggravating factors, or other mitigating factors, in deciding whether the death penalty should be imposed. The death penalty would not be mandatory under this bill. In the final analysis, the factfinder must weigh the mitigating and aggravating factors, to decide that the facts justified the death penalty. There are appropriate provisions for appellate review.

In my judgment, the provisions of the bill clearly meet the constitutional criteria enunicated by the Supreme Court in the Furman case and in *Gregg* v. *Georgia*, 428 U.S. 153 (1976), and companion cases. I hope that the committee responsible for legislation affecting the District of Columbia will carefully study this proposal and, in due course, act on the measure so as to give our colleagues an opportunity to vote on this issue.

Mr. President, I ask unanimous consent that the bill I am introducing be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 908

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Section 801 of the Act entitled "An Act to establish a code of law for the District of Columbia", approved March 3, 1901 (31 Stat. 321, D.C. Code, Sec. 22–2404, is amended to read as follows:

"(a) The punishment of murder in the first degree shall be death or life imprisonment.

"(b) The punishment of murder in the second degree shall be life or not less than twenty years.

"(c) When a defendant is found guilty or pleads guilty to murder in the first degree, the judge who presided at the trial or before whom the guilty plea was entered, or any other judge if the judge who presided at the trial or before whom the guilty plea was entered is unavailable, shall conduct a separate sentencing hearing to determine the punishment to be imposed. The hearing shall be conducted—

"(1) before the jury which determined the defendant's guilt;

"(2) before a jury impaneled for the purpose of the hearing if—

"(A) the defendant was convicted upon a plea of guilty;

"(B) the defendant was convicted after a trial before the court sitting without a jury;

"(C) the jury which determined the defendant's guilt has been discharged for good cause; or

"(D) after initial imposition of a sentence under this section, redetermination of the sentence under this section is necessary; or

"(3) before the court alone, upon the motion of the defendant and with the approval of the Government.

A jury impaneled pursuant to paragraph (2) of this subsection shall consist of twelve members, but, at any time before the conclusion of the hearing, the parties may stipulate with the approval of the court that it shall consist of any number less than twelve.

"(d) Notwithstanding any other statute or rule, when a defendant is found guilty of or pleads guilty to murder in the first degree, no presentence report shall be prepared. In the sentencing hearing, information may be presented as to any matter relevant to the sentence and shall include matters relating to any of the aggravating or mitigating factors set forth in subsections (g) and (h) or any other mitigating factor. Information presented may include the trial transcript and exhibits if the hearing is held before a jury or judge not present during the trial. Any other information relevant to such mitigating or aggravating factors may be presented by either the Government or the defendant, regardless of its admissibility under the rules governing admission of evidence at criminal trials, except that evidence may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the issues, or misleading the factfinder, or by considerations of undue delay, waste of time, or needless presentation of cumulative evidence. The Government and the defendant shall be permitted to rebut any information received at the hearing and shall be given fair opportunity to present arguments as to the adequacy of the information to establish the existence of any of the aggravating or mitigating factors, and as to the appropriateness in that case of imposing a sentence of death. The Government shall open the argument. The defendant shall be permitted to reply. The Government shall then be permitted to reply in rebuttal. The burden of establishing the existence of any aggravating factor is on the Government, and is not satisfied unless established beyond a reasonable doubt. The burden of establishing the existence of any mitigating factor is on the defendant, and is not satisfied unless established by a preponderance of the information.

"(e) The jury, or if there is no jury, the court, shall consider all the information received during the hearing and the evidence received during the trial. It shall return special findings identifying any mitigating factors and any aggravating factors set forth in subsections (g) and (h) found to exist. A finding of such a factor by a jury shall be made by unanimous vote. If no such aggravating factors set forth in subsection (g) or (h) are found to exist, the court shall impose a sentence, other than death, authorized by this section. If one or more of such aggravating factors are found to exist, the jury, or if there is no jury, the court, shall then consider whether the aggravating factor or factors found to exist sufficiently outweigh any mitigating factor or factors found to exist, or in the absence of mitigating factors, whether the aggravating factors are themselves sufficient, to justify a sentence of death. Based upon this consideration, the jury by unanimous vote, or if there is no jury, the court, shall return a finding as to whether a sentence of death is justified.

"(f) Upon a finding that a sentence of death is justified, the court shall sentence the defendant to death. Upon a contrary finding, the court shall impose a sentence, other than death, authorized by this section.

"(g) In determining whether a sentence of death is to be imposed on the defendant, the following mitigating factors shall be considered but are not exclusive:

"(1) the defendant was youthful at the time of the crime;

"(2) the defendant's capacity to appreciate the wrongfulness of his conduct or to conform his conduct to the requirements of law was significantly impaired, but not so impaired as to constitute a defense to the charge;

"(3) the defendant was under unusual and substantial duress, although not such duress as constitutes a defense to the charge;

"(4) the defendant is punishable as a principal or otherwise but his participation was relatively minor;

"(5) the defendant could not reasonably have foreseen that his conduct in the course of the commission of murder for which he was convicted would cause, or would create a grave risk of causing, death to any person.

"(h) If the defendant is found guilty or pleads guilty to an offense under this section the following aggravating factors shall be considered:

"(1) the defendant has been convicted of another District of Columbia, Federal, or State offense resulting in the death of a person, for which a sentence of life imprisonment or a sentence of death was authorized by statute;

"(2) the defendant has previously been convicted of two or more State or Federal offenses punishable by a term of imprisonment of more than one year, committed on different occasions, involving the infliction of serious bodily injury upon another person;

"(3) in the commission of the offense the defendant knowingly created a grave risk of death to one or more persons;

"(4) the defendant committed the offense in an especially heinous, cruel, or depraved manner;

"(5) the defendant procured the commission of the offense by payment, or promise of payment, of anything of pecuniary value;

"(6) the defendant committed the offense as consideration for the receipt, or in the expectation of the receipt, of anything of pecuniary value;

"(7) the defendant committed the offense after substantial planning and premeditation to cause the death of a person or commit an act of terrorism;

"(8) the defendant committed the offense against—

"(A) the President of the United States, the President-elect, the Vice President, the Vice-President-elect, the Vice-President-designate, or if there is no Vice President, the officer next in order of succession to the office of President of the United States, or any person who is acting as President under the Constitution, and laws of the United States.

"(B) a foreign official listed in section 1116(b)(3)(A) of title 18, United States Code, if he is in the United States because of his official duties; or

"(C) a Federal or District of Columbia judge, law enforcement officer, or employee of a penal or correctional institution, while performing his official duties or because of his status as a public servant. For purposes of this subsection, a 'law enforcement officer' is a public servant authorized by law or by a Government agency to conduct or engage in the prevention, investigation, or prosecution of an offense.

"(i) In any case in which the sentence of death is imposed under this section, the sentence of death shall be subject to review upon appeal by the defendant. An appeal under this section may be consolidated with an appeal of the judgment of conviction. Such review shall have priority over all other cases.

"On review of the sentence, the court of appeals shall consider the record, the evidence submitted during the trial, the information submitted during the sentencing hearing, the procedures employed in the sentencing hearing, and the special findings

returned under subsection (e) of this section.

"The court shall affirm the sentence if it determines that: (1) the sentence of death was not imposed under the influence of passion, prejudice, or any other arbitrary factor; (2) the information supports the special finding of the existence of any aggravating factor, or the failure to find any mitigating factors as set forth or allowed in this section; and (3) the sentence of death is not excessive, considering both the crime and the defendant. In all other cases the court shall remand the case for reconsideration under this section. The court of appeals shall state in writing the reasons for its disposition of the review of the sentence.".

SEC. 2. Sections 23–1701 through 23–1705 of the District of Columbia Code as in effect on December 16, 1980, are hereby reenacted.

S. 909—TO AMEND TITLE 18 OF THE UNITED STATES CODE TO PROVIDE FOR THE IMPOSITION OF MINIMUM MANDATORY SENTENCES FOR THE USE OF A FIREARM IN THE COMMISSION OF A CRIME

Mr. THURMOND. Mr. President, in addition to the other measures I am introducing today for myself and Mr. ZORINSKY, I am submitting a bill to amend title 18 of the United States Code to provide for the imposition of minimum sentence of imprisonment for the use of a firearm in the commission of a Federal felony.

Historically, very few crimes have carried a mandatory minimum period of imprisonment because it was argued that such a statute takes away from the sentencing judge the discretion to make the sentence match the crime. It is also argued that mandatory sentence provisions have a coercive effect on guilty pleas. Notwithstanding these arguments, Congress has recognized that certain crimes are of such a violent nature and of such danger to society that mandatory minimum penalties should be provided.

The Federal Criminal Code legislation, pending last year as S. 722, contained two provisions with mandatory minimum sentences—trafficking in opiates and the use of a firearm in the commission of a Federal felony. These two crimes, because of the danger they pose to the community, were given statutory minimum sentences. Senator KENNEDY, a cosponsor of the Criminal Code revision bill, has also endorsed recently mandatory minimums for firearms-related crimes.

Mr. President, the bill I am submitting today is identical to provisions that have been included in previous legislation leading with the abuse of handguns by criminals. It would impose, in addition to the punishment provided for in the commission of the Federal crime, a sentence of at least 1 year for the first offense and no less than 2 years to 25 years for a second or subsequent offense. The sentencing court is prohibited from suspending the sentence, and the period of imprisonment shall not run concurrently with any other sentence imposed.

This is a tough sentencing provision, but the use of firearms indiscriminately by criminals of this country without fear of prosecution or imprisonment must be stopped. No amount of gun control legislation or restrictions on law-abiding citizens will affect these criminals. They must be dealt with swiftly and, where necessary, harshly.

Critics of mandatory minimum sentencing provisions say the legislature does not have the ability to actually determine which criminals are a danger to the community. I have a hard time understanding that logic. Embezzlers do not use firearms. People who write bad checks do not use firearms. The people who do use firearms commit crimes of violence against other people. The victims of violent crimes can testify which kinds of criminals they fear most—those who use firearms in the commission of crimes. The legislature does have a responsibility to its citizens to protect them where the courts have failed to do so.

In addition, the existence of a mandatory minimum imprisonment provision will give more discretion to the prosecutor to charge the use of a firearm in the commission of a felony as a separate offense. If this leads to faster guilty pleas, then perhaps justice will be better served.

Mr. President, this legislation is not new or revolutionary. It is an approach to dealing with violent criminal offenders that has been advocated for years. The recent attempt on the life of President Reagan, as well as the numerous incidents of crimes committed with a handgun, has drawn the attention of the entire Nation. Congress should not avoid its responsibility to place appropriate penalties for crimes committed with firearms on the books. It may not be the final answer to such crimes, but it will begin to send a signal that persons committing crimes with a firearm will not go unpunished.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 909

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

Section 924 of title 18, United States Code, is amended:

(a) by adding after the words "violates any provision of this Chapter" in the first sentence of subsection (a) the words "other than subsection (j) of section 922,";

(b) by adding the following at the end of subsection (a): "Whoever violates section 922(j) of this chapter shall be fined no more than $1,000, or imprisoned not more than one year, or both."; and

(c) by amending subsection (c) to read as follows:

"(c) Whoever—

"(1) uses a firearm to commit any felony for which he may be prosecuted in a court of the United States, or

"(2) carries a firearm during the commission of any felony for which he may be prosecuted in a court of the United States,

shall, in addition to the punishment provided for the commission of such felony, be sentenced to a term of imprisonment of not less than one year nor more than ten years in the case of the first offense, and to a term of not less than two nor more than twenty-five years for a second or subsequent offense. Notwithstanding any other provision of law, the court shall not suspend the sentence, nor shall the term of imprisonment imposed under this subsection run concurrently with any term of imprisonment imposed for the commission of such felony."

SENATE JOINT RESOLUTION 65—JOINT RESOLUTION RELATING TO RAOUL WALLENBERG

Mr. PELL. Mr. President, on behalf of myself and 42 of my colleagues, I am today introducing a joint resolution proclaiming Raoul Wallenberg to be an honorary citizen of the United States and requesting the President to ascertain from the Soviet Union the whereabouts of Mr. Wallenberg and to secure his return to freedom if he is still alive.

Sweden, in accordance with her traditional humanitarian and human rights tradition commissioned Raoul Wallenberg as a diplomat in order to better help the Jews in Hungary. Wallenberg went on to courageously and heroically save the lives of an estimated 100,000 innocent victims of Nazi terrorism in Hungary during World War II. Congressman TOM LANTOS, who, along with his wife Annette, was among those saved by Wallenberg's actions, has introduced the same resolution in the House with 265 cosponsors.

At the request of Secretary of State Cordell Hull, Raoul Wallenberg went to Hungary in 1944 to organize the rescue mission to save Jews and others marked for extermination as part of Hitler's "Final Solution." Wallenberg risked his life so that others might live. With funds provided by the U.S. War Refugee Board, Wallenberg established himself in Budapest where he distributed Swedish passports to thousands of Jews. He purchased and rented scores of houses in Budapest, equipped them with Swedish flags and declared them Swedish Embassy property, and personally protected the refugees he gathered within these safe houses. He followed the death marches and went daily to the deportation trains where he literally pulled people out of the clutches of the Nazis. Altogether, he saved tens of thousands from deportation to the death camps or violent deaths in the ghetto of Budapest.

In January 1945, Raoul Wallenberg was seized by Russian authorities in direct violation of his diplomatic immunity. The Soviets accused him of being an American spy and imprisoned him in the Soviet Union. For 36 years now, the Soviet Union has refused to account in a credible manner for the whereabouts and fate of Raoul Wallenberg. At first, Russian authorities acknowledged taking him into protective custody; 6 months later, however, they denied any knowledge of him. But evidence began to mount that the Soviets were holding him prisoner. Former inmates of Soviet prisons who were released and escaped from Russia reported talking to or hearing about Wallenberg.

Finally, in 1957 Soviet authorities conceded that a man named "Wallenberg"

had been taken prisoner in Hungary in 1945, but they claimed that he had died of a heart attack while in prison in 1947. More recent reports from former Soviet prisoners, however, indicate that Wallenberg might still be alive today.

Mr. President, I have long had a special interest in the Raoul Wallenberg case. My father was the U.S. Minister to Hungary just prior to World War II, and was the U.S. Representative to the United Nations War Crimes Commission. In that capacity, he took the initiative to have the Commission declare genocide a war crime. I myself served as vice president of the International Rescue Committee and was responsible for the IRC's refugee relief effort in Europe at the time of the Hungarian uprising in 1956.

As a member of the Commission on Security and Cooperation in Europe, I have striven to secure the human rights of the oppressed people of the Soviet Union and Eastern Europe. Along with Senators Church, MOYNIHAN, and BOSCHWITZ, I founded the Free Raoul Wallenberg Committee in July 1979. And last year, along with those same distinguished colleagues, I cosponsored Senate Concurrent Resolution 117 expressing the sense of the Congress that the President should convey to the Soviet Government the deep concern of the Congress and the American people for the fate of Raoul Wallenberg, and that the U.S. delegation to the Madrid Conference on Security and Cooperation in Europe should urge consideration of the case of Raoul Wallenberg at that meeting by the signatories to the Helsinki final act. That measure, I am proud to say, won the overwhelming approval of both the Senate and the House last fall.

The United States owes a debt of gratitude to Raoul Wallenberg. Since his humanitarian actions were undertaken at the behest of our Government, it is appropriate that we express our appreciation for his unprecedented acts of courage on our behalf by formally awarding him honorary citizenship—the highest honor we can bestow upon him. Certainly our country has an obligation to Raoul Wallenberg to try to secure for him the same freedom he brought to so many others.

Mr. President, I ask unanimous consent that the full text of my resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

S.J. Res. 65

Whereas during World War II the United States was at war with Hungary, and had no diplomatic relations with that country;

Whereas in 1944 the United States Government through Secretary of State Cordell Hull requested the cooperation of Sweden, as a neutral nation, in protecting the lives of Hungarian Jews facing extermination at the hands of the Nazis;

Whereas Raoul Wallenberg agreed to act at the behest of the United States in Hungary, and went to Hungary in the summer of 1944 as Secretary of the Swedish Legation;

Whereas Raoul Wallenberg, with extraordinary courage and with total disregard for the constant danger to himself, saved the lives of almost one hundred thousand innocent men, women and children;

Whereas Raoul Wallenberg, with funds and directives supplied by the United States, provided food, shelter, and medical care to those whom he had rescued;

Whereas the Soviet Union, in violation of Wallenberg's Swedish diplomatic immunity and of international law, seized him on January 17, 1945, with no explanation ever given for his detention and subsequent imprisonment;

Whereas Raoul Wallenberg has been a prisoner in the Soviet Union since 1945;

Whereas reports from former prisoners in the Soviet Union, as recent as January 1981, suggest that Raoul Wallenberg is alive;

Whereas history has revealed that heroic acts of salvation were tragically rare during the massacre of millions of innocent human beings during World War II; and

Whereas the significance of this symbol of man's concern for his fellow man has been tainted by the wall of silence that surrounds the fate of Wallenberg: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Raoul Wallenberg is proclaimed to be an honorary citizen of the United States of America.

SEC. 2. The President is requested to take all possible steps to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom.

Mr. LEVIN. Mr. President, I support the joint resolution offered by Senator PELL to bestow honorary citizenship on Raoul Wallenberg. Few people in recent history have given so much to humankind and received so little in return.

Raoul Wallenberg was born in 1912 into a prominent Swedish family, which for generations had produced outstanding statesmen, bishops, and diplomats, as well as military heroes and financial leaders. His family was wealthy, his relationship with society secure. As a youth, he traveled extensively in Europe and the Middle East, and in 1935 took an honors degree in architecture at the University of Michigan.

Wallenberg then returned to Sweden, and pursued his family's interest in finance. He later worked for a bank in Haifa. Here he first saw Jews in flight from Hitler—survivors of an inhuman environment created by the most evil regime in the history of this planet.

These early impressions of broken lives and tortuous treatment were reinforced in Wallenberg during the early 1940's, when he served as the foreign representative of a Swedish import-export firm. During that time, he made several trips to Nazi-occupied Europe. His visits produced vivid impressions of Nazi brutality. These graphic experiences provided the spiritual underpinnings for the voyage which Wallenberg was about to undertake.

In 1944, Wallenberg's combination of pragmatic and idealistic qualities came to the attention of the U.S. War Refugee Board. Under cover of his family's financial interests, he went to Budapest in charge of a special department responsible for the protection and relief of Hungarian Jews.

Physically isolated from his homeland, he sought to save a people who had been thrown into a world of chaos—divorced from a society in which they had once shared. Wallenberg became an emissary to the Jewish ghetto—the twisted world of the Jew under Nazi rule.

He acted in this environment for only 7 months. But in that time, he touched the lives of approximately 100,000 human beings. He issued thousands of protective passports of his own elaborate design, complete with officials and the triple-crown insignia of Sweden. And he provided them to those who were about to be taken away—then threatened their guards with unknown but horrible consequences if they violated the protection those passports provided.

It worked. People marched away from railroad cars which led to death and walked into apartments that Wellenberg rented for the displaced.

Wallenberg worked around the clock. He built up a citywide relief organization of hospitals, nurseries, and soup kitchens. He met with Adolph Eichmann, mastermind of mass murder, in his desperate efforts to delay deaths. He visited the mayor of Budapest and left with lives. He challenged soldiers on the streets and at the very trains of death, and produced safety for people. He was here and then he was there: hunted by local Nazis and haunted by the image of what they were doing.

Wallenberg took the plight of a people packed into a ghetto and stalked by death and destruction as his cause. He saw in their persecution an evil, and infighting to eradicate that evil, he voluntarily separated himself from the society to which he belonged and the culture which could have provided his protection.

Wallenberg's efforts did not cease at the end of the war. In its closing days, he sought to meet with the victorious Russian generals who were then marching into Budapest. His dream was to begin the process of building anew, both physically and psychologically, a home for the displaced and dispirited.

But the Russians had no interest in seeing these dreams fulfilled. And so there were no conversations, and no discussions. There was only an arrest—and then a trip to a jail cell in Moscow.

From there, he began a long journey which we do not totally understand, and which makes the honorary citizenship which we seek to bestow all the more compelling.

It appears that Wallenberg was transferred from one prison to another. But no one knew for sure, since the Soviets refused to even acknowledge that they were holding him as a prisoner. As interest in his plight built, however, pressure on the Soviets to account for him continued to grow.

Finally, in 1957, they produced a document, signed by current Foreign Minister of the Soviet Union Andrei Gromyko. That document purported to demonstrate that newly discovered records indicated that Wallenberg had, indeed, been imprisoned, but had died of a heart attack in 1947. No death certificate accompanied this document. No explanation of his arrest was contained in this document. It simply reported the death and blamed any past misunderstanding on

already discredited figures of the discredited Stalinist regime.

Since then, the Soviets have persisted in saying that they have no additional information on the case. But for years, there have been reports of sightings, stories of meetings, tales of conversations.

Just 3 years ago, a man named Jan Kaplan was released from a Soviet prison. He called his daughter in Israel and, in an attempt to assure her that he had survived the ordeal in good health, told her of a Swedish prisoner who had been held for over 30 years. Word of that conversation circulated through the growing community of those concerned about Wallenberg and, ultimately, to the Soviet authorities. Those authorities promptly arrested Jan Kaplan again. Repeated attempts by our Government and others to locate Jan Kaplan or talk with him have been rebuffed by the Russians. His crime appears to have been the making of a casual remark which might imply that, even after 30 years of isolation, Raoul Wallenberg still lived somewhere in the frozen wild of the gulag.

The international Wallenberg hearings, held in Stockholm on January 15–16, 1981, offer additional evidence that Wallenberg did not die in 1947. The report of the proceedings, prepared by the Simon Wiesenthal Center and distributed to Members of Congress, contains several statements which independently substantiate Kaplan's observations. They cast deep doubt on the Soviet's claim of Wallenberg's death more than three decades ago, but they also underscore the continuing need to focus international attention on Wallenberg's tragic and mysterious disappearance.

The report contains a statement by Cronid Lubarsky that, as late as 1978, there was an old Swede being held in the Blagoveshchensk Special Psychiatric Hospital. That Swede was believed to be Wallenberg.

Dr. Marvin Makinen, who was incarcerated at the same time as Francis Gary Powers, also testified that he had heard of a Swedish prisoner who had been in Vladimir in the late 1950's.

Simon Wiesenthal presented a report from an unnamed witness, with whom he had direct contact, who stated that a General Kuprianov had personal encounters with Wallenberg from 1953 through 1956. General Kuprianov died in May 1979.

And, finally, there was the compelling testimony from Andre Lipchitz. Speaking under the assumed name of Andre Shimkevitch, Lipchitz testified that he was Raoul Wallenberg's cellmate in Moscow's Lubiana Prison in December 1947. All this testimony and documentation led the convenors of the Stockholm hearing to conclude that Raoul Wallenberg did not die in July 1947, as the Soviets have claimed.

Of course, these statements are not conclusive proof that Raoul Wallenberg is alive. Yet, taken together, they cast a total doubt on everything that the Soviets claimed to have happened to this heroic humanitarian. These doubts make this resolution all the more necessary—not just to honor Wallenberg, but to keep the beacon of public attention lit and focused on his disappearance. It is perhaps a distant hope that Raoul Wallenberg may be alive and someday freed, but it is a hope which we cannot allow to diminish.

As part of our pursuing the truth about Raoul Wallenberg's whereabouts, we must also press the Soviets for information regarding the whereabouts of Jan Kaplan. Verifying Kaplan's fate and freeing him, if he is alive, is essential in establishing some firm evidence about Raoul Wallenberg's whereabouts.

Raoul Wallenberg was an extraordinary hero. He was a Swedish hero. He was an American hero, because he was carrying out the work of the U.S. War Refugee Board. He was a hero of all humankind.

The depths of his bravery can only be measured by the compassion he meted out in the face of the most cruel and brutal tyranny humankind has ever witnessed. We cannot bestow a higher, or a more truly deserved, recognition of his courageous deeds than the granting of our own citizenship.

Last Friday a stirring account of Raoul Wallenberg's activities in Budapest appeared in the Detroit Jewish News. It was written by Per Anger, who served in the Swedish foreign legation at the time of Wallenberg's arrival in Hungary, and who worked with him during those dark 7 months. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the account was ordered to be printed in the RECORD, as follows:

[From the Detroit Jewish News, Apr. 3, 1981]

SWEDISH ENVOY DOCUMENTS WALLENBERG'S EFFORTS TO SAVE THOUSANDS OF HUNGARIANS IN THE HOLOCAUST

Thirty-six years after the abduction of one of the greatest heroes of World War II by the Russians, and their denial that he is still alive, the world movement for the freeing of Raoul Wallenberg has gained momentum.

Committees laboring for the rescue of Wallenberg, who is believed still to be in a Russian prison, have been formed. His family is in the front ranks of the activists laboring for his freedom and for action by the Swedish government. His stepfather, Fredrik von Dardel, wrote a book listing the facts about his fate, giving credence to the testimony by impartial observers who say they had seen Wallenberg in Butyrki prison in 1951, in Vladimir prison during the 1950s and in a mental hospital in the Soviet Union in 1961.

The renewed action in behalf of Wallenberg is receiving greatest impetus in the Schocken Holocaust Library series' "With Raoul Wallenberg in Budapest," by Per Anger. It is the most authoritative volume with the background of Wallenberg's heroic labors as a result of which tens of thousands of Jews were rescued from the gas chambers to which they were assigned by the Nazis who attempted to round them up in Hungary.

Per Anger was in Hungary, serving in the Swedish foreign legation preceding Wallenberg's arrival there. When he was the Swedish ambassador to Ottawa in recent years he told this reviewer that upon leaving the Swedish foreign service he will tell the story of the great hero. Was he handicapped by protocol? His book relates of hesitancies which are at last developing into action.

The Anger record is very important. He was born in Goteborg, Sweden in 1913. Upon graduating from Uppsala University in 1939 he entered the diplomatic service and was assigned to the Swedish Foreign Office in Stockholm. His first foreign assignment was in 1940 when he joined the staff of the Swedish Embassy in Berlin.

He was transferred to Budapest in 1942. There as an attache in the embassy he became involved in the rescue of the persecuted Hungarian Jews then being carried on by several neutral governments and by the International Red Cross.

In July 1944, Raoul Wallenberg arrived in Budapest and Per Anger became his close and devoted collaborator in the noble humanitarian mission of saving Hungarian Jews from deportation to the gas chambers of Auschwitz.

Raoul Wallenberg saved about 25,000 Jews directly and another 70,000 indirectly. In a tense, dramatic account Per Anger relates their experiences in Budapest during those fateful years 1944–1945. He recounts his association with Raoul Wallenberg in his rescue work and tells of Wallenberg's tragic fate after his arrest by the Russians.

After the war Per Anger was assigned to the Swedish embassies in Cairo, Addis Ababa, Paris, and the consulate general in San Francisco. His most recent assignment was as Sweden's ambassador to Ottawa. He retired in December 1979 after 40 years of distinguished diplomatic service to his country.

Schocken Books has to its credit an immense achievement with the publication of the many books forming the Holocaust Library. This newest addition to that bookshelf is among the very great contributions to the battle for justice and for the spreading of truth about the Nazi terror and the greatest of all heroes in the anti-Nazi struggle.

Anger enters into great detail in relating the Wallenberg story.

Anger's thorough account of what had occurred, the details of events that transpired in Hungary, the Nazi invasion and the eventual domination of the collaborating murderous gangs belonging to the Arrow Cross exposes the most bestial of inhuman movements in the anti-Semitic ranks that served as the tools of the barbaric Nazis. Most important in the Anger book is the chapter entitled "Wallenberg's Last Acts, His Unique Achievement." While the entire book is an historic document, this chapter emphasizes the heroism of a great man who gave up career and wealth to serve a great cause—that of rescuing Jews at his own peril. In that chapter Anger relates:

"Wallenberg's words, the last time we saw each other, were typical of him and of the seriousness with which he took his assignment. 'I'd never be able to go back to Stockholm without knowing inside myself I'd done all a man could do to save as many Jews as possible.' And he did all that a man could, to the very last.

"He was tireless in his efforts to save Jews from deportation. Many are the stories of how he could pop up on the most unexpected occasions and succeed in preventing the removal of Jews with protective passports, or stop the Arrow Crossmen from forcing their way into the Swedish houses. He swamped the Arrow Cross authorities with written petitions for relief for his charges. It was often he who was the prime mover in the neutral legations' protests, through joint memoranda, to the Arrow Cross regime, against the inhuman treatment of the Jews.

"Even if the mass deportations to Auschwitz by rail had stopped, the Germans made sporadic attempts to ship groups of Jews off by train.

"Wallenberg always had people on watch who could warn him in time to get to the station before the train's departure. On one occasion, he arrived with several long lists

of the holders of protective passports and demanded in an authoritative tone to check whether any such persons had by mistake been taken aboard.

"The Germans were taken by surprise and, right under their noses, Wallenberg pulled out a large number of Jews. Many of them had no passport at all, only various papers in the Hungarian language—drivers licenses, vaccination records or tax receipts—that the Germans did not understand. The bluff succeeded.

"Another time, when I was there, the Germans tried to stop us with guns. But we stood our ground, showed our Swedish diplomatic passports, and were able to leave with our charges.

"One day when Wallenberg was elsewhere, I rushed out to a station from which a trainload of Jews was about to depart. There was no time to debate with the Germans. I explained that a terrible mistake had been made, since apparently they were about to deport Jews who had Swedish protective passports. Should they not be released immediately, I would make sure that Veesenmayer was informed.

"The reaction to this proved to be the same as on the 10th of October, when we were sending home the group of Swedish women and children. The German train commander did not dare to risk being reported to the dreaded Veesenmayer.

"I went into the cars to call the roll, but found only two Jews with protective passports. However, with the help of the Hungarian police officer there, Batizfalvy (who secretly cooperated with Raoul Wallenberg and me), I succeeded, despite the SS commandant's orders, in freeing 150 Jews from the station even though 148 had no protective passports.

"Wallenberg sometimes arranged for special expeditions in which Jews who looked Aryan, dressed in Arrow Cross uniforms, raided camps and prisons and on several occasions succeeded in freeing a large number of Jews on the pretext that they were being taken away to deportation.

"How many persons did Wallenberg save? To that question, a clear-cut answer can hardly be given.

"I witnessed his stopping the deportation of a total of several thousand Jews at train stations, from the Swedish houses, and during the death march to the Austrian border.

"It was through these acts that the rumor was spread of his almost superhuman ability, in seemingly hopeless situations, to snatch victims from the Nazi executioners. He became hated but feared by the Arrow Crossmen. He became the Budapest Jews' hope of rescue from the final liquidation.

"Yet it was not through the kind of personal intervention just described that he made his greatest contribution. It was as a negotiator that he achieved his greatest results. He was the driving force behind the agreements entered into with the Arrow Cross regime concerning their respecting not only the 5,000 Swedish protective passports but also corresponding documents of the other neutral legations.

"Wallenberg was always conscious of the fact that saving as many persons as possible was what mattered. 'You know yourself,' he remarked on one occasion, 'how we're besieged every day by people who plead for a job at the legation, for asylum or for a protective passport for themselves and their relations. When they can't come themselves, they send their Aryan friends to ask for them. All of them want to meet me personally. I've got to be firm. Time doesn't allow me to devote myself to single cases when it's a question of life or death for Budapest's entire Jewish population.'

"Wallenberg held to this line rigorously.

"To accomplish his ends, he applied every means. He bribed Arrow Cross officials. Sometimes he threatened execution. Other times he promised pardon after the arrival of the Russians. He used Foreign Minister Kemeny's wife (who was of Jewish descent and greatly admired him) to influence her husband to approve the protective passports and so on.

"As I mentioned earlier, after the war had ended, it was established that 50,000 Jews who lived in the foreign houses, the international ghetto, had survived. They were generally equipped with protective passports or similar documents issued by the neutral legations and the International Red Cross. Of these, Wallenberg had protected nearly half, around 20 to 25,000.

"But Wallenberg's contribution extended even further. Besides his efforts for the international ghetto, toward the end he also worked to protect the inhabitants of Budapest's general or so-called sealed ghetto, where around 70,000 had been forced together. He could sometimes arrange for food deliveries to the starving, and he managed on several occasions to forestall the Arrow Crossmen's rampages in the ghetto.

"But the Arrow Crossmen had, in their fanatical hatred of the Jews, decided to commit mass murder in the ghetto at the last minute. When Wallenberg got wind of this, he demanded that the German commander, General Schmidthuber, prevent the killing. Otherwise, Wallenberg would make sure that Schmidthuber would swing on the gallows when the Russians came.

"Schmidthuber was shaken by Wallenberg's words and stopped the planned operation against the ghetto.

"Thus Wallenberg contributed to saving still another 70,000 lives.

"Jeno Leval, in his book, 'Raoul Wallenberg—Hero of Budapest,' praises Wallenberg's efforts for the Jews in the sealed ghetto. He adds: 'It is of the utmost importance that the Nazis and the Arrow Crossmen were not able to ravage unhindered—they were compelled to see that every step they took was being watched and followed by the young Swedish diplomat. From Wallenberg they could keep no secrets. The Arrow Crossmen could not trick him. They could not operate freely, they were held responsible for the lives of the persecuted and the condemned. Wallenberg was the world's observing eye, the one who continually called the criminals to account.

" 'That is the great importance of Wallenberg's struggle in Budapest.' "

The movement in behalf of Wallenberg made little progress for many years. In the last 15 years a number of those in the ranks of the tens of thousands he had rescued emerged to demand that he be freed from the Russian agonies. Annette Lantos, whose husband, Dr. Tom Lantos, is now a member of Congress from California, is a leader in that movement.

In Sweden there was lethargy. Now there is an awakening. Per Anger asserts that "it has come to be a question of decency to find out what happened to a man who, on an official Swedish assignment, rendered such unique service to mankind." Anger states:

"Under the skillful leadership of Undersecretary Leif Leifland, the Foreign Office continues to pursue the new leads that turn up. With great seriousness, Leifland set to work on the testimony of Abraham Kalinski at the end of 1978, according to which Wallenberg was seen in various Soviet prisons during the '40s, '60s, and '70s, that is, after the year 1947 when, according to the Soviet authorities, he is supposed to have died. This information led to a new representation to the Soviet government in January 1979.

"The Soviets, in their reply, maintained that the new information did not alter their earlier answer that Wallenberg died in 1947. In a press bulletin from the Foreign Office after that reply, it was said that the Swedish government does not regard Raoul Wallenberg's case as closed by this Soviet answer but plans to continue its effort to clear up what his fate has been.

"In contrast to the earlier situation, especially in the years right after the war, a trusting cooperation now takes place between the government and the Wallenberg committee, which consists of Wallenberg's closest relatives and a number of others who, wherever they may be, have worked through the years for Wallenberg's cause. Nina Lagergren and Guy von Dardel have been tireless in this work and deserve all possible support."

Many were helpful, some obstructed. The Vatican of that era failed to provide the help that was so urgently needed. Relating the help that was given Wallenberg and the Swedish legation when they established means of saving the targets of anti-Semitism, the Arrow Cross And the Nazis, Pope Pius XII, who has often been accused of failure to help rescue efforts, is accused also by Anger. He states:

"The number of protective passports approved by the Hungarian authorities rose to 5,000. Later on, more and more Jews were spirited into these buildings in secrecy, without the authorities' permission. Soon the total number of Jews under Swedish protection rose to more than twice the number authorized, or from 15 to 20,000. Add to this the great throng of Jews, both adults and children, who were hidden or otherwise helped through the efforts of Langlet and Asta Nilsson.

"Other foreign legations, too, the Swiss, Spanish, Portuguese, and the Papal Nuncio, got to work issuing identification papers of a similar sort. Ever since the German occupation began, the nuncio, Angelo Rotta, had been making energetic representations to the Hungarian government to help the Jews.

"Rotta's action were in stark contrast to the passivity shown by his chief, Pope Pius XII. During the persecution of the Jews in Italy, his silence was notable. As regards Hungary, Rotta had to work alone, without any particular support from the Vatican."

The great drama entitled "Raoul Wallenberg" has reached a new stage. There is action and it is hoped, now that legislation in his behalf is proposed in the U.S. Congress, that a great hero innocently held in a Soviet prison will be released.

The resolution introduced in the U.S. House of Representatives by Congressman Tom Lantos to make the Swedish war hero an honorary U.S. citizen is an important development. This, Rep. Lantos states, would make it possible for the U.S. to become legally interested in the case and to add to the demands for Wallenberg's release from Russia. Rep. Lantos and his wife Annette were among the Hungarians rescued from the Nazi death camps in the process of Wallenberg's issuing Swedish passports to the victims of Hitlerism who were to be sent to death camps.

The story written by Per Anger serves to add to the movements in civilized and human spheres both to end a tragedy and to give full credit for heroism and courage to a great Christian humanitarian who labored and risked his life to rescue tens of thousands of Jews.

Mr. LEVIN. Mr. President, finally, I commend my friend from Rhode Island for introducing this joint resolution. It shows the kind of extraordinary leadership that we have come to take for granted from the Senator from Rhode Island, and it is my pleasure to be added as a sponsor to his resolution and without his leadership this resolution would not have been brought to the attention of

the Senate with the kind of forcefulness that it indeed has been.

Mr. HAYAKAWA. Mr. President, will the Senator yield?

Mr. LEVIN. I yield.

Mr. HAYAKAWA. Mr. President, Raoul Wallenberg, a Swedish diplomat, singlehandedly saved the lives of an estimated 100,000 innocent victims fleeing from Nazi terrorism, 37 years ago in Budapest, Hungary.

Mr. Wallenberg's mission was to deliver the last remnant of the Jewish population and others marked for extermination from Hitler's last efforts to insure the Jewish holocaust.

In 1945, as the war ended, Russian troops occupied Budapest. Mr. Wallenberg was, at that time, imprisoned in direct violation of his diplomatic immunity. He has never been released. There have been a multitude of conflicting stories as to his whereabouts. At first, the Russians acknowledged taking him into protective custody; 6 months later they denied any knowledge of him. Despite overwhelming evidence by former Soviet prisoners that Wallenberg is still alive in Spets Korpus in the Gorkij prison region, the Soviets have remained silent since 1957 concerning this brave man's case.

Mr. President, we owe Raoul Wallenberg a debt of gratitude for the humanitarian actions undertaken at the behest of our Government. On November 19, 1980, Senate Concurrent Resolution 117 was passed to demonstrate Congress deep sense of concern about the Wallenberg case. We now need to take this issue one step further. Therefore, I am pleased to cosponsor a joint resolution proclaiming Raoul Wallenberg to be an honorary citizen of the United States, and requesting the President to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg in order to secure his freedom.

Thank you, Mr. President.

● Mr. MOYNIHAN. Mr. President, I join my colleagues in support of Senate Joint Resolution 65, which grants honorary American citizenship to Raoul Wallenberg, a man whose claim on the gratitude of our country is very great. At American request he undertook, as my colleagues have explained, a mission at the end of the Second World War, seeking to rescue Hungarian Jews from the death chambers of the Third Reich, which grew ever more murderous as its end drew near. Despite this heroism, Raoul Wallenberg was seized by Soviet occupation forces, which were moving into Hungary at that time only to subject it to a new dictatorship. His whereabouts have remained a mystery ever since.

Mr. President, to grant honorary American citizenship is no small step. Not because the privileges that attach to it are so great, but because it has to date been bestowed only on one man: Churchill. It is not easy to compare any man's achievements, however heroic, with those of Winston Churchill.

Yet there is a deep similarity between what he stood for and what we remember of Raoul Wallenberg. Churchill was among the few men of the thirties who had no illusions about either of the fearful totalitarian regimes that threatened the West—Fascism and Bolshevism, Germany and Russia, Hilter and Stalin. So many others of that corrupt time felt obliged to obscure the evils of one in order to oppose the other. Not Churchill. He was the enemy of both totalitarianisms, and each of them understood that it faced no more formidable opponent than he.

Curiously, both of these regimes understood as well that Raoul Wallenberg was their enemy. His mission to Hungary was to save fellow human beings from the Nazis, and yet the humanity and courage of his work there seemed to mark him out for the Soviet authorities as their enemy as well. Having opposed one totalitarian regime he became the victim of another. In light of his heroism it is fitting that we honor Raoul Wallenberg.●

THE NOMINATION OF DR. ERNEST LEFEVER TO BE ASSISTANT SECRETARY OF STATE FOR HUMAN RIGHTS AND HUMANITARIAN AFFAIRS

Mr. HAYAKAWA. Mr. President, the nomination of Dr. Ernest Lefever to be Assistant Secretary of State for Human Rights and Humanitarian Affairs has drawn mixed reviews from the press. Several nationally syndicated columnists have commented favorably on his nomination as well as some major newspapers.

One such comment appeared in the Washington Star on February 12, "A New Human Rights Champion." The editorial accurately portrays Dr. Lefever's views on human rights—"The difference between the new administration and its predecessor, he thinks, is that the newcomers know what fosters human rights and what threatens them. The emphasis on defense is on safeguarding the institutions that make possible democracy, diversity and peaceful change." Furthermore, the Star notes that Dr. Lefever's point of view is widely represented in the new administration and also is held by Americans in general.

Mr. President, I ask unanimous consent that this editorial be printed in the RECORD so that my colleagues may have the opportunity to read it and that columns by Joseph Sobran, William Safire, Hugh Sidey, Smith Hempstone, and William Murchison also be printed.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Star, Feb. 12, 1981]

A NEW HUMAN RIGHTS CHAMPION

Just in case anybody still hasn't got the word that there's a new human rights policy coming out of the White House, here's President Reagan's choice for chief of the State Department's Bureau of Human Rights and Humanitarian Affairs: Dr. Ernest Lefever, head of the Georgetown Ethics and Public Policy Center.

To some simplifiers this appointment may look like another indication that the administration will do anything for military security, no matter who's being tortured. Dr. Lefever, after all, has defended U.S. support of imperfectly humane regimes in South Korea, Taiwan and Chile. He has spoken well of the CIA. Dr. Lefever has even refused to read South Africa out of the human species.

To him, though, the implications run the other way. A clergyman who has fought race discrimination in this country, Dr. Lefever considers human rights the heart of the American foreign policy he will be helping to implement. The difference between the new administration and its predecessor, he thinks, is that the newcomers know what fosters human rights and what threatens them. The emphasis on defense is on safeguarding the institutions that make possible democracy, diversity and peaceful change.

Dr. Lefever has written extensively on threats to human rights, human dignity and human freedom in the contemporary world. The list begins with military aggression, as in Afghanistan. A second threat comes from proxy aggression, such as that of the Cubans in Angola and elsewhere in Africa. Next, subversion of the kind that has been going on in El Salvador. Finally, the threat of terrorism, which can be seen north, south, east and west around the globe.

He is happy to associate himself with U.N. Ambassador Jeane Kirkpatrick's willingness to support "moderately repressive" authoritarian governments when they are strategically important and friendly to the U.S.

Like Ambassador Kirkpatrick, he takes very seriously the distinction between authoritarian and totalitarian governments. Authoritarian governments have been known to evolve toward democratic freedoms, as in Spain. Totalitarians, not so far.

This point of view is ever more widely represented in the Reagan administration. Ambassador Max Kampelman has been expressing it in Madrid, where the Helsinki human rights accords have been under discussion for the last few months. It fits in with the attitudes of our two new delegates to the United Nations Humans Rights Commission, which is currently meeting in Geneva: Michael Novak and lawyer Richard Schifter.

Perhaps most important, it seems to fit in with the thinking of Americans in general.

According to a January Harris poll in which people were asked to rate the quality of Mr. Reagan's cabinet appointees, Jeane Kirkpatrick who has so outraged proponents of the Carter administration's human rights program, topped the list with 57 per cent of the respondents ready to call her a good or excellent choice. The nearest competitor: Samuel R. Pierce Jr., Housing and Urban Development secretary with a rating of 55.

[From the New York Post, Mar. 14, 1981]

NEGLECTING REAL HUMAN RIGHTS

(By Joseph Sobran)

The headline in the Washington Post read, "Ultraconservative May Get Human Rights Post at State." There was the first shot in what promises to be a real battle: the confirmation of Ernest Lefever as Asst. Secretary of State for Human Rights and Humanitarian Affairs.

No question, Lefever's nomination was a real red flag to the Left. The Washington Post story went on to call him an "ultraconservative" and "rightist" half a dozen times, the line between objective reporting and ideological vituperation sagging badly.

The Council on Hemispheric Affairs has weighed in, too, with a blast at the nomination as "at best a cruel joke and at worst an appalling insult to the large community in this country concerned with human rights."

The Hive doesn't like Lefever, not one little bit. Who is this right-wing monster?

As it happens, I have known him, by no means intimately, for some years, reading his books more often than meeting him. He is, quite simply, a deeply decent man—an ordained minister who did voluntary work in the Philadelphia slums back when most of his critics were too young to lecture others on "compassion."

Lefever is not skeptical about human rights. But he is profoundly skeptical of the kind of "human rights activists" who have

lately dominated public discourse on the subject.

Why? "They neglect or trivialize the fundamental political and moral struggle of our time—the protracted conflict between forces of total government based on coercion and the proponents of limited government based on popular consent and humane laws." Lefever stresses the distinction between the "authoritarian" state, the junta sort of regime under which freedom is bruised but not killed, and the "totalitarian" state, in which freedom is extinguished.

The distinction, ridiculed by the Left, is absolutely vital. Under the authoritarian regime, non-political institutions like the family, the church, private property, the universities, are pretty much left alone. Even private newspapers critical of the government may be tolerated. But totalitarian regimes, usually socialist, persecute these institutions mercilessly. In the authoritarian state there is a chance of liberalization; in the totalitarian state, almost none.

What the "human rights activists" don't grasp is that human rights depend, in the long run, on institutional bases. The Soviet Constitution has a long, long list of civil rights, all of them empty; the Soviet citizen can't find anyone to enforce them.

My own view—to the right of Lefever's, I suspect—is that we should drop the whole subject of human rights. Alexander Hamilton opposed a Bill of Rights because our government, unlike the British one, has no need of it: the presumption was always in favor of liberty, unless sovereign power had been specifically delegated by the people to their government. Any attempt to list their rights, he argued, would imply the right of the government to do anything not forbidden.

By the same token, there are simply too many genuine human rights to make it practical to insist on their observance around the world.

Most of our "human rights activists" are, consciously or not, socialists, who tend to pick on places like Chile—one of the world's freer countries.

Any human rights policy is bound to be selective. We should therefore look to our national interests, and strengthen the relatively free societies that are our natural allies. And confirm Lefever.

[From the New York Times, Feb. 9, 1981]

THE LEFEVER NUDGE

(By William Safire)

WASHINGTON.—Wither "human rights" in the Reagan Administration? Will the United States fling its arms around right-wing dictators and stop trying to end torture and to foster the growth of democracy?

Some recent political history: Human rights was rediscovered as a political issue in 1975. Daniel Patrick Moynihan, in a Commentary magazine article and later speaking as the United States Representative to the United Nations, rejected criticism of the U.S. record on civil rights by Communist and third-world countries who denied their citizens any such rights. To the delight of guilt-ridden Americans, the totalitarian world was put on the defensive.

Early in 1976, candidate Ronald Reagan was searching for issues other than the Panama Canal to use in his campaign against fellow Republican Gerry Ford. Ford's Secretary of State, Henry Kissinger, was pursuing détente and preferred "quiet diplomacy" to outspoken confrontation as the means to help Soviet dissidents or the emigration of Jews. In the primaries, Reagan clashed with Kissinger-Ford on this human rights issue, and that became the basis of differences for years.

In the Democratic primaries that year, Jimmy Carter was also looking for foreign policy differences with Ford. Taking a leaf from Reagan's briefing book, Mr. Carter embraced human rights and rejected Kissingerian amorality; that appealed to Democratic conservatives. Carter added a wrinkle that attracted liberals—an attack on human-rights violations by "authoritarian" allies.

At that point, human rights became a bed in which such disparate souls as Anthony Lewis and I could be fellows. Liberals concentrated on abuses by right-wing allies, and conservatives denounced abuses by the totalitarian left.

When Carter became President, he had developed the Moynihan-Reagan theme: "Our commitment to human rights must be absolute." But when neither the Soviet Union nor the third world paid any attention to him, Mr. Carter concentrated his absolutism on right-wing governments in Latin America and South Africa.

By demanding human rights "in nations friendly to us—while passively noting violations in unfriendly countries—the Carterites perverted the original idea. Friendly dictator Somoza was overthrown by Carter and was replaced by a more totalitarian Marxist regime; unfriendly dictator Qaddafi was supported in Libya and Egypt's Sadat was told not to trouble him. The Soviet crackdown on dissenters was ignored.

"Human rights" was thus besmirched. In practical terms, it bothered no leftist totalitarian regime, and its righteous finger-wagging turned off non-Communist nations fighting terrorism and subversion.

Now the Reaganites are in, and that disastrous "slap-only-rightist-allies" policy is being reversed. The question is: Will we go back to the "quiet diplomacy" policy of the mid-70's that pushed nowhere for human rights, or will we adopt a "slap-only-leftist-enemies" policy that ignores repression and corruption in our allies?

Both of those approaches are as barren as the Carter approach, though less harmful to our foreign policy. Yes, we should be embarrassing the totalitarians of the left mercilessly, as Max Kampelman has been doing lately in Madrid—but we should also be searching for a new and more effective way to protect human rights in allied nations under attack.

Ernest Lefever has been chosen to lead the human rights department at State. A lesser-of-evils theologian who believes we must provide arms to allies to put down insurrection, Lefever's aggressive pragmatism appalls idealists. However, he has written that we are best able to "nudge history our way" by being faithful allies to our imperfect friends—by persuading them quietly rather than parading their sins.

The Lefever Nudge deserves a chance. Although Secretary of State Haig's comment on human rights—"not a de-emphasis, but a change in priority"—is doubletalk, Lane Kirkland at the A.F.L.-C.I.O. attests that Haig at NATO was unusually sensitive to the promotion of free labor unions. State could learn a lot from the American labor movement about getting a democratic foot in an authoritarian door overseas.

Maybe the human rights carrot will work better for Reagan than a stick worked for Carter, and proud nations like Argentina will respond to subtler inducements to permit more press freedom and loyal political opposition.

But the change in priority must never mask a change in goal: If Dr. Lefever's gentle elbow should be ignored in Chile or South Africa or South Korea, and if unnecessary repression should not be lessened, then the U.S. would lose its moral claim against human rights atrocities on the left.

President Reagan must never let that happen. Morality has a place in foreign policy—he helped put it there—and an ally that refuses to distinguish itself from an enemy deserves to go down the drain. Results count: we'll see if the Lefever Nudge can deliver where the Carter Shove failed.

[From the Washington Star, Feb. 21, 1981]

OF HUMAN RIGHTS AND THE CASE OF MR. LEFEVER

(By Hugh Sidey)

Religious wars are always the worst; more duplicity, hatred and desolation than in any other kind of battle. People convinced of their rectitude and fevered by their cause get nasty quick.

We are about to witness such an engagement. It will center on the Senate confirmation hearings of Ernest W. Lefever, 61, who has been nominated as Assistant Secretary of State for Human Rights. Already a range of critics from politics and press have howled that Lefever, who some time or another went through the Yale Divinity School, is a sanctimonious poseur who in truth is nothing but a gunboat parson, an apologist for the industrial-military complex. He would, his detractors suggest, use his credentials to cloak America's return to the embrace of dictators and other strong men who place order above humanity.

How Lefever, who has spent his life as missionary, ethics student, Hubert Humphrey aide, Brookings Institution scholar and arms control researcher, could have critics contemptuously label him an ultra-conservative is best left to the intrepid investigators on the Hill to figure out. The question at hand is larger.

Jimmy Carter made human rights almost everything in his presidency. It rose from his soul, it was the manifestation of his religious nature and one suspects at this distance that it was his reason for becoming president. He never really wanted to exercise power. He wanted to preach. He wanted to search through the world's back alleys among the bullies and the thieves and bring them to the altar by sweet reason or, that failing, by righteous thunder. He did not want to carry a weapon.

The office of Human Rights and Humanitarian Affairs under Carter was advanced to bureau status and Patt Derian was placed in charge. She was possessed by the same missionary real as Carter. Now that the Carter administration is history and changes are in the wind, those rallied by Carter's singular approach to foreign policy cling passionately to the belief that his human rights crusade will be the thing most remembered and revered in his four years.

Within that belief is the flawed view that until Carter began talking about human rights in such born again fervor American foreign policy was not concerned with the rights issue. Where does that leave Harry Truman. Dwight Eisenhower, John Kennedy, or for that matter Lyndon Johnson and Richard Nixon? In fact, the goal of every president has been peace, world stability and the enlargement of freedom. Some may have made mistakes along the way but none conspired against the ideal of freedom. "Human rights are what politics is all about," wrote Lefever. The U.S., flawed though she is, has always been a beacon of hope.

While the final report on Carter's human rights stewardship is full of praise and claims of success, the specifics are skimpy and the reasoning foggy. Out of the highest of purposes to be sure, Carter substituted rhetoric for strength, erroneously equated his own faith and ideals with those of other societies. While he watched hungrily for signs that his sermons and related pressures could change the internal affairs of the offenders (mostly small, struggling allies) he did not see (or care to) until the Soviet Union invaded Afghanistan that the greatest enemies of human rights were the brutal totalitarian regimes who put their faith in weapons.

THE LAST FOUR YEARS

No matter what the propagandists at the State Department have decreed, the hard fact is that the perimeter of freedom shrank under Carter. While he could tell with pride that no American boys had been sent into combat in his time, the deaths, dislocations and abridgements of every human right in Cambodia, Vietnam, Ethiopia, Afghanistan, Iran and elsewhere mocked his policy. In trying to tally the human suffering of the last four years, mathematics is meaningless. But it is not too wild an assumption that once again in the affairs of men those who preached the most about human rights presided in a time when misery grew larger.

Ernest Lefever is a prickly man and he has a bit of the air of a parson one Ph.D. removed from the pulpit. He may be flawed beyond redemption for all that we know. But his critics will be hard put to deny him the nomination if their arguments only assail the idea that the greatest case for human rights can be made by an America which is strong enough, both militarily and economically, to discourage adversaries and to retain imperfect friends to whom we can quietly talk about the benefits of human rights.

[From the Richmond Times-Dispatch, Mar. 8, 1981]

LEFEVER OUTRAGES LEFT WITH HUMAN-RIGHTS VIEWS

(By Smith Hempstone)

Any Reagan appointee who can attract the ire of The New York Times, Mary McGrory and Sen. Alan Cranston can't be all bad.

The gray-haired gentleman in question, Dr. Ernest W. Lefever, is a 61-year-old ordained minister and scholar who has been selected to serve as assistant secretary of state for human rights and humanitarian affairs.

To hear the grand panjandrums of the left tell it, the scholarly Lefever is a mixture of Torquemada and Attila the Hun.

On Monday, The New York Times asserted that Lefever's appointment was "frivolous," criticized his "cynical approach" and described him as "a tetchy academic . . . dubious about the very existenced of the office he is being named to administer."

Miss McGrory, a columnist who scribbles for The Washington Star, last month painted Lefever as "a human rights wrecking crew and a proven red-baiter."

Cranston, the liberal Democratic Californian who tried unsuccessfully to derail the appointment of Alexander Haig as secretary of state, maintains that Lefever's confirmation "would deprive us of one of our most important weapons for peaceful competition with Soviet regimes."

Having known Ernie Lefever for the better part of a decade, one has to admit he is not a charm boy. He has a tendency toward irascibility, and a zealot's belief in the righteousness of his cause. He is a conservative, and does not suffer fools gladly (which may account for the vehemence of those who oppress him).

Lefever has had the effrontery to suggest there might be some merit in friendly states such as South Korea, Taiwan and Chile which have less-than-perfect human rights records; he has implied that some international corporations are not entirely evil; he has even, on occasion, spoken well of the Central Intelligence Agency.

But the most annoying thing of all about Ernie Lefever is that he is frequently and demonstrably correct in his assessments.

Now such personal characteristics and the holding of such opinions may be lapses of taste, but they are not indictable offenses. Nor do they preclude Lefever from performing well in his designated post.

But to describe Lefever (as Columnist Jack Anderson did last week) as a "right-wing fanatic" simply does not jibe with the profile of a man who is a graduate of the Yale Divinity School, holds a doctorate in Christian ethics, and has served as a Hubert Humphrey aide, an official of the National Council of Churches and token conservative at the Brookings Institution, a liberal think tank.

A foreign policy analyst and writer, Lefever, who describes himself as "a Harry Truman Democrat," is the founder and president of Washington's Ethics and Public Policy Center, a small, tax-free research and publication organization that seeks to promote Judeo-Christian values in the formulation of public policy.

Lefever believes the Carter administration's approach on human rights not only failed to work but was counterproductive. And you have to be a certified idiot not to appreciate the veracity of that position.

Was the Shah of Iran truly a greater foe of human rights than the Ayatollah Khomeini? Are Cambodians really better off now than they were under Lon Nol? Is Taiwan demonstrably more repressive than Communist China? The answers to all these questions clearly are no, and Lefever does not shrink from saying so.

Lefever's point is that there is infinitely more freedom—and more chance of greater freedom in the future—under authoritarian regimes than under totalitarian ones. Spain and Portugal are good examples of this thesis.

He further holds that "a consistent and single minded invocation of a human rights standard in making U.S. foreign policy decisions would subordinate, blur or distort other essential considerations." He believes that the maintenance of our national security and world peace—and the promotion of economic productivity—can have a more positive impact on human rights than preaching and posturing.

Lefever takes the position that the United States has "no moral mandate to remake the world in our own image," that it is "arrogant of us to attempt to reform the domestic behavior of our allies and even of our adversaries."

He holds that "the struggle for a bit more freedom of choice or a better chance for justice is a never-ending one," and that the United States can best assist this process by "quiet diplomacy" and "serving as a good example."

Ernie Lefever may be a prickly man, but he's no neo-fascist. He does stand convicted of refusing to pay homage to liberal shibboleths, of stripping cant and hypocrisy from the human rights issue, of being, in short, a realist.

We could use a few more like him.

[From the Dallas Morning News, Feb. 19, 1981]

RIGHTS AND WRONGS

(By William Murchison)

I'm for human rights, you're for human rights, we're all for human rights, right? Indubitably, until it comes time to specify whose rights and how, not to say whether, the United States shall guard them, whereupon the feuding and fussing begin.

The feuding and fussing are in high gear just now, thanks to the election of Ronald Reagan. At the helm of foreign policy is a secretary of State, Alexander Haig, who urges that we not make human rights our diplomatic be-all and end-all.

Our delegate to the United Nations, Dr. Jeane Kirkpatrick, came to Reagan's notice with a magazine article scoring the Carter administration's version of a human rights doctrine—hastle despots of the right but tolerate depots of the left.

The Director of the State Department's human rights section is to be Dr. Ernest Lefever, a scholar and theologian who says such startling things as, "We have no moral mandate to remake the world in our own image. It is arrogant of us to attempt to reform the domestic behaviors of our allies and even of our adversaries."

Liberals, as might be expected, have taken to their beds. Mary McGrory, the columnist, claims the new administration means "to stamp out human rights in foreign policy." Sen. Alan Cranston of California assails Lefever for his "blind eye to human rights violations by right-wing military dictatorships."

Well, it's plainly a new day. And how radiant, how warming, is the dawn.

The great truth that Jimmy Carter's and Andy Young's human rights rhetoric always obscured is that successful foreign policies are based on looking out for No. 1. What helps Britain is what the British are for. Whatever strengthens Soviet policy the Soviets instinctively embrace. So, inevitably, it must be for even so idealistic a nation as the United States.

Human rights can be one means to an end—but not the end itself. For what is the legitimate end of American policy if not America's survival in the face of the Soviet threat? If human rights helps our chances of survival, splendid. If not, it can't precisely be classed as an overriding concern.

As it happens, human rights could be an immensely important tool of American policy—but not as wielded by the Carter White House. The Carterites were down on rightist countries—Chile, the Philippines, South Africa, South Korea, Iran, Nicaragua.

That all these nations were hostile to the Soviets and friendly to the United States cut no ice with the Carterites. Nor did another urgent consideration—that no rightist regime, whatever its sins, is half so vile or despotic as the Soviet Union, whose human rights record Carter never seriously challenged.

Who can visualize Jimmy Carter hugging Somoza? At Vienna, the SALT II treaty having been signed, Carter impulsively threw his arms around Brezhnev.

Instead of embracing a Communist thug, the President might have used human rights—a concept scorned by the Kremlin—to score points off him. He might, for instance, have conditioned American trade on the improvement of human rights. He might have doubled the budget and the facilities of Radio Liberty and Radio Free Europe. He might have sought every occasion to publicize the plight of the Russian dissidents.

Why? Because the dissidents are in the right. And also because internal dissent weakens the regime, at home and abroad.

The Communist system depends on repression. Any loosening of that repression—as in Poland—and men and women start to stir, thinking unthinkable thoughts about an unthinkable subject, freedom.

For which reason Alexander Solzhenitsyn admonished an American audience several years back: "You are the allies of our liberation movement in the Communist countries . . . Whenever you help the persons persecuted in the Soviet Union, you not only display magnanimity and nobility, you're defending not only them but yourselves as well. You're defending your own future."

Jimmy Carter could never see it that way. With Ronald Reagan, it may prove different. Whatever the case, human rights, as a soggy, sentimental cliche, would seem to be dead. May it rest in peace.

SMALL BUSINESS INNOVATION RESEARCH ACT OF 1981

Mr. HAYAKAWA. Mr. President, I am very pleased to be an original cosponsor of the Small Business Innovation Research Act of 1981, which is a continuing

endeavor to direct more Federal research and development funds to small innovators in this country. The Senate Small Business Committee introduced a similar bill in the last session which was not enacted, and I sincerely believe the time is overdue for this direction.

Why is it that the Federal Government devotes less than 5 percent of its R. & D. funds to small business when individual entrepreneurs and small firms account for more than one-half of all inventions and innovations?

Perhaps this bill will represent at least one small step to correct this paradox.

Its provisions are fashioned after the program already in place at the National Science Foundation which was established in 1977 at the request of Congress. It requires no additional appropriations in this period of economic recovery. It merely directs all Federal agencies with R. & D. budgets over $100 million to establish a small business innovation research (SBIR) program and to set aside within 3 years a total of only 1 percent of that budget for small business research. Capital investment from a third source will be required for commercial application.

While large companies undoubtedly will continue to make major technological advancements, history clearly shows that a major source of technological advancement has resulted from the work of individual inventors and entrepreneurs working independently of our large industrial corporations. The list is a long one, beginning with the cotton gin, the railroads, communications, the Wright Brothers, the Polaroid camera, and so forth. All of these innovators were small guys.

America needs more of these inventions and improvements; not fewer. I believe the Federal Government should accept its share of responsibility to these enterprising taxpayers and be more conscientious about recognizing their particular needs and, indeed, their ideas that need some seed money to help them grow into reality.

As a result of fairly modest Federal assistance, a small firm has developed the ability to provide direct access to documents of all kinds with no paper—a boon to many businesses overwhelmed by paperwork requirements; the Optacon was invented, a small device that enables blind people to "read" any book without the necessity of Braille. The list is a long one that certainly justifies the attention of the budget decisionmakers in our Government.

Mr. President, a recent article in the Wall Street Journal, March 18, 1981, described a new gold rush in venture capital for high-technology firms. Many of these companies are located in California's "Silicon Valley" where Apple Computer, Inc. and Genentech, Inc. made financial headlines, and other companies are coming right along. Due primarily to the lowering of capital gains tax and new laws easing entry of pension fund money into venture capital, there is so much venture capital money around that inflated prices will inevitably result, and no one knows where the cycle will end.

I believe this reinforces the need for a steady support system that innovators can depend on and the need for the bill introduced today. It is a modest approach, but a stable one.

Thank you, Mr. President.

RECOGNITION OF SENATOR HEFLIN

The PRESIDING OFFICER. Without objection, the Senator from Alabama may proceed out of order. The original order was for the Senator from Wyoming (Mr. SIMPSON) to now proceed. In his absence, the Senator from Alabama, without objection, may proceed.

NASA—AN INVESTMENT IN AMERICA

Mr. HEFLIN. Mr. President, on February 5, 1981, President Reagan in a nationwide address stressed increased productivity as a key factor in economic stabilization. The contribution of the National Aeronautics and Space Administration to productivity in aeronautics and space activities is worthy of praise and study as an example of how Government and industry can work together to make conditions better for all of us. For more than 65 years, NASA and its predecessor have provided the research base on which technological progress in aeronautics has built. Yet for the past 10 years America's productivity has steadily declined, to less than half of what it was, lower than that of most industrial nations. The causes are undoubtedly complicated; but I have no doubt that a major factor is the decline in support of research and development, the base on which productivity ultimately rests. It is my conviction that America's R. & D. effort has long been underfunded and its relation and importance to productivity and employment and confidence greatly underestimated.

Thus, it might be instructive to examine an institution which exemplifies what a government-industry-academic partnership can mean to this country in terms of productivity, economic growth, technological superiority, jobs, new industries, better methods and goods, and, perhaps even more important, national pride and prestige. It would, in my judgment, be difficult to find an R. & D. team which has made more significant contributions to our country's well-being than the National Aeronautics and Space Administration. NASA's budget represents less than 1 percent per year of Federal spending, yet its impact on our economy and on our national life is substantial. I ask unanimous consent that a table, labeled table 1, be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE 1.—FEDERAL BUDGET, 1961–81

[Dollar amounts in millions]

	Total Federal budget	NASA appropriation	Percent of total budget
Fiscal year:			
1961	$110,428	$964	0.87
1962	118,814	1,825	1.54
1963	130,885	3,674	2.81
1964	132,636	5,100	3.85
1965	138,610	5,250	3.79
1966	163,127	5,175	3.17
1967	182,652	4,968	2.72
1968	190,649	4,589	2.41
1969	196,167	3,995	2.04
1970	212,973	3,749	1.76
1971	236,406	3,312	1.40
1972	248,097	3,310	1.33
1973	276,417	3,408	1.23
1974	313,861	3,040	.97
1975	412,099	3,231	.78
1976	415,336	3,550	.85
Transition quarter	91,409	932	1.02
1977	465,231	3,819	.82
1978	501,500	4,063	.81
1979	556,732	4,559	.82
1980 (estimate)	653,974	5,270	.81
1981 (estimate)	696,080	5,737	.82

Mr. HEFLIN. Mr. President, given the difficulty of measuring the multiple benefits from research efforts—new knowledge, new products, whole new industries, spinoffs—several independent organizations have made the attempt to determine NASA's effect on the economy.

In 1971, the Midwest Research Institute calculated a 7-to-1 return over 18 years from new technology such as that which NASA R. & D. stimulated.

In 1975, Chase Econometrics Associates calculated that returns from the pure productivity impact of NASA R. & D. were 14 to 1.

In 1975, Mathematica, Inc., measured potential gains to the economy of $7 billion over 10 years resulting from the speed-up of the introduction of just four successful NASA technological developments—gas turbine engines, NASTRAN computer programing, intergrated circuits, and cryogenic insulation. This large return reflects only a very small fraction of the impact from all NASA technology, yet its estimated dollar benefit far exceeds NASA's annual budget.

Mr. President, what these studies indicate is that our investment in high technology R. & D. does not cost money, it makes money for our economy. Few industries can show a return of between $7 and $14 for each $1 invested, but for NASA and our space program, that has been the case.

Mr. President, it is no accident that America's most profitable industrial product is aircraft, with sales accounting last year for $10 billion in positive balance of trade. The U.S. aerospace industry currently employs 1.1 million people to produce over 70 percent of the world's commercial aircraft. Competition from other countries is now fast increasing, with such factors as newer facilities, national subsidies, and American trained aeronautical engineers proving formidable. It is primarily through research efforts, building on the American base, that potential competitors expect to take markets now held by the United States. Europe and Japan are both investing

heavily in aerospace technology. The A-300 wide-body jet transport, built in Europe, has been selected for use by 30 airlines of the world and offers real competition to American-built craft.

Perhaps the most concern to us should be the fact that significantly fewer young Americans are studying aeronautical engineering than projections indicate are needed to maintain a strong research base. Without maintaining the intellectual talent from which all gains in productivity are made, we shall find ourselves losing ground. The long-term threat to America's aeronautical preeminence and to our economy is real.

Several commercial applications show clearly the productivity benefits of space research in the creation of new industries and new and more efficient methods:

COMMERCIAL COMMUNICATIONS VIA SATELLITES

One of the greatest NASA contributions to national productivity has been the development of satellites for commercial communications. This development not only spawned a new international industry, but also has touched the lives of virtually every person on Earth. International communications via satellite was the first space activity to reach commercialization. The application was started by Intelsat, in which Comsat is the U.S. partner. The reasons for the swift application are simple. Satellites could provide television service that existing undersea cables could not. There were few regulatory barriers to the establishment of communications on a worldwide basis and the cost advantages were tremendous.

Today, 104 countries hold investment shares in Intelsat, and the owners' equity is approximately $550 million. That investment in the space segment is overshadowed by the several hundred Earth stations and supporting terrestrial communications circuits in the network. At the end of 1979, there were 222 Earth stations providing direct satellite communication to 124 nations. An entirely new commercial market sprang up to provide the needed equipment, appearing while the research and development was still underway.

Since the first commercial satellite was placed in orbit in mid-1965, Intelsat's annual revenues have grown steadily, exceeding $200 million in 1980. At the same time circuit costs have been greatly reduced. Intelsat charges for transatlantic circuits are only 15 percent of the initial charges in 1965. These advantages for overseas callers are now starting to be realized for domestic long-distance communications via satellite.

The first U.S. domestic communications satellite was Western Union's Westar I, launched in 1974. Now three Westars have been joined by two RCA Satcoms and three Comsat Comstars, which are leased to A.T. & T. These satellites have enabled the distribution of television programs at low rates to cable TV companies throughout the United States. Four more companies have applied for permission to operate domestic satellites, bringing to 22 the total planned domestic communications satellites between 1980 and 1986. These satellites promise to lower long-distance telephone rates significantly and bring many new communications services.

One promising new service, in terms of productivity, is video teleconferencing. If this service can be successfully provided at a reasonable cost, it could reduce business travel and make substantial savings in the cost and time required to conduct business, not to mention the favorable impact on fuel consumption.

During the initial years, each Earth station cost $6 to $10 million, and at this cost, there were very few, mainly located at key trunking nodes to handle large volumes of collected traffic. As new technology emerged from NASA's R. & D. efforts, the power level of the signal relayed from the satellite increased and the cost of the Earth station decreased. Now a suitable small-dish antenna costs about $10,000.

NASA STRUCTURAL ANALYSIS (NASTRAN)

The Nastran program is a large and powerful computer program that analyzes the effects of loads on structures. Originally developed by NASA to aid design of airplanes and spacecraft, it has been used by U.S. industry to design such things as automobiles, trucks, railroad cars, ships, nuclear power reactors, steam turbines, bridges, and office buildings. The Nastran program, aimed primarily at large structural and design problems, is capable of treating concepts of virtually unlimited size. The structure to be analyzed is approximated by an array of elastic finite elements, each of which is characterized by an appropriate set of sectional properties and material properties. The Nastran element library contains more than 30,000 one-, two-, and three-dimensional elements, including nonlinear elements. Although other structural analysis software packages are available, none are capable of performing such large-scale analyses as the Nastran program nor generalized to as many applications.

THE LANDSAT PROGRAM

The goal of NASA's Landsat program is the development of technology for surveying Earth resources from space. The program involves the development, operation, and use of the Landsat series of remote-sensing satellites; they permit repetitive resources surveillance via the acquisition of multispectral image data.

The first NASA satellite dedicated to resource surveillance, Landsat-1, was launched in July 1972. Landsat-2 followed in January 1975 and Landsat-3 in March 1978. The satellites were placed in Sun-synchronous, near-polar orbits at altitudes of approximately 900 km (490 nmi). The remote-sensing instruments repeatedly view any particular area on the Earth's surface at 18-day intervals and at the same Sun angle. Their utility stems from the ability of onboard instruments to sense electromagnetic energy reflected or emitted from the Earth's surface and thereby to distinguish between surface features in considerable detail. The data can be interpreted to, for example, identify negative species, evaluate crop conditions and production, map the extent of watershed snow cover, or locate promising mineral regions. The digital data are received and processed at a number of ground facilities and then stored on magnetic tapes or transformed into imagery from which resource surveys and maps can be prepared.

The Landsat remote-sensing systems are serving many users including Federal, State, and local governments as well as private industry. The value of the systems has been demonstrated in many applications such as agricultural inventory, prospecting for new oil and mineral resources, charting sources of fresh water, classifying land usage, monitoring floods and mapping flood plains, and assessing the ecological impact of disturbances such as forest fires, surface mining, earthquakes, and volcanoes.

The following examples of current research and applications demonstrate the utility of the Landsat program.

Remote-sensing research and development efforts pertaining to agriculture are focused on the following high-priority information needs identified by the U.S. Department of Agriculture: warning of crop hazards such as inclement weather, insects, and diseases; foreign commodity production forecasts; land use classification; renewable resources inventories; land productivity estimates; conservation practices assessment; and pollution detection.

Landsat data have proven cost-effective for the survey and monitoring of forested lands. Several States have surveyed extensive forested areas. The estimated cost of a 10-million-acre survey in the State of Washington by standard ground and air methods would have been $10 million over a 2-year period. Landsat use allowed a comparable survey in half the time and a tenth the cost. Perhaps the most valuable forest management application of Landsat is the monitoring of deforestation by both man and nature. Tropical deforestation for cultivation is a topic of major concern because of the impact on the global carbon dioxide supply. The ability to detect forest alterations with Landsat data has been demonstrated for diverse locations across the world. This ability will enable global monitoring of deforestation for future studies of atmospheric carbon dioxide.

Many additional examples of Landsat applications could be cited. A recent survey by the Natural Resource and Environmental Task Force, an effort directed from the White House, identified 79 ways in which Landsat data are being used. The remote-sensing systems continue to provide resource managers with information—some of it previously unattainable—at lower cost and more quickly than conventional methods: Impressive results from a system originally designed as experimental.

These are just a few examples of research applications. To see why I am concerned that our research and development base in aerospace is shrinking requires only a comparison of the budget and personnel totals of several years ago with current totals. In the mid-1960's NASA and NASA-related programs employed 400,000 people—civil servants and contractors. Its budget was $5 billion. Present employment numbers 135,000. The current budget is $5.5 billion. Ad-

justed for inflation to constant 1972 dollars, this figure becomes a little more than $3 billion. I find this a starting and alarming situation. I ask unanimous consent that my second table be included at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE 2.—TOTAL EMPLOYMENT ON NASA PROGRAMS

	June 1960	June 1961	June 1962	June 1963	June 1964	June 1965	June 1966	June 1967	June 1968	June 1969	June 1970
Total employment	46,786	74,577	137,656	246,304	379,084	409,900	393,924	306,926	267,871	218,345	167,803

Mr. HEFLIN. Mr. President, NASA's George C. Marshall Space Flight Center, located in my State, employs 5,000 people—including contractor personnel—and significantly contributes to Alabama's economy—10,000 employed throughout the State on NASA programs—especially in the Huntsville area. Not surprisingly, the manpower-budget figures for Marshall show the same trend as those for the entire Agency. One alarming trend is the decline in the number of inventions reported by NASA. The curves showing decreased expenditures and decreased numbers of inventions are almost identical and one is tempted to make the obvious conclusion, Americans well know the value of invention and innovation. A recent example which has aroused a good deal of interest is the power factor controller invented by Mr. Frank Nola of Marshall. Its potential, when commercially available, for small-motor energy savings is enormous.

NASA's research centers are located in a dozen States around the country bolstering local and regional economies. Firms in 48 States work on NASA contracts. NASA grants to universities totaled $177 million in this fiscal year. NASA contributes to research in the fields of energy, pollution, construction, materials, and a number of others. This is a Government-industry-university relationship that clearly works well.

In addition to the obvious economic gains from aerospace research and development, what value, beyond the scientific and technical achievements, can be placed on the surge of pride and confidence we feel as Americans become the first of mankind to set foot on the Moon, or the awe inspired by the recent encounter with Jupiter and Saturn of the American Voyagers spacecraft? With the launch of the Space Shuttle next month a new era of space activity will begin: Opportunities for manufacture and research never before possible will challenge our best minds, call forth our best efforts. These achievements, some of America's historic milestones, are based largely on the research activities of the past.

Yet, we have for 10 years cut our support for NASA, creating a plateau in the upward slope of technological advance. While other countries mount impressive new research and development aerospace programs—using our pioneering work as a base—we level off. Markets will begin to erode perhaps in much the same way as has happened to other once invincible largely American markets.

In testimony prepared for delivery to the Subcommittee on Science, Technology and Space, the Senate Commerce Committee, Dr. Walter B. Olstad, Acting Associate Administrator of NASA for Aeronautics and Space Technology made the following statement:

A long range program in high power laser technology development is generating increased optimism that lasers may be used to transfer power in space. Earlier described solutions for the high cost of producing electric power in space addressed enhancement of current technology . . . (L)aser power transmission could enable a whole realm of exciting new possibilities: a central power station in orbit could be used to furnish power to networks of spacecrafts; energy could be transmitted to an orbital transfer vehicle; a high-energy laser might be used to provide propulsion to launch spacecraft from earth; orbital power plants could possibly deliver energy to aircraft in flight; and high-energy lasers, coupled with spaces borne relay reflectors might also be used to replace transmission lines for point-to-point relay of earth-generated power. In FY 1982, exploratory research on these and other novel concepts were continued.

Mr. President, this is the essence of what I am talking about today. In my judgment, we must unleash the creativity, the imagination, and the technology innovation of this superb team of scientists and our space program and provide them with the funds necessary to move these daring programs forward. We must, for our own sakes, provide new marks for challengers to aim toward, not watch as they surpass the old ones. I am convinced that NASA is the best hope for retaining aerospace leadership and markets. I am convinced that far greater support is needed. In a larger sense, I am convinced that research and development is essential to our growth and productivity and to our spirit—the spirit that is recognized everywhere as "American."

CONCERN OVER AMERICA'S FARM SYSTEM

Mr. HEFLIN. Mr. President, I ask unanimous consent that a statement of Goodwin L. Myrick, president of the Alabama Farm Bureau Federation, which was made here in Washington, D.C., on March 17, 1981, pertaining to agriculture, and which statement, in my judgment, is an excellent blueprint for Congress to follow in regard to legislation dealing with farmers be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF GOODWIN L. MYRICK

Today, I stand before you again, as I did last year, representing the Alabama Farm Bureau—the farmers from Alabama. Today, there are fewer farmers in Alabama; the 1980 drought, heat, inflation, and high interest rates have taken their toll in 1980. However, I am proud to say that those of us who remain believe the American system will ultimately reward the productive and hard-working farmers who have taken the risk in agricultural production and who have invested in producing food and fiber for this country. I am proud to be a part of these people. These are the people who make this nation great.

Each year our legislative visits to Washington have come in the spring, a time of hope for farmers. This year, as every year, these people will leave Washington and will return to their farms to plant the crops and tend the livestock which will feed this nation and much of the world. However, 1981 is not the same as past years. This year, this group has many concerns which extend beyond those normal risks of weather, pests and markets.

The causes for concern in the farm sector are many. On occasion, we have all singled out one thing or another as the central issue—energy, inflation, interest rates, taxes, embargoes and other government manipulation of operations, price, and markets. A livestock producer may cite excessively high feed prices; a row crop producer may cite excessive costs of energy, chemicals and fertilizer. All may cite interest rates, land and capital cost increases which drive the costs of producing above the anticipated returns. For those of us who have farmed for some time, equities have grown with inflation; for others, entry into this profession has been barred because of these inflated equities.

Well-intentioned individuals and groups in and out of government have injected their concerns over the environment, human nutrition, health and safety and human and animal rights. Once expressed, these concerns are pursued with mindless vigor to the end that markets are disrupted, production costs are increased. Then, regulations are issued to remedy alleged fears or concerns.

There is justifiable concern in the Alabama farming community. Let me address just a few of those concerns now. We will be expanding upon these and others in much greater detail as legislation is offered.

Inflation is the farmers' and nation's number one enemy. We applaud this administration's efforts to reduce government spending and taxes. We have asked for this repeatedly. However, there are two elements of the inflation fight which concern us. First, high interest rates inflate our production costs. We have entered the past two planning seasons with prime interest rates in excess of 18 percent. We understand the intentions but observe that the ability of the economy

to increase productivity has deteriorated significantly due to these high interest rates. We want you to realize that these interest dollars decrease net farm income. We cannot pass on this cost. Second, we acknowledge and accept the fact that cuts in the budget must be made if we are to achieve the desired goals of reducing government spending, increasing savings and capital investment, lowering inflation and promoting increased productivity. Please recognize that agriculture has achieved all of these goals.

You may question that statement relative to inflation because food prices have certainly increased. The fact is that since 1970, the farm share of the consumer's food dollar has decreased by over 15 percent and is no longer the major contributor to food price increases. The average American family spends less than 15 cents of every disposable dollar for food—of that the farmer receives less than 5 cents.

My point is this—when you consider sanctioning the continuing high interest rates and cutting budgets, please consider the long-term effect on agriculture. Agriculture is the one sector of the economy which has consistently made the economic decisions you are now encouraging in other sectors. Careful consideration should be given to price supports and to the authority under the 1949 Farm Act and the Charter of the CCC which permits the establishment of support prices at 100 percent of parity. Fine tuning of commodity loan prices and farmer held reserve loan prices, release and call prices are not disincentives. Adjustments may be needed, but should include all production costs, land and management. Reasonable target prices should be set so that they reflect regional costs of production including factors for management and land rent. These cannot be considered subsidies.

Another concern is the trade of American agricultural commodities to all of the nations of the world. Aggressive worldwide marketing efforts are the single best method of placing American farmers in a position where they can efficiently utilize their equipment, resources and skill for a profit. This worldwide market development must be allowed to occur in an atmosphere dominated by world supply, world demand and worldwide price discovery.

We are apprehensive because in the past the task of formulating trade policy has been spread throughout the Departments of State, Commerce, the White House and USDA. As a result, issues such as human rights, reciprocal agreements, domestic food prices and national security have influenced our markets. The credibility of American producers in world markets has been jeopardized and our trade has been diverted to other more reliable nations.

To accomplish free and open markets we must pursue a vigorous trade development policy. We must allow our products to enter the market freely. We must allow price to be determined in the marketplace without government interference. We must encourage the development of systems capable of drawing producers closer to both domestic and foreign consumers. We must have agricultural attachés in the embassies of all current and major potential customers. Trade should be conducted for cash or at prevailing credit terms and P.L. 480 should be used to provide food to needy nations when surplus is available.

Another concern is energy. Modern production-oriented agriculture uses only 3 percent of the nation's energy. We must have a reliable supply at reasonable prices. Agriculture can supply 10 percent of the nation's energy from renewable sources without adversely affecting food supply or using fragile lands. Recent recisions and proposed budget cuts have dealt a severe blow to the budding biomass energy potential. We agree that private funding must build the plants. However, without initial incentives from government, we will have a difficult time attracting private capital. Many advantages can accrue to agricultural and the economy if renewable energy development is encouraged.

We are concerned over the annual loss of 3 million acres of agricultural lands, but are equally concerned over the attitude on the part of some that our title to land is only a package of rights which can be taken from us piece by piece. Profitable markets for our commodities will keep prime lands in agriculture. However, this must be accomplished by consistent government policy. We recommend that government provide guidelines, not regulations, and develop incentives which place ultimate land use decisions at the local level. We cannot tolerate any further federal blackmail to enforce the dreams of land use planners who have no stake in the outcome.

Regulation of the agricultural enterprise and all other aspects of our lives has grown out of proportion to its useful or intended function. We support fully the efforts of government to prune and shape the bureaucratic hedgerow. Recognizing that we will always have regulation in one form or another, we suggest that we do not and cannot live in this world without risk. The regulatory process should carry with it stringent congressional oversite and potential veto. Another and perhaps more insidious part of the regulatory function is de facto regulation which is carried out daily in government publications and the press. Allegations of danger carry with them the impact of a regulatory decree. This is particularly true in the area of chemicals and food additives. The nitrite controversy, cholesterol, DES, cyclamate, char-broiled steaks and now coffee are all cases in point. In all of these cases our agricultural interests have been damaged by allegation. We recognize that there is no way to control the release of information by a non-government researcher. However, government should not magnify the damage with pronouncements of anticipated regulatory activity.

Perhaps the most important legislation in the history of American agriculture will be debated this year. This, of course, is the 1981 Farm Bill. I say this because the Omnibus Bill is the legal document under which the USDA operates for the next four years. The major areas of discussion appear to be loan prices, support prices, farmer-owned reserves and target prices, normal crop acres, land use and conservation, loans and loan guarantees, rural electrification and rural development. I have already made general comments on most of these issues. We are working with Congressional committees as the bill is constructed so that Farm Bureau policy is incorporated.

I would like to single out one other area—agricultural research. Today, the yields and efficiencies that we maintain are a result of the land grant college research conducted 10 to 15 years ago. For the past decade, research budgets have been systematically reduced in terms of real dollars. Increases in productivity have begun to level off. The funds must be restored so this trend can be reversed.

Other industries have the capital and the self-interest to invest in private research and development. They are then able to pass the costs on to the consumer. Agriculture is a diffuse industry, comprised of many individuals and commodities. We are not capable of maintaining a sustained research effort independently. If this nation and the world are to enjoy the productivity of American agriculture, we must sustain and expand this research effort.

Every commodity produced in Alabama has suffered a disaster in 1980. We are concerned with the way that government has handled the problems of farmers in this crisis and do not agree with many specifics of current disaster programs.

Those of us who have survived the catastrophe and the inequities of the disaster relief program will bear the scars for many years. Land which was paid for is once again mortgaged. It does not appear that we can do anything about that. However, using the experience, we can work together to make certain that in the next disaster we will have equitable programs which provide adequate response reflecting actual loss.

As I mentioned earlier, the people gathered in this room represent the farmers of Alabama. Collectively, they make up our state's largest, most productive industry. They are concerned because as they produce more at higher cost, their rewards are less. In 1970, U.S. agriculture earned 12 billion dollars net. In 1980, the figure in 1970 dollars will be between 12 to 13 billion dollars. In 1980, farmers contributed more than 18 billion net dollars to the U.S. Balance of Trade; and they provided the food and fiber to consumers of this nation for less than 5 cents of each disposable dollar. That's mighty close to a free lunch.

We all realize it takes cuts in government spending to balance the budget. But let me urge you to move cautiously and don't be guilty, as the saying goes, of cutting off the hand that feeds the mouth.

THE SOIL AND WATER CONSERVATION INCENTIVES ACT OF 1981

Mr. HEFLIN. Mr. President, I rise to announce that I am cosponsoring legislation to improve our Nation's soil and water conservation practices. The principal author of this much-needed legislation is Senator ROGER W. JEPSEN, of Iowa. The proposal is entitled, "The Soil and Water Conservation Incentives Act of 1981."

Senator JEPSEN's bill, S. 569, is designed to meet the needs and interests of many people in our country who want to conserve their land but do not have the funds available to do so. Department of Agriculture studies show a loss of 4 billion tons of soil per year from non-Federal lands in the United States, including a staggering 2 billion tons of topsoil lost every year.

This proposal would allow private landholders and operators to claim a 10-percent tax credit when they invest their own money installing and maintaining conservation practices on their land.

As Senator JEPSEN has appropriately pointed out, most of our Nation's farmers and ranchers have a special protective feeling about the land, but the fact is that it takes an extra special effort for a farmer to conserve his land for future generations. Soil conservation pays off over a number of years, but in today's market when many farmers have to worry about just getting by, paying for soil conservation can be a real economic burden.

As we all know, the basic and most important ingredient for providing abundant food for a hungry world is good soil. This takes on added significance when you consider that the world's population is growing at a rate of 70 million per year and the demand for American agricultural products is steadily increasing. In two important areas of my State alone, the loss of soil to erosion is a severe problem. In the Tennessee Valley

area of Alabama, we lose approximately 20 tons per acre, per year of cropland to erosion. In the Wiregrass area, we lose 10 to 15 tons per acre, per year.

As ranking member of the Senate Agriculture Subcommittee on Soil and Water Conservation, I am pleased to join Senator JEPSEN in efforts to improve conservation practices throughout the Nation by adopting adequate incentives and to promote voluntary participation. I believe the conservation tax route is a step in the right direction.

Currently, the U.S. Department of Agriculture provides cost-share programs which are special programs to encourage farmers to apply conservation measures. However, although the Department of Agriculture funds 50 percent of these programs, very few farmers take advantage of this aid. Therefore, Mr. President, I hope my colleagues will join in supporting this important proposal. The Soil and Water Conservation Incentives Act of 1981 is practical legislation. It builds on that section of the Tax Code which allows farmowners or operators to deduct the land management and conservation expenditures already listed in the code. The bill we are sponsoring would allow for a choice of either a full tax deduction the year the structure is installed or a 10-percent investment tax credit the first year, with deductions that year or thereafter on a standard depreciation schedule. For example, a farmer uses his own money to install an erosion control structure at a cost of $2,000. This bill would allow him to:

First, deduct the $2,000 from his gross income that taxable year; or

Second, take a $200 tax credit—10 percent—of his tax liability that taxable year with deductions thereafter amounting to the full cost of the structure over the span of its appreciable life.

This is a good bill, Mr. President, one which will aid America's farmers. This aid will come at a time when the American farmer will be playing a major role in improving the U.S. lagging balance of trade and meeting national needs for food and fiber.

AN EXPERT SHEDS LIGHT ON EL SALVADOR'S TUNNEL

Mr. HEFLIN. Mr. President, I ask unanimous consent that an editorial that appeared in the Montgomery Advertiser on March 8, 1981, and written by Lt. Col. John Napier III, U.S. Air Force (retired), entitled "An Expert Sheds Light on El Salvador's Tunnel" be printed in the RECORD. I wish to state that I am doing this at the request of a friend, Judy Cumbree of Tuskegee, Ala., and that the views of Colonel Napier do not necessarily reflect my views.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

AN EXPERT SHEDS LIGHT ON EL SALVADOR'S TUNNEL

(By Lt. Col. John H. Napier III, USAF-Ret.)

Nearly 20 years ago, I became one of the U.S. Air Force's first specialists in "counter-insurgency," a Kennedy Administration euphemism for counter-revolutionary warfare directed primarily against Communist-inspired guerrilla movements.

The cardinal tenet of counterinsurgency doctrine is that "host" governments must have or gain the support of their own people to thwart Communist subversive takeovers, and the strategy is a three-pronged one of carefully coordinated military, civic and psychological actions. The corollary is that military action alone is futile in combatting revolutionary guerrilla warfare.

Although our strategy failed in Indochina when we went from advising the South Vietnamese to trying to fight their war for them, in Latin America our counterinsurgency assistance bought time for local governments to put their domestic houses in order with needed socio-economic reforms. The climax of this effort was the death of Che Guevara in Bolivia in 1967, nearly 14 years ago.

However, today I am both disturbed and skeptical about reports of Castroite or Sandinista Communist guerrilla warfare in El Salvador, coming both from U.S. and Salvadoran government officialdom. Independent reports tell such a diametrically-opposed story that one wonders whether people are talking about the same country.

Our new administration reports a Communist guerrilla war which television covers obligingly, but in its March issue, Harper's contributing editor T. D. Allman charges that no Central American nor U.S. official in that region could show him one captured Cuban adviser, Soviet weapon nor Sandinista propaganda pamphlet.

Indeed, he alleges that the "guerrillas" arms have been sold them by American free-enterprise friends of freedom dealing in the arms traffic (see "Rising to Rebellion: With the Guerrillas in El Salvador" in Harper's).

If there is indeed a Communist threat, why is the anti-Communist Roman Catholic Church opposed to U.S. military aid to the Salvadoran military junta? Why on Feb. 21 did that junta arrest one of its own members, Col. Adolfo Majano, who happened to be the only one of them who urged land and social reforms, an arrest which last Sunday San Salvador's Archbishop denounced?

Is the Salvadoran Army waging war against Castroites or Sandinistas, or is it making war on its own people who have had the temerity to ask for a $3.50 daily wage? If the latter, God help El Salvador, not us.

The American public needs to understand two historic facts about Latin America and the United States. The first is the repression that Latin American armies have exercised against their largely Indian masses ever since 1519 when Hernan Cortes crushed the Aztec Empire in Mexico.

One must ponder the irony that the only two Central American nations which have no armies—Costa Rica and Belize—are also the only two that are democratic and have no repression, hence no rebellion and thus no need for U.S. military aid.

The second fact is that in this century U.S. governments have been all too prone to military interventions in Meso-America, starting with Theodore Roosevelt's wresting Panama from Colombia in 1903.

The U.S. Marines' "banana wars" from 1912 to 1933, Woodrow Wilson's two interventions in Mexico, our threat of war with Mexico in 1927 over the expropriation of U.S. oil industries there, our clandestine toppling of the Arbenz regime in Guatemala in 1954, the foredoomed Bay of Pigs invasion of Cuba in 1961 (supported by Alabama Air National Guard B–26 aircrews) and our large-scale invasion of the Dominican Republic in 1965, to name just the major interventions, have all failed to bring political peace and social justice to the countries involved, all have left a heritage of hatred for the Colossus of the North and none can be proven to have been in the U.S.'s best national interests.

Indeed, the Bay of Pigs operation (approved by the U.S. Joint Chiefs of Staff) had the opposite of its intended effect by encouraging a direct Soviet military presence in Cuba that led to the brink of World War III in the 1962 Cuban Missile Crisis.

If we react too quickly to support repressive military regimes in Latin America, we may instead throw their people who are being jailed, tortured, starved, robbed, raped and murdered into the arms of Communist revolutionaries. The Salvadoran Army does not need our advice on how to kill its own people more efficiently.

Of its 2,000-man officer corps, over the years we have already trained 1,971. It was not Communist guerrillas but right-wing terrorists in Salvadoran uniforms and with U.S. weapons who raped and murdered four American nuns there last fall, presumably for the Christian offense of comforting the afflicted.

One needs to bear in mind that the Anglo-Saxon-American military tradition in much different from that of Latin America, in being a political subordinate to civil authority and in humane values.

The ancient Latin warning, "caveat emptor," has its modern Southern equivalent: "Don't buy a pig in a poke." I suggest that the American public stay both cool-headed and skeptical about this latest Communist specter in Latin America.

Comparisons between Central America and Southeast Asia are invidious because of vast natural and cultural differences between the two regions, but one fact about both is clear: No outside force can maintain a government which lacks the support of its own people. That is the real lesson of Viet Nam, where we sent 60 advisers in 1953. In March 1981 we are sending 50 to El Salvador.

RECOGNITION OF SENATOR SIMPSON

The PRESIDING OFFICER. Under the previous order, the Senator from Wyoming is recognized for not to exceed 15 minutes.

SENATE JOINT RESOLUTION 64—NATIONAL BLINDED VETERANS RECOGNITION DAY

Mr. SIMPSON. Mr. President, as one of my first official acts as the incoming chairman of the Veterans' Affairs Committee of the Senate, and at the special request of the blinded veterans of America, I send to the desk a resolution which designates August 13, 1981, as "National Blinded Veterans Recognition Day."

The Blinded Veterans Association is a highly respected veterans service organization which works actively to represent the special needs and legislative interests of this country's thousands of blinded and visually impaired veterans. Over the years the Senate Veterans' Affairs Committee has introduced, and the Congress has enacted, a wide variety of bills which have targeted the very unique needs of these most deserving veterans. Programs have been initiated, expanded, and improved in the areas of compensation, readjustment, rehabilitation, and specially adapted housing in order to assist the blinded and severely visually impaired veteran to live a more independent and productive life.

On August 11 of this year, the Blinded Veterans Association will hold its na-

79-059 O - 84 - 80 (Pt. 5)

tional convention here in our Nation's Capital. The hundreds of blinded veterans who will be attending the convention will evaluate the need for new legislative initiatives. We will be very interested in their proposals. During the convention, on the date of August 13, a commemorative envelope will be issued in braille honoring the blinded veterans of America.

Their representatives will on that date place a memorial plaque in the memorial display room at Arlington National Cemetery honoring our war dead. By establishing August 13, 1981, as Blinded Veterans Recognition Day, Congress will appropriately and effectively indicate its support and appreciation for the thousands of blinded and visually impaired veterans who have served and sacrificed in the defense of our Nation.

Mr. President, I wish to express my personal appreciation and admiration for the many blinded and severely visually impaired veterans throughout the United States. I was particularly impressed with the testimony of their president, George Stocking, in his testimony before the committee the other day. I assured that group that as chairman of the Senate Veterans' Affairs Committee I will continue to carefully consider all new legislative initiatives and will monitor existing programs designed to address the very special needs of these very special veterans. I urge my colleagues to join me in support of this effort to recognize the very extraordinary sacrifices made and the problems faced by our Nation's blinded veterans.

Mr. President, I ask unanimous consent that the text of this resolution be printed at this point in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 64

Whereas there are thousands of Americans in the United States today who, as a result of service in the military forces of their country, incurred the catastrophic disability of blindness;

Whereas despite the extreme severity of their disability, most of these veterans have received rehabilitation and have returned to and continue to lead useful and productive lives; and

Whereas the sacrifices and contributions that these veterans have made and the service rendered by the many veterans who later suffered blindness from non-service related causes are deserving of national recognition: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That August 13, 1981, is designated as "National Blinded Veterans Recognition Day", and the President is authorized and requested to issue a proclamation calling upon the people of the United States and interested groups and organizations to set aside this day to honor the sacrifices and service of blinded veterans in an appropriate manner.

Mr. SIMPSON. I would also remark, Mr. President, that the entire membership of the Veterans' Affairs Committee join me as cosponsors of this resolution.

S. 911—SPECIAL PENSION TO SURVIVING SPOUSE OF MEDAL OF HONOR WINNERS

Mr. SIMPSON. Mr. President, I am pleased today to introduce legislation which will insure that the surviving spouse of any member of the armed services who is or was a Medal of Honor winner shall be awarded a special pension.

The pension would be at half the rate of the pension which would have been awarded to the service member were that individual alive. To qualify for this pension, the surviving spouse must have been married to the individual receiving the Medal of Honor at the time of the deed which occasioned the award and the pension shall continue until the surviving spouse dies or remarries. It seems, indeed, ironic to me that this Nation appropriately accords a special gratitude and pension for the personal benefit of the military person who displays the extraordinary gallantry to qualify for such an award, but then denies this pension benefit to the immediate spouse of the deceased person whose very heroism gave rise to the award. It is to correct this inequity that this legislation is introduced by me.

Mr. President, I believe that the surviving spouse of the decorated hero should receive the benefit of the award until that surviving spouse dies or is remarried. It is often quite true that the spouse also displays a remarkable degree of courage. I therefore believe this special consideration should be expressed.

I trust that my colleagues will agree that pure equity alone directs the surviving spouse of the individual awarded the Medal of Honor be accorded one-half of the pension that both did or would have benefited from.

Mr. President, I ask unanimous consent that the text of this bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 911

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 562 of title 38, United States Code, relating to special pension for Medal of Honor recipients, is amended—

(1) by redesignating subsections (b), (c), and (d) as subsections (c), (d), and (e), respectively;

(2) by inserting after subsection (a) the following new subsection (b):

"(b)(1) The Administrator shall also pay to the surviving spouse of any person who has served on active duty in the Armed Forces of the United States and who has been awarded the Medal of Honor, a special pension at the rate of $100 per month, beginning on the first day of the month after the date of application therefor under paragraph (2) of this subsection as long as the surviving spouse was married to such person at the time of the action for which the Medal of Honor was awarded.

"(2) Applications for the pension referred to in paragraph (1) of this subsection shall be made in the form and under regulations prescribed by the Administrator. The Administrator may require such evidence as the Administrator determines necessary to establish that the applicant is the surviving spouse of a person described in paragraph (1) of this subsection.

"(3) A surviving spouse of a person described in paragraph (1) of this subsection who makes application for and receives the special pension under paragraph (1) of this subsection shall continue receiving such pension until death or remarriage."; and

(3) by striking out the period at the end of subsection (e), as redesignated by clause (1), and inserting in lieu thereof "nor shall the surviving spouse of any such person receive more than one special pension.".

NUCLEAR REGULATORY COMMISSION LEGISLATIVE PROPOSALS

Mr. SIMPSON. Mr. President, with regard to the issue of nuclear regulation, of which subcommittee I am chairman, today, I am introducing, by request, two legislative proposals submitted by the Nuclear Regulatory Commission. The first proposal would overturn a recent decision by the U.S. Court of Appeals for the District of Columbia Circuit entitled Sholly against NRC. This proposal, if adopted, would amend section 189 of the Atomic Energy Act of 1954 to clarify that the Commission may issue a license amendment that involves no significant hazards consideration without first holding a hearing. The proposal would also specify that section 189 does not limit the NRC's authority to take immediate action by amendment or order to protect the public health, and interest, or common defense and security.

The second legislative proposal from the Nuclear Regulatory Commission would authorize NRC to issue an interim operating license for a nuclear powerplant if the Commission finds that in all respects other than the completion of the hearing, the requirements of the Atomic Energy Act have been met, and that authorizing interim operation is necessary in the public interest in order to avoid the consequences of unnecessary delay in the operation of the plant. Under the NRC proposal, interim operation would be limited to fuel loading and low-power operation and testing of the plant, not to exceed 5 percent of full power. In addition, the Commission's authority to issue interim operating licenses would expire at the end of 1983.

Mr. President, the Nuclear Regulation Subcommittee has already held two hearings on the two issues addressed by the NRC legislative proposals: The likely impact of the Sholly decision and the growing problem of delays in issuing operating licenses for new nuclear plants beyond the time when construction of the plants has been completed. It is clear to me and I believe to the subcommittee that these are both serious problems that require prompt action by Congress. In the case of the operating license delays, administrative actions on the part of the agency are also required to expedite safety reviews and hearings, consistent

with the need to provide a fair opportunity for public participation. In the coming few weeks, the Nuclear Regulation Subcommittee will continue to grapple with these important issues and with the Commission's proposed legislative responses.

Mr. President, I ask unanimous consent that the bill, the Commission's letter of transmittal, a section analysis, and a legislative memorandum on the Sholly proposal be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 912

Section 189 of the Atomic Energy Act of 1954, as amended, is amended by adding the following new sentences at the end of paragraph (a) thereof: "The Commission is authorized to issue and to make immediately effective an amendment to a license upon a determination by the Commission that the amendment involves no significant hazards consideration, notwithstanding the pendency before it of a request for a hearing from any person. The Commission is authorized to issue and to make immediately effective any amendment to a license, or any order to govern any activity subject to this Act, as it may deem necessary upon a determination that immediate effectiveness is required to protect the public health, safety, and interest, or the common defense and security.".

NUCLEAR REGULATORY COMMISSION,
Washington, D.C., March 11, 1981.

Hon. GEORGE H. BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Transmitted herewith is a Nuclear Regulatory Commission legislative proposal in the form of a draft bill to amend the Atomic Energy Act of 1954, as amended, to clarify that the Commission may issue a license amendment, where no significant hazards consideration is involved without holding a prior hearing and for other purposes. A draft bill is in Enclosure 1. An analysis of the proposal is in Enclosure 2. A memorandum explaining the need for the proposal is in Enclosure 3.

This proposal is in response to and seeks to overturn the decision of the U.S. Court of Appeals for the District of Columbia Circuit in *Sholly, et al.* v. *NRC, et al.*, No. 80–1691 (November 19, 1980). The court held that the NRC may not issue a license amendment even if there is no significant hazards consideration when an interested person has filed a request for a hearing under Section 189(a) of the Atomic Energy Act, 42 U.S.C. 2239(a). The decision could also implicate the Commission's authority to issue immediately effective license amendments and orders when the public health, safety, and interest or the common defense and security requires. The court's decision mandating a prior hearing on demand on matters insignificant to the public health and safety seriously and immediately encumbers the regulation of nuclear power, and puts at risk a substantial number of nuclear power plants which would either have to be shut down or operate at reduced power if they are not accorded the authority sought in pending license amendment requests. The number of power plants affected will fluctuate over time depending upon which plants have license amendment applications pending and the nature of the license amendment requests.

The proposed legislation, if adopted, would amend Section 189 to clarify that the Commission may issue a license amendment which involves no significant hazards consideration without first holding a hearing. The bill would also clarify that Section 189 does not limit the NRC's authority to take immediate action by amendment or order to protect the public health, safety, and interest or common defense and security. This legislation is needed to overturn the adverse impacts of the Sholly decision on the regulation of nuclear energy. Unless overturned, this decision raises the prospect of a substantial curtailment of nuclear power plant operation for reasons which in the Commission's view are unrelated to the safety of the facility. We do not believe that prospect to have been intended by Congress in enacting Section 189 and urge approval of the proposed NRC legislation.

Sincerely,

JOSEPH M. HENDRIE.

SECTION ANALYSIS

The purpose of the amendment is to overturn the decision of the U.S. Court of Appeals for the District of Columbia Circuit in *Sholly* v. *NRC*, November 19, 1980. The amendment provides that the Commission may issue a license amendment upon a determination that it involves no significant hazards consideration without holding a prior hearing. It also clarifies that nothing in the Atomic Energy Act limits the agency's exercise of its powers to issue immediately effective license amendments or orders to protect the public health, safety, and interest or the common defense and security. This amendment does not affect the opportunity of an interested person for a hearing after the amendment has been issued.

LEGISLATIVE MEMORANDUM IN SUPPORT OF PROPOSED BILL

This memorandum sets forth the views of the U.S. Nuclear Regulatory Commission in support of a proposed amendment to Section 189(a) of the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2239(a), to overturn the decision of the U.S. Court of Appeals for the District of Columbia Circuit in *Sholly, et al.* v. *NRC, et al.* (November 19, 1980). That decision seriously and immediately encumbers the regulation of nuclear power, and puts at risk a substantial number of nuclear power plants which would either have to shut down or operate at reduced power if they are not accorded the authority sought in pending license amendment requests. The number of power plants affected will fluctuate over time depending upon which plants have license amendment applications pending and the nature of the license amendment requests. The Commission urges enactment of this amendment.

STATEMENT OF FACTS

The lawsuit arose over the Commission's efforts to take necessary preliminary steps for the cleanup of the March 28, 1979 accident at Three Mile Island. As a result of that accident the TMI–2 containment building atmosphere held approximately 43,000 curies of radioactive krypton–85 which had been released from the nuclear fuel damaged during the accident. That radioactive krypton posed a barrier to progressing with the cleanup. There was no serious dispute, by anyone, that the krypton had to be removed. After a multi-month extensive public process, the Commission decided to vent the krypton to the atmosphere and amended the license to permit the venting at a faster rate than that permitted under the license's technical specifications while at the same time keeping radiation doses to the public at or below levels which the superseded release limits were intended to assure.

COURT OF APPEALS DECISION

In an opinion handed down November 19, 1980, the D.C. Circuit declared that the Commission's refusal to hold a hearing on its venting orders violated petitioners' statutory right to a hearing under Section 189 (a) of the Atomic Energy Act, 42 U.S.C. 2239 (a), *Sholly* v. *NRC*, F.2d , No. 80–1691 (Nov. 19, 1980). The court ruled that even where a license amendment involves no significant hazards consideration (such as the substitution of dose limits for release limits that allowed for the venting to be completed within two weeks rather than months) an interested person who requests a hearing is entitled by Section 139(a) of the Atomic Energy Act to a hearing before the amendment becomes effective. The proposed amendment addresses this ruling.[1]

IMPORTANCE OF THE COURT OF APPEALS DECISION

The principal ruling of concern to the Commission is the D.C. Circuit's holding that even where an amendment to a nuclear power plant license involves no significant hazards consideration, an interested person who requests a hearing is entitled by Section 189(a) of the Atomic Energy Act, 42 U.S.C. 2239, to a hearing before the amendment becomes effective. The practical effect of that ruling is substantial. Over the past four years the Commission has issued more than 1600 amendments to nuclear power plant operating licenses based upon a no significant hazards consideration determination. Over the past few months some 20 nuclear power plants would either have had to shut down or operate at reduced power if they were not accorded the authority sought in no significant hazards license amendment requests. If, as the D.C. Circuit has held, hearings are necessary before this authority can be granted whenever an interested person requests one, there is the prospect of a substantial curtailment of nuclear power plant operations for reasons which in the Commission's view are unrelated to the safety of the nuclear power plants.

The large number of license amendment actions which the Commission must act upon, as is reflected in the yearly average of better than 400 amendments, is directly attributable to the kind of detailed regulation of nuclear power plant operation that the Commission has demanded. A nuclear power plant operating license, like that issued for Three Mile Island, Unit 2, the power plant involved in the Sholly case, is quite literally hundreds of pages long,

---

[1] The court also ruled that the Commission's approval of venting the TMI–2 containment was itself a license amendment even though not characterized by the Commission as such. This ruling should not prove onerous for three reasons. It is applicable only to a situation where the relevant authority under a license has been revoked as the court mistakenly thought was the case with regard to the TMI–2 license. Second, the Commission does not consider itself bound to follow the court's misreading of the Commission's intent. Third, even prior to *Sholly* the granting of significant authority where none existed previously would have required a license amendment. Thus the Commission is not proposing to legislatively overrule the court's erroneous ruling with regard to the TMI–2 license.

and consists of highly detailed technical specifications. Any change in the license itself or in any of those hundreds of pages of technical specifications is a license amendment.

Since changes must often be made—for example, whenever a nuclear power plant refuels, which usually occurs at about 18-month intervals, the technical specifications often need to be adjusted to reflect the physical behavior of the fresh fuel placed in the reactor core—the consequence of the court's holding could be to keep a nuclear power plant shut down or prevent its operating at full-rated capacity, whenever the power plant refuels; and this despite the fact that in the Commission's best judgment there is no significant hazards consideration involved in adjusting the technical specifications to account for the behavior of the fresh fuel. A variety of other kinds of license amendment actions, such as extending the time for imposing a new requirement, or relieving the licensee of a particular maintenance check, could have similar results.

For example, as the Commission moves to implement a whole host of new operating license requirements developed in response to the TMI-2 accident, any fine tuning of those requirements involving a delayed effective date or the substitution of one kind of licensing requirement for another could, under the court's ruling, prevent or impede a new power plant from coming on line or impede the operation of a nuclear power plant already in service until the issue was resolved after a hearing. And this despite the fact that the Commission thinks the license or technical specification amendment involved is not of safety significance. That result lacks practicality. The Commission does not think that Congress intended nuclear power regulation and the operation of nuclear power plants to be as episodic and dependent upon happenstance as the frequency of hearing requests on minor matters. Yet such a consequence is plainly a possible result of this Court's ruling that Section 189 (a) of the Atomic Energy Act obliges the Commission to hold a hearing on a no significant hazards consideration license amendment, on request, before the amendment becomes effective.[2] Nor does the Commission think that Congress intended the Commission to eliminate or grossly simplify the vast bulk of technical specifications which govern the operation of nuclear power plants in order to minimize the number of license amendment actions that must be dealt with.[3]

With simplification comes a loss of governmental control, a loss of enforceability, and a loss of detailed assurance in a power plant's method of operation. It is questionable whether acceptance of those kinds of uncertainties best advances the public interest in assuring that nuclear power plants are operated safely. It is just as questionable that such a reading of Section 189(a) is the one that Congress intended.[4]

PROPOSED AMENDMENT

The Commission believes that the court's interpretation of Section 189(a) was erroneous and that the decision seriously encumbers the regulation of nuclear power by providing leverage to block, through hearing requests, needed license amendments which involve no significant hazards consideration. The Commission proposes to correct this situation through an amendment to Section 189(a) which, if adopted, would confirm the Commission's interpretation that there is no right to a prior hearing before an amendment may be made effective, if it presents no significant hazards consideration. The amendment would also clarify that Section 189(a) does not limit the Commission's authority to issue immediately effective amendments and orders when the public health, safety, and interest or the common defense and security requires. As to this latter point Commissioner Gilinsky believes that the proposed amendment should delete the words "and interest" and empower the Commission to take immediate action only when required by the public health and safety or the common defense and security. Commissioner Gilinsky believes that his proposal more accurately reflects the standard the Commission currently employs and that this is not the occasion to broaden the Commission's immediate effectiveness powers.

The amendment urged by the Commission would effectively end the adverse potential impacts of the Sholly decision. For the reasons described in this memorandum, the Commission urges adoption of the proposed amendment.

Mr. SIMPSON. Mr. President, I also ask unanimous consent that the bill, the Commission's letter of transmittal, additional comments of Commissioners, and an analysis of the proposed interim operating legislation be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 913

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection 189a of the Atomic Energy Act of 1954, as amended, is amended by adding after the final sentence in the subsection:

"Notwithstanding any other provisions of this Act, the Commission may, upon determination that such action is necessary in the public interest in order to avoid the consequences of unnecessary delay in the operation of a nuclear power reactor, issue for such a facility an interim operating license authorizing fuel loading, and operation and testing at power levels not to exceed five percent of rated full thermal power, in advance of the conduct or completion of any required hearing: *Provided,* That any operating license so issued shall be subject to any subsequent findings and orders of the Commission after the conduct of any required hearing: *and provided further,* That in all other respects the requirements of the Atomic Energy Act of 1954, as amended, shall be met. Prior to the issuance of any such interim license, the Commission shall publish in the Federal Register a notice of its intent to issue the license, and shall provide an opportunity for parties to the proceeding to comment on whether such action is necessary in the public interest. The authority to issue such an interim license for a nuclear power reactor in advance of the conduct or completion of a hearing shall expire on December 31, 1983."

U.S. NUCLEAR REGULATORY COMMISSION,
Washington, D.C., March 18, 1981.

Hon. GEORGE H. W. BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Transmitted herewith is a Nuclear Regulatory Commission proposal in the form of a draft bill to amend the Atomic Energy Act of 1954, as amended, to authorize the Commission to issue an interim operating license for a nuclear power plant, authorizing fuel loading and low-power operation and testing, in advance of the conduct or completion of an on-the-record evidentiary hearing on contested issues. The proposed legislation, which represents an extraordinary and temporary cure for an extraordinary and temporary situation, is set forth in Enclosure 1. An analysis of the proposed legislation is set forth in Enclosure 2. Enclosure 3 sets forth the proposed legislation in the form of a comparative text.

Under the Atomic Energy Act of 1954, as amended, no person may operate a nuclear power plant without first obtaining an operating license from the Nuclear Regulatory Commission. Under existing law, a formal on-the-record evidentiary hearing must be held, and a decision rendered on the basis of that record, if requested by any person whose interest may be affected, before the Commission may issue an operating license.

In the past, the scheduling and processing of licensing reviews has typically provided sufficient time to enable the hearings to be completed and the license issued by the time the nuclear plant is completed and ready to operate. For the first time, however, it appears that the hearing process for a significant number of nuclear power plants will last beyond the date when construction should be complete and the plants are ready to operate. This situation is an indirect consequence of the Three Mile Island (TMI) accident, which required a reexamination of the entire regulatory structure. After TMI, for a period of over a year-and-a-half, the Commission's attention and resources were focused on plants which were already licensed to operate and to the preparation of an action plan which specified a discrete set of TMI-related requirements for new operating reactors. During this period, utilities that had received construction permits continued to build the authorized plants.

The severe public interest impact of these delays has been discussed extensively before interested committees in the House and Senate. Although there may be differences of opinion on the precise overall impact of these delays, as well as in the different estimates of the consequences for each of the plants, the delay costs now are generally estimated to range in the tens of millions of dollars per month for each completed plant.

The Commission is making every effort to see that available resources are devoted to the completion of its licensing reviews of these plants, and that unnecessary delays in these hearings are avoided. Under existing law, however, the Commission lacks the authority to authorize fuel loading and low-

[2] The NRC, of course, does not know how many hearing requests, if any, might be filed in connection with these license amendment requests. The Court's opinion, however, clearly provides an incentive for such filings.

The Commission also has as an alternative but not coextensive source of authority to issue immediately effective orders where the public health, safety or interest so requires. There is language in Sholly which could be interpreted as requiring a hearing on request prior to the NRC's exercise of its power to take immediately effective action. The second sentence of the proposed amendment clarifies that that is not the case, and the Commission is empowered to take such immediate action despite the pendency of a hearing request.

[3] Of course, any simplification of technical specifications would itself be a license amendment that under the Sholly decision could not be placed in effect until the completion of whatever hearing or hearings are requested by interested persons.

[4] The court of appeal's decision takes no account of these realities in its interpretation of Section 189. Beyond this, in the NRC's view, the court's decision seriously misreads Congress' intent in passing the 1962 amendments to the Atomic Energy Act and erroneously refuses to give deference to the Commission's consistently held interpretation of its governing statute—that no prior hearing need be held when a finding is made that a license amendment involves no significant hazards consideration.

power operation and testing on the basis of its safety and environmental evaluation; it must instead await the completion of the hearing process. The result, for the plants most affected by TMI-related actions, is likely to be delays of at least several months in ultimate operation of the facilities, absent remedial action by the Congress.

The proposed amendment to subsection 189a of the Act would authorize the Commission, if it finds that such action is in the public interest in order to avoid the consequences of delay in the operation of a completed nuclear power plant, to issue an interim operating license authorizing fuel loading and low-power operation and testing of the plant in advance of the conduct or completion of any required hearing. In all respects other than the completion of the hearing, the Commission would have to find that the requirements of all applicable law have been met prior to allowing such interim operations. Thus, the public health and safety, common defense and security, and environmental findings would still have to be made, even though the public interest finding is made. Furthermore, a hearing would still be held if requested by an interested person under section 189 of the Act. The proposed amendment would simply provide that in such a case, the requested hearing could be held or completed after issuance of the license authorizing fuel loading and low-power operation and testing. Moreover, any interim license issued under this authority would be subject to any subsequent findings and orders of the Commission after the conduct of any required hearing. The authority to issue such interim licenses would expire on December 31, 1983.

The effect of this proposed legislation would be to advance by at least several months the date of operation of the plants most affected by the TMI-related actions, where issuance of the operating license is contested. The savings of time could be much more substantial in cases where testing showed the need for modification and further testing. By placing a time limit of December 31, 1933 on the Commission's authority to issue such interim licenses, the proposed legislation would assure that the relaxation of licensing requirements would be confined to those plants which have been most directly affected by the Commission's post-TMI actions. Since the risks associated with low-power operation and testing are much smaller than those associated with normal full-power operation, we believe that this authority, limited to the relatively few plants likely to be most affected by our TMI-related effort, represents a minimal intrusion on our usual review and hearing process. The Commission cannot, under existing law, take these measures to reduce the delay in the licensing of the affected plants. The proposed legislation would result in very substantial cost savings for consumers in the service areas of the affected plants.

The proposed legislation deals essentially with matters of licensing procedures and, as indicated, would not alter any of the substantive standards and requirements of the Atomic Energy Act pertaining to the protection of public health and safety and the common defense and security or of NEPA. In light of this the Commission has concluded that the proposed legislation would not significantly affect the quality of the human environment.

Additional comments by Commissioner Ahearne and myself are enclosed.

Sincerely,

JOSEPH M. HENDRIE.

ADDITIONAL COMMENTS OF COMMISSIONER AHEARNE

I accept the desirability of low-power interim licensing, given the problems we now face. If improvements in the licensing process cannot be made, then full-power interim licensing may be necessary. However, it is time for fundamental reforms in the role and practice of the hearing process. In particular, the Commission should direct Boards to serve to decide only issues that are raised by the parties, and of those, only those of substance. The threshold for admitted contentions should be significantly raised, sua sponte authority should be limited, and the Boards should be authorized to manage the proceedings with a strong hand. Failing these changes, I expect another Commission will be requesting full-power interim licensing legislation.

ADDITIONAL COMMENTS OF CHAIRMAN HENDRIE

I strongly support the legislative proposal made here for authority to issue interim operating licenses for fuel loading and low-power operation and testing. It would, in effect, advance the operating schedules of the affected units by several months and result in substantial savings for consumers.

But it is also my view that the authority for interim licensing could reasonably be extended to include full-power operation, with a further substantial reduction in cost impacts. This authority would be needed with regard to only a small number of units, I estimate nine at most and more probably no more than six, that are particularly severely affected by the licensing delays following the Three Mile Island accident. For these units, even the low-power interim license authority, together with all the measures the Commission can take under existing law, will probably not be enough to avoid licensing decision delays. Indeed, one of these units is already experiencing such a delay. The full-power interim licensing authority would remedy that situation for most of these units and would minimize the delay for the unit already affected.

ANALYSIS OF PROPOSED LEGISLATION

Under the Atomic Energy Act of 1954, as amended, no person may operate a nuclear power plant without first obtaining an operating license from the Commission. Under existing law, a formal on-the-record public hearing must be held before issuance of any operating license if requested by any person whose interest may be affected. The proposed amendment to subsection 189a authorizes the Commission, under the circumstances specified therein, to issue an interim operating license authorizing fuel loading and operation and testing at power levels not to exceed five percent of rated full thermal power, in advance of the conduct or completion of hearings on the issuance of the full-term license.

This authority could be used only if all legal requirements applicable to a license for fuel loading and low-power testing and operation have been satisfied, with the sole exception of the requirement that in a contested proceeding, operation can be authorized only after a decision based upon the record of a completed hearing. These legal requirements include the Commission's findings as to public health and safety, the common defense and security, the environment, and antitrust considerations, as mandated by the Atomic Energy Act of 1954, as amended, the National Environmental Policy Act, and other applicable statutes.

Under the proposed legislation, the Commission may exercise the authority to permit fuel loading and low-power operation and testing if it finds that such action is necessary in the public interest in order to avoid the consequences of unnecessary delay in the operation of the facility. This public interest finding would be based on the consideration of the costs, ultimately borne by consumers, of having a completed nuclear power plant standing idle while awaiting the completion of the hearing on the full-term license. These costs include the dollar costs of delay and of obtaining replacement power, and may also include the need for power from the facility and the energy equivalency of fossil fuel.

Any interim license issued under this authority will be subject to any subsequent findings and orders of the Commission after the conduct of the required hearing.

The proposed legislation requires the Commission, before authorizing issuance of a license for fuel loading and low-power operation and testing, to publish notice of its intended action in the Federal Register and to afford an opportunity for parties to comment on whether the intended action is necessary in the public interest.

Any fiscal action of the Commission under this subsection is subject to judicial review.

The authority granted by the proposed legislation will expire on December 31, 1983. For a significant number of nuclear power plants—those most affected in the review process by Commission efforts to respond to the Three Mile Island accident—this time period should permit the Commission, with the full cooperation of prospective applicants, to schedule licensing reviews and proceedings so as to avoid, wherever possible, situations in which completed plants stand idle while awaiting completion of licensing proceedings.

Mr. SIMPSON. Mr. President, I yield back the remainder of my time and look forward to the continuing efforts of Senator BYRD as he elucidates the procedures and history of the U.S. Senate. I appreciate that.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator.

RECOGNITION OF SENATOR ROBERT C. BYRD

The PRESIDING OFFICER. The Senator from West Virginia.

THE UNITED STATES SENATE—SOME SENATE RULES AND PRACTICES

Mr. ROBERT C. BYRD. Mr. President, in thinking about the enduring nature of the Senate, I often am reminded of the observation made by former Senator William Peffer of Kansas. He said:

> The Senate is a school. The world's history is its text book. The record of a single day's proceedings frequently shows a range of work as wide as Christendom. No man well made up can be there long, if he will but listen, without himself becoming wiser and better. His opportunities for usefulness multiply as the new days come to him; his intellectual horizon expands, his view broadens and he grows stronger.

The day-to-day functioning of the Senate has given rise to a set of traditions, rules, and practices with a life and history all its own. The body of principles and procedures governing many Senatorial obligations and routines—attendance, quorums, voting, and pairing, for example—is not so much the result of reasoned deliberations as the fruit of jousting and adjusting to circumstances in which the Senate found itself from time to time.

From the first day of Senate business in 1789, the problem of attendance has

been a major concern of conscientious Senators. The Continental Congress and the Congress of the Confederation had been plagued by the embarrassing problem of absenteeism. As a result, the United States Constitution provided that the two branches of Congress could compel the attendance of their members, but left the method of compulsion up to the individual chambers.

Reflecting this responsibility, the first set of rules adopted by the Senate on April 16, 1789, ended with Rule XIX, which read, "No member shall absent himself from the service of the Senate without leave of the Senate first obtained." Though to this day that rule has remained unchanged, except for the deletion of the words "of the Senate first obtained", the principle embodied in it has not always commanded the most consistent adherence.

One day during the first session, for instance, Senator Maclay reported with evident chagrin that a cry for adjournment went up in the Senate chamber in order that the Senators might watch the flight of a hot-air balloon. On another occasion. Maclay recorded that the Senate adjourned because the President was giving a party. But most notable among these early breaches of duty was the week in November, 1804, when the Senate could not muster a quorum for several days, apparently because of the running of horse races.

Though many Senators have been exceptionally faithful in the matter of attendance, and though stringent efforts have been proposed periodically to curb absenteeism—such as Maclay's suggestion that absence without leave be declared "disorderly conduct"—absenteeism has remained a chronic problem. Two early Senators distinguished themselves by attending only the first and last days of each session, long enough to pick up their pay. As late as 1907, one freshman Senator, eager not to transgress but pressed by unfinished business at home, asked some veteran colleagues how he might obtain a leave of absence, and was laughingly informed, "You just clear out!" Another early-twentieth-century Senator from Arkansas won a degree of lasting infamy by never attending more than six consecutive days of Senate business in six years of Senate tenure, answering only 22 out of 200 rollcall votes in 1911, and reportedly being absent from Arkansas only thirty days during his term of office.

Of course, the issue of absenteeism gave impetus to a consideration of methods of compulsion. At different times, the Senate authorized the Sergeant-at-Arms to take this or that action to compel errant Senators to come back to their desks. At one point or another, such actions entailed a written admonition, docking pay, publicizing of absences, and even the suggestion of the use of force.

The issue of absences and compulsion of attendance has sometimes led to indignant exhortations on the Senate floor, accompanied by debates on drastic solutions. But, in the main, Senators have historically demonstrated a lenient attitude toward these vexing problems, usually mindful of the personal and political circumstances that might force their own absences. This is particularly true of absences involving campaigns for reelection.

But more than one Senator has labeled the matter of presence on the floor for Senate business, *per se*, a false issue. Several Senators have called attention to the fact that Rule V forbids a member's being absent without leave, *not* from the Senate chamber, but "from the service of the Senate." None less than Henry Clay, in opposing a resolution for deductions from *per-diem* allowances for a Senator's absence form his seat, insisted that absence from the Senate chamber did not necessarily imply neglect of Senate duties. Clay indicated that he did far more work at home, night and day, than he did on the Senate floor, and that much public business was facilitated more in private or in committee than at a Senator's desk.

The provision for docking members' pay originated in 1856, several years after Clay's death, at the time Congress abandoned its practice of paying senators and representatives only for the days they actually were present in the capital. Some members opposed changing from the daily rate to an annual salary on the grounds that it would only further stimulate the already high rate of absenteeism. They feared, not without justification, that a few of their colleagues would simply collect their salaries and spend much of their time at other pursuits.

To weaken that argument, the House added a provision to the salary bill authorizing the Secretary of the Senate and the Sergeant at Arms of the House to dock member's pay "unless such member assigns as the reason for such absence the sickness of himself or some member of his family."

I have found no instance where senators' pay was actually reduced due to non-attendance. One reference indicates that, as far as the Senate was concerned, the statute quickly became a "dead letter."

In the House, where the docking provision originated, six members' salaries were reduced in the month following the provision's enactment, and then only because the members certified their absences to the Sergeant at Arms. After 1856, in the words of one member, the provision for docking fell into "innocuous desuetude."

In August 1914, in the midst of an election campaign, a near record-length session, and a hot summer, House Democratic Floor Leader Oscar Underwood introduced a resolution to enforce the 1856 act against the more than two hundred absent members. In speaking for the Democratic majority, Underwood stated, "If a member finds it more important for him to stay in his district and work for himself than to stay in Washington and work for his Government, he ought not to ask the Government of the United States to pay him his salary while he is absent from this Hall."

Underwood's resolution was adopted and it achieved his desired effect, bringing many members back to town. Two months later, as Congress was about to adjourn, Underwood successfully moved to rescind the resolution on the grounds that it was no longer necessary. Floor debate at the time indicated that the Sergeant at Arms probably would not attempt to collect from the absentees.

When Francis Valeo was Secretary of the Senate in the early 1970's, he received many letters from citizens urging him to use his powers under the 1856 act. He responded:

> The complexity of legislative demands upon a Senator, the calls made upon his time by his constituents, and the hours he must give to study of a wide range of current problems cannot be met in the present time except that he is sometimes away from the Senate.
>
> The fact is that a Senator has to be, and is, on duty at all times, 24 hours a day, whether in his home State or in the Chamber.
>
> His absence from Washington and the Senate floor at no time separates him from the continuing responsibilities of his office anymore than when the President is away from Washington, or the Supreme Court Justices are away from Court on recess. The obligations of their office remain with them at all times.

The provision was finally repealed in the Legislative Branch Appropriations Act of 1976.

At any rate, presence in the Senate chamber by individual Senators remain a problem for some. To this day, many Senators are absent from the floor for days, but almost invariably appear at the required and appropriate times, fully cognizant of the business at hand and completely briefed on all that has taken place in the intervening period of their absence. Some have absented themselves for weeks upon end. Naturally, gallery spectators regularly become exercised when, unfamiliar with all the work taking place in committees and Senators' offices, and unaware of the communication network linking the Senate floor to all corners of the Capitol and the Senate Office Buildings, they so often observe the sparsely-attended chamber where debates are conducted by a mere handful of Senators for what appears to be the benefit of the presiding officer, the press, and an otherwise phantom audience at vacant mahogany desks.

But, pragmatism aside, serious Senate business cannot be conducted without a quorum. Since this is true in every formal organization, not surprising is the fact that quorum considerations in the Senate have been primary since the birth of the Republic.

Article I, Section 5, of the Constitution states in reference to the Congress simply, "A Majority of each (Branch) shall constitute a Quorum to do Business." The definition of "a Majority" was not so simple however. Did that mean a majority of the number of Senators to which all the states in the Union at that time were entitled? Or was it a majority of those Senators duly elected from those states and *living* at that time? Or perhaps a majority of those duly elected and sworn in? Early precedents on this question were contradictory, and not until the War Between the States was the matter forced to a head as the result of the complicated relationships precipitated by the question of secession and the consti-

tutionality of actions taken by citizens of the separated states.

The House of Representatives promptly decided in 1861 that a quorum for House business consisted of a majority of "those chosen." But not until May 4, 1864, did the Senate decide that a Senate quorum was "a majority of the Senators duly chosen." This was later refined to read, "A quorum shall consist of a majority of the Senators duly chosen and sworn," a change in which the House subsequently concurred.

Currently, a quorum is "presumed" always to be present and daily business moves forward on schedule in the Senate until and unless the question of a quorum is raised. As soon as the question is raised, however, the Secretary of the Senate is directed to call the roll. Bells ring and buzzers sound, and if the quorum goes "live" Senators emerge from offices, committee rooms, the restaurant, the Senate gymnasium, or wherever, to answer the call. In some instances, a Senator may stay on the Senate floor only long enough to be counted present before he returns to the work with which he was occupied prior to the quorum interruption.

The question of a quorum may originate for any one of several reasons, and, as a result, can have multiple values and uses. Though usually the question of a quorum is raised by a Senator, the presiding officer may raise it on his own initiative. A Senator in the midst of his speech may call for a quorum count to obtain a larger audience. That might prove risky, however, for if a quorum cannot be raised, his speech could not continue and the declared minority might decide to adjourn, thus losing for him the opportunity to speak that day.

Or, for one reason or another, another Senator might raise the question of a quorum during a speech, with the speaking Senator's consent, and, by unanimous consent, the speaking Senator will retain the floor. But a speaking Senator loses the floor when the suggestion of a quorum is raised, and only when it has been established or the quorum call is called off can it be regained.

In order to prevent the quorum call from deteriorating into a dilatory tool, subsequent and consecutive quorum calls cannot be suggested if no business has intervened between the calls. Mere debate or continued speech-making does not constitute business in itself, the Senate has ruled on several occasions, but intervening business is not hard to manufacture.

Since a quorum is necessary for the Senate to do business officially, rulings of the Chair that a *"present"* quorum is as constitutionally valid as a *"voting"* quorum have been upheld by the Supreme Court. Without a quorum, the actual business of the Senate grinds to a halt. Messages may not be received from the President or the House, although bills or joint resolutions can be signed, but no speeches are in order or votes taken other than those to produce a quorum, and debate must cease, though if previously ordered by unanimous consent, recesses are allowed.

As in bullfighting, the killing of the bull is the climax of the drama and the moment of truth alike, so the act of voting is often the decisive moment in the flow of Senate business. Most Senate votes are *viva-voce*, in answer to the presiding officer's call for "ayes" and "noes." If a vote is in doubt, a "division" may be requested, and the Chair counts the Senators for and against the question either by a show of hands or by having Senators stand. But before the Chair announces the result of the vote, if a Senator demands the "yeas and nays," and one-fifth of those present sustain the demand, the Chair will order the Clerk at once to call the roll alphabetically, and each Senator will individually answer "aye" or "no" as his name is called. As in the case of the quorum call, bells and buzzers are triggered, and Senators come trooping to the floor. At the close of the roll call, those who have entered the chamber since their names were called will stand until they are individually recognized by the Clerk and record their votes recorded retroactively, however, and the Chair cannot even entertain a unanimous consent request that they be allowed to do so.

This process is iron-clad. Indeed, Senate Rule XII states that, "Each Senator shall, without debate, declare his assent or dissent to the question, unless excused by the Senate." However, for personal or political reasons, a Senator may want to avoid being recorded on an issue, and vote-dodging has always been a feature of Senate life.

Members, at their voluntary request, are often excused from voting on issues in which they may have some personal interest. Others may avoid voting by arranging to miss a travel connection on the way back to Washington, or by failing to respond to a vote summons in their offices or a committee room.

As to pairs, there is no Senate rule governing "pairs." But the unique practice of "pairing off" has evolved as a means of avoiding the confrontation of a recorded vote. This peculiar device is highly complex and has often been attended by controversy. According to Thomas Hart Benton, "pairing" first appeared in the House of Representatives and signified an agreement by two members of opposing political parties to absent themselves from the duties of the House, without the consent of the House, and without deducting their *per-diem* pay during the time of such a voluntary absence. Theoretically, this would maintain the proportional party balance mandated in the last election, and would allow a member at the same time to pursue important personal or political duties without upsetting that balance.

The first instance of this practice may have occurred in 1824, when a House Member announced that he was paired off with another Member whose affairs required his presence at home.

In May of 1824, Representative Henry Dwight of Massachusetts rose to ask the indulgence of the House to excuse him from voting on two questions of disagreement to Senate amendments which had unexpectedly come up for a vote. The following account appears in the Annals of Congress for May 17, 1824:

Mr. Dwight of Massachusetts said he rose to ask the indulgence of the House to excuse him from voting on the two questions of disagreement with the amendments of the Senate—an indulgence, he said, which he was sure the House would unanimously grant, when they understood the grounds upon which it was claimed. An honorable friend had entertained, in common with himself, and almost all others, an opinion that the tariff bill would not come back from the Senate. They were both anxious to leave town, and had agreed to depart this morning. Another question of importance had unexpectedly detained him. The gentleman from Virginia, who was, upon all questions of the tariff, opposed to himself, had left town, and he felt himself bound in honor not to vote.

Sixteen years later, in 1840, another pairing occurred when a House member announced that he was "paired off" with another member whose affairs required his presence at home. Sensing a violation of the letter and spirit of the Constitution, Congressman John Quincy Adams unsuccessfully urged the immediate adoption of the following resolution:

Resolved: that the practice of pairing off involves on the part of the members resorting to it the violation of the Constitution of the United States, of an express rule of this House, and of the duties of both parties in the transaction to their immediate constituents, to this House and to their country.

During Benton's term in the Senate, he declared that pairing had not yet penetrated the upper chamber. But by 1860, the practice had become so common in the Senate that a Senator, when called on for his vote, might refuse to answer to his name and would be excused from voting on the grounds of being paired with another member. Paradoxically, pairing remains a feature of Senate proceedings in spite of the fact that, while provided for by House rules, it goes unrecognized, as I have said, by the Standing Rules of the Senate.

In the course of preparing for a yea-and-nay vote, a paired Senator will announce the pair during the vote.

These pairs usually occur in situations in which one Member who takes a particular position on an issue cannot be present in the Senate at the time the vote occurs. In order that his absence may not have a deciding impact upon the outcome of the vote on the issue, he or she will arrange to have a so-called "live" pair with another Senator who intends to be present on the rollcall vote. In this way, the absent Member, as I have already indicated, will be just as effective as if he had been present for the particular rollcall vote, in that, although he is absent, his "live" pair with the Member who is present cancels out what otherwise would be a vote cast by the present Member.

The Member who is present announces the pair. For example, let us say that I have a pair with my distinguished colleague from West Virginia, Senator RANDOLPH, and I am present and voting, and Senator RANDOLPH, for good reasons, might have to be in West Virginia.

When my name is called during the rollcall vote, or at the end of the rollcall vote and before the vote is announced by the Chair, I would stand and address the Chair thus:

Mr. President, I have a live pair with my distinguished senior colleague from West Virginia, Mr. RANDOLPH. If he were present

and voting, he would vote "yea." If I were permitted to vote, I would vote "nay." I, therefore, withhold my vote.

In other instances, I might proceed to vote and then withdraw the vote upon the announcing of a pair, and I would do it in this manner:

Mr. President, I have a live pair with my distinguished senior colleague from West Virginia, Mr. RANDOLPH, who is unavoidably absent today. If he were present and voting, he would vote "yea." I have already voted "nay." Therefore, I withdraw my vote.

The arranging of pairs has been decisive from time to time on very close votes, because it is possible to pair off enough present Senators to affect the outcome of the vote and perhaps make a difference of 1 or 2 votes which, had the Senators present not been paired, would have decided the issue opposite to the outcome that resulted.

However, Senators generally will not agree to give a "live" pair except on the condition that the outcome is not changed by virtue of the pair given.

Senators are very circumspect and careful once they give a colleague a promise of a pair and they feel that they are honor bound to keep that commitment.

But as I say they may make the promise to pair on the condition that the pair will not affect the outcome of the vote in which case they would be relieved of their commitment.

Though pairing has been periodically questioned during the course of its prevalence in the Senate, the practice has been allowed to continue, though it violates two Standing Rules of the Chamber—the requirement of attendance and the injunction to vote.

A so-called "dead" pair has no impact upon the outcome of any vote. It is merely the announcement in the RECORD of the positions of two absent Senators, with one of the absentees being paired "for" and the other "against." Such so-called "dead" pairing is usually not prearranged by the two Senators so recorded in opposition to each other. Rather, the Party Whip may sometimes use this method of stating how absent Senators would have voted had they been present for a vote. However, no absent Senator's position on a particular vote will be so shown unless he so requests. He may, of course, at any later time, state for the RECORD how he would have voted had he been present on a given rollcall.

In addition to their duties and relationships within the Senate, Senators confront many occasions when they must meet and negotiate with members of the House of Representatives on a variety of matters. Interestingly, the joint rules governing the conduct of formalities in matters in which both branches of Congress are concerned were officially declared dead over a century ago.

The joint rules in question found their inception in the work of the first select committee ever chosen in the Senate. The members of that committee, in conference with a similar committee from the House of Representatives, were charged to prepare "rules for the government of the two Houses in cases of conference." The report of this joint committee was accepted and, in time, new rules were added until, by 1876, the joint rules numbered some twenty items.

In that year, however, notice was drawn in the Senate to the fact that no formal vote had been taken on this accumulated body of procedures, and its binding force was questioned. Subsequently, the Senate passed and sent to the House a resolution providing that the joint rules, which had previously been observed through acquiescence and precedent, be adopted officially for that session of Congress. In response, however, the House made no reply, and there the matter rested for some months.

At the end of that session, the House routinely requested the concurrence of the Senate in the suspension of two of the joint rules. At that point, the Senate "respectfully returned" the latter resolution to the House, notifying that worthy body that, since the House had made no response to the Senate's earlier resolution, there were "no Joint Rules in force." Subsequently, the Senate in a heavy vote sustained that decision, which had been conveyed originally by the Chair. In spite of these actions, however, the legally-forceless joint rules continued to be printed in the *Manuals* of the Senate and House for nearly a decade, and, to this day, continue in many respects to govern relations between the two Congressional branches.

But practice has often taken precedence over codification in the Senate. Thus, apparently, was the evolution of the Senate's daily routine in the early part of this century to be explained. In the stress of experience, protocol and process alike were shaped, later to be set into print. In the "legislative ballet," unless otherwise specified, the presiding officer of the Senate and the Chaplain would mount the Senate dais at the stroke of noon to convene business with the blow of the gavel and the words of invocation.

"Morning Business," the next item on the agenda, officially begins following the reading of the Journal of the previous legislative day's proceedings. Ordinarily, however, the Journal reading is dispensed with by unanimous consent on request of the majority leader. However, a member can insist on the reading of the *Journal* to its end, and this tactic, coupled with debates and votes for fantastic corrections of the *Journal*, has been one of the classic instruments of filibustering on occasion.

"Morning Business" would move to its conclusion through receiving messages from the President; reports and communications from the heads of departments other communications to the Senate, bills, joint resolutions, and messages from the House remaining on the table undisposed of from the previous day's session; and any other bills, memorials, reports, and concurrent and joint resolutions for which the presiding officer calls, followed by resolutions over under the Rule.

At the conclusion of "Morning Business," and not until so announced, the Senate proceeds to the consideration of the Calendar of Bills and Resolutions. Bills and resolutions not subjected to objection are taken up in their order. Locomotive velocity may develop at this point, as bills come up and pass through with no objection. Thus, something of a record was established on December 30, 1924, when the Senate considered and passed in one afternoon 136 "unobjected to measures" involving appropriation of $14 million, a princely sum in those days. However, at any stage, objection may be raised to any measure, forcing it to "go over" to a later day. This practice places great power in the hands of individual members, and, more than once, this tool has been used as an instrument of mild retaliation by Senators who were irked by the prior actions of one or more of their colleagues.

After the "unobjected to measures" on the Calendar have been considered and dispatched, unless "special orders" are scheduled, the Senate turns to its "unfinished business."

In spite of this intricate process, however, the Senate has generally maintained a predisposition for informality. Since the Senate is a unique matrix out of which emerge law and legislation, Senators, even while observing an elaborate code of etiquette, decorum, and often-stylized address, have fostered in their midst an air of near-Olympian familiarity relative to their own rules. This attitude was presaged on April 16, 1789, when the Senate, acting on a draft of its own rules for conducting business did not *adopt* the rules as reported, but voted that the rules *"be observed."*

This tone was characteristic of that first intimate group of men who met in secret session in a small room. The Senate has always been an assemblage of consciously unique people who anticipate being something of a law unto themselves. Indeed, as originally conceived before the advent of popular Senatorial election, Senators were intentionally insulated from the dangers inherent in the pressures of demogogic influences from the outside, free to decide legislation on its own merits and in the Senate's own time. In spite of later changes that rendered the Senate more amenable to the popular will than originally contemplated, over the decades the Senate evolved a special mystique in which Senators are expected to operate by an almost unuttered code of honor, and to learn to relate to one another as if by a sixth sense.

It should not appear strange, therefore, that rule V of the Standing Rules of the United States Senate states that, with the exception of other provisions of the rules, "*Any* rule of the Senate may be suspended without notice by unanimous consent." Thus, unencumbered by legalisms that might hamstring less auspicious legislatures, the Senate moves with an almost mystical sense of itself, and certainly with an imperial grace, to fulfill duties and responsibilities imposed on it by a set of Founding Fathers, some of whom conceived of the Senate that they had created as a precious enclave in which Providence and Destiny Incarnate would be cast for a fortunate progeny of countless millions in NOVUS ORDO SECLORUM.

Mr. SIMPSON. Mr. President, I was fascinated with the remarks of the good leader of the other faith with regard to his continuing history of the U.S. Senate. I have found that absolutely fascinating and intriguing. I have been reading it as it unfolded in these past months. I have enjoyed it thoroughly. It means a great deal to all of us.

It is particularly interesting to hear him speak on the issue of attendance today. It seems terribly ironic to bring that up. It is true that we are so deeply involved in so many committee assignments.

For one Senator, I want to thank the minority leader so much for what he has done to increase our understanding of the history of this remarkable institution.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield briefly?

Mr. SIMPSON. I yield.

Mr. ROBERT C. BYRD. Mr. President, I thank my friend for his expression of interest and will say that his words of approbation are heartwarming.

This is the 37th speech on the U.S. Senate that I have made, beginning March 21, 1980.

I anticipate that I will probably continue throughout this year. I do this in anticipation of the forthcoming 200th anniversary of the U.S. Senate which will be commemorated in 1989.

I again thank the distinguished Senator.

Mr. President, I ask that the time of this colloquy will be charged against my time.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the time for commencing the pending business, S. 734, be extended until 12:45.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER (Mr. HEINZ). Under the previous order, there will now be a period for the transaction of routine morning business during which Senators may speak for up to 5 minutes each.

FORGETTING THE HOLOCAUST

Mr. PROXMIRE. Mr. President, in last Monday's New York Times, Rabbi Howard Singer brings the importance of Holocaust Day, which is on April 30, into focus, and discusses why the tragedy can never be forgotten.

Singer tells of the many current events that simply will not let his memories die: War criminals in Cleveland, the American neo-Nazi Party, the growing interest in Nazi memorabilia—the world is full of reminders. The most shocking symptom, Singer insists, is the incredible notion that the holocaust never took place, that the killing of two out of three European Jews is somehow a myth.

Rabbi Singer dwells on these and other ideas with great eloquence.

Mr. President, I ask unanimous consent that the entire article I have referred to be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FORGET THE HOLOCAUST?

(By Howard Singer)

WEST HARTFORD, CONN.—In Israel, they fly flags at half mast on April 30. In the United States, they hold memorial meetings. It's Holocaust Day.

At the meetings, six candles are lit, one for each million dead. The speakers, their eloquence defeated by the terrifying demands of the occasion, are reduced to pleading: Don't ever forget, they say in one way or another. Forget?

How? I pick up the newspaper and read that Pope John Paul II has named Jean-Marie Lustiger the Archbishop of Paris. On the surface, that appears to have nothing to do with me, or with the six pathetic ceremonial candles. But it does.

The new Archbishop was born a Jew. His parents, like mine, were Polish Jews; his were hunted by the Nazis, and his mother died at Auschwitz. He was hidden with a French Roman Catholic family as a child and baptized during the war, like thousands of other Jewish children. After the war, a few were restored to their families or to Jewish institutions; most were not. Something within me stirs. We lost millions to Nazi paganism; we lost many thousands to Christian mercy. The pain is of another order but it is pain, nevertheless.

A few days later, I read that a man was just accused of having helped kill hundreds of thousands of Jews at Treblinka. Where is he now? In Cleveland, of all places—friendly, familiar, old Cleveland, Ohio. The world makes certain I won't forget.

The prods to memory keep coming. One morning, the press reports an obscene resurgence of interest in Nazi memorabilia: Prices have risen so sharply that one manufacturer is turning out replicas. Another morning there is a picture of pimply faced young men in uniform—members of the American neo-Nazi party. Minuscule, to be sure; no threat, I know—but evocative; certainly, an effective barrier to even willful amnesia. I also read that West Germany was considering selling Leopold II tanks to Saudi Arabia, whose leaders recently urged the Arab world to "cleanse" Jerusalem of its Jews. That word "cleanse" recalls the time when Europe was to be made *Judenrein* ("Purged of Jews"). Then, too, it was to be accomplished by German arms. The world insists on reminding me.

Then is forgetting the real danger? Not for those who attend memorial meetings. But there are dangers. The most shocking is outright denial. Some now say that the holocaust never took place. The notion that it didn't was first spread by neo-Nazis in postwar Germany. Incredibly, a tiny group of revisionist "historians" now echo that here. Young Americans are ill-informed about recent European history, and, out of their commendable sense of fair play, give a respectful hearing to anyone. The monstrous falsehood may yet find its audience.

There is danger of trivialization. I pick up a paperback novel. The cover features a Nazi officer holding a whip, facing a voluptuous girl whose torn dress bears the Star of David, and whose breasts are showing. Quickly I dismiss it as one of the genre, part of the flood of abysmally bad novels profiting from the murder camps. I rage against those who turn Jewish tragedy into something between a monster show and "Hogan's Heroes."

There is the danger of a false universalism. Come now, say the enlightened ones, don't be narrow: Think of the Cambodians, the "boat people," the Vietnamese, the Biafrans. What can one say to that? It is degrading, even ghoulish, to seek to prove preeminence in suffering but the holocaust was unique. Its dead and maimed were not victims of war or famine or politics in the normal sense: They were "processed" by a bureaucratic killing machine. But didn't Poles also die in the machine? And Gypsies and homosexuals? True, others were caught in the machine, but Jews were the people for whom it was designed, the only people whose right to live was denied in principle. And the machine almost succeeded.

Two out of three European Jews were murdered, children and women included. In contrast, battlefield losses for the Russians were one in 22; for the Germans, one in 25; for the British, one in 150. The Jews did not suffer as ordinary citizens of defeated countries; they were given "special treatment"—extracted from their communities and sent away to be killed because they were Jews. I point this out not to belittle what others endured but only to keep the facts in the sharpest focus. It is not necessarily provincial to assert the uniqueness of one group's experience; it is sometimes the simple truth.

"The world is weary of the past,/Oh, might it die or rest at last!" wrote Shelley, in "Hellas." His wish is mine as well. Healthy humans can't live in the shadow of the crematoria, poisoning every sunny hour with bitterness. But the world won't let my memories die. The demons can't be exorcised.

The door to the past can't be closed.

CONTINUATION OF AUTHORITY UNDER THE DEPARTMENT OF JUSTICE APPROPRIATION AUTHORIZATION ACT, FISCAL YEAR 1980

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 840.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 840) entitled "An Act to continue in effect any authority provided under the Department of Justice Appropriation Authorization Act, Fiscal Year 1980, for a certain period", do pass with the following amendment:

Page 2, strike out line 2, and insert: thereof) during the period beginning on April 6, 1981, and ending immediately before October 1, 1981.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, with respect to the request for immediate consideration, it has been cleared on this side of the aisle.

Mr. STEVENS. I do ask that this matter be immediately considered.

The Senate proceeded to consider the bill.

Mr. STEVENS. I move that the Senate concur in the House amendment.

The motion was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE SNAIL DARTER

Mr. BAKER. Mr. President, I have some delightful news I simply must share with my colleagues—despite what I am certain some consider the best efforts of the Tennessee Valley Authority and all of the Federal Government, I can report to my colleagues that the plucky snail darter has defied us all and survived. Indeed, it has prospered.

I call to my colleagues' attention an April 1 article in the Knoxville News-Sentinel, written by Mr. John Moulton. As we all recall, the supposition that the snail darter inhabited only the Little Tennessee River contributed to more than 2 years of delays in the completion of TVA s Tellico Dam project on that river, even after the structure was virtually intact.

Now, however, Mr. Moulton writes, the irrepressible darter has been located by biologists in four other Tennessee waterways, in addition to the Hiawassee River to which it was transplanted in accordance with our decision to complete the Tellico project. The fish species has now been located also in the Sequatchie River, Sewee Creek, the Nickajack Reservoir, and the South Chicamauga Creek.

All of which calls to mind, Mr. President, a verse by Rupert Brooke: "Fish say, they have their stream and pond; But is there anything beyond?" Fortunately, for the snail darter, there is indeed something beyond.

So that my colleagues might share in this moment, I would ask unanimous consent that the text of Mr. Moulton's article be printed in its entirety in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SNAIL DARTERS FOUND IN NEW HABITATS

(By John Moulton)

Snail darters, once thought to exist only in the Little Tennessee River, are cropping up in several Tennessee Valley streams, leading biologists to believe maybe the fish is not endangered after all.

The tiny fish, which because of its endangered species status helped delay the controversial Tellico Dam for more than two years, has been discovered in three separate locations in the last two weeks.

"It seems like they're much more widespread than we really thought. And it brings us closer to delisting," said TVA marine biologist Gary Hickman. "The species appears to be in a lot better shape than we originally considered it to be."

Dr. David Etnier, the man who discovered the first snail darter in the Little Tennessee River in 1973, found one snail darter March 23 in Sequatchia River, which flows into the Tennessee River, below Nickajack Dam west of Chattanooga.

Then, TVA aquatic biologists this week found 29 small darters in Sawee Creek, which flows into Chicamauga Lake about 5.5 miles below Watts Bar Dam, and four of the endangered fish in the Nickajack Reservoir below Chicamauga Dam. The 19 fish were found Thursday and the four darters were spotted Wednesday.

Etnier, a UT professor, and his students found some small darters last fall in South Chicamauga Creek near Chattanooga, giving the Snail Darter Recovery Team the first indication another natural habitat exists. However, authorities were not convinced the fish had not migrated there from the Hiwassee, where TVA had transplanted many of the fish.

TVA resumed its search for other habitats Tuesday, said Gary Hickman, TVA aquatic biologist. The snail darter rescue program has been halted since last fall, while TVA officials examined the merits of continuing the program.

Hickman said TVA has decided to scale down its involvement in the recovery because of budget limitations. Only about $120,000 is left in the budget, and when that is gone, TVA probably will drop out, he said.

"The chances of getting more money from the Tellico project (budget) are pretty slim," he said.

Hickman said other agencies, such as the Tennessee Wildlife Resources Agency, may pick up the slack.

TVA divers and snorklers will continue to search the Sewee Creek area and other rivers and streams identified as likely habitats. "We're going to look at every major tributary that comes in below a dam," Hickman said.

Three habitats must be established for the fish before it can be removed from the Endangered List. In addition to the Hiwassee, TVA has transplanted the fish, a member of the Perch family, in the Holston River near Mascot and in the Lower Elk River south of Pulaski.

The gates of the Tellico Dam were closed in 1979 after Congress exempted the project from the Endangered Species Act. TVA was ordered to halt work on the project in 1977, when the Sixth Circuit Court of Appeals overturned a lower court ruling. In 1978, the U.S. Supreme Court upheld the appeals court halting the project until Congress intervened.

TVA spent $138 million on the Tellico Dam project, which turned the Little Tennessee River into the 16,000-arce Tellico Lake.

SENATOR GLENN EVALUATES UNITED STATES-PEOPLES REPUBLIC OF CHINA RELATIONS

Mr. ROBERT C. BYRD. Mr. President, on March 21, 1981, our distinguished colleague, Senator JOHN GLENN, addressed the American Assembly Conference on the future of relations between the United States and the People's Republic of China.

I call the attention of my colleagues to this address because I consider it to be one of the most realistic and thoughtful analyses of a relationship which is of significant importance to this Nation.

Senator GLENN noted:

I am optimistic that the 80's will witness great advancements in U.S.-P.R.C. relations. Our common interests are many, and closer cooperation between us can go far toward ensuring global stability. That is why no peace-seeking nation need fear an enhanced Sino-American relationship.

I found Senator GLENN's views on the possible security aspects of this relationship to be particularly valuable. He pointed out:

We must concentrate on the long run—and resist the temptation to act impulsively for short-term tactical advantage. Twisting the Polar Bear's tail just to watch him jump is dangerous, as well as counterproductive. And it is folly to think that our China connection can somehow be used to dissuade the Soviets from specific actions, particularly when they believe that important national interests are at stake.

It was for this same reason that, on "Face the Nation" Sunday, I was critical of comments raising the possibility of providing conventional arms to China if the Soviets were to invade Poland. In my response to a question concerning the Secretary's comments, I pointed out:

I think that we ought to do what's in the best interest of the United States in the short run, and in the long run. If two weeks ago, a month ago, if six weeks ago it would have been in the best interests of the United States to provide arms to China, that's perhaps what we ought to do, but I don't think that ours ought to be a policy of simple reaction there . . . if the Soviets go into Poland, we will sell arms to China.

I think we best be very careful that we don't leave the impression with People's Republic of China that we're simply out to use the Chinese.

As one who had stated early on that perhaps the United States ought to consider some military sales of conventional weapons to the People's Republic of China, I agree with Senator GLENN's assessment that:

America should slowly and with great care begin to expand its military and security relations with China. Now let me be clear. I do not foresee—and do not propose—any sort of military alliance between our two countries.

I strongly believe that it is in our interest and in the interests of our allies to ensure that China is not intimidated or threatened by growing Soviet power in Asia. Beijing has opted for a gradual and measured modernization of its military forces. That is wise and proper. In specific instances, however, we may wish to make available selected technologies so that China neither falls further behind the Soviets, nor is forced to cloak its deficiencies behind a facade of xenophobic self-reliance.

Senator GLENN's speech is a constructive assessment of all aspects of our relations with the People's Republic of China. I commend him for his significant contribution to a vital area of our foreign policy concerns.

I ask unanimous consent that Senator GLENN's speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

REMARKS OF SENATOR JOHN GLENN

Let me begin by suggesting that this important discussion of the China Factor could not come at a more propitious time. In Washington, of course, we have a new President and a new Administration. In our relations with China, we have some very old issues that have yet to be resolved. These issues range well beyond the largely bilateral questions on which I will focus this evening. U.S.–PRC relations have, for example, important secondary and tertiary effects elsewhere in the Pacific Basin. Our friends in Northeast Asia clearly have a stake in America's China policy.

Future relations between Washington and Hanoi—and among Hanoi, Beijing and Moscow—will likewise be affected. And regional organizations such as ASEAN cannot help but be shaped by future U.S. policy toward China. Conferences like this one, providing fresh thinking and lively debate, are in the best American tradition and can be of enormous help to those in policy-making positions.

As you know, I have been asked to outline my views on what direction U.S. policy toward China ought to take over the next few years. In doing so, however, I am reminded of the famous Greek dictum that "the past is prologue." So I want to preface my remarks about the future with some brief re-

flections about the past; in particular, about the amazing progress we have witnessed in Sino-American relations over the last two years.

Political exchanges between our two countries, while not yet routine, have become prolific, cordial and remarkably productive. Vice Presidents Mondale and Bush, Cabinet Secretaries, Assistant Secretaries and dozens of other American luminaries all have made the trip to Beijing. A number of Chinese officials—including Deng Xiaoping himself—have made reciprocal visits to the United States. In fact, I traveled with Mr. Deng and his party when they toured America. My fondest memory is of an event that occurred at a rodeo just west of Houston. There in the backseat of a stagecoach, with an ill-fitting, ten-gallon cowboy hat falling down around his ears, sat the Vice Premier of China—leader of one billion people—waving and grinning from half-covered ear to half-covered ear. I assure you that is one mental picture truly worth 1,000 words.

Only a few short years ago, who among us would have believed all this possible? Who would have dreamed that our two-way trade would already top $4½ billion or that it might reach $6 billion by the end of 1981? These developments are all the more remarkable in light of the icy hostility that had for so long characterized Chinese-American relations. Not only were we on opposite sides during two different wars, but for 25 years we rarely spoke to each other, either publicly or privately. On the other hand, perhaps we should not be too surprised at the dramatic turnabout. After all, we fought Japan and Germany during World War II and today count them among our closest allies.

In retrospect, the key to our breakthrough with China was clearly the way in which we handled the sensitive Taiwan issue. Because both Beijing and Taipei view that dispute as merely a continuation of the Chinese civil war, the search for a solution was understandably complicated by deep-seated emotional scars and personal hatreds. Despite President Nixon's dramatic visit to China six years earlier, by 1978 we still had not found the key to normalized relations.

Obviously, we were anxious to establish normal diplomatic contact with a country containing ¼ of the world's population. But we were unwilling to do so if it meant jettisoning our long-time friends and allies on Taiwan. The formula finally adopted—diplomatically recognizing Beijing while maintaining unofficial relations with Taipei—was not completely satisfactory to any of us. But by breaking the impasse, it allowed us to establish a framework that will better serve all of our interests, both now and in years to come.

Unfortunately, statements made during and after last fall's election have generated uncertainty about the future of that framework. To my friends in the People's Republic of China, let me say that I believe America must adhere to the commitments we made in the Joint Communique and associated diplomatic understandings. These documents can and should be the basis for a strengthened relationship between our two countries in the future.

To my friends on Taiwan, I make a solemn pledge. I will do all I can to ensure that the Taiwan Relations Act is administered fairly and that it is carried out fully. Last year, as Chairman of the Senate Subcommittee on East Asian and Pacific Affairs, I conducted several hearings and commissioned a staff study on the implementation of the TRA. While those efforts convinced me that our nongovernmental relations have prospered amazingly well thus far, you may be sure that this monitoring will continue. We have promised to protect Taiwan's freedom of choice. Honor demands that we keep that commitment.

Concern over Taiwan notwithstanding, I am optimistic that the 80s will witness great advancements in U.S.-PRC relations. Our common interests are many, and closer cooperation between us can go far toward ensuring global stability. That is why no peace-seeking nation need fear an enhanced Sino-American relationship.

In world politics, of course, optimism must always be leavened with realism. Chinese and American interests will sometimes conflict and we are unlikely to see eye to eye 100% of the time. Occasionally, our relations may even be less than cordial. But in politics as in life, mature friendships endure through bad times as well as good.

Let me now turn to a major issue that has not yet been adequately addressed—but which may well be crucial to our long-term relationship with the PRC. While there is widespread agreement on the efficacy of expanding Sino-American cooperation in the political and economic spheres, there is considerably less consensus on what should be done in the security area. Clearly, both sides have reason for caution. China's economy simply cannot sustain rapid military modernization without adversely affecting progress in the civilian sector. And Chinese leaders have learned through bitter experience the danger of over-dependence on foreign sources of hardware and technology.

For its part, the United States must remain ever mindful of the impact our relationship with the PRC has on the sensibilities of America's regional allies. Maintaining our reputation as a reliable partner requires that we carefully consider the views and concerns of all our friends. Perhaps most important of all, we must concentrate on the long run—and resist the temptation to act impulsively for short-term, tactical advantage. Twisting the Polar Bear's tail just to watch him jump is dangerous, as well as counterproductive. And it is folly to think that our China connection can somehow be used to dissuade the Soviets from specific actions, particularly when they believe that important national interests are at stake.

But these caveats aside, I believe that America should slowly and with great care begin to expand its military and security relations with China. Now let me be clear. I do not foresee—and do not propose—any sort of military alliance between our two countries. That would require, among other things, a major transformation in China's political and economic system—a transformation which, if it occurs at all, is at least several decades away. For now, our objectives should be two-fold. First, we must seek to facilitate China's freedom of action. We should ensure that she has no need for a return either to "fraternal" Soviet assistance or to a Maoist-like policy of shrill isolationism. Second, we should seek to maintain peace and stability throughout the Asian region. That, in turn, means neutralizing attempts at intimidation of the PRC and assuraging her fears of outright military aggression.

For almost 35 years, a relatively stable military balance has existed in Asia. Recently, however, growing Soviet power and influence—along the Sino-Soviet border, in Vietnam and on Pacific waters—has threatened to disrupt that balance. In my view, it is imperative that we meet and deflect that threat. First, we must give high priority to finding ways of reconstituting U.S. Pacific forces spread thin by our obligations in the Persian Gulf—obligations that will likely last for a decade or more. Second, we must make military equipment and technology available to those allies who wish to modernize and strengthen their own defenses.

These precautionary measures alone, however, may not prove sufficient if, at the same time, the quality of Chinese armaments should seriously deteriorate relative to those possessed by the Soviets. And unfortunately, that is precisely what is happening.

For one thing, Chinese exploitation of Russian military equipment and technologies obtained in the 1950s and early 1960s has reached the point of diminishing returns. For another, China's own scientific and technological base is inadequate to permit quick, autonomous force modernization. When to those realities is added the almost exponential increase in Soviet capabilities, certain conclusions appear inevitable. In sum, without a quick infusion of more modern technology, China's military capability will be grossly inferior to that of the Soviet Union by the year 2000. I submit that such a development would neither be in our interests, nor in those of our allies.

Preventing that scenario from occurring, however, will mean that we must be willing to transfer carefully selected technologies and equipment to the PRC. As a member of the Senate Foreign Relations Committee, I am announcing tonight my willingness to approve such transfers of defense material on a case-by-case basis. Aircraft engines, avionics equipment and antitank weapons are three examples of what I have in mind.

In proposing this policy, let me again clarify my motives. Frightening the Russians is assuredly not my intent. Nor am I among those spoiling to play the so-called "China card." Good poker players hedge their bets until they are certain they hold more than a deuce. My proposal is simply based on a belief that to do otherwise could risk the peace and stability we seek. Naturally, I am aware that such a policy would remind Moscow of our intention to discourage aggression and adventurism. But what is wrong with that? If strengthening the world's weak spots encourages the Soviets to stay at home, so much the better.

Let me close tonight by briefly summarizing my views about the future of Sino-American relations. The prospects for widening cooperation are bright and we will exchange views frequently on global and regional matters of mutual concern. Although we may sometimes disagree, our discussions will promote confidence and greater understanding. With each problem solved, resolution of the next becomes possible. With each act of trust, the next act requiring even greater trust can follow.

Trade expansion is one avenue that can be especially rewarding. Despite China's temporary economic retrenchment and readjustments, I believe that two-way trade can continue to increase. A number of U.S. companies, disappointed that the bonanzas they envisioned have failed to materialize, have withdrawn their staffs or closed their China offices in recent weeks. But the key to long-term success in China is to not give up too quickly. According to experts quoted in the March 18 Wall Street Journal, ample trade opportunities will continue to exist in the areas of light industry, transportation and energy.

In the realm of energy, for example, we know that development of her oil reserves remains one of China's top priorities. The quality of American drilling equipment—particularly our drill bits and off-shore drilling rigs—far exceeds that of our trade competitors. In other areas too, opportunities for trade—and even for joint ventures—abound. All we need is imagination, interest and, above all, patience. Congress must do its part as well. That means encouraging exports and examining afresh certain import problems peculiar to trade with nonmarket economies. I have supported such efforts in the past and will do so in the future.

On military and security matters, change will occur more slowly. But I strongly believe that it is in our interest and in the interests of our allies to ensure that China is not intimidated or threatened by growing

Soviet power in Asia. Beijing has opted for a gradual and measured modernization of its military forces. That is wise and proper. In specific instances, however, we may wish to make available selected technologies so that China neither falls further behind the Soviets nor is forced to cloak its deficiencies behind a facade of xemophobic self-reliance.

In the words of Thomas Jefferson, 'et us seek today in Asia, as we did at our founding 200 years ago, "equal and exact justice for all men, of whatever state or persuasion . . . and peace commerce and honest friendship with all nations."

Thank you.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

EXPORT TRADING COMPANIES, TRADE ASSOCIATIONS, AND TRADE SERVICES ACT

The PRESIDING OFFICER (Mr. STEVENS). Under the previous order, the Senate will now resume consideration of S. 734 which the clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 734) to encourage exports by facilitating the formation and operation of export trading companies, export trade associations, and the expansion of export trade services generally.

The Senate resumed consideration of the bill.

The PRESIDING OFFICER. The Chair, in his capacity as a Senator from the State of Alaska, suggests the absence of a quorum.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, I see that Senator PROXMIRE, my colleague on the Banking Committee, my distinguished ranking minority member, was not only on his way but is now present.

Mr. PROXMIRE. Right.

Mr. HEINZ. I would like to take this opportunity to make a brief opening statement.

Let me state at the outset, Mr. President, that this will be brief as the Senate has faced these issues before, and I believe most Senators are prepared to move forward on S. 734.

The bill before us today, S. 734, is an original bill reported from the Banking Committee incorporating some minor changes the committee made in S. 144, the basic export trading company legislation which Senators DANFORTH, BENTSEN, TSONGAS, and I introduced on January 19. That bill presently has 63 cosponsors, including a majority of Senators in both parties.

On March 23 I placed in the RECORD a summary of the substantive changes the committee made in S. 144. I ask unanimous consent, Mr. President, that that summary be printed at the conclusion of my opening remarks today.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HEINZ. None of the changes in question alters the basic provisions of this legislation.

Mr. President, this bill, which is essentially the same as legislation which passed the Senate unanimously last year, is a concrete effort to translate into action an objective we all share; namely, improving our Nation's export picture. That this is an objective worth achieving is no longer in dispute.

Although the ratio of exports to GNP rose from 4.2 percent in 1972 to 7.5 percent in 1979, U.S. imports, led by massive increases in the cost of oil, grew equally as fast, increasing in importance relative to GNP from 5.1 percent to 8.7 percent in the same years. Because imports have expanded since 1972 from a higher base than exports, the trade deficit has expanded sharply, with an aggregate deficit over the past 5 years exceeding $105 billion.

Because of their superior international competitiveness in manufactured goods, our major trade competitors have been able to offset their imported energy bills much better than the United States. According to a study done by the National Association of Manufacturers last year, imports of manufactured goods increased nearly four times as fast as exports since 1970, with that margin growing in the last half of the decade. The study further concluded that our industrial competitiveness is declining measured both by increased import penetration here and loss of export markets elsewhere.

The U.S. share of world markets declined from 21.3 percent to 17.4 percent over the past 10 years, the largest relative decline among major industrial exporters. We have lost market share in 8 of the 9 EC countries and 12 of the 13 OPEC countries. While our manufactured goods trade has stayed in rough balance, Japan and West Germany in 1979 had surpluses of $70 billion and $60 billion respectively. The study concludes:

Because of worsening terms of trade, the U.S. has to run faster, in terms of export volume, to stay in the same place. . . . Improving the U.S. trade account by further depreciation of the dollar (which increases inflation) and/or by restraining U.S. growth (which increases unemployment) are very unattractive long-term policy options.

Obviously, that trend is not going to be reversed overnight. But every successful program of trade promotion is a step in the right direction. Small- and medium-sized businesses have too long been excluded from a significant role in our Nation's export picture.

In an effort to do something about our deteriorating export performance, my predecessor as chairman of the Subcommittee on International Finance and Monetary Policy, former Senator Stevenson, and I initiated an extended series of hearings in 1978 on export policy and performance.

Out of those hearings grew this legislation, based on a realization that substantial numbers of small- and medium-sized businesses, 20,000 in the Commerce Department's estimate, could export but did not. In investigating this, the committee concluded that small businesses were deterred from exporting both by their traditional focus on domestic markets and by serious barriers—real and perceived—to exporting in the form of different customs rules, licensing standards and languages, unfamiliar marketing practices, and financing difficulties. In short, the small businessman has, not surprisingly, found foreign marketing alien and confusing, and therefore has avoided it.

One way to surmount these barriers is through export trading companies—service-providing companies that will perform some or all of the functions that intimidate small businessmen. In its most advanced form, the export trading company might simply buy the goods from the domestic source and resell them abroad itself, assuming all the risk and responsibility. In a more limited form, the export trading company might provide marketing advice—to the point of finding a market and helping arrange a purchase—for a fee, leaving the seller on his own to complete the transaction.

An export trading company, of course, could also provide a wide range of other services in that case, helping to obtain necessary Government licenses and approvals, finance, and ultimately ship the product. There are an infinite number of scenarios, but they all revolve around the same theme—removing some or all of the risk and unfamiliarity of foreign marketing from the domestic businessman.

In looking at why such service-providing organizations do not exist now in adequate numbers, we concluded that there are two primary problems which could be addressed through legislation—undercapitalization and antitrust uncertainties. A third area, a need for adequate tax incentives, will be the subject of another bill we will shortly introduce. The first two problems are addressed in the legislation before us today.

In brief, S. 734 deals with the capital problem by providing for limited bank investment in export trading companies. Because it is not our intent simply to permit banks to move unrestricted into certain kinds of commercial activities, the bill narrowly limits the scope of bank involvement, particularly with respect to bank control of a trading company, which in every case would have to be approved by the appropriate bank regulatory agency.

Beyond the basic statutory limit of 5 percent of the bank's capital which could be invested in the export trading company, S. 734 contains numerous other restrictions to protect the safety, soundness, and integrity of banks involved with trading companies.

The report on the bill lists these limitations in detail, Mr. President, and I ask unanimous consent that that list be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

(1) The bill prohibits banking organizations from making loans to any export trad-

ing company in which the banking organization holds any interest whatsoever, and to any customers of such company, "on terms more favorable than those afforded similar borrowers in similar circumstances" or involving "more than the normal risk of repayment" or presenting "other unfavorable features." Thus, banking organizations would be barred from making preferential or unusually risky loans to export trading companies or their customers.

(2) The appropriate Federal banking agency may require divestiture or impose conditions on a banking organization's investment in an export trading company if the export trading company "takes positions in commodities or commodities contracts, in securities, or in foreign exchange, other than as may be necessary in the course of its business operations." That is, purely speculative activities are forbidden for any trading company controlled by a banking organization.

(3) The bill prohibits a trading company with a banking organization investor from engaging in "manufacturing or agricultural production activities" and permits it to engage in underwriting, selling, or distributing securities only to the extent its bank investor may do so under applicable Federal and State laws and regulations.

(4) The bill empowers the Federal banking agencies (the Federal Reserve Board, the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Federal Home Loan Bank Board for Federal savings banks) when acting on a banking organization's application to take a controlling interest in an export trading company, to impose any conditions they deem necessary—

(A) to limit a banking organization's financial exposure to an export trading company, or (B) to prevent possible conflicts of interest or unsafe or unsound banking practices.

(5) The bill authorizes the Federal financial institutions regulatory agencies to establish standards with respect to the taking of title to goods by any export trading company subsidiary of a banking organization, standards "designed to ensure against any unsafe or unsound practices that could adversely affect a controlling banking organization investor. Such standards may specifically include inventory-to-capital ratios.

(6) The bill would bar any banking organization from taking a controlling interest or making any investment over $10 million in any export trading company without receiving the prior approval of the appropriate Federal banking agency. The Federal agency would be required to disapprove any application for which it finds—

That the export benefits of such proposal are outweighed in the public interest by any adverse financial, managerial, competitive, or other banking factors associated with the particular investment.

(7) The bill would prohibit aggregate investments by any banking organization of more than 5 percent of its consolidated capital and surplus in one or more export trading companies.

(8) The bill would prohibit the total historical cost of a banking organization's direct and indirect investments in a trading company combined with extensions of credit by such organization and its subsidiaries from exceeding 10 percent of the banking organization's consolidated capital and surplus.

(9) The bill would allow the appropriate Federal banking agency—

Whenever it has reasonable cause to believe that the ownership or control of any investment in an export trading company constitutes a serious risk to the financial safety, soundness, or stability of the banking organization and is inconsistent with sound banking principles or with the purposes of this Act or with the Financial Institutions Supervisory Act of 1966, order the banking organization . . . to terminate . . . its investment in the export trading company.

(10) The bill requires that any banking organization investment, even if it is less than $10 million, be reported to the appropriate Federal banking agency. After receiving such notification, the agency could disapprove the investment or impose conditions on it if the agency determined that the trading company was a subsidiary of the banking organization investor.

(11) A banking organization also must report each additional investment in a trading company subsidiary or the engagement by a trading company subsidiary in any new line of activity, such as taking title to goods, which was not included in any prior application for approval of banking organization control of the trading company. The Federal banking agency could disapprove the proposed investment or new activity under the same standards applicable to controlling investments.

(12) The bill prohibits a trading company from having a name similar to that of its bank organization investor unless the bank organization owns a majority equity interest in the trading company.

The Committee is supported in its view that the bill contains appropriate Federal regulatory authority over bank investments in export trading companies by the Administration, by the Comptroller of the Currency, and (with one exception) by the Federal Reserve Board. The sole exception is the Board's view that Federal bank regulatory agencies should not be authorized to approve any controlling investments by banks in export trading companies with the possible exception of certain "ingle-purpose" trading companies. Specifically, the Board would prohibit any one banking organization from acquiring 20 percent or more of any export trading company and any group of banking organizations from acquiring more than 50 percent of a trading company. The Board would accept non-controlling investments, subject to the provisions contained in the bill. The Board appears to question the ability, as well as the propriety, of permitting banks, either singly or as a group to manage export trading companies.

Mr. HEINZ. In my judgment, this is an overly conservative approach designed to calm unrealistic fears. However, the bill is the product, Mr. President, of a good deal of compromise—compromise with two administrations, compromise with bank regulatory agencies, and compromise with numerous Senators, and, as one who has been intimately involved in those negotiations and compromises, I can say they are compromises I am prepared to support. I do not, however, feel there is much more room for compromise if we are to have a bill that has any meaning.

With respect to the antitrust issue, the bill makes a procedural reform in the existing Webb-Pomerene Act by permitting the issuance of a certificate providing an antitrust immunity for the activities specified in the certificate for the period of time the certificate is in effect. The language of this title does not modify substantive antitrust law. My colleague, Senator DANFORTH, the author of title II, will have more to say about this shortly.

Mr. President, I would also like to make a brief point about one issue in the bill that has come up recently.

Nothing in the bill is intended as an override of existing State authority over State-chartered institutions. Limitations which now exist by force of individual State statutes or regulations that would affect the ability of State-chartered banks to take equity positions in export trading companies are not preempted. Furthermore, because no override of existing State regulatory authority is intended, nothing in the bill can be construed as preventing States from adopting laws or promulgating regulations which would prohibit, condition, limit, or restrict investments by banks chartered under the laws of any State. That is the intent of section 105(a) of the bill.

To the extent that State-chartered institutions are not prohibited by State statute or regulation from taking any equity position in an export trading company within the meaning of this bill, section 105(b)(1)(B) is not intended to create an exclusive approval right in the appropriate Federal banking agency where a controlling interest is to be acquired, nor is section 105(b)(1)(A) intended to preclude the requirement of State approval for the taking of less than a controlling interest. It is not intended that this bill interfere in any way with the present role of the State banking department as the primary regulator of State-chartered institutions.

I believe the manager for the minority, my distinguished colleague from Wisconsin (Mr. PROXMIRE) may have some comments on the bill and possibly some amendments to it. I will have more, much more, to say about his amendments later, but before I yield to him, I want to express my appreciation for the role he has played throughout the committee's consideration of this bill. I know the Senator from Wisconsin has some reservations about some aspects of the bill, but I think the record should also reflect his consistent cooperation in moving the bill along through the legislative process. I am also indebted to him for raising, in a reasonable and constructive fashion, some basic issues surrounding this bill relating to the role of banks and the antitrust certification procedures. I do not agree with the Senator, and I hope no one else will either, but I think he has raised the right issues and thereby contributed to their resolution in a constructive manner that exemplifies the tradition of this body.

Mr. President, I reserve the remainder of my time.

EXHIBIT 1

THE EXPORT TRADING COMPANY ACT OF 1981

● Mr. HEINZ. Mr. President, on Thursday, March 12, the Committee on Banking, Housing, and Urban Affairs marked up S. 144, the Export Trading Company Act of 1981, and ordered reported an original bill embodying the amendments to S. 144 approved by the committee. The committee report, along with the original bill, S. 734, were filed March 18.

In its markup, the committee did not change the basic provisions of S. 144, but it did adopt 24 amendments, most of them technical, a few of which make substantive changes in particular parts of the bill. For those who have been following this legislation closely, I would like to list briefly the more substantive changes in S. 144 made by the committee.

First. The committee reduced the amount of money authorized in section 106 of the bill for EDA and SBA loans and loan guarantees from $20 million per year to $10 million per year for 5 years.

Second. The committee added a new section 108, proposed by Senator RIEGLE, creating a program which would help small businesses not previously significantly involved in exporting hire an export manager by providing for Federal payment of half the manager's salary for the first year. The cost of this amendment is $2 million per year for 3 years. It is the same amendment which the Senate adopted on the floor last year in its consideration of S. 2718, the predecessor of S. 144.

Third. The committee adopted two amendments initially proposed by Senator CHAFEE which would: (a) Permit a trading company to have the same name as its banking organization investor if the latter owns a majority of the stock of the trading company; and (b) provide the bank regulatory agencies greater flexibility in dealing with violations of section 105(c)(3) of the bill relating to taking positions in commodities, securities or foreign exchange. Both these amendments were recommended by the Comptroller of the Currency.

Fourth. With respect to title II of the bill, the antitrust provisions the committee agreed to an amendment which would permit existing Webb-Pomerene Associations to continue to operate under current law if they so chose rather than being forced to seek certification under the new system created by this bill. Such associations, of course, would also retain the option of seeking certification under the same standards and procedures applicable to everyone else.

The other amendments, Mr. President, were technical in nature, correcting typographical or reference errors or making other minor changes in language, in most cases at the request of the administration So that all these changes are clear to everyone concerned, Mr. President, I shall ask that the complete text of S. 734, the original bill reported by the Banking Committee, be printed in the RECORD at the conclusion of my remarks.

Reporting this bill represents another important step in our progress toward enacting this legislation and thereby giving American businesses interested in exporting another set of tools to use to successfully market and sell abroad. The committee held 3 days of hearings on this bill this year, in addition to the many days held in 1979 and 1980, and I anticipate that the printed record of the 1981 hearings will be available to Senators and the public shortly. I am also pleased to see that the House is also moving forward with this legislation, the House Judiciary Committee having scheduled hearings on it and other related measures for March 26. The next step should be Senate floor action, which I hope will come soon.

Mr. PROXMIRE. Mr. President, first let me say a word about the senior Senator from Pennsylvania (Mr. HEINZ), for his perseverence in guiding this legislation to the point where it is today. The Senator from Pennsylvania is a tireless worker on behalf of what he believes in. And make no mistake about it, he believes in exports. S. 734 is the first major bill to be reported out of his International Finance Subcommittee, the subcommittee of which he is the chairman. He deserves the congratulations of the Senate for the expeditious, prompt, and efficient way he has handled this bill in committee and is handling it on the floor.

I say that despite the fact that I have two serious reservations about this bill. Both reservations concern how the substantive powers granted in the bill are to be administered. Despite my reservations, I shall vote for this bill. I know that it has virtually unanimous support in the Senate.

The bill passed the last time 78 to 0.

I fully expect that the House Banking Committee will take a closer look at the banking provisions and that the House Judiciary Committee will take a closer look at the antitrust provisions. By the time this bill gets through the House and then through conference and back to the Senate, I believe it will be a better bill. I am convinced the Senate has gone as far as it can, given the politics of the situation, and therefore I would not try to hold this bill up.

I believe we should seek ways to update our export capability. The goal of this bill is to do just that and I support it. Nevertheless, I think we should all recognize that we do not have an export crisis. Last year we had a favorable balance on current account, a unique position in the industrialized world. That is the true measure of our export-import situation because it takes into account all factors.

People are confused when I say current account. The Senator from Pennsylvania talks about the balance of trade. The current account is the overall balance, including trade, including investment income, services, foreign aid. It includes everything. On that basis, we had a balance and I say that is unique. The only other developing countries that had a balance were, of course, the OPEC countries. They have an enormous advantage because they are selling oil at a very high price. Under those circumstances, I do not think anybody could really argue that we have anything like an export crisis or anything but the proper kind of a situation this country should have, which is a balance, meaning that if other countries had the same, we would have far greater equity in trade throughout the world.

We should not be surprised that one segment of the current account, the merchandise balance, is in deficit. That deficit has to do with the price of oil, which quadrupled in 1974 and doubled again in 1979. We will have to find ways to operate more efficiently, to conserve imported oil, if we are to bring the merchandise account into balance.

All the trading company legislation and export legislation will not solve our problem unless we recognize that the fundamental problem is an energy problem.

One thing is sure. Our situation is not of such a magnitude that we have to throw out the separation of banking and commerce that serves our economy so well. Neither do we have to forego our antitrust laws which have given us the benefit of a free and competitive economy, probably the most competitive economy of any country in the world. That is one of the reasons why we have been the dominant economic country in the free world, and continue to be.

The AFL–CIO, which has as much at stake as anyone else in a healthy economy, opposes this bill. In a statement on the bill the AFL–CIO said:

> The AFL–CIO supports exports that promote U.S. jobs and help create a healthy U.S. industrial base. Many industries, including those that provide services, need and deserve the help of the U.S. Government in an increasingly complicated international trading world.
>
> We do not believe S. 734 will accomplish these objectives and we oppose it.
>
> This bill ends the traditional U.S. legal separation between banking and commerce, a risky move in a world where international banks are already "loaned up" and government insurance of exports is at issue in other hearings. The lender and exporter can become one under this legislation—a damaging change in U.S. law.
>
> At a time when banks and commercial enterprises in the United States are claiming capital shortages, a measure that will result in a further competition for funds and diminution of capital for productive investments is unwarranted.
>
> Title II extends antitrust exemptions of the Webb-Pomerene Act to associations formed for the purposes of exporting services and to export trading companies. Exempting the nation's largest banks and an unidentified number of existing international lawyers, accountants and other so-called service firms will add to the competitive problems of many businesses at home.
>
> What appears to be developed in the bill is a double standard on competition—one for U.S. exporters and another for U.S. producers. The exporters may be giant world companies or banks exempt from U.S. law on antitrust. Trade would be special privilege while all U.S. activities would be subject to competitive laws.

Mr. President, the Conference of State Bank Supervisors (CSBS), which is comprised of the 50 State banking commissioners opposed this bill as an unwarranted intrusion on States rights.

I understand that Senator HEINZ will offer a statement on the floor ameliorating some of their concerns.

Furthermore, the Independent Bankers Association originally opposed this bill as written. The Securities Industry Association and the Independent Insurance Agents also oppose the bill as written.

Why? Because the legislation goes too far. It does not take the care that needs to be taken to continue the benefits of separating banking from commerce and it needlessly puts the antitrust laws in a back seat relationship to trade promotion.

Mr. President, There are two serious defects in this legislation.

One serious defect is that the significant and historical precedent setting power for banking organizations to control up to 100 percent of export trading companies engaged in business and commerce will be administered by three separate bank regulatory agencies. In the past when Congress enacted bank legislation authorizing new activities regulatory authority has been given to the Federal Reserve.

Another serious defect is that the Justice Department and the Federal Trade Commission have been shunted aside as primary antitrust enforcers of the antitrust laws governing foreign commerce from the United States in favor of the Commerce Department whose primary mission is to promote and trumpet trade.

The Secretary of Commerce admitted that they did not have the expertise or competence in his Department to regulate antitrust matters.

Thus this legislation will undoubtedly

result in inconsistent, wasteful, and overlapping bank regulation instead of a consistent and coherent bank regulatory policy; and will result in less competition while price fixing in domestic and international markets gets a wink from the Commerce Department.

This is major legislation; Major bank legislation and major antitrust legislation. Banking organizations—banks, bank holding companies, and Edge Act international corporations—are given the power to control export trading companies which are permitted to engage in a wide range of export and import activities not only as financiers but as equity participants. An export trading company is permitted to purchase for its own account goods and commodities, warehouse them, and market them overseas through its own retail network. The separation between banking and commerce which has served this Nation well for over 100 years has prohibited such activities by banks.

If we pass this legislation, that separation will be ended with respect to that particular part of banking and commerce.

The Federal Reserve and the Federal Deposit Insurance Corporation, the two regulatory agencies which are responsible for the safety and soundness of our banking system, testified that bank control of export trading companies posed unacceptable risks to our banking system. Their recommendation was that exports could best be served by banks continuing their role as financiers, holding a minority position perhaps in export trading companies, but not a position which would jeopardize bank capital in the highly leveraged risk operations of an export trading company.

Our export posture is not one that requires that we put our financial system at risk. We already have enough risk in our financial system.

I offered an amendment in committee which would contain the risk yet let the legislation move forward. This amendment would have allowed control of an export trading company by only a bank holding company or an Edge Act International Company. The benefit of my amendment is that it would continue to require separation between banking and nonbanking activities and would lodge authority in the Federal Reserve to administer the provisions. That is consistent with our existing banking structure where nonbank activities are carried out through the holding company and through Edge Act Corporations. Both the bank holding company laws and the Edge Act are administered by the Federal Reserve.

The Senate, on occasion, closes its ears to meritorious responses to questions raised by legislation. This is one of those occasions. Thus, the Senate will send to the House a bill that mixes banking and commerce unnecessarily. I trust the House Banking Committee will clarify the situation.

By recommending that the Commerce Department play the key role in administering the Sherman Antitrust Act in place of the Justice Department and the Federal Trade Commission, this administration continues its assault on the antitrust laws.

The legislation rewrites the Webb-Pomerene Act. Currently, adherence to the provisions of the Webb-Pomerene Act provides a defense against suit under the Sherman Act for export associations. This legislation goes further. An export association, upon making an application to the Commerce Department, may obtain certification by the Commerce Department that its activities meet the standards of the legislation.

Such a certification carries with it immunity from not only the Federal antitrust laws but also from State antitrust laws and private party suits, except for ultra vires acts.

This intrusion into the realm of State's rights and private rights might be plausible if a Federal agency with antitrust experience was charged with the responsibility of administering the statute. That is not the case here. The Commerce Department will issue the certificates upon consultation with the Justice Department and with the Federal Trade Commission. The legislation leaves it up to the Commerce Department to determine the degree to which it considers the views of the Justice Department and the Federal Trade Commission.

While the Justice Department and the Federal Trade Commission may file suit within 30 days after the issuance of a certificate by the Commerce Department on the grounds that the export association's behavior violates the standards set forth in the Webb-Pomerence Act, it is clear that the real action in administering the law will be in the granting of certificates—and who has that power? The Commerce Department.

The Commerce Department is in a massive conflict-of-interest situation under the legislation, having responsibilities to promote trade and enforce the antitrust laws. It is clear that the antitrust laws are going to take a back seat. And why? The antitrust laws have served this Nation well, giving us a marvelous free and open competitive society. They are now to be placed on the scrap heap because the Justice Department and the Federal Trade Commission have done their job in enforcing the law, and they are going to be taken out of the act by this bill.

The true test of competition is whether there is a market restraint on prices. The authors of this legislation told us that this legislation did not change the substantive standards under the antitrust laws. Yet, when the antitrust experts came before the committee, we were told that the legislation is:

> An attempt to codify what many people who participated in this process consider to be the best thinking on what the law should be interpreted to be by the courts.

That statement makes it obvious that a good deal of judgment went into the alleged codification.

It is clear from the testimony of Secretary Baldrige that, where U.S. firms fix prices overseas or allocate markets overseas, he intends to certify the behavior even though such behavior is actionable at the present time under the antitrust laws. It was precisely this kind of behavior in overseas markets that caused the Wall Street Journal to say in an editorial—this is the Wall Street Journal, not the AFL–CIO—

> By endorsing and expanding the principle of export cartels, the legislation undermines U.S. commitment to an open international trading system. How can we complain about OPEC or Third World cartels if we encourage our producers to form their own export cartels?

Mr. President, it is clear that the Commerce Department will not have the stomach to stand against price fixing overseas. How will they administer the act when the effect is on domestic prices? I do not know, but I have my doubts. Commerce will find itself in a basic conflict position of trying to balance effects on domestic prices and overseas trade.

The Commerce Department has no expertise in administering antitrust statutes, according to Secretary Baldrige's own testimony. Yet they are entrusted with administering a complex statute. For example, under the legislation, one of the changes made is to prohibit effects on domestic prices that are "unreasonable," terms of art under the Sherman Antitrust Act. But with respect to price-fixing under the Sherman Act, no inquiry is permissible as to "reasonableness" or "unreasonableness."

Price-fixing is one of those categories of antitrust behavior that is per se unlawful. Where price-fixing is found, it is always held to be "unreasonable" under current law.

Now comes this legislation, providing that only behavior that does not "unreasonably enhance, stabilize or depress prices within the U.S." is permitted. Price-fixing is to be allowed, is it not? Is that not what that means? How much price-fixing is reasonable or unreasonable? And the Commerce Department, which has no experts, no experience, no background in antitrust laws, is to administer the law while the experts at the Justice Department and the Federal Trade Commission sit on the sidelines. I hope the House Judiciary Committee refines the antitrust sections substantially, and there is every indication they will do so.

Thus, Mr. President, we have before us a bill that proves the worth of having two Houses of Congress. The Senate has a good concept, but goes too far, perhaps even in anticipation of the expected cutback in the bill in the House. I hope the House will perform the needed surgery on this bill and the Senate should not expect to see quite the same bill when it returns from conference.

Mr. President, I ask unanimous consent that letters from the Independent Banker's Association, the Securities Industry Association, the Independent Insurance Agents and the Conference of State Bank Supervisors be printed in the RECORD following my remarks.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

INDEPENDENT BANKERS ASSOCIATION OF AMERICA,
McHenry, Ill., September 2, 1980.

Hon. WILLIAM PROXMIRE,
Chairman, Banking, Housing, and Urban Affairs Committee, Dirksen Senate Office Building, Washington, D.C.

DEAR CHAIRMAN PROXMIRE: As the Senate continues to deliberate the merits of S. 2718, the Independent Bankers Association of America deems it appropriate to present its views on the Proxmire-Federal Reserve Amendment (Amendment No. 2276) which would prevent a single banking organization from owning more than 20 percent of an export trading company or group of banking organizations from owning more than 50 percent of an export trading company, except under extraordinary circumstances.

Just as the IBAA opposes the concentration of banking resources, it opposes the dominance by a few large banking organizations of the export trading company area. We believe that the Proxmire-Federal Reserve Amendment (Amendment No. 2276) will help preserve the separation of banking and commerce and prevent the excessive concentration of economic power. Therefore, we support it.

Sincerely,

THOMAS F. BOLGER,
President.

SECURITIES INDUSTRY ASSOCIATION,
Washington, D.C., March 30, 1981.

Hon. WILLIAM PROXMIRE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PROXMIRE: The Securities Industry Association is extremely concerned as to the breadth of S. 734, legislation which would extend to the banking industry the ability to form and participate in export trading companies. We understand the bill will be considered by the Senate this week. While we can recognize a clear and compelling need to improve our export posture and balance of payments abroad, we seriously question whether or not commercial banks should be permitted to engage in this extremely high risk area of commerce.

Our membership believes this bill, as written, presents a situation where major money center banks without the appropriate regulator's approval, could direct a captive export trading company to engage in the underwriting, selling, and distributing of securities and commodities that would otherwise be prohibited by both the Bank Holding Company Act and the Glass-Steagall Act. We believe this to be a fundamental breach of the Glass-Steagall Act in an area which was not thoroughly explored during Senate Banking Committee consideration. It is our hope that Congress, during its consideration of this legislation, will amend S. 734 to prohibit this kind of circumvention of existing legislative restrictions on commercial banks and bank holding companies.

Sincerely,

EDWARD I. O'BRIEN.

INDEPENDENT INSURANCE AGENTS OF AMERICA INCORPORATED,
March 9, 1981.

Hon. WILLIAM PROXMIRE,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR PROXMIRE: Our association would like to raise serious objection to certain provisions of the Export Trading Company Act, S. 144, now before the Senate Banking Committee.

In general, the Export Trading Company Act's stated purpose represents a dramatic policy shift from the more than 100 year separation of banking and commerce—a separation that this association, in connection with other legislation now before this committee, has fought hard to retain.

The encouragement and facilitation of bank participation in and ownership of export trading companies is bound to have adverse implications for many small businesses not privileged to have access to banks' capital, credit, financial records, and expertise. Moreover, any advantages to export trading company clients that may derive from a bank's ability to engage in a full range of export services through an export trading company may be more than offset by non-competitive tie-ins of these services to credit.

Specifically, language contained in Sections 103(a) 3 and 4 of the Act virtually ensures adverse impact on a now thriving and highly competitive non-affiliated export insurance market, and on potential export trading company clients.

That section includes within the definition of collateral services to be provided by export companies the term "insurance." Since not qualified in any way, the term could be interpreted to include insurance sales, services, or underwriting, for domestic or international coverages, within the context of onshore or offshore insurance operations.

Additionally, the proposed bill contains no language that would protect export trading company clients from direct or implied tie-ins of insurance sales to the credit and managerial services the companies will be offering.

Moreover, it is unclear from the Act, or from any previous committee record, whether all of the permissible insurance services are to be subject to the traditional state regulatory apparatus established by the McCarran-Ferguson Act. Specifically, it is unclear whether, if included within definition of insurance, offshore export insurance captives are intended to be subject to state regulation, or will be able to escape the rigors of state oversight and enforcement.

Export trade insurance services are available today from many sources at competitive prices. Introduction of additional sources, of undefined scope, unfairly advantaged by access to capital, credit, and managerial services, would seem at best unnecessary and at worst extremely harmful to existing markets and potential clients.

IIAA would propose as a remedy the deletion of the word "insurance" from sections 103(a) 3 and 4. Additionally, the committee's report should make explicit the committee's awareness of the dramatic shift in heretofore traditional public policy that enactment of S. 144 would engender, including possible adverse effects on businesses now associated with export trading, but denied access to the competitive advantages export trading companies will enjoy should this bill become law.

Sincerely,

ROBERT REYNOLDS, CPCU,
President, IIAA.

MARCH 23, 1981.

Hon. WILLIAM PROXMIRE,
Dirksen Building,
Washington, D.C.

DEAR SENATOR PROXMIRE: You will soon be voting on S. 144, The Export Trading Company Act of 1981. The Conference of State Bank Supervisors opposes this legislation because, as currently drafted, it would override state authority over state-chartered institutions and would violate the principle of the separation of banking and commerce.

CSBS asks that you support the Proxmire amendment to limit control of export trading companies to bank holding companies, Edge Act Corporations and bankers banks. The Proxmire amendment would eliminate the preemption of state authority and would lessen to some degree the erosion of the policy of the separation of depository banking activities from other forms of commerce.

Representing the primary chartering and regulatory source for state-chartered commercial banks, the Conference strongly objects to those provisions in S. 144 which would permit state-chartered commercial banks to take equity positions in business enterprises in violation of state banking codes banning such action. This proposed action would constitute a serious preemption of state authority to determine the operating powers of banks which they charter and supervise. In the absence of some overriding national policy consideration, which we do not perceive here, CSBS objects to any statutory provisions which would enlarge state-chartered banks' powers beyond those which a state authorizes for its institutions.

CSBS supports Congress in its efforts to increase U.S. exports, but believes that goal can be achieved more effectively by reducing government-related burdens on producers of goods and services which might be sold abroad. American industry can be competitive in the international marketplace if we allow it to be. Oppressive taxation, government-fed inflation, consequent high interest rates, high labor costs and direct control adversary-type government regulations, all merit attention ahead of another government program—particularly one which has all the ingredients of more, not less, regulatory burdens. Until the underlying causes of our industrial malaise have been addressed, no program, no matter how well intentioned, can succeed.

Moreover, the principle of the separation of banking and commerce, a cornerstone of our policy against undue concentration of economic power, should not be abandoned without proven necessity to do so. Bank equity in nonbanking enterprises, like government equity, presents a very real danger of credit allocation.

For all of these reasons, the Conference of State Bank Supervisors asks that you support the Proxmire amendment and oppose final passage of S. 144.

Sincerely,

LAWRENCE E. KREIDER,
Executive Vice President-Economist.

Mr. PROXMIRE. Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. SCHMITT). The Senator from Massachusetts.

Mr. TSONGAS. Mr. President, this is an issue that is coming back. As the Chair knows, we dealt with it last year, The vote, I believe, was 77 to 0, or 78 to 0, something of that magnitude.

The reason there is such broad support is, I think, a growing awareness of the need for an aggressive export policy. Though there are many components of that, certainly, export trading companies are part of it.

Mr. President, in the last 5 years, our trade deficit totaled $105.7 billion. There are many ways of looking at that, but the fact is that this hemorrhaging of U.S. capital has weakened the dollar in overseas markets and inflated the costs of imports to Americans. Look at our German and Japanese competitors, who make export trade a top priority. In the same 5-year period, they have had total trade surpluses of $88.8 billion and $55.6 billion respectively.

I might add that these two countries import a much higher percentage of their energy than we do.

We must reduce this trade deficit. The Commerce Department estimates that less than 1 American firm in 10 sells overseas. This record must be improved. If we continue to believe that the status

quo provides ample trading possibilities, we may soon find America reduced to the status of a glorified banana republic ever diminishing our raw materials and awash in imported manufactured goods.

The bill before us attempts to improve this situation. It makes possible the formation of American export trading companies to deliver the output of small- and medium-sized American businesses to the marketplaces of the world. Export trading companies would represent American firms abroad and perform international market research, customs documentation, and regulations research. They would have expertise in exchange rate issues and foreign market potential.

I would ask Members to go around their States and talk to their small- and medium-sized businessmen and ask how many of those are familiar with exchange rate issues and other such matters critical to international trade.

The Commerce Department estimates that more than 20,000 nonexporting U.S. firms offer products that could compete abroad. Export trading companies are an attempt to tap this vast potential.

Title I of S. 734 allows banks to participate in the formation of export trading companies. Banks bring to bear their investment capital, international networks, and international financial expertise, and as such are the institutions that have the best chance of making export trading companies significant contributors to increased American exports. Bank controlling interest in ETC's is permitted, with strict constraints, to assure banks the opportunity to use their international financial aid management skills fully. A number of safeguards are in place to prevent bank abuses:

Banking organizations can invest no more than 5 percent of their assets in export trading companies.

Approval of the appropriate bank regulators is necessary for investments in excess of $10 million or if controlling investments by the bank exceed 50 percent of the stock of an export trading company.

I, for one, find these restrictions to be somewhat excessive, but within the framework of trying to provide the proper assurances, I can live with them.

Mr. President, let me stress that export trading companies are an idea that business leaders in New England are fully behind. In my own State of Massachusetts, my small business advisory task force is eager for the enactment of S. 734. The Small Business Association of New England strongly endorses export trading companies. The New England Congressional Institute's export trading company task force, consisting of 15 economists, bankers, and businessmen, also believe the export trading company idea deserves attention. Two banks in my State, the First National Bank of Boston and the Shawmut Bank are keenly interested in the bill. In addition, I have met with a number of textile manufacturers in this past year and found it refreshing to listen to their support for export trading companies as a means to compete internationally. A Department of Commerce study indicates that American textile manufacturers could benefit significantly from this bill. I suggest that international competitiveness is a much better option than protectionism.

Mr. President, this bill is a start in a much needed effort to improve our international trade competitiveness. It means jobs for Americans and help in paying our huge oil debt. We cannot afford to pass up this opportunity. I am confident that, as last year, the Senate will pass this measure—without dissent, it is hoped.

Let me talk about some of the issues that have been raised in opposition, which are the same issues raised last year. The problem, in the meantime, has not gone away.

One argument put forth is the idea that there is no trade problem. Exports are growing, so why worry? I must point out that even though U.S. exports have grown in the 1970's from 4.3 percent of our GNP to 8 percent today, we are in fact losing ground in the growing overseas markets. The U.S. share of the total world market in 1970 was 15 percent; in 1980, it was 12 percent. The U.S. share of the manufactured goods total world market has gone from 21.3 percent to 17.4 percent.

Second, let me talk about the current account issue. Those who argue that we do not have a crisis because the current account is in balance are half right and half wrong. They are absolutely correct that the current account is in balance. They are absolutely incorrect, in my opinion, that that is cause for great comfort. There are several reasons why I feel this way.

First, any rapid growth in foreign investments here would rapidly offset the return in our foreign investment there, so our strength is a reflection of what our trading partners have not yet done but are increasingly doing. The advantage we have by the balance of current accounts is a function of noninvestment by foreigners in this country; and as everybody knows, that is changing rapidly. So the advantage we have is illusory. It is a function not of our strength but of decisions made by others.

Second, the recent jump in recorded return on foreign investment is caused to some degree by companies bringing funds back to America to take advantage of high-interest rates. This is a temporary and rather artificial source of strength.

Third, living off returns from foreign investments is sort of coupon-clipping writ large. It is a static benefit derived from past competitiveness. It is no substitute for present competitiveness. To have the edge which enables you to invest abroad successfully requires a lead in technology, production, and management know-how. No return of a foreign investment can continue if there is not movement up the product scale and a retention of the competitive edge.

There are also those who would argue that we do not have an export crisis but that, in fact, what we are dealing with is simply a problem that results from the price of oil going up dramatically. That is true. Our ever growing oil bill certainly creates our trade problem.

The Japanese and the Germans, however, who import a higher percentage of their energy than we do, have taken an activist position to insure their own economic survival. They have done what is necessary to pay their oil debt in a competitive world economy; they have made trade their No. 1 priority. That is a mind set we do not have in this country and must rapidly assume.

Finally, one can argue against export trading companies because of fear of expanding the powers of banks. I think the German and Japanese responses would be simple—that without the capacity to compete internationally we will run up our trade deficit year after year, and soon not have an economy to worry about. That response must become our response.

My State, which has witnessed the decline of the shoe and textile industries, is probably the best example—at least during my lifetime—of a State that has learned dramatically, and to its chagrin, what it means not to be competitive internationally. We in Massachusetts now have an unemployment rate considerably below the national average because of our capacity to produce world class high technology equipment.

If we lose the capacity to compete internationally in this area, what do we then go to? Probably years of decline. It seems to me that we should learn our lesson and do what our international competitors are doing, and that is to take international trade seriously and do what is necessary to be competitive. Export trading companies represent a first step.

There are other important trade issues—Export-Import Bank funding the taxation of Americans abroad—but they are issues for another time.

Today it is my hope that the export trading companies measure will be passed. and passed unanimously as it was passed last year. Then we can work on the House side, to make them see the wisdom of the bill.

Mr. HEINZ. Mr. President, will the Senator yield?

Mr. TSONGAS. I yield.

Mr. HEINZ. Mr. President, I commend the Senator for his statement. I agree strongly with something he said at the close, which is that this is only a part of what we need to do to enhance this Nation's export stance to be competitive.

There are a number of things we have to do in connection with the Foreign Corrupt Practices Act, sections 911 and 913, of the Internal Revenue Code, as well as many other things—the Export-Import Bank, getting some negotiations going in terms of export credit financing practices worldwide, perhaps even a follow-on trade bill to the Trade Agreements Act of 1979.

So I believe the Senator is absolutely correct as to the points he has made, and I commend him for his statement.

Mr. TSONGAS. I thank the Senator for his comments. I will take a Xerox copy of his remarks and send it to the White House.

They are equally persuaded as to the value of the comprehensive approach.

Mr. HEINZ. It is my hope the Senator and I will be able to join together. I think he and I agree.

Mr. PROXMIRE. Mr. President, before the Senator yields the floor, and I know the Senator from Nebraska is anxious to call up an amendment, I shall take a few minutes to call attention of the Senate to testimony before the committee that showed a few things.

It showed in the first place, unlike the arguments made by my good friends from Pennsylvania and Massachusetts, the trade balance has been improving and sharply improving.

As one witness pointed out before our committee on March 5, he pointed out that 1980 was the second consecutive year in which our merchandise trade deficit declined; that in 1980 exports increased $39.9 billion or some 22 percent; that in 1980 our merchandise trade balance with non-OPEC developing countries moved to a surplus of $3.3 billion from a deficit of $3 billion, while the surplus with Western Europe increased to $20.3 billion from $12.3 billion, and that looking solely at nonagricultural exports, 1980 showed an increase of $33.4 billion or some 7 percent by volume.

Let me conclude by saying that Henry Wallich, who is the international finance expert for the Federal Reserve Board and a highly respected international economist, argued exactly the opposite position from what the Senator from Massachusetts was telling us about, the significance of balance on current accounts. He pointed out that overall, if you include everything, investment, income, services, et cetera, overall our position stands in sharp contrast, with that of continental European countries and Japan, all of which are recording deficits on current accounts.

So in both of these areas he has said that we have improved and improved sharply and that overall our current account balance which is in his judgment, and he is a man of very distinguished credentials and highly respected as an economist, the top international expert for the Federal Reserve Board, he feels we are in very sound position and improving.

Mr. TSONGAS. Mr. President, I make just two points.

First, let me say that to argue that our balance of trade is not as bad as it used to be, so we need not worry about it, is the same as arguing that my house mortgage and my car mortgage are less expensive, due to inflation, so I need not worry about paying them. The fact is you have an enormous deficit that you are running, as I have pointed out in my remarks. During the last 5 years, it totals over $105 billion. That is a gigantic deficit that cannot be ignored.

The second point is that these are the same arguments that my distinguished chairman used last year and yet he still voted for the bill. I can only assume that in the deep recesses of his heart, he knows we are right.

Mr. PROXMIRE. Mr. President, may I say I voted for the bill. I think the bill, as I say, overall is all right though there are two parts of the bill that I oppose, and the Senator's statement did not go to those. The antitrust feature of the bill is certainly one of the principal ones and giving the Federal Reserve the centralized power of administering it, is something the Senator did not discuss.

I agree overall it is good to have this legislation. But I think it can be improved.

Mr. TSONGAS. On that note I agree.

UP AMENDMENT NO. 58

(Purpose: To make technical amendments; to remove the establishment of the Office of Export Trade; and to eliminate the term "invalidation" and substitute the term "revocation")

Mr. HEINZ. Mr. President, I send a package of amendments to the desk, four in number, and ask unanimous consent that they be considered en bloc.

The PRESIDING OFFICER. Without objection. It is so ordered.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ) proposes an unprinted amendment en bloc numbered 58.

Mr. HEINZ. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 5, line 14, strike out "and" and insert in lieu thereof "or".

On page 5, line 16, strike out "and" and insert in lieu thereof "or".

On page 11, line 25, delete ", after notice and opportunity for hearing,".

On page 12, line 5, after "agency" insert ", after notice and opportunity for hearing,".

On page 25, strike out lines 4 and 5, and insert in lieu the following:

"(b) PURPOSE.—It is the purpose of this title to encourage American exports by directing the".

On page 54, strike out lines 7 through 19. Renumber succeeding sections accordingly.

On page 30, line 23, strike out "or invalidation".

On page 40, line 1, strike out "INVALIDATION" and insert in lieu thereof "REVOCATION".

On page 40, line 15, strike out "invalidation" and insert in lieu thereof "revocation".

On page 40, line 20, strike out "declaring the certificate invalid" and inserting in lieu thereof "revoking the certificate".

Mr. HEINZ. Mr. President, there are four technical amendments.

Mr. PROXMIRE. Mr. President, we had an opportunity to review these amendments. They are technical amendments, and I have no objection to them. They are fine amendments. I support them.

Mr. HEINZ. I thank my colleague from Wisconsin.

The PRESIDING OFFICER. The question is on agreeing to the amendments en bloc.

The amendment (UP No. 58) was agreed to.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HEINZ. Mr. President, before I yield, and I know the Senator from Nebraska has an amendment that he wants to offer, I simply wish to provide for the RECORD a letter we recently received from the Conference of State Bank Supervisors who prior to the discussion we had in the Chamber today did object to the bill on the basis that they thought it preempted State bank regulatory auhority.

This letter lays that objection to rest, and I quote in part:

The Conference is satisfied that your explanation, made a part of the legislative history of the Export Trading Company Act, responds adequately to our objection on the points covered. That objection is therefore withdrawn.

Mr. President, I ask unanimous consent that the entire text of this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CONFERENCE OF STATE BANK SUPERVISORS,
Washington, D.C., April 1, 1981.

Hon. JOHN HEINZ,
Russell Building,
Washington, D.C.

DEAR SENATOR HEINZ: The Conference was pleased to learn of your intent to address our concern over the apparent override of state authority over state-chartered institutions contained in S. 734, the Export Trading Company Act.

It is our understanding that you will explain the intent of the bill in the following terms:

"Nothing in the bill is intended as an override of existing state authority over state-chartered institutions. Limitations which now exist by force of individual state statutes or regulations that would affect the ability of state-chartered banks to take equity positions in export trading companies are not preempted. Furthermore, because no override of existing state regulatory authority is intended, nothing in the bill can be construed as preventing states from adopting laws or promulgating regulations which would prohibit, condition, limit or restrict investments by banks chartered under the laws of any state. That is the intent of Section 105(g) of the bill.

"To the extent that state-chartered institutions are not prohibited by state statute or regulation from taking any equity position in an export trading company within the meaning of this bill, Section 105(b)(1)(B) is not intended to create an exclusive approval right in the appropriate federal banking agency where a controlling interest is to be acquired, nor is Section 105(b)(1)(A) intended to preclude the requirement of state approval for the taking of less than a controlling interest. It is not intended that this bill interfere in any way with the present role of the state banking department as the primary regulator of state-chartered institutions."

The Conference is satisfied that your explanation, made a part of the legislative history of the Export Trading Company Act, responds adequately to our objection on the points covered. That objection is therefore withdrawn.

The Conference does, however, reserve its objection to the erosion of the principle of the separation of banking and commerce, absent a proven necessity to do so.

Sincerely,

LAWRENCE E. KREIDER,
Executive Vice President-Economist.

Mr. HEINZ. Mr. President, there are a number of supporters of this bill that I

wish to take another minute just to read into the RECORD.

These include:

President's Export Council.
National Governors' Association.
U.S. Chamber of Commerce.
American Bankers Association.
National Forest Products Association.
National Association of Manufacturers.
American Association of Port Authorities.
Mining and Reclamation Council of America.
Emergency Committee for American Trade.
National Small Business Association.
American Textile Machinery Association.
Man-Made Fiber Products Association.
American Apparel Manufacturers Association.
Scientific Apparatus Makers Association.
National Machine Tool Builders Association.
American Soybean Association.
Electronic Industries Association.
National Customs Brokers and Forwarders Association of Amercia.
National Federation of Independent Business.
American League for Exports and Security Assistance.
American Electronics Association.
Business Roundtable.
Bankers Association for Foreign Trade.
Task Force on International Trade of the White House Conference on Small Business—Thomas M. Rees.
Acme-Cleveland Corporation.
Commercial Credit Company.
Rockwell International Trading Company.
Philadelphia National Bank.
North Carolina National Bank.
International Trade Operations, Inc.
Export Managers Association of California.
Schueler and Company.
American Institute of Marine Underwriters.
AMERX.

And last, by no means, at least two administrations, the previous one and this one as evidenced by the testimony of Secretary Baldrige, of the Commerce Department, at our hearings.

Mr. President, we are delighted with this broad support of the legislation and delighted to have the support of the Senator from Wisconsin for this legislation and as I say some 61 cosponsors that we have.

Mr. DANFORTH. Mr. President, the United States needs to become an aggressive exporter of its goods and services. One need only look at our growing trade deficit to appreciate that our industries are losing the competitive battle within world markets.

For the first 70 years of this century our Nation had a positive trade balance with its trading partners. For the better part of this century U.S. industry was efficient, had innovative capacity, and was unexcelled in technological leadership. Today, the statistics and the outlook is not that encouraging. In 1977 the United States ran a $26.5 billion deficit, a $28.5 billion deficit in 1978, and a $25 billion deficit in 1979. Last year the trade deficit was approximately $25 billion. The economic stability of our Nation is being swiftly eroded.

In the last two decades the U.S. share of free world exports declined from 15 to 11 percent. Within the last 5 years our major competitors have managed to increase real exports by 4 percent a year, while the value of U.S. exports, adjusted for inflation, has shown little if no growth. Looking at the relative importance of exports as a percentage of GNP, U.S. exports account for approximately 7 percent of GNP in contrast to Japan where exports account for 14 percent of GNP and for 22 percent of GNP in Germany. Something has to be done to spur U.S. exports.

Mr. President, S. 734 is a step in that direction. The bill encourages and provides a framework within which export trading companies may be formed. The bill enables banking institutions to invest in export trading companies under specified and carefully regulated conditions. Further, S. 734 significantly amends the Webb-Pomerene Act of 1918 to clarify the antitrust provisions applicable to export trade associations and provides a certification procedure whereunder export trading companies and trade associations may receive antitrust clearance for specified export trade activities.

Mr. President, I would like to address my remarks to the antitrust provisions of S. 734, specifically title II. Title II finds its origin in S. 864, the Export Trade Association Act of 1979, intrdouced by myself and Senators BENTSEN, CHAFEE, Javits, HEINZ, and MATHIAS on April 4, 1979. Hearings were held on S. 864, and other bills, on September 17 and 18, 1979 before the Subcommittee on International Finance of the Senate Committee on Banking, Housing, and Urban Affairs. A revised version of S. 864 was introduced on February 26, 1980 as amendment No. 1674. Hearings on the revision were held on March 17 and 18, and April 3, 1980. The Senate Banking Committee reported an original bill, S. 2718, which contained amendment No. 1674 to S. 864. On August 27 and September 3, 1980, S. 2718 was considered by the Senate and passed by a vote of 77 to 0. On January 19, 1981, Senator HEINZ, I, and others introduced S. 144. Title II of S. 144 was the same as title II of S. 2718 as passed the Senate last year. Hearings on S. 144 were held before the Subcommittee on International Finance and Monetary Policy on February 17, 18, and March 5, 1981. S. 144 was reported out by the Banking Committee as S. 734.

Before I address myself to the particulars of title II of S. 734 I believe a brief historical background of the current law—the Webb-Pomerene Act of 1918 (15 U.S.C. 61–66) which title II amends, will prove beneficial.

In 1914 Congress directed the Federal Trade Commission to study and report to the Congress on the conditions affecting U.S. export trade. In 1916 the Federal Trade Commission published a report that found American manufacturers and producers when attempting individually to enter foreign markets to be at a disadvantage because of strong combinations of foreign competitors and organized buyers. The report also noted that the threat of antitrust prosecutions under the Sherman Act deterred exporters from carrying out collective efforts to challenge foreign cartels.

In response to the findings of the FTC report, Congress passed in 1918 what has come to be known as the Webb-Pomerene Act. The purpose behind passage of the Webb-Pomerene Act was to provide U.S. exporters with the ability to compete in international markets on an equal basis with their foreign competitors. The Webb-Pomerene Act provides a limited exemption from both the Sherman and Clayton Antitrust Acts to qualified joint ventures in export trade known as Webb-Pomerene Associations. The Webb-Pomerene law exempts from U.S. antitrust laws any association established "for the sole purpose of engaging in export trade" (15 U.S.C. 62) as long as the association, its acts, or any agreements into which the association enters, do not: First, restrain trade within the United States; second, restrain the export trade of any domestic competitor of the association; or third, artificially or intentionally enhance or depress prices within the United States of commodities of the class exported by such association or substantially lessen competition within the United States or otherwise restrict trade therein (15 U.S.C. 62).

The Webb Act defines "export trade" to include only "trade or commerce in goods, wares, or merchandise exported, or in the course of being exported from the United States" (15 U.S.C. 61). As is obvious, the Webb Act does not extend to exports of services.

Mr. President, both the legislative history of the Webb Act, and the administrative and judicial interpretation of the act, shed light on its scope and intended effect.

The debate on passage of the Webb Act was centered on the resolve of two points mentioned in the FTC report. These were: First, that American firms and U.S. exports might be benefited if cooperative arrangements reduced the costs of foreign marketing or enhanced the bargaining power of American firms when dealing with foreign buyers; and second, that domestic trade might be affected adversely if cooperative arrangements enabled American firms either to exploit consumers in the home markets or exclude nonmember firms from the export market.

The legislative history of the Webb Act, including both House and Senate reports and the debates in the CONGRESSIONAL RECORD, evidences that Congress presumed that formation of export trade associations would enable smaller American firms to compete more effectively with large and powerful firms abroad by permitting American sellers to combine and bargain collectively. It was believed that the combined power of American firms would provide the means for entry into foreign markets which previously were blocked by the power and tactics of sellers and buyers abroad.

Early in the history of the Webb Act the FTC issued a letter setting forth its enforcement intentions. In that letter, known as the 1924 silver letter, the FTC announced that an association could qualify under the Webb Act if it existed for no other purpose than to fix prices and allocate sales in foreign markets—as long as the substantive criteria set forth in the act were met—and while foreign corporations were excluded from membership in Webb Associations, these

associations might enter into any cooperative arrangements with nonnationals which might enhance their trade position in foreign markets.

A second determination of the silver letter—permitting restrictive agreements between Webb associations and foreign nationals—was rescinded in 1955. Under the new criteria outlined by the FTC, if export associations enter into restrictive agreements with foreign competitors, those agreements will not be within the antitrust protections of the Webb Act and the lawfulness of the associations' activities will be judged under the Sherman Act, as would similar conduct by an individual exporter.

After issuance of the silver letter it was not until the 1940's that further clarification was afforded the scope of the Webb-Pomerene antitrust exemption through a series of investigations conducted by the Commission known as the 202 series of recommendations. These investigations concluded that a Webb-Pomerene association may not:

Enter into agreements of any kind with domestic producers who are not members of the association which fix prices, terms of sale, or otherwise restrain the free export of goods of nonmember firms. Pipe Fittings and Valve Export Association (1948).

Enter into agreements of any kind whereby exports of domestic nonmember producers are deducted from the export quota of the association. Florida Hard Rock Phosphate Export Association (1945).

Enter into agreements of any kind which prohibit association members from selling to domestic exporters in competition with the association, or which deduct sales by a member within the United States from the member's export quotas through the association. Phosphate Export Association (1946).

Falsely represent that it is the sole export representative of the United States in a given industry. Pacific Forest Industries (1940).

Enter into agreements of any kind with owners or operators of shipping terminals, thereby restricting use of such terminals to only association members. Phosphate Export Association (1946).

Be involved in acquiring control of any patent or process useful in the production of the goods it markets. Sulphur Export Corp. (1947).

Enter into an agreement of any kind which precludes or restricts the right of the association or its members from using a trademark or label in the United States. General Milk Co., Inc., Ltd. (1947).

Enter an agreement of any kind whereby it controls or attempts to control any of the terms or conditions of sales by its members within the United States. Phosphate Export Association (1949).

Enter an agreement of any kind with any foreign producer or cartel whereby the United States is designated as an exclusive trade area, or imports into the United States are otherwise curtailed or restricted. Export Screw Association of the United States (1947).

Own stock, either directly or indirectly through subsidiaries, in corporation or other producers outside the United States. Export Screw Association of the United States (1947).

Enter an agreement of any kind whereby foreign producers are guaranteed the right to sell within a given area a specified tonnage over and above sales in that area by the association. Sulphur Export Corp. (1947).

Enter an agreement of any kind which discriminates among its members as to the right of withdrawal, resignation, or restricting the right of former members to compete with the association after withdrawal. Phosphate Export Association (1946).

Conduct office operations jointly with a domestic trade association. Carbon Black Export, Inc. (1949).

Enter an agreement of any kind to "maintain the status quo" in the world market of the industry and to do nothing which would encourage or increase competition in the industry. Sulphur Export Corp. (1947).

Take into membership anyone who is not a citizen of the United States, nor any foreign purchaser, customer, representative, or agent of a foreign company. Phosphate Export Association (1946).

In 1966 the Commission in advisory opinion No. 91 determined that membership by a firm owning foreign entities is permissible in a Webb-Pomerene association.

Further clarification as to the parameter of the antitrust exemption provided under the Webb Act has been gained through adjudication of a number of cases brought by the Department of Justice. Of these cases there are two major decisions which interpret the scope of the Webb Act.

In the first case, United States against Alkali Export Association (Southern District, New York, 1944) the court found that a Webb association had violated the Sherman Act by participating in foreign cartels that engaged in practices resulting in the use of monopoly power to extinguish the competition of independent domestic competitors engaged in export trade and, which carried out practices that stabilized domestic prices by removing surplus products from the domestic market. In the second case, United States against Minnesota Mining Mfg. (District Court, Massachusetts, 1950) the court held that an export association could not establish or operate jointly owned facilities abroad and then went on to give illustrations of conduct that a Webb association may lawfully carry out: First, an association could be created by a majority of the firms in an industry; second, the association could be used as the members' exclusive foreign outlet; third, members of the association could agree that goods would be purchased only from member producers; fourth, resale prices could be fixed for the associations' foreign distributors; fifth, prices could be fixed and quotas established for members; and sixth, foreign distributors could be required to handle only the members' products.

The Minnesota Mining case provides the most authoritative interpretation of the scope and rationale of the antitrust exemption under the Webb-Pomerene Act. As stated by the court:

> Now it may very well be that every successful export company does inevitably affect adversely the foreign commerce of those not in the joint enterprise and does bring the members of the enterprise so closely together as to affect adversely the members' competition in domestic commerce. Thus every export company may be a restraint. But if there are only these inevitable consequences, an export association is not an unlawful restraint. The Webb-Pomerene Act is an expression of Congressional will that such a restraint shall be permitted.

In enacting the Webb-Pomerene Act, Congress envisioned an eager American business community availing itself of the opportunity to pool its facilities, resources, and expertise in such a fashion as to implement an ambitious joint exporting program. That vision never materialized.

At their high-water mark between 1930 and 1935, Webb-Pomerene Associations numbered 57 and accounted for approximately 19 percent of total U.S. exports. Today the number of associations has dwindled to around 30 and their share of total U.S. exports has dipped to less than 2 percent.

The reasons for this poor showing are many. To list but a few:

The business community traditionally has placed top priority on tapping the vast domestic market and has been much slower to focus on the prospects overseas.

The ever-expanding U.S. service industries have been excluded from qualifying for the act's antitrust exemption.

The Department of Justice, and to a lesser extent the Federal Trade Commission have been perceived by the business community as exhibiting a thinly veiled hostility toward Webb-Pomerene Associations. Therefore, the threat of antitrust litigation has served as a deterrent to broader utilization of the Webb-Pomerene Act.

All in all, there remains the strong impression among most parties that the Webb-Pomerene Act is a quaint relic of the past—a cracked plate that is not good enough to be brought out for company and yet not so useless as to be thrown away. This is regrettable, particularly at a time when we are suffering year in and year out $30 billion deficits.

Title II to S. 734 modifies the Webb-Pomerene Act in a way that will permit many more American firms to make use of its updated provisions to promote exports.

Title II does the following:

It makes the provisions of the Webb-Pomerene Act explicitly applicable to the exportation of services. The National Commission for the Review of Antitrust Laws and Procedures made this same recommendation in its report to the President.

It expands and clarifies the act's antitrust exemption for export trade associations, and provides an antitrust exemption for export companies formed under title I of S. 734.

It requires that the antitrust immu-

nity be made contingent upon a preclearance procedure.

It transfers the administration of the act from the FTC to the Department of Commerce.

It creates within the Department of Commerce an office to promote the formation of export trade associations and trading companies.

It provides for the establishment of a task force whose purpose will be to evaluate the effectiveness of the Webb-Pomerene Act in increasing U.S. exports and to make recommendations regarding its future to the President.

Mr. President, with respect to amendments made to the Webb-Pomerene Act by title II of S. 734 section 201 states the short title of the act while section 202 sets forth findings by the Congress regarding exports and joint exporting activities and the need for amending the 1918 Webb-Pomerene Act (15 U.S.C. 61–66).

Section 203 amends section 1 of the Webb-Pomerene Act (15 U.S.C. 61) and defines the pertinent terms to be used in the amended Webb-Pomerene Act. "Export trade" is amended to include trade in services as well as that in goods, wares, or merchandise. "Service" is defined as meaning tangible economic output and is intended to be an all-encompassing definition, a term not limited by usage relevant to any particular point in time. The term "trade within the United States" retains the definition under section 1 of the Webb-Pomerene Act. The definition of "antitrust laws" is intended to be all inclusive of both Federal and State statutes prescribing the competitive norms within the marketplace. Within the Federal jurisdiction this includes the Sherman Act, the Clayton Act, the Wilson Tariff Act, and the Federal Trade Commission Act. The remaining definitions in section 203 are self-explanatory. It should be noted that the amendments to the Webb Act contained in title II are expanded to include qualified "export trading companies" as well as Webb associations.

Section 204 of title II amends sections 2 and 4 of the Webb-Pomerene Act (15 U.S.C. sections 62 and 64) establishes the scope of the antitrust exemption. Section 2 of the Webb-Pomerene Act exempts from the application of the Sherman and Clayton Antitrust Acts—specifically sections 1 to 7 of title 15 of the United States Code—any Webb association that is established for the sole purpose of engaging in export trade; does not restrain trade in the United States; does not restrain the export trade of any domestic competitor of the association; that does not artificially or intentionally enhance or depress prices within the United States of commodities of the class exported by the association; or does not substantially lessen competition within the United States.

Section 4 of the Webb-Pomerene Act extends the jurisdiction of the Federal Trade Commission Act to include unfair methods of competition used in export trade even though the acts were engaged in outside the United States.

Section 204 of title II establishes a new section 2 to the Webb-Pomerene Act. Section 2(a) sets out the eligibility criteria for the antitrust exemption afforded under the act for export trade associations and trading companies. Section 2(a) establishes six eligibility criteria. They are that the association or trading company and their export trade activities:

First. "Serve to preserve or promote export trade";

Second. "Result in neither a substantial lessening of competition or restraint of trade within the United States nor a substantial restraint of the export trade of any competitor of such association";

Third. "Do not unreasonably enhance, stabilize, or depress prices within the United States of the goods, wares, merchandise, or services of the class exported by such association";

Fourth. "Do not constitute unfair methods of competition against competitors engaged in the export trade of goods, wares, merchandise, or services of the class exported by such association";

Fifth. "Do not include any act which results, or may reasonably be expected to result, in the sale for consumption or resale within the United States of the goods, wares, merchandise, or services exported by the association or export trading company or its members"; and,

Sixth. "Do not constitute trade or commerce in the licensing of patents, technology, trademarks, or knowledge, except as incidental to the sale of goods, wares, merchandise, or services exported by the association or export trading company or its members."

With the exception of the requirements in paragraphs (1), (4) and (6) of section 2(a) of the act—provisions that impose additional criteria for eligibility in addition to those found in the standards of the current Webb-Pomerene Act—the substantive law of antitrust as modified by the amended Webb-Pomerene Act has not been altered. The amendment of the Webb-Pomerene Act by section 204(a) of title II of S. 734, with the exceptions as noted, is a codification of court interpretations of the Webb-Pomerene exemption to the domestic antitrust laws. In this regard I make specific reference to the decision in United States against Minnesota Mining and Manufacturing Co. which I alluded to earlier in my remarks. Also, the amendment is consistent with the present enforcement policy of both the Department of Justice and the Federal Trade Commission.

As stated by Ky Ewing, Deputy Assistant Attorney General, Antitrust Division, Justice Department, during hearings on S. 864—now title II to S. 734—before the International Finance Subcommittee of the Senate Banking Committee on September 18, 1979:

> We note (that S. 864) would require that a restraint of U.S. domestic trade be substantial before the exemption would disappear. The purpose of this proposal . . . is to bring the Act into what we conceive to be the current state of antitrust law interpreted by the court. (September 17, 18 hearing record on Export Trading and Trade Association, p. 138).

Similarly, Daniel Schwartz, Deputy Director, Bureau of Competition, Federal Trade Commission, testified that the antitrust standards specified in S. 864 "are essentially equivalent to the standards of the Webb-Pomerene Act." (September 17, 18 hearing record on Export Trading and Trade Associations, p. 194.)

In his prepared statement, Mr. Ewing further explained that—

> The judicially accepted legal threshold test for applicability of the Sherman Act to activity abroad places a heavier burden on government and private plaintiffs than that applicable domestically. The presence of a substantial and foreseeable effect on U.S. domestic or foreign commerce is required, not merely some minimal effect. (September 17, 18 hearing record on Export Trading and Trade Associations, p. 144.)

Mr. Ewing also noted in his testimony before the subcommittee that—

> The Department of Justice has long predicated its enforcement efforts in export related matters upon the ability to prove a substantial and foreseeable effect on U.S. commerce. (September 17, 18 hearing record on Export Trading and Trade Associations, pp. 154–155.)

Mr. HEINZ. Will the Senator from Missouri yield for a question on section 204(a)?

Mr. DANFORTH. Yes.

Mr. HEINZ. If section 204(a) is nothing more than a codification of not only current judicial understanding of section 2 of the Webb Act but also the enforcement intent of both the Department of Justice and the Federal Trade Commission, why was it necessary to amend this section of the Webb Act with the exception of paragraphs (1), (4), and (6) as you noted?

Mr. DANFORTH. The amendment is necessary to provide certainty to the business community in their international trade activities, assuring them that their activities do not run afoul of domestic antitrust laws. This is accomplished by establishing a certification procedure and by codifying not only present applicable case law but also the enforcement intentions of the antitrust oversight branches of our Government. Two examples will suffice. Under the present Webb-Pomerene Act if an activity of a Webb association is "in restraint of trade within the United States"—section 2 of the Webb-Pomerene Act—then the international trading activity of that association is not exempt from prosecution under the antitrust laws. When is a "restraint" actionable? When it is de-minimus, insignificant, something more than inconsequential, substantial, or just what kind of measurement is to be employed?

The Court in Minnesota Mining held that the restraint has to be something more than the inevitable consequences of the joint activity of competitors. The Department of Justice stated its enforcement intent under the Webb Act to be against joint exporting activities that have a substantial and foreseeable restraint on domestic trade. It would seem to this Senator that for the business community to be sure as to the circumstances under which its international trade conduct is to be held accountable, that the test judging the conduct be written in law. It is for this reason that "substan-

tial" modifies the phrase "restraint of trade" and "substantially" modifies "lessening of competition" in section 2(a) of the act.

A second example relates to section 2 of the Webb-Pomerene Act which states that a joint exporting activity which "artificially or intentionally enhances or depresses prices within the United States" is outside the scope of the antitrust exemption provided by the act. The point I wish to make here is that for a business venture to rely on such a test—"artificially or intentionally"—is to place reliance on a standard which give a false sense of security of joint exporting activities. The courts in the area of antitrust jurisprudence have developed a test that looks not to the mind—intent of the actors—but to the foreseeable consequences of their actions—the effect. It is for this reason that under paragraph 3 of section 2(a) of the act, the eligibility criteria is that the joint exporting activity does not "unreasonably enhance, stabilize or depress prices within the United States * * *," a test that looks to the effect of the actions not at the intent of the actors.

Mr. HEINZ. I thank the Senator from Missouri for his explanation.

Mr. DANFORTH. It should be noted that the eligibility criteria found in paragraph (6) of section 2(a) of the act requires nothing more than a determination by the Secretary that the international trading activity of the trade association or export trading company not be solely trade in the "licensing of patents, technology, trademarks, or know-how" with the exception that such trade may be present if it is incidental to the sale of goods or services. It is the purpose of S. 2718 to further U.S. export trade in goods and services and not to promote trade in processes or ideas that could well result in the opposite effect occurring.

Mr. President, under section 2(b) of the act an export trade association, export trading company and their respective members that have their trade, trade activities, and methods of operation certified according to the procedures set forth under section 4 of the act and carried out in conformity therewith are exempt from the operation of the antitrust laws be it private or sovereign—State or Federal—enforcement of those laws. The immunity from prosecution under the antitrust laws is complete from the day the certification goes into effect until it is either revoked or rendered invalid pursuant to actions taken under section 4 (d) or (e) of the act. If a revocation or invalidation occurs under the act, the loss of immunity is prospective only.

Mr. HEINZ. Will the Senator from Missouri yield for an injuiry?

Mr. DANFORTH. Yes.

Mr. HEINZ. Would the Senator, for the benefit of his colleagues, and as the author of title II of S. 734 explain how the antitrust immunity provided under title II, which attaches after certification, differs from the antitrust immunity afforded under the current Webb-Pomerene Act?

Mr. DANFORTH. I would. Under current law, a Webb-Pomerene association that complies with the filing requirements of section 5 of the Webb Act and which is not in violation of the substantive law standards of section 2 of the Webb-Pomerene Act is exempt from the operation of the antitrust laws but only as to those sections of the Sherman and Clayton statutes set out in the Webb-Pomerene statute. Further, neither the fact of immunity nor the extent thereof is known until an association is sued and obtains a judicial determination that section 2 of the Webb-Pomerene Act has not been violated. What the Webb association has is only a hope. A case in point is United States against United States Alkali Export Association (Southern District of New York, 1944).

In that case a Webb association was charged with entering into agreements with foreign cartels for the purpose of dividing world alkali markets, assigning international quotas, and fixing prices in certain territories other than the United States. The Webb association admitted the agreements but asserted in defense that it had complied with the filing requirements of section 5 of the statute, that its activities were not in violation of section 2 of the statute and therefore the association was immune from prosecution under the antitrust laws. Notwithstanding the association's belief that it was in compliance with the law, the court found to the contrary. The court's holding placed the arrangements employed by the alkali association outside the protective provisions of the Webb Act and exposed the association to liability under the antitrust laws. The Webb association which was organized in 1919 found out, after appeals, that the antitrust immunity which it believed it had for 40 years did in fact not exist.

Under the procedures established by title II of S. 734, a Webb association—or for that matter an export trading company—whose export trade activities have been certified and which association or company acts within that certification knows for certain that those activities are exempt from both private and sovereign enforcement of either State or Federal antitrust laws. The latter, besides encompassing the Sherman and Clayton antitrust laws and the Wilson Tariff Act includes the antitrust provisions of the Federal Trade Commission Act, sections 5 and 6 thereof. The certainty provided through the certification process is not lost until action is taken pursuant to the provisions of title II either to revoke or invalidate the certification. If the latter occurs, the loss of the antitrust exemption is prospective—for future conduct only.

Mr. HEINZ. I thank the Senator. I can see that title II provides certainty to Webb associations and trading companies as to what activities they may undertake without fear of prosecution or suit under the antitrust laws.

Mr. DANFORTH. Under section 2(c) of the act, when a certificate is issued by the Commerce Department, and the Department of Justice or Federal Trade Commission has previously advised the Department of Commerce of its disagreement with a determination to issue a certificate granting immunity under the act, the immunity from the operation of the antitrust laws is held in abeyance for 30 days. This provision is applicable to the issuance of a certificate under section 4(b).

Section 205, Mr. President, provides conforming changes in style to section 3 of the Webb-Pomerene Act (15 United States Code, section 63).

Section 206 amends sections 4 and 5 of the Webb-Pomerene Act (15 United States Code, sections 64 and 65) and adds an additional seven sections to the act. Section 4 of the Webb-Pomerene Act extended the jurisdiction of the Federal Trade Commission Act to include States. Under title II both the Department of Justice and the Federal Trade Commission have authority to seek invalidation of a certificate when the export trade, activities, or methods of operation of the association or trading company no longer meet the requirements of section 2 of the act. One of the eligibility criteria under the act, specifically paragraph (4) of section 2(a), is that of "unfair methods of competition," an antitrust standard uniquely within the expertise of the Federal Trade Commission and a standard which establishes a norm of competitive behavior prescribed by section 5 of the Federal Trade Commission Act. While under the current Webb Act there exists no exemption for joint exporting activity that may be found to violate section 5 of the Federal Trade Commission Act, such an exemption is provided under title II of S. 734.

Section 5 of the Webb-Pomerene Act establishes administrative requirements for associations operating under the act. Each association, within 30 days after its formation, has to submit a statement to the Federal Trade Commission giving details concerning its certificate of incorporation and bylaws. The association must also furnish to the Commission such information as the Commission requests. The Commission may also investigate associations if it believes that the law may have been violated. Recommendations for readjustment can be made by the Commission and if the association does not comply with the recommendations the Commission may refer its findings to the Department of Justice for any appropriate action. Under the present Webb-Pomerene law a Webb association that complies with the filing requirements of section 5 would not know if it had an immunity from the operation of the antitrust laws until a judicial determination was rendered that section 2 of the Webb-Pomerene Act had not been violated.

Mr. President, section 206 of title II provides a new section 4 to the Webb-Pomerene Act. Section 4(a) establishes the procedure to apply for certification as either an export trade association or export trading company. The section, specifically paragraphs (1) through (9), describes the information to be included in the application for certification which paragraphs I believe are self-explanatory. Most notable of the informational filing requirements are a description of the circumstances showing that the association or export trading company will

serve a need in promoting the export trade in the goods or services involved, a description of the methods by which the association or company intends to conduct its export trade and any other information which is reasonably available to the applying parties and which is necessary for the grant of certification.

Under section 4(b)(1) the Secretary of Commerce is required to certify an association or company within 90 days after receiving the application. During this 90-day period the Secretary will have the opportunity to consult with both the Department of Justice and the Federal Trade Commission. The purpose for the consultation is to provide an opportunity for the two antitrust enforcement agencies of our Government to share with the Secretray of Commerce their respective analysis of and any concerns they may have relative to the eligibility criteria of the act, section 2(a).

Under section 4(b)(1) an association or company will be granted a certificate upon a determination by the Secretary that first, the association or trading company and their respective export trade, trade activities and methods of operation meet the requirements of section 2 of the act and second, that the association or company and their respective activities will serve a specified need in the promotion of the applicable export trade.

Mr. HEINZ. Will the Senator from Missouri yield for a question?

Mr. DANFORTH. Yes.

Mr. HEINZ. There has been some concern raised as to the application of the "needs test" in title II of S. 734. As the Senator from Missouri is aware, in its report to the President and the Attorney General on January 22, 1979, the National Commission for the Review of Antitrust Laws and Procedures concluded that if the Congress determines that it is necessary to continue the Webb-Pomerene exemption it should seriously consider that before any immunity from the operation of the antitrust laws is afforded an association of joint exporters the latter "be required to make a showing of need." Under section 2(a) of the act, specifically paragraph (1), one of the eligibility criteria for ascertaining whether a certification is to be issued is whether the joint exporting activities "serve to preserve or promote export trade." How is the eligibility criteria of section 2(a)(1) related, if at all, first to the needs showing under section 4(a)(6) and second to the needs determination required of the Secretary under section 4(b)(1)?

Mr. DANFORTH. There is no relationship.

Mr. HEINZ. Would the Senator then explain what is required in the showing of a specified need under section 4 and the reason for the eligibility criteria of paragraph (1) of section 2(a)?

Mr. DANFORTH. The reason for providing an exemption from the operation of the antitrust laws for the joint exporting activities of either a Webb association or export trading company is that without such an exemption, and an exemption which is certain, it would not be reasonable to conclude that such joint exporting activities would be undertaken except on an infrequent basis. Therefore, to encourage such activity, an exemption is available. However, the exemption should only be utilized to preserve, that is to say maintain the status quo, or promote, that is to say, add to, export trade. To be eligible for the exemption such a finding—that the association or trading company will preserve or promote export trade—should be made by the Secretary of Commerce. Further, since the existence of that fact is one of six eligibility criteria, the finding would be subject to judicial consideration under a section 4(e) action.

On the other hand, the determination by the Secretary under section 4(b)(1) utilizing information tendered pursuant to section 4(a)(6) is not subject to judicial consideration under a section 4(e) action. The reason behind requiring the Secretary to not only determine that the six eligibility criteria of section 2(a) will be met but that the activities of the Webb association or export trading company will serve a specified need in promoting the export trade covered by the certification is simple.

It was believed that those seeking to avail themselves of the benefit of the Webb-Pomerene exemption should come forward and share with the oversight agency, the Department of Commerce, the reasons they believe their activities will be in furtherance of the export trade of our Nation. The needs demonstration required by section 4 of the act is nothing more than a subjective explanation by the association or trading company as to how its activities will further U.S. trade. The Secretary in his determination will either agree or disagree with that evaluation.

Mr. HEINZ. I thank the Senator. I, too, believe that the needs showing within section 4 contemplates nothing more than a subjective explanation by the Webb association or trading company that the activities of the association or company will further U.S. export trade.

Mr. DANFORTH. Mr. President, the Secretary, under section 4(b)(1) must specify in the certificate the permissible export trade, trade activities, and methods of operation of the association or company. The immunity from the operation of the antitrust laws provided by section 2(b) of the act applies to those enumerated activities.

Under section 4(b)(1) the Secretary must issue the cetrificate or deny the application 90-calendar days after an application is filed but may extend that process by an additional 30 days with the agreement of the applicant. After an application is filed, by the 45th day, the Secretary is to delivery to the Attorney General and the Federal Trade Commission a copy of any certificate the Secretary proposes to issue. No later than 15 days thereafter—in the case of a certificate delivered on the 45th day, by the 60th day—the Attorney General or Commission may give written notice of an intent to offer advice on the determination. If the Commission or Attorney General does not respond within the 15-day period or formally advises the Secretary of no disagreement with his intent to issue a certificate then the Secretary may issue a certificate at any time.

If the Attorney General or Commission advises the Secretary of an intent to offer advice on the application, then such advice must be provided the Secretary within 45 days of the date the Attorney General or Commission received from the Secretary a copy of the proposed certification. In the case of the Attorney General or Commission notifying the Secretary of Commerce of his intention to offer formal advice on the 60th day after the certificate has been filed the formal advice must be given by the 90th day, since the proposed certificate was tendered to each agency on the 45th day.

The extension of time afforded under section 4(b) applies only to the granting of the certificate and not to the time during which the Attorney General or Commission is obligated to act.

Mr. HEINZ. Would the Senator yield for a question on section 4(b)(1)?

Mr. DANFORTH. Yes.

Mr. HEINZ. What is the purpose of the last sentence of section 4(b)(1)? Is it not the intent of the author of this title that the two respective antitrust enforcement agencies establish a process similar to that utilized for enforcement of the domestic antitrust laws whereby they will reconcile any potential conflict as to which agency will enforce its respective law against a given company or industry in a manner so that all those concerned know that one or the other agency will assume primary jurisdiction?

Mr. DANFORTH. Yes, that is the intent.

Mr. HEINZ. I thank the Senator.

Mr. DANFORTH. Mr. President, section 4(b)(2) of the act provides that an association may request expedited consideration on its application. The time constraints in section 4(b)(1) must still be honored but it is expected that if a need is demonstrated, justifying expedition, then all affected agencies will act in due speed.

Section 4(b)(3) provides automatic certification for existing Webb-Pomerene associations which request such certification within 180 days after enactment of the act. Under the amendment, the certification process for existing Webb-Pomerene associations is to comport with the process applicable to other associations seeking certification under the act, with two exceptions: First, under paragraph (3) of section 4(b) the Secretary's review of the application for certification is to be summary in nature. Specifically, the Secretary is required to determine whether the application shows "on its face" whether a certificate should issue. It is further stated that unless the Secretary "possesses information clearly indicating that the requirements of section 2(a) are not met"—again, by looking at the application on its face and having available the advice of the Department of Justice or Federal Trade Commission—the Secretary must issue the certificate for the export trade, export trade activities and methods of operation that meet the requirements of section 2(a) of the act. Second, when issuing a certificate pursuant to paragraph (3) of section 4(b) the Secretary need not deter-

mine that the association and its activities will serve a specified need in promoting the export trade of the goods, wares, merchandise or services described in the application. An existing Webb-Pomerene association need not have to demonstrate that its existence is in furtherance of U.S. export trade. Such will be presumed.

Section 4(b)(4) provides a mechanism whereby an association whose application for certification or amendment thereto is denied is to be afforded a hearing with respect to that determination pursuant to section 557 of title 5 of the United States Code.

Section 4(b)(4) provides a mechanism whereby an association whose application for certification or amendment thereto is denied is to be afforded a hearing for reconsideration with respect to that determination.

Section 4(c) of the act requires that after certification, if there occurs a material change—meaning something more than inconsequential—related to the association or trading company's membership, trade activities or methods of operation, then an affirmative duty on the part of the association or company exists to report the change to the Department of Commerce. At the time the report is made the association or company may request that its certification be amended.

The antitrust immunity provided by the act continues uninterrupted if the material change subsequently becomes incorporated into the certification through approval by the Secretary of Commerce. It should be noted that upon the failure of the Secretary of Commerce to approve the change such failure does not affect the scope of the underlying certification except as to that part relevant to the material change.

Under section 4(d) the Secretary, after notification to an association or trading company and after affording it a hearing, may require that the association or company amend its organization or methods of operation to correspond to its grant of certification. Further, if the Secretary determines that the eligibility criteria of section 2(a) of the act are no longer met, the Secretary must either revoke the certification or himself make such amendments to the certification to satisfy the eligibility criteria of the act.

Mr. President, section 4(e)(1) authorizes either the Department of Justice or the Federal Trade Commission to bring an action to invalidate, in whole or in part, the certification granted to an association or trading company on the grounds that the eligibility criteria of section 2 of the act are no longer being met.

Once an association or trading company's export trading activity has been certified under the act, the only action provided by law against the association, trading company or their respective members would be either a self-initiated action by the Secretary under section 4(d) of the act or an action by the Department of Justice or Federal Trade Commission under section 4(e) of the act.

Mr. HEINZ. Will the Senator yield for a question on section 4(e) of the act?

Mr. DANFORTH. Yes.

Mr. HEINZ. Would a private party have a cause of action against a Webb association, trading company or their respective members under the Federal, or for that matter, State antitrust laws for injury to it?

Mr. DANFORTH. Section 4(e)(3) of the act provides that only the Department of Justice or the Federal Trade Commission has standing to bring a cause of action in court against a trading company or Webb association for violation of section 2 of the act. Therefore, apart from the complaint against activity being ultra vires to the certification, a private party has no standing to bring suit. However, after a certificate has been revoked or invalidated, a private party could have standing to bring an action under the antitrust laws based on activities subsequent to the revocation or invalidation.

Where a private cause of action has been initiated, claiming that a Webb association is acting ultra vires to its certification, a court would not be able to infer from the acts of the Webb association any anticompetitive effect or intent until it first determines that the acts of the association were in fact ultra vires to the certification. If an ultra vires act is determined to be present, then the court may proceed with its inquiry and determine whether it may infer from that ultra vires act the requisite intent and anticompetitive effect under the antitrust laws.

I would also point out that a private party who may be "aggrieved by an order of an appropriate banking agency" pursuant to section 105(e)(1) of S. 734 (title I of the legislation) may not employ the broad standing provision of section 105(e)(1) in order to obtain standing against an export trading company or association with respect to its export trade, trade activities and methods of operation.

Mr. HEINZ. I thank the Senator.

Mr. DANFORTH. Under section 4(e)(1), before the Department of Justice or Federal Trade Commission may sue to invalidate a certification, it is required to notify the affected parties 30 calendar days in advance. It is anticipated that this 30-day period will allow sufficient time for the parties to resolve their differences, if at all possible. The 30-day notification period is not applicable to an action seeking a restraining order under section 4(e)(2).

The authority of the district court under an action for invalidation is to consider the issues de novo. The only issues that are before the court are whether the requirements of section 2(a) of the act, the eligibility criteria, are being complied with by the association or trading company. While the Secretary of Commerce must consider the requirements of section 2(a) and determine that the activities of the association or trading company will serve a specified need in promoting the applicable export trade in order to issue a certificate, the specified need determination of the Secretary is not an issue which is subject to consideration by the district court in a section 4(e)(1) action.

The district court in a section 4(c)(1) action may either issue an order invalidating the certificate, after which the association or company may continue to exist but does so without the protection of the antitrust immunity of section 2(b) of the act, or require the association or company to modify its organization or methods of operation in order to comply with the requirements of section 2(a) of the act.

Under section 4(e)(2), during the 30-day period, the effective date of the grant of certification is held in abeyance, the Department of Justice or Federal Trade Commission may seek an applicable order prohibiting the certificate from taking effect. It is anticipated this right of action granted by section 4(e)(2) will be used sparingly. This provision for a temporary restraining order or prohibition is applicable to the issuance of a certificate pursuant to section 4 of the act. Further, the common law requirements applicable to the granting of either a temporary restraining order or preliminary injunction must be met by the moving party before the court can issue such an order. Congress means for this not to be an easy burden to overcome.

The provision for the restraining order or prohibition was added at the request of the Department of Justice. It exists as a safety valve where, in the opinion of the antitrust enforcement agencies of our Government, the Secretary of Commerce intends to issue a certification to either a Webb association or a trading company and there exists, on the face of the certification, obvious violations of section 2 of the act. The sole issue before the court is whether on the face of the certification there exists such obvious violations of section 2 of the act that a restraining order or prohibition must be issued.

Under section 4(f) trading companies and associations are obligated to comply with U.S. export control laws. Under section 4(g) final orders of the Secretary of Commerce are subject to judicial review under chapter 7 of title 5 of the United States Code.

Mr. President, section 5 of the act mandates that within 90 days after enactment, the Secretary of Commerce, after consulting with both the Department of Justice and the Federal Trade Commission, publish proposed guidelines. The guidelines are to relate to the process by which the Secretary of Commerce will reach his determinations under section 4 relative to whether the requirements of section 2 of the act are being met. The guidelines shall be periodically reviewed and revised where warranted.

Sections 6 and 7 of the act are self-explanatory. Section 8 of the act requires that portions of applications, amendments and annual reports that contain trade secrets or confidential business or financial information, which if disclosed could competitively harm the party submitting the information, be held confidential and not disclosed except as provided under section 9(b). The latter section, under specific circumstances, allows disclosure to the Attorney General or Federal Trade Commission. Sections 9, 10, and 11 of the act, I believe, are also self-explanatory.

Mr. President, section 207 of title II would add a new section to the Webb-Pomerene Act. The purpose of this new section would be to grandfather existing Webb-Pomerene associations so that their ongoing operations would not be affected by the changes to the Webb-Pomerene Act proposed by title II of S. 734.

I believe, Mr. President, that any export trade legislation must insure that existing Webb-Pomerene associations have the election to continue their operations unimpeded. Existing association operations that involve many millions of dollars of capital investment, long-standing course of dealings and long-term contractual obligations should not be jeopardized. Care must be taken to insure that there is no temporal discontinuity with regard to the antitrust immunity enjoyed by such associations and that any modified system of antitrust immunity be, at a minimum, coextensive with what immunity currently is available to Webb-Pomerene associations.

The provisions of section 207 would permit Webb-Pomerene associations in existence as of January 1, 1981 to continue to function under the provisions of the prior law if they so elect. Further, section 207 would authorize Webb-Pomerene associations in existence on January 1, 1981, to apply at any time for certification under the revised act.

The proposed section 207 reflects a recognition that existing associations differ from new potential applicants because they have invested time, personnel and resources in reliance on the present exemption. Its provisions would encourage application for intended benefits of certification, while at the same time making clear that there is no desire to impose that process or to jeopardize or dislocate those who have lawful investments and activities presently in place which in 1980 contributed in excess of $2 billion annually to our Nation's balance of trade. Those associations who seek certification are allowed to decide whether they will accept it. They thus are assured that to seek certification will not put at risk any of their existing investment. In essence this is the same choice facing all applicants: freedom to choose the benefits of the new law or to remain under the status quo.

UP AMENDMENT NO. 59

Mr. EXON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Nebraska (Mr. EXON) proposes an unprinted amendment numbered 59:

At the appropriate place, add the following section:

It is the sense of the Senate that the schedule of phased decontrol of natural gas prices embodied in the Natural Gas Policy Act of 1978 continues to be sound public policy which should not be altered.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. EXON. Mr. President, this is an amendment which expresses that it is the sense of the Senate to support the objectives of the Natural Gas Policy Act which has to do with phased decontrol of natural gas under title I of the Natural Gas Policy Act of 1978.

The administration has voiced some support for accelerating the schedule set forth in this act decontrolling the wellhead price of natural gas.

This resolution which I present to the Senate today would send a clear message to the administration and the Nation that this body does not support immediate decontrol of natural gas prices.

The overriding purpose of the 1978 act was to encourage more domestic natural gas production by gradually decontrolling prices.

The overwhelming conclusion by the industry is that the aim of title I is succeeding.

Domestic natural gas production increase in 1979 from about 19.3 trillion cubic feet in 1978 to 19.9 trillion cubic feet, the first increase since 1972.

Additions to proven reserves in 1979 increased 35 percent over 1978 figures.

In fact, the gas industry is currently experiencing a significant surplus of gas supplies. Industry sources have indicated that there is perhaps even more gas to sell than the pipeline has places or buyers to purchase the product.

The NGPA established a gradual decontrol schedule for new gas. The price is allowed to go up monthly and at an annual rate of the annual rate of inflation plus 4 percent until 1985.

(Mr. QUAYLE assumed the chair.)

Mr. EXON. Consumers, of course, will feel the increases regardless of the different pricing categories. The pipelines purchase both old and new gas from producers, and even though two-thirds of our total supply is characterized as old gas, sales are made on a rolled-in price basis where the cost of old and new gas is averaged together in the retail price.

The phased decontrol schedule contemplated in the 1978 act was a compromise measure, designed to protect consumers as well as provide incentives to producers. The administration's consideration to accelerate decontrol will destroy the delicate balance of that compromise which was hammered out in several endless days of committee work. Accelerating decontrol of natural gas prices will dramatically tip the scales in favor of the gas producers.

Mr. President, the Nation's largest gas producers are not unfamiliar players in our continuing energy policy debate. Such firms as Exxon, Texaco, Gulf, Shell, Mobil, Amoco, and Union Oil produce more than 40 percent of our domestic supply of natural gas. Decontrolling natural gas will only accelerate the gusher of profits which the major oil companies have realized from OPEC price hikes and the administration's recent order to immediately decontrol oil prices. These companies would surely experience another explosion in new profits if the remaining controls on gas are removed.

A recent study by the American Gas Association indicated that under total decontrol the wellhead price of natural gas would rise from the current national average of $1.65 per thousand cubic feet to $4.50 or $5.50 per thousand cubic feet. The AGA study concluded that immediate decontrol would double residential heating bills from an average of $494 per home in 1981, to $897 in 1982.

In my State of Nebraska, where 75 percent of the homes use natural gas, residential users could pay at least $330 more in 1982 if gas prices are immediately decontrolled. Prices to industrial users of gas would also double, increasing the cost of goods and services and pushing the inflation rate beyond its already unbearable limits. A recent study by the Energy Action Educational Foundation stated that natural gas decontrol would add from 3 to 5 percentage points to the Consumer Price Index as workers, farmers, and businesses strive to maintain their standard of living and keep pace with rising energy costs.

Let us not compound the terrible rigors of inflation at this time by even considering deregulation of natural gas. If we are really and truly concerned about inflation then we should be against any acceleration in this area.

Mr. President, I quote from the Washington Post of April 4, 1981, in a headline entitled "Food, Fuel Costs Push Price Index Up by 16-Percent Rate." I read from the Washington Post:

Part of the increase in the price index for finished goods, as well as the 1.1 percent rise in the companion index for intermediate goods, was a result of large increases in the cost of refined petroleum products. These came in turn from President Reagan's decision to strip away federal price controls on domestic crude oil, and the continued pass-through of Organization of Petroleum Exporting Countries' price hikes.

For instance, the energy component of the finished goods index rose 6.1 percent last month. That includes a 7.5 percent increase in the price of gasoline charged by a refiner. Similarly, the same component of the intermediate goods index—which covers the cost of, say, heating oil to businesses—rose 4.3 percent.

Mr. President, I use those figures merely to bring home once again that despite our efforts, despite our rhetoric, and despite our goal, inflation continues to eat America alive, and if we do anything more to dramatically increase inflation, as accelerated decontrol of natural gas certainly would do, in fact, I say, Mr. President, that such action would pale by comparison the President's decontrol early this year of oil prices.

Natural gas decontrol, like oil decontrol, will have an enormous impact on the farming community which is already overburdened by the administration's policies. In addition to emasculating the farm programs, the administration's consideration to decontrol natural gas, like the decontrol of oil prices, will only add to the farmer's cost of production in added fuel prices and agricultural supplies such as insecticides and pesticides manufactured with natural gas. In addition, manufacturers of irrigation equipment, an important commodity to the West, utilize natural gas, and also farmers use gas in conditioning and drying grain. All consumers will, of course, pay for these increases in higher food costs. The additional revenues, however, will not be realized by farmers. It is the gas

producers who will be crying all the way to the bank.

The study by the energy action group also estimated that the value of the major oil companies' natural gas reserves would increase to between $1.3 trillion and $1.6 trillion in 1985, a market value increase of between 800 and 940 percent over the value of their reserves on December 31, 1979. Lifting the controls on natural gas could add $500 billion to oil company revenues between 1981 and 1985 compared to $10 or $15 billion which these companies will realize from oil decontrol.

Already, the oil companies cannot spend all of the money they are making. Even though these firms have invested billions in new exploration activities, their remaining cash pot has allowed these companies to buy heavily into other business ventures as well as into coal and related mineral extraction industries. There is currently a shortage in the drilling equipment market as well as in the availability of drilling crews, and, although exploration activity is at a record alltime high increasing some 35 percent over last year, the industry is hard pressed to prove that they would be drilling much more with additional profits.

What more incentive do these producers need. I ask? Under the NGPA all gas discovered after 1977 is allowed to gradually rise in price until 1985 when, as I said, all controls would be lifted. At that time the price of gas could rise to the world selling price of oil. The producers claim this incentive is too stringent, and that the price of gas should track the price of oil not tomorrow, not in 1985, but now.

The producers have cried a lot but have not made a case for the need to allow a perfect equivalency between the price of oil and the price of natural gas. Oil production is much more expensive than gas production, and some industry sources have admitted there is room for price differentials between gas and oil. Neither has the gas-producing industry proved that decontrolling the price of gas will increase the quality of gas available.

In this Senator's mind, it is debatable that free market economics apply to this situation. OPEC sets the price of oil, and after 1985 will set the price of natural gas. Supply and demand principles are unfamiliar terms in this scenario. In a decontrolled natural gas market, the producers will set the price which the pipelines and the utilities will have to pay. Without alternatives, there is little choice in the matter.

As usual, we consumers are also left with few alternatives. Phased decontrol at least cushions the impact of lifting the cap on gas prices.

Mr. President, this Senator is no stranger to the free enterprise system. As a small businessman myself, I certainly believe that we need to reduce Government intrusion where the normal forces of the market will work effectively. I believe however, that the administration's free market enthusiasts who argue that immediate decontrol of natural gas is necessary to insure additional supplies, are failing to look at the realities of their proposal.

In conclusion, Mr. President, the stakes in this decontrol scheme are enormous. Forty million consumers will lose, and a few gas producers—big oil—will gain hundreds of billions of dollars over the next several years. The economy will suffer as inflation soars upward with the ever-increasing costs of energy. Huge shifts of income will move from the Northeast and Midwest to the gas-producing States of the South and Southwest. Phased decontrol will at least cushion, for a time, the shock to consumers, while at the same time signaling producers that higher price incentives are becoming available.

I would urge the Senate to adopt this measure, sending assurances to the American people that at least Congress recognizes the responsibility it bears in formulating our Nation's energy policy. We certainly cannot afford to pursue a free market philosophy which is not tempered with reason and an overriding sense of equity. The public interest surely demands it.

Mr. RIEGLE. Will the Senator yield?

Mr. EXON. I am glad to yield.

Mr. RIEGLE. Mr. President, I commend the Senator for his amendment and for his leadership and I would like to ask unanimous consent to be listed as a cosponsor of his amendment.

Mr. EXON. Mr. President, I certainly appreciate the fact that my friend from Michigan wants to be added as a cosponsor to this amendment. I am happy to ask unanimous consent that his name be added, if there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. I thank the Senator.

Mr. EXON. Mr. President, I think it would be well if I could possibly amplify on this matter just a little bit more. I think that we are all concerned about the very grave difficulties we have with inflation today.

Most of us on this side of the aisles, as well as those on that side of the aisles, have, in most instances, supported the President in his overall goals of trying to reduce the inflationary pressure. I would think and hope that the Senate would accept this proposal, because if it does not, then I think the Senate of the United States is saying very simply that, "No, while we vote for budget cuts and while we want to use supply-side economics to continue to try and juice the economy, when it really comes down to doing something about further decontrol of basic energy costs that are killing the average Mr. and Mrs. John Q. Public in the United States today, that when we get into that area we do not want to make a stand. We will let the course of the administration continue."

Now what is the present course of the administration in this particular area? About 2 weeks ago, I was with several other Senators and we had a very interesting discussion at some length with the new Secretary of Energy, the former Governor of South Carolina, Mr. James Edwards, who is not only a former Governor with whom I was associated, but a good friend. Toward the end of that particular discussion involving Members of the U.S. Senate and several of our colleagues from the House side of the Hill, I asked the question:

> Mr. Secretary, what had been or what will be your recommendation to the President of the United States on acceleration of the decontrol of natural gas prices?

His response, Mr. President, was:

> I have made no recommendations to the President at this juncture. We have ordered a study and this study is expected to be completed within the next 60 days.

I suspect, therefore, if the Secretary of Energy's timing was accurate at that time—and I suspect it was—that that would mean sometime within the next 30 days, at the outside, that report would be coming down.

This is clear evidence, it seems to me, as has been widely reported in the press and discussed in the cloakrooms off the Senate floor, that indeed the administration, while not yet having made any final decision, is seriously considering the matter of acceleration of the decontrol of the act that I referred to a few moments ago.

It seems to me, Mr. President, regardless of what the study showed the administration is coming forth with, regardless of that, I think it is critically important that we who are elected here by the people of the United States recognize and realize that the gas producers are now doing very well; that we have more supplies of natural gas now than we ever had before; that the "bubble" in the gas supply lines that we heard a great deal about a few months ago has turned into a huge bulge, and, because of the accelerated drilling for oil, we have had an unanticipated discovery of natural gas supplies.

This being the case, and with the recognition that the people of the United States today are overwhelmed with the increases over which they have little or no control—certainly I feel badly about the fact that gasoline prices at the pump continue to rise. But I recognize that there are other means of transportation if the people can afford it. At the same time, America is a nation that travels on wheels and literally millions of people depend upon their automobiles, which have to run on ever-increasing and staggering costs of gasoline, are a part of their life that they need, that they depend on, and that they have to have. But I recognize that there are some other things that could be done if you have to get from point A to point B.

But when we are talking about natural gas and, as I said earlier, when 75 percent of the people who live in my State depend on natural gas, there is little if any alternative to heating the home during the winter. Therefore, it seems to me, Mr. President, that we should certainly send the signal very loud and send the signal very clear to the administration that the U.S. Senate feels that this would be a wrong time to tamper with that act that was very carefully and time-consumingly put together, which phased out natural gas over a period of time—over a period of time, Mr. President—finally being phased out on January 1, 1985.

Mr. President, I ask unanimous consent that Senator BUMPERS and Senator BIDEN be added as cosponsors.

The PRESIDING OFFICER (Mr. DANFORTH). Without objection, it is so ordered.

Mr. EXON. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ARMSTRONG. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, this amendment is a sense of the Senate resolution which reads:

It is the sense of the Senate that the schedule of phased decontrol of natural gas prices embodied in the Natural Gas Policy Act of 1978 continues to be sound public policy which should not be altered.

That, of course, at the present time, is, as the amendment states, public policy. That is present law. It is what the Senate and the House decided in 1978. As a practical matter, the amendment does nothing that is not already the law of the land. Indeed, it does less, because it is only a sense of the Senate resolution.

It is also clearly nongermane to export trading companies legislation. It is an energy issue. It has nothing to do with the Banking Committee. It has nothing to do with international finance, monetary policy, or export policy.

It is my view that, notwithstanding the fact that it is consistent with current law, it just does not belong on this bill.

I personally might be very sympathetic to the policy expressed. Indeed, that was the policy I voted for in 1978. I might support it if it was on another bill. But let me say to my good friend from Nebraska, I just do not think this is the time or the place to debate an energy subject, not on a Banking Committee bill.

We do not have a time agreement on this bill, so technically the Senator from Nebraska can offer any kind of amendment he wants, for whatever purpose he has in mind. But I am strongly opposed to this amendment being added to this bill.

It also has great potential for doing mischief to our legislation over on the House side. Right now there are three committees of jurisdiction in the House, all of whom have claimed a piece of their equivalent of export trading company legislation. The Foreign Affairs Committee has been very involved in legislation of this kind. The House Banking Committee has been very involved in similar legislation. The House Judiciary Committee has been very involved in title II of the export trading company bill, so much so that some members of the committee have introduced a totally different approach to title II.

As a result, the House made little progress on this legislation last year. They never got it to the floor. Not because of the merits of the legislation, but because of jurisdictional difficulties over on the House side, which we hope they will resolve this year.

Putting this amendment on this bill gives one more committee of jurisdiction a shot at this legislation. It would, at a minimum, invite one more subcommittee and one committee in the House to claim it.

Mr. President, that is just not the kind of help this legislation needs. We want to make the job of the House as easy as possible, not as difficult as possible, which is the effect the amendment of the Senator from Nebraska would have.

I also think, Mr. President, that for us to get into the merits of the issue that the Senator seeks to raise will cause one additional problem, which is to confuse the issue that we will be voting on later today when we finally get to passage of this bill.

If we spend most of our time debating the merits of natural gas decontrol, regardless of how the amendment of the Senator from Nebraska is disposed of, either favorably or unfavorably from his point of view, there are two possible outcomes.

The first outcome is that people who like the result will think that that was what we spent most of our time on and the export trading company bill has somehow become a natural gas bill. Remember, we had a filibuster on this for weeks, with many votes being 48 to 52, 47 to 49. I am concerned that the final vote on this bill might be not what is reflected in the bill but what is reflected in this amendment.

Do we want to make the job of the House easier? Do we want to show people, as a practical matter, that we are all very much for this bill?

Senator PROXMIRE has had more reservations about this bill than anybody else, and we have had our share of disagreements. Nobody has been a stronger or more effective critic of this bill than BILL PROXMIRE. Yet he is a strong supporter of this bill even though he does not think it perfect. This bill passed the Senate last year 77 to 0. I do not want to see it passed 76 to 1, I will be honest with you. I do not want to see it pass 70 to 6. I do not want to see it pass 50 to 40. I want to see it pass by the same overwhelming, unanimous vote that it did last time.

All the amendment of the Senator does, it seems to me, is to cloud the real issues. It does not help this legislation in terms of really giving us a true measure of the support for it that we all know is here in this body.

I understand the Senator is determined to proceed to a recorded vote on this. I understand that Senator BUMPERS wants to make a statement, and I want to move to table the amendment. However, I do not wish to preclude Senator BUMPERS from his statement.

I would like to ask the Senator from Arkansas if he wants some time. I would be happy to yield him some time by unanimous consent.

Mr. EXON. The Senator from Arkansas told me he wants about 3 or 4 minutes. I appreciate very much the offer by the Senator from Pennsylvania to give us some additional time.

Will the Senator yield to me at this time for 3 minutes to answer the objections he has just raised?

Mr. HEINZ. No, this Senator cannot yield that much time, I am afraid. But I am prepared to yield to Senator BUMPERS for a reasonable period of time, if he wants me to yield to him. Otherwise, I will be forced to move to table. I do not wish to foreclose debate, but I do not want to perpetuate the filibuster, either.

Mr. EXON. Mr. President, is the Senator from Pennsylvania indicating that he is not going to give me a chance to respond to his remarks?

Mr. HEINZ. No, the Senator merely declined to yield a half-hour.

Mr. EXON. I beg the Senator's pardon?

Mr. HEINZ. Mr. President, the Senator from Pennsylvania merely declined to yield the Senator one-half hour.

Mr. EXON. Mr. President, I said 3 minutes.

Mr. HEINZ. Oh, I am sorry. I apologize, Mr. President. I understood the Senator to say 30 minutes.

Mr. President, I yield 3 minutes, 4 if he so desires, to the Senator from Nebraska, without my losing my right to the floor.

I apologize to my good friend. I thought he said 30 minutes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. EXON. Mr. President, I thank my friend from Pennsylvania. I was puzzled by his actions. There is a difference between 3 minutes and 30 minutes.

Mr. President, the objections that the Senator from Pennsylvania has to my sense-of-the-Senate resolution in this case are not well founded. I simply point out to the Chair that, on numerous occasions, I have sat on this floor and heard managers of a bill say the same thing that the Senator from Pennsylvania just said with regard to this particular piece of legislation. Mr. President, I simply point out that I wish the Senator would clarify for the Senate the fact that this sense-of-the-Senate resolution would have no effect whatsoever as this bill goes to the House of Representatives.

It is a sense-of-the-Senate resolution and, therefore, would not obstruct the bill at all on the other side of the Hill.

I simply point out to the Senator from Pennsylvania that this sense-of-the-Senate resolution is worded in the same fashion and takes the same form as a Republican-sponsored sense-of-the-Senate resolution 10 days or so ago with regard to sending a message to the President of the United States in the form of a sense-of-the-Senate resolution on another bill that had no direct connection with that, simply saying that it was the sense of the Senate that the grain embargo should be ended. Mine is noth-

ing more and nothing less. If it were appropriate to have that sense-of-the-Senate resolution on the grain embargo, sponsored by those on that side of the aisle in that instance, I suggest, Mr. President, that it is entirely proper for this to be included as I have amended it.

On many occasions, Mr. President, the U.S. Senate has agreed that when we have matters of a critical nature—which I think this is—there is broad interpretation with regard to the amendments to a piece of legislation on the floor.

I yield back to my friend from Pennsylvania, with my thanks.

Mr. HEINZ. Mr. President, how much time does the Senator from Arkansas want?

Mr. BUMPERS. No more than 10 minutes.

I say to the Senator, he is going to be on an airplane with me tonight going to Pittsburgh, and I want us to leave here good friends.

Mr. HEINZ. That may even be possible in 10 minutes.

Mr. President, I ask unanimous consent that I may yield 10 minutes to the Senator from Arkansas without losing my right to the floor.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BUMPERS. Mr. President, first, I want to acknowledge that this amendment may not appear germane to the export trading bill. If this administration had not indicated that it is seriously considering the decontrol of natural gas prices, we could certainly have postponed this amendment until after the recess, to be put on a more appropriate measure. However, there has been much mention in the press about the President's contemplation of decontrol of natural gas prices.

The other day, Secretary of Energy Edwards appeared before the Energy Committee, and this very question came up. I asked him if he had made a recommendation to the President. He said no recommendation had been made, but that it was under study and as soon as they completed the study within the Department of Energy, a recommendation would be made to the President.

I then asked the Secretary what the average price for natural gas in this country is right now. He said he thought it was around $1.50. Actually, it is $1.61 an Mcf—that is a thousand cubic feet of gas.

I then asked Secretary Edwards what the price was for the deep gas in Louisiana, gas found below 15,000 feet.

He did not know, so I told him. I know that the Arkansas-Louisiana Gas Co. is paying between $6.07 and $7 an Mcf.

That means that the controlled price of natural gas is $1.60 per Mcf, but the decontrolled price is $7 per Mcf.

I asked Secretary Edwards if he could give me one reason for believing that all the natural gas in this country would not immediately go to $7 per Mcf if the price was decontrolled. He said that he could not.

Mr. President, decontrol would impose a severe hardship, and I am happy to say that the President cannot decontrol natural gas as he did oil. If he chooses to decontrol natural gas, he must submit it to Congress. I am serving notice here, as I have once before, that the last filibuster on that Natural Gas Policy Act which Senator HEINZ will recall because he and I were among those who slept in the cloakroom for 3 or 4 nights during that one, will be like child's play compared to the one that will take place on this floor if there is any effort to decontrol natural gas any faster than it is being decontrolled right now.

Mr. President, immediately decontrolling natural gas prices would be a grave mistake which would impose further hardships upon Americans without any hope that it will eventually lead to the production of more natural gas.

The current situation demonstrates that fact. Prices are already increasing under the phased decontrol provisions of the Natural Gas Policy Act of 1978.

Mr. President, we are phasing out the price of natural gas right now and I am not very proud of the vote I cast on that right now. I wish I could get it back.

In 1978, the average wellhead price of natural gas was 90.5 cents Mcf. In December 1980, with phased decontrol under the Natural Gas Policy Act, that average had risen to $1.61 per Mcf, an increase of 77 percent. During that same time, however, domestic production barely increased at all, going from an annual production of 19.122 trillon cubic feet in 1978 to 19.295 trillion cubic feet in 1988. That is an increase of 0.9 percent.

Remember that we were told that if we would just decontrol gas, we would find all of it we wanted, but, domestic production has increased only 9/10th of 1 percent since decontrol began. Remember also that the pricing scheme of the NGPA provides every incentive necessary to produce new natural gas and even greater incentives for high-cost gas, or gas which is difficult or risky to produce.

Bear in mind also, Mr. President, that section 102 of the act allowed a price of $1.75 per Mcf for new gas beginning in April, 1977, with inflation adjustments after that, at the rate of inflation plus 3 percent. So prices have been rising by 15 to 17 percent since that time.

Consider the effects of decontrol. The country holds gas reserves of about 200- to 250-billion Mcf. With decontrol, all of that known gas goes up in value by about $5 an Mcf, which means that is a windfall for the oil and gas industry of this country on an order of a trillion dollars.

Section 107 of the act allowed that price for gas from deep wells and also allowed the Federal Energy Regulatory Commission to establish special prices for other high cost gas. So decontrolling natural gas would only provide a windfall for the production of gas which has already been found. It would not encourage production any more than the Natural Gas Policy Act. It would simply increase value of gas already found by hundreds of billions of dollars.

Furthermore, if the oil companies recent acquisitions are any indication, I can tell my colleagues that they will use this money to buy up everything in sight.

I remember during the windfall profit tax debate, the oil companies opposed that tax because, they said, they needed that money to explore for oil and develop synthetic fuel. What have they done? Just in the last few days, they have been repeating the pattern already occurring as a result of oil decontrol. We have become familiar with the news reports, for example, that Standard Oil Co. of California offered to buy Amax, Inc., for $4 billion and that Sohio, which already owns the Old Ben Coal Co., has agreed to purchase the Kennecott Corp. for $1.77 billion. Gulf has also offered to buy Kemmerer Coal and the coal holdings of Republic Steel. The oil companies made one-third of all corporate profits last year.

Seagrams sold its oil interests to buy St. Joe Minerals, although it now appears that it will not succeed. That is $8 billion in the last 60 days offered by the oil companies for nonrelated industries.

Mr. President, it is especially significant that these are purchases, not mergers. The oil companies declared that they needed oil decontrol to get the money to find more oil. Well, they got a lot more money, and, rather than using it to find more oil, they are using it to acquire other companies.

This strategy is especially troublesome in the current economic situation, which requires new investment to enhance productivity. The problem is sufficiently worrisome that we are about to consider a tax bill loaded with provisions designed to encourage new investment. It would be completely inconsistent to decontrol natural gas, take money from those who might make such investments, and give it to companies which will not. That is a breach of faith.

Consider the current economic situation in the world, which, in this administration's view, means we must have more investment capital. So, in a few days or a few weeks or a few months, we will consider a tax bill, the main reason for which is to try to stimulate the economy by inducing people to invest more money. Can we, at the same time, take money by decontrolling gas, the equivalent of the highest tax increase ever imposed on the American people, and give it to the oil industry that takes money from those who might otherwise invest it in another industry, which is supposed to be the whole reason for this administration. It would be inconsistent with this administration's desire to cut taxes.

I can remember when my mother used to complain because our gas bill was $3.50. The other day, I asked a constitutent whether he had received $100 gas bill yet.

He said, that he had not, because he had gotten some $200 and $300 gas bills.

Last January my bill was $156, and that is no big home. Next January, if the price of natural gas is decontrolled, my gas bill will probably be between $400 and $500.

So what we are talking about here is a very serious matter for about 99 percent of the American people.

Finally, Mr. President, consider the ultimate impact on gas price, which would track the Btu equivalent of oil

prices, which, in turn, are dictated by the OPEC cartel. I have spoken of this many times. Thirteen oil ministers from 13 nations sit around the table and decide what the American people are going to pay for oil. When you decontrol gas, they will be deciding what you are going to pay for gas, too.

We have some fine friends in that cartel—Iran and Iraq, for example. You know how they have our best interests at heart when they are setting those prices.

In conclusion, decontrol would be a terrible disaster for the consuming public of America; and those who heat their homes with heating oil are already suffering terribly because of the decontrol of oil prices. Decontrolling natural gas prices would make it even more staggering. Billions and hundreds of billions of dollars will be taken out of the pockets of the American people and transferred into the pockets of the oil companies who made one-third of all the corporate profits made in America last year.

Between now and 1985 we are going to send the OPEC cartel, the equivalent of one-half the value of all the stocks on the New York Stock Exchange. Talk about a transfer of wealth from people who cannot afford it—all in the name of some misguided idea about the free marketplace. The free marketplace is fine, but we should not use it as a kneejerk, litmus test when there is no free market and there is not going to be a free market because of the operation of the OPEC cartel.

A recent study by Energy Action estimated that immediate decontrol would add $626 billion to natural gas prices. More American households depend on natural gas for heating than on any other fuel. In the regions of the country where natural gas use is most intensive, the gas bill for the average household would increase by between $6,000–$7,000 between 1981 and 1985. Energy Action estimated that the greatest increases would occur in the West North Central and East North Central regions of the country, with respective increases of $6,750 and $7,788. This problem will be compounded by the increases in the price of finished products which require natural gas for processing. An example is the manufacture of automobiles, an industry heavily centered in the gas-dependent regions. The inevitable price increases would further depress that industry, thus negating the Federal aid which that industry has already received.

Finally, we must consider natural gas pricing in the international context, because decontrol would free natural gas prices to move up to the Btu-equivalent of the world price of oil. Therefore, decontrol would be a Government action removing protections of the domestic market and allowing that market to be manipulated by an acknowledged cartel. By comparison, before the end of this year, we will probably consider legislation to restrict car imports, even though evidence of unfair trade practices by foreign car manufacturers is less than compelling, and by no stretch of imagination it is as clear as OPEC's inflationary price manipulations. It would be absurd to remove one protection against an acknowledged cartel and to consider adding an import restriction on cars which might have slight justification and which would probably have an inflationary impact by removing cheaper cars from the market.

In short, there is no justification for decontrolling natural gas. It would severely damage the economy, and I urge my colleagues to support the amendment expressing the sense of the Senate that the pricing schedule of the Natural Gas Policy Act not be changed.

I thank the Senator for yielding me time.

Mr. HEINZ. Mr. President, I yield 4 minutes to the Senator from Idaho, without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. I thank the Senator for yielding.

Mr. President, I appreciate the opportunity to give some reassurances to some people who obviously are rather nervous about something, the exact substance of which I am not certain.

I have said repeatedly, and I will say now on the record—I have said it on the record before, and I will repeat it here today—that, so far as the chairman of the Energy and Natural Resources Committee is concerned, we have no expectation to deal with any question concerning the decontrol of natural gas this year. That is a matter of record.

To go beyond that slightly, this is not the time to debate the merits of energy policy on a bill that is totally unrelated to it, and I do not intend to take the time today to talk about energy policy in particular.

However, I do want to indicate that, from the examination of the budget materials that have been submitted to us both by the former administration and as updated by this administration, and as late as the hearings we are in the midst of now, both in the Energy and Natural Resources Committee and the subcommittees of the Appropriations Committee, the budget data reveal to us—and the plans of this administration are—that the Federal Energy Regulatory Commission will continue in its activity administering the provisions of the present legislation that governs the pricing of natural gas in this country.

So, it seems to me that to debate here today a sense-of-the-Senate resolution dealing with a very important part of the energy policy—but only a part of it—is both misplaced and premature.

I understand that the Senator from Pennsylvania, the manager of the bill, will make a motion, at the appropriate time, to table the pending amendment. I will support that motion to table, because I believe that this is not the time to settle the issue of the merits of the question of control or decontrol of natural gas.

There is a study commission which has indicated what the economic consequences will be of changing the pricing regime under which natural gas prices are now controlled; but I think it is clear that that does not mean that immediately on the heels of it they will come forward with a proposal for the immediate decontrol of natural gas.

So far as this Senator can make any assurance to the Members of the Senate on both sides of the aisle, that will not be done through my committee this year. There are no plans to do it. The administration has not asked us to do it.

From what I can discern from the plans of the administration, as revealed by the budgetary submissions with regard to the activities of the various subagencies of the Government that deal with this problem, they intend to be administering the law as it is now written with respect to the pricing of natural gas.

I have indicated that we may look at the Fuel Use Act to determine whether or not we should make any change in the mandatory conversions or allocations of various fuels, including natural gas; but that is totally separate from the issue of whether or not we are going to deal with the decision that Congress made last year to put natural gas on a path toward decontrol of natural gas.

So I hope that when we get to the point of voting on the motion of the Senator from Pennsylvania, we will vote not upon the merits of the issue of control or decontrol of natural gas but will vote upon the motion to table, with the expectation that the issue will be before us later. I hope the motion will be agreed to, so that we can enter that debate at the appropriate time and at the appropriate place.

Mr. HEINZ. Mr. President, I want to make it clear that a vote to table this amendment is not necessarily a vote against the merits of the amendment offered by Senator Exon. I am certain that some people who will vote for tabling would vote for the Exon amendment on its merits, were it offered at the appropriate time and place. Frankly, I feel that way about it.

So, Mr. President, I move to table the Exon amendment.

The PRESIDING OFFICER. The question is on the motion to table the amendment of the Senator from Nebraska.

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, I ask unanimous consent to yield to the Senator from Ohio for not to exceed 5 minutes without losing my right to the floor.

The PRESIDING OFFICER. Is there objection to debate being in order notwithstanding the pendency of a motion to table?

Without objection, it is so ordered.

The Senator from Ohio is recognized for 5 minutes.

Mr. METZENBAUM. Mr. President, I came over to support the amendment of the Senator from Nebraska because there cannot be any logical reason to be de-

controlling the price of natural gas in these economic times.

It takes us back to the period when the previous administration proposed to phase decontrol of the price of natural gas. They told us at that time that we had to have phased decontrol because there was a shortage of natural gas in this country and that they had to go out and drill for more gas.

It was hardly 24 hours after the phased decontrol became a reality that the oil companies and the natural gas companies, which are really one and the same, took the caps off their wells and suddenly there was a glut of natural gas in this country. They called it a bubble.

What they did was hold back their product from the marketplace to force up prices. They were successful in doing just that. Then they had to say there was a glut and it was embarrassing to them. But the price continued to go up, and there was plenty of natural gas.

Now we find that the natural gas companies are constantly hammering away at the idea that everyone should convert to natural gas.

But despite all of the price increases, nothing has really happened. The oil and gas companies have not found that much more natural gas. But they have raised the price, and they have taken the caps off the fields where the gas was all the time.

There were 15 separate Government reports indicating that there was an adequately supply of natural gas at the time the Congress considered phased decontrol but that the gas companies were holding it back.

Now we are talking about the possibility of decontrolling natural gas prices entirely. One report says that immediate decontrol will cost the American people $600 billion. Another report indicates that the price of natural gas will double, and I do not doubt any of those assertions. As a matter of fact, a spokesman for Sohio, Standard Oil Company of Ohio, was making a speech in Cleveland the other day, and he stated:

Mossler predicted, "Today a $100 monthly bill for natural gas will be $1,000 in 1990 if nothing changes."

It goes on to say,

And we have to prevent that.

Mossler said that the Government must encourage the maximum domestic production and the consumer must conserve that. Yet, every time the consumer conserves heat, the gas companies have increased their prices that much more claiming they needed it in order to achieve a fair return on their investment.

Decontrolling the price of natural gas would be similar to decontrolling the price of oil.

All that decontrol resulted in was higher prices for the oil companies and the American consumer wound up paying the price.

When we originally had the issue about decontrolling the price of natural gas and phasing it in, as the Carter administration did, they told us that we should not be using natural gas for industrial boilers and that we should not use oil for industrial boilers, that we should use coal, which is in very abundant supply, and much of which comes from my own State. But immediately after we passed the matter of phasing out controls, what happened? Suddenly, Mr. Schlesinger and his team reversed signals said, "Now, we should use more gas for industrial boilers, and that is the way of backing out of oil."

The American people have consistently been misled. The American people have been consistently taken advantage of, and the American people cannot afford to have the price of natural gas decontrolled.

This economy cannot tolerate the decontrol of oil. But if oil decontrol is compounded by the decontrol of natural gas that would indeed be an unbearable burden.

When some of us argued that President Reagan's decision to accelerate the decontrol of the price of oil would raise the inflation rate 1.2 to 1.4 percent, it was pooh-poohed.

But the most recent figures that came out indicate that we were right on target and if anything maybe we were a bit low.

I feel very strongly that the amendment of the Senator from Nebraska, the attachment he would make to this bill, is in the right order.

I think a message should be sent to the administration. As this Senator has said on previous occasions in the Chamber, if there should be an effort to decontrol the price of natural gas, I know that many other Senators would join me in causing a debate on that subject to extend through the days and nights of the Senate.

The Senate cannot tolerate that. I believe we should get on about our business, and I hope that the administration does not see fit to send any action up to this Congress that would effectively decontrol the price of natural gas.

The PRESIDING OFFICER. The Senator's time has expired.

The Senator from Pennsylvania.

Mr. HEINZ. Mr. President, I ask unanimous consent, without losing my right to the floor, to yield 5 minutes to the Senator from Texas.

The PRESIDING OFFICER. Is there objection to the Senator from Texas proceeding for 5 minutes during the pendency of a motion to table?

Without objection, it is so ordered.

Mr. EXON. A parliamentary inquiry.

Mr. BENTSEN. Mr. President, I wish the Chair would not wait so long for that objection, that we move a little earlier on that, if I may.

The PRESIDING OFFICER. Does the Senator from Texas yield for an inquiry?

Mr. BENTSEN. I yield without losing my right to the floor.

The PRESIDING OFFICER. The Senator has that right.

Mr. EXON. Mr. President, the motion to table has been made by the Senator from Pennsylvania. Is that correct?

Mr. HEINZ. It has been withheld.

The PRESIDING OFFICER. The motion to table has been made.

Mr. EXON. Mr. President, I ask for the yeas and nays on the motion to table.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. EXON. I thank my friend from Texas.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mr. BENTSEN. Mr. President, I rise to oppose the amendment of my good friend from Nebraska.

As he probably knows, and I am sure the Senator from Ohio knows, this is one of the most emotional and controversial issues that we can have before the Senate.

I can well recall the debate in 1977 when we went weeks on end debating this issue. I can remember going on through the night as we discussed it. I can recall Senators being awakened and brought here to vote, coming into the Chamber at 3 a.m. to vote on this issue.

That is the kind of a tough, controversial issue this is.

My friend from Ohio says that despite the N.G.P.A. they have not found that much new gas. But I understand that we have had an unprecedented amount of production from below 15,000 feet. We are not having the brownouts we had before and there has even been a net increase in the amount of new gas reserves in this country. We have not been able to accomplish that in oil.

What we have accomplished is to buy some time while we try to make the transition to alternative sources of energy. But it is controversial in every respect. I do not know of any issue that is tougher to iron out on the floor of the Senate.

Are we going to say, without any benefit of hearings on how we might improve the act, make it work any better, that we are going to vote on it now and say it is perfect?

Is there no little change we could make in that piece of legislation? With the time and the experience we have had in seeing which parts of it worked and which were inequitable can we not determine how the act can be improved? We still have time to improve it for the consumer, for the producer, and for industry.

But how do we do that? We do it with hearings, where we let all segments of our society be heard. There can be some improvement. I would assume, for all of these people.

I do not believe we should short-circuit that process.

I do not believe we should close the door on that possibility before we even have the chance to explore it. We should be more deliberative about evaluating our Nation's energy policies.

I am unaware of any decisions that have been made to completely decontrol the price of natural gas, as the distinguished sponsor of the amendment would have us believe. There may be some improvements we can make, and I certainly hope that all concerned will be able to set aside some of the emotion

of this issue so that we can look at improving our Nation's energy supplies, particularly in gas.

Finally, we have to ask ourselves, is this amendment germane to the export trading bill which it hopes to amend? Clearly it is not germane. It is rather an attempt to push through the Senate an early end to the debate on natural gas before it even begins.

So I hope my colleagues will be more deliberative on this emotional issue and reject this amendment of my good friend from Nebraska.

I thank the distinguished Senator.

The PRESIDING OFFICER. The question is on agreeing to the motion to table.

Mr. HEINZ. Mr. President, I ask unanimous consent that the Senator from Washington (Mr. JACKSON) be recognized for not to exceed 5 minutes during the pendency of the motion to table.

The PRESIDING OFFICER. Is there objection to the Senator from Washington proceeding for 5 minutes notwithstanding the pendency of a motion to table? No objection being heard, the Senator from Washington is recognized for 5 minutes.

Mr. JACKSON. Mr. President, I thank the senior Senator from Pennsylvania.

I just learned of this amendment a few minutes ago. I believe the timing of the amendment and the procedure here are not wise. As the major author of the amendments to the original Natural Gas Act of 1937, I must speak my mind.

Mr. President, may I say that I agree wholeheartedly with the substance of the pending amendment. I want to report, as we all know I am sure, that the Natural Gas Policy Act is indeed working. There are more rigs out drilling for gas now than at any time in history. We had a net increase in domestic natural gas production last year for the first time, Mr. President, in years.

However, I must disagree with pursuing this amendment at this time, and I emphasize "at this time." The chairman of the Energy Committee, Mr. MCCLURE, has urged the administration not to pursue legislation for decontrol at this time. So, may I point out, Mr. President, Has the chairman of the House Energy and Commerce Committee, Mr. DINGELL? And, if I may add. I also share the view of the chairmen of the Senate and House committees.

I think we are all in agreement that the act is working reasonably well. It may not be perfect, but it is indeed achieving the purpose for which the legislation was intended. It is my view, Mr. President, that tampering with it will create uncertainty, and that is the last thing we need.

Now is not the proper time, nor is this the proper vehicle, to pursue this issue.

If the administration chooses not to heed our collective advice and sends us a bill I want to say right here and now that I will oppose it. I do not mean just ordinary opposition. because I feel very deeply about this subject. I believe that our collective efforts reached an equitable result. We were able to achieve a bipartisan compromise. Our differences of opinion were fought out and resolved.

I think the administration certainly should get the very clear message that amending the Natural Gas Policy Act would not be an easy task. We want to make that very clear.

I would join the ranks of those who would talk a long time, or at length, or any other way you want to describe any sort of extended debate, regarding any decontrol bill.

Finally, Mr. President, this resolution does not provide the proper forum, or afford us time for adequate preparation to discuss the hundreds of issues we would need to discuss in connection with such an important debate.

I will, therefore, support the tabling motion. I want to make it clear why I am supporting it. I must state categorically that I do not oppose the substance of the amendment, but I indeed oppose the procedure here which I do not think gives the consumers, the producers, and the public interest as a whole an opportunity to be heard, to properly ventilate all of the matters that are relevant and pertinent to this matter.

The PRESIDING OFFICER. The question is on agreeing to the motion to table. The yeas and nays have been ordered——

Mr. HEINZ. Mr. President, I ask unanimous consent that during the pendency of the motion to table I may yield first 2 minutes to the Senator from Massachusetts (Mr. TSONGAS).

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. The Senator from Massachusetts is recognized for 2 minutes.

Mr. TSONGAS. Mr. President, this amendment presents a dilemma for those of us who are from the Northeast and whose States are reasonably dependent upon natural gas.

But I share the view of the Senator from Washington, that it is premature to bring the issue up like this without serious debate and consideration. I think it does not do justice to the complexity of the issue.

I happen to support decontrol in principle for the obvious reason that energy ought to be priced at its replacement cost in order to assure efficient use and sufficient development of energy. But the specific question of natural gas decontrol depends on a great deal of information not yet available regarding the competitiveness of natural gas markets, projected supply response, availability of substitutes, adequacy of programs to protect the poor, and interregional transfers of wealth. I think that faced with an attempt by the President to deregulate natural gas suddenly, I would join with the Senator from Washington in the extended debate and oppose efforts to eliminate the Natural Gas Policy Act. But I think the issue today is the export trading companies.

The likelihood is that the President will not seek to deregulate natural gas this year. The chairman of the Energy Committee has said he does not think that will take place either. I think on the merits I agree with the Senator from Nebraska but given the issue of time and place rather than substance, I will vote to table and urge my colleagues to do the same. However, I reserve my right to join with the Senator from Nebraska in the future were there to be an attempt to deregulate. But I want to distinguish between the substance of the issue and what indeed we are addressing here today.

I thank the Senator from Pennsylvania.

Mr. HEINZ. Mr. President, I ask unanimous consent that the Senator from Nebraska (Mr. EXON) be yielded 2 minutes without my losing my right to the floor during the pendency of the motion to table.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. The Senator from Nebraska is recognized.

Mr. EXON. I thank the Chair, and I thank my friend from Pennsylvania. I also wish to thank the wide range of support I am receiving from my colleagues on the floor for what I am trying to do, but not now.

It brings to mind the old story that I am all for the church but I am not going to give to it because I do not like the location. The fact of the matter is I do not want the new church in the first place.

I am amazed to hear on the floor some of the people who conceded they put together the Natural Gas Policy Act of 1978 saying we should not tamper with it.

Mr. President, this sense-of-the-Senate resolution does not tamper with it at all. It says it was a good act and it says we should continue that. That is all it says.

Let me read it again:

It is the sense of the Senate that the schedule of the phased decontrol of natural gas prices embodied in the Natural Gas Policy Act of 1978 continues to be sound public policy which should not be altered.

I am patting them on the back for the good job they did. and they objected for reasons—unless they are indeed intending to change that well-thought-out measure that they enacted in 1978.

I urge my colleagues to vote against the tabling motion.

I thank my friend from Pennsylvania.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Pennsylvania to lay on the table Mr. EXON's amendment (UP No. 59).

The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. DURENBERGER), the Senator from Florida (Mrs. HAWKINS), and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Illinois (Mr. DIXON), the Senator from Kentucky (Mr. HUDDLESTON), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I further announce that the Senator from New Jersey (Mr. BRADLEY) is absent on official business.

The PRESIDING OFFICER (Mr. ABDNOR). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 66, nays 27, as follows:

[Rollcall Vote No. 80 Leg.]

YEAS—66

Abdnor	Goldwater	Melcher
Andrews	Gorton	Mitchell
Armstrong	Grassley	Murkowski
Baker	Hatch	Nickles
Bentsen	Hatfield	Nunn
Boren	Hayakawa	Percy
Boschwitz	Heflin	Pressler
Burdick	Heinz	Quayle
Byrd, Harry F., Jr.	Helms	Rudman
	Humphrey	Schmitt
Cannon	Jackson	Simpson
Cochran	Jepsen	Specter
Cohen	Johnston	Stafford
D'Amato	Kassebaum	Stennis
Danforth	Kasten	Stevens
DeConcini	Laxalt	Symms
Denton	Leahy	Thurmond
Dole	Long	Tower
Domenici	Lugar	Tsongas
East	Mathias	Wallop
Ford	Mattingly	Warner
Garn	McClure	Weicker
Glenn		

NAYS—27

Baucus	Exon	Pell
Biden	Hart	Proxmire
Bumpers	Hollings	Pryor
Byrd, Robert C.	Inouye	Randolph
Chafee	Kennedy	Riegle
Chiles	Levin	Roth
Cranston	Matsunaga	Sarbanes
Dodd	Metzenbaum	Sasser
Eagleton	Moynihan	Zorinsky

NOT VOTING—7

Bradley	Hawkins	Williams
Dixon	Huddleston	
Durenberger	Packwood	

So the motion to lay on the table UP amendment No. 59 was agreed to.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. McCLURE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, will the distinguished manager of the bill yield to me so that we may take care of another matter?

Mr. HEINZ. I yield.

SENATE CONCURRENT RESOLUTION 17—PROVIDING FOR ADJOURNMENT OF THE CONGRESS FROM APRIL 10, 1981, TO APRIL 27, 1981

Mr. BAKER. Mr. President, I send to the desk a concurrent resolution and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the concurrent resolution.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 17) providing for an adjournment of the Congress from April 10, 1981 to April 27, 1981.

Mr. BAKER. Mr. President, I have conferred with the distinguished minority leader. I believe he is agreeable to disposing of this matter at this time, and I hope that the Senate can dispose of this resolution so we can send it to the other body at this time.

The concurrent resolution (S. Con. Res. 17) was considered and agreed to as follows:

Resolved by the Senate (the House of Representatives concurring), That when the two Houses adjourn on Friday, April 10, 1981, they stand adjourned until 12 o'clock noon on Monday, April 27, 1981.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

GRAYMAIL LEGISLATION: PROTECTING NATIONAL SECURITY IN CRIMINAL CASES

Mr. BIDEN. Mr. President, I was pleased to note last week in reading the Baltimore Sun that the Justice Department is implementing the so-called graymail legislation for the first time in a case in Baltimore. That case involves a former CIA agent charged with embezzling $60,000. The former agent's defense is that the CIA authorized the loans for secret CIA projects. Of course the defendant intends to use that defense as a pretext for pretrial discovery that will force the Government to disclose classified information and "graymail" the Government into dismissing the case. The Classified Information Procedures Act which we developed in the Judiciary Committee last year addresses this problem by providing procedures to protect classified information and restrict frivolous discovery motions in these kinds of cases.

I ask unanimous consent that an article from the April 2 Baltimore Sun describing this case be printed in the RECORD:

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NEW LAW ON CLASSIFIED DATA MAKES DEBUT IN JOLLIFF CASE

A federal judge yesterday appointed a caretaker for secret documents that may be sought by a former CIA employee as evidence in his criminal case, activating for the first time here a new law to guard against public disclosure of classified information.

The temporary appointment was made by U.S. District Court Judge Frank A. Kaufman in the case of Wade A. Jolliff, Jr., who is charged with impersonating a CIA agent and fraudulently obtaining more than $65,000 in loans for purported CIA "operations" while working as head of security at the University of Maryland's Baltimore campus.

Mr. Jolliff, who the FBI said worked for the CIA until 1972, disputes the charges, contending that there are CIA records that will prove he was actually on assignment for the agency while employed at the university's Baltimore campus.

However, concerned that Mr. Jolliff—who had access to secret information while working for the CIA—may be seeking classified information, federal prosecutors have asked that procedures outlined in the Classified Information Procedures Act be followed.

The law, enacted last October, would require Mr. Jolliff to disclose in writing what material he is seeking and to prove the relevance to his case of any secret material he may request. The law also requires the appointment of a court security officer to protect any classified documents.

Judge Kaufman temporarily assigned Mary Schwartz, a member of the Security Programs staff of the U.S. attorney's office, to that duty so the case could proceed in time for the April 21 trial. A permanent caretaker will be appointed some time next week from a list of candidates provided by the Justice Department, a Justice Department spokesman said.

The duties of the security officer include making certain that the area where the documents will be reviewed—for example, the judge's chambers—is secure and that no one who does not have CIA clearance sees the information.

According to FBI records, Mr. Jolliff worked 10 years for the CIA until he left in 1972 to work for UM as head of security at the Baltimore campus.

In the grand jury indictment, Mr. Jolliff was accused of obtaining loans from B. Dixon Evander Associates, Inc., an insurance firm, and from other investors in an alleged scheme in which he purported to solicit funds for secret CIA projects.

HEROIN ADDICTION AND STREET CRIME

Mr. BIDEN. Mr. President, as ranking minority member of the Senate Judiciary Committee I am continuing to pursue an issue I began addressing 2 years ago as chairman of the Subcommittee on Criminal Justice. Two years ago the subcommittee began to notice an increase in Southwest Asian heroin in the urban Northeast. I am convinced that heroin addiction is a prime contributor to much of the increasing crime that occurs in this country.

This opinion is supported by most streetwise cops and prosecutors, but now we have supportive research which shows the appalling relationship between heroin addiction and street crime.

A study done by Prof. James Inciardi of the University of Delaware showed that 356 active heroin users were:

First, responsible for 118,134 crimes in 1 year;

Second, over 95 percent reported committing illegal activity in the year period;

Third, 90 percent relied on criminal activity as a means of income; and,

Fourth, most disturbing, is that only 1 of every 413 crimes committed resulted in an arrest.

Additional research completed this past year at the Temple University School of Medicine by Dr. John C. Ball, Dr. Lawrence Rosen, Dr. John A. Flueck, and Dr. David Nurco showed that 243 heroin addicts committed almost 500,000 street crimes in 11 years.

Their research also showed that when these addicts were not dependent on heroin, there was an 84-percent decrease in criminality.

These two studies clearly show that if we could ever control heroin addiction or even reduce it, we would see an appreciable reduction in criminality.

As the new administration begins its war on violent crime it also proposes to cut $5.4 million requested previously by the Drug Enforcement Administration for its Southwest Asian heroin interdiction program, elimination of the State and local drug coordination program, $5.9 million cut for the Federal, State, and local task force programs, and budget cuts to the State Department's international narcotic management program that supports crop substitution overseas. In the treatment area, there will be major cuts in treatment slots and prompted Mr. Julio Martinez of the New York State Division of Substance Abuse Services to say in the New York Times on March 9, 1981:

. . . The cuts in antidrug funding will grind New York's fight against drugs to a near halt and possibly force thousands of addicts and users onto the streets . . .

I am fearful that the administration does not seem to recognize the obvious relationship between heroin and crime. I only point to the alarming increase in crime in the Northeast cities which are also experiencing a flood of cheap Southwest Asian heroin on their streets. In New York City this past year mortality rates due to heroin overdose were up 25 percent and the price of street heroin decreased because of its easy availability.

Mr. President, I ask unanimous consent that the two research documents I refer to be printed in the RECORD in their entirety.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

HEROIN USE AND STREET CRIME

(By James A. Inciardi)

The relationship between heroin use and street crime has been studied for the better part of this century, but the findings have been inconclusive. Research in this area has been limited to analyses of criminality in terms of arrest data, and samples have been drawn only from officially known populations of drug users. The present study focuses on a sample of 356 active heroin users from Miami, Florida, and data have been collected describing their officially known and self-reported criminal activity. The data indicate that, while active heroin users are heavily involved in street crime, any relationship between drug use and crime is much more complex than has been generally believed. The findings of the research suggest that the wrong questions may have been asked in previous studies of the drugs/crime nexus.

The relationship between heroin use and street crime represents an issue that has long been studied, argued, and reexamined—yet few definitive conclusions are apparent today. For more than six decades, researchers and opinion makers have addressed the subject, asking such questions as, Do heroin use and addiction cause crime? If so, what ought to be done to manage the problem? Much of the research on this has attempted to determine the sequence of heroin use and criminal activity. Does addiction per se lead the user into a life of crime, or do the demands of the addict's life-style force him into criminal behavior? Or, alternatively, is heroin use simply an additional pattern of deviant activity manifested by an already criminal population? The catalog of research has been impressive, at least in terms of sheer quantity.[1]

The findings that have emerged, however, have led to a series of peculiar and contradictory perspectives. Some researchers have found that the criminal histories of their sample cases considerably preceded any evidence of drug use; thus, their conclusion has been that the heroin user is indeed a criminal, and should be treated as such. Others have found in their data that the sequence is in the reverse direction, and have offered us an "enslavement theory" of addiction. Within this perspective, it is suggested that the monopolistic controls over the heroin black market have forced the otherwise law-abiding user into a life of crime in order to support his habit. The answer to the "problem" is simple: Legalize heroin, and the need for crime is removed. And still a third group finds conflicting data: Some members of the samples were drug users first, other members were criminals first, and still others embraced both drug use and crime simultaneously. The conclusion here is that heroin use and crime may not be related at all, but instead result from some third, unknown variable, or some complex set of factors that pervade the user's operating social milieu and greater environment.

Yet any conclusions, hypotheses, and theories from these efforts become meaningless when one considers the awesome biases and deficiencies in the information that has been generated. Data-gathering enterprises on criminal activity have usually restricted themselves to the heroin users' arrest histories, and there can be little argument as to the inadequacy of official statistics as measures of the incidence and prevalence of criminal behavior. Those studies that have gone beyond arrest figures to probe self-reported criminal activity invariably have been limited to small samples of either incarcerated heroin users or users placed in treatment programs. And the few efforts that have been made to locate active heroin users have generally examined their samples' drug-taking behaviors to the exclusion of their drug-seeking behaviors.

In an effort to generate a preliminary and more realistic data base descriptive of the criminal activities of active heroin users, the present study focused during a twelve-month period ending in 1978 on the street community as an information source, using active cases in Miami, Florida.[2]

METHOD

The peculiar life-style, illegal drug-taking and drug-seeking activities, and mobility characteristics of active drug users preclude any examination of this group through standard survey methodology. A sample based on a restricted quota draw was rejected in favor of one derived through the use of a sociometrically oriented model.

In the field site, the author had established extensive contacts within the subcultural drug scene. These represented "starting points" for interviewing. During or after each interview, at a time when the rapport between interviewer and respondent was deemed to be at its highest level, each respondent was requested to identify other current users with whom he or she was acquainted. These persons, in turn, were located and interviewed, and the process was repeated until the social network surrounding each respondent was exhausted. This method, as described, restricted the pool of users interviewed to those who were currently active in the given subcultural knit in the street community and who were "at risk." In addition, it eliminated former users as well as those who were only peripheral to the mainstream of the subcultural half world.

This selection plan does not guarantee a totally unbiased sample. However, the use of several starting points within the same locale eliminated the difficulty of drawing all respondents from one social network. Confidentiality was guaranteed to the respondents, interviewing was done in an anonymous fashion, and each respondent was paid a fee for participating.

This sampling technique resulted in an initial study population of 356 heroin users (see Table 1) who were active in the free community at the time of the interview. Not unlike other populations of drug users, most of the sample cases were males (67 percent), and the majority of both the males and females were unemployed whites, clustered in the eighteen- to thirty-four-year-old age group (see Table 1). Males and females did, however, evidence many pronounced differences in their criminal career patterns.

TABLE 1.—SELECTED CHARACTERISTICS OF 356 ACTIVE HEROIN USERS

Characteristics	Males (n=239)	Females (n=117)
Age:		
17 and under	0.8	3.4
18 to 24	19.2	34.2
25 to 34	64.0	51.3
35 to 49	14.2	9.4
50 and over	0.8	1.7
Median (years)	27.9	26.9
Ethnic background:		
White	52.3	55.6
Black	33.5	24.8
Hispanic	14.2	16.2
Other		3.4
Years of school (median)	11.8	11.7
Employment status:		
Currently employed	49.3	41.9
Unemployment	48.5	53.8
Not in labor force	2.2	4.3
Marital status:		
Never married	45.6	46.2
Married	25.9	13.7
Divorced/separated	26.4	36.8
Widowed	1.7	2.6
No data	0.4	0.9

DRUG USE PATTERNS

The heroin users sampled in this study had long histories of multiple drug involvement, following clear sequential patterns of onset and progression. Both males and females began the use of drugs with alcohol. Their first experiences with alcohol intoxication occurred at median ages of 13.3 and 13.9 years, respectively, with 39.3 percent of the males and 21.4 percent of the females having such an experience before age 12. Furthermore, as indicated in Table 2, progression into the other major drugs followed identical sequential patterns for both sexes. For example, based on median ages of onset, alcohol use was followed by initial drug abuse experimentation at 15.2 years of age, followed by marijuana use, barbiturate use, heroin use, and cocaine use:

TABLE 2.—DRUG USE HISTORIES

Drug use characteristics	Males (n=239)	Females (n=117)
Age of 1st alcohol use (median)	12.8	13.8
Age of 1st alcohol high (median)	13.3	13.9
Ever used alcohol (percent)	95.8	98.3
Age of 1st drug (excluding alcohol) use (median)	15.2	15.2
Age of 1st marihuana use (median)	15.5	15.4
Ever used marihuana (percent)	99.2	99.1
Age of 1st barbiturate use (median)	17.5	17.0
Ever used barbiturates (percent)	84.9	88.0
Age of 1st heroin use (median)	18.7	18.2
Age of 1st cocaine use (median)	19.7	18.7
Ever used cocaine (percent)	92.9	92.3
Median number of drugs ever used[1]	10.3	10.5
Median number of drugs "currently" being used[2]	5.0	5.6
Ever treated for drug use (percent)	56.9	56.4
Currently in treatment (percent)	.4	.9

[1] Includes alcohol, heroin, other narcotics, sedatives, stimulants, antidepressants, hallucinogens, analgesics, and solvents/inhalants.

[2] "Current" use refers to any intake during the 90 days before the interview.

Austin and Daniel J. Lettieri, *Drugs and Crime: The Relationship of Drug Use and Concomitant Criminal Behavior* (Rockville, Md.: National Institute on Drug Abuse, 1976); S. W. Greenberg and Freda Adler, "Crime and Addiction: An Empirical Analysis of the Literature, 1920–1973." *Contemporary Drug Problems*, vol. 3 (1974), pp. 221–70; and James A. Inciardi, "The Vilification of Euphoria: Some Perspectives on an Illusive Issue," *Addictive Diseases*, vol. 1 (1974), pp. 241–67.

[2] These data were generated by DHEW grant No. 1–R01–DA–0–1827–02, from the Division of Research, National Institute on Drug Abuse.

Substance	Median onset age	
	Males	Females
Alcohol use	12.8	13.8
Alcohol intoxication	13.3	13.9
First drug abuse	15.2	15.2
Marijuana use	15.5	15.4
Barbiturate use	17.5	17.0
Heroin use	18.7	18.2
Cocaine use	19.7	18.7

Curiously, while the females began their careers of substance use one year later than the males, their progression was more rapid and the extent of their drug involvement seemed to be greater. A median of 5.9 years separated the males' initial alcohol experimentation from their first use of heroin at age 18.7. With females, the onset of heroin use was at age 18.2, only 4.4 years after the first use of alcohol. Furthermore, as is shown in Table 2, the females were using a slightly wider variety of drugs than were the males.

CRIMINAL HISTORIES

Early involvement in criminal activity was characteristic of the great majority of the sampled heroin users. As shown in Table 3, 99.6 percent of the males and 98.3 percent of the females reported having ever committed a crime, with the median age of the first criminal act preceding the sixteenth year. The first crimes committed were generally crimes against property, although the specific kind of property crime varied between males and females.

As shown in Table 3, burglary was cited most often by males as the first crime (25.1 percent), followed by shoplifting (20.1 percent), other larcenies (11.7 percent), and drug sales (10.0 percent). In contrast, 38.5 percent of the females reported shoplifting as their first offense, followed by prostitution (18.8 percent) and drug sales (12.8 percent). It might also be noted here that the proportion reporting vehicle theft as the first crime was ten times higher among males than among females; the percentage of violent crime (robbery and assault) was also higher among the male group. For example, while 15.4 percent of the males specified robbery or assault as the first criminal offense, only 6.0 percent of the females indicated one or the other as the first offense.

TABLE 3.—CRIMINAL HISTORIES

Criminal characteristics	Males (n=239)	Females (n=117)
Ever committed offense (percent)	99.6	98.3
Age of first crime (median)	15.1	15.9
First crime committed (percent):		
Robbery	7.9	3.4
Assault	7.5	2.6
Burglary	25.1	5.1
Vehicle theft	9.2	0.9
Shoplifting	20.1	38.5
Other theft/larceny	11.7	6.9
Prostitution		18.8
Drug sales	10.0	12.8
Other/no data	8.1	9.3
Have arrest history (percent)	93.7	83.8
Age at first arrest (median)	17.2	18.3
Total arrests (median)	3.5	2.6
Ever incarcerated (percent)	81.2	62.4

Most of the heroin users studied here had arrest histories, but these typically began more than two years after the initiation of criminal activity (Table 3). Some 93.7 percent of the males reported having been arrested at least once, with the first arrest occurring at a median age of 17.2 years. Slightly fewer females (83.8 percent) had arrest histories, with the initiation into criminal justice processing beginning at a median age of 18.3 years. The data also indicate that the males had more frequent contacts with the criminal justice system (Table 3). The median number of arrests for the males was 3.5, with 81.2 percent having histories of incarceration. In contrast, the females reported a median of 2.6 arrests, with 62.4 percent having been incarcerated. Such differences might be explained by the younger age at which the males initiated their criminal activity and arrest histories, or by the slightly younger age of the female group. However, the expanded arrest figures below, reflecting the visible, nature of the males' criminal in the somewhat more serious, and hence more visible, nature of the males' criminal involvement. For example—

Nature of arrest	Median number of arrests	
	Males	Females
Crimes against property	1.6	0.5
Crimes against persons	.3	.2
Drug law violations	1.4	.8
Public order crimes	.2	1.1

While the male arrest data reflect a greater involvement in crimes against the person, property, or drug laws, the females were more often arrested for the less serious crimes against the public order, primarily prostitution. This would account for the higher rate of incarceration among the male group.

Patterns of drug use support

As indicated below, the heroin users reported a wide variety of sources of support for both their general economic needs and their drug use. For example—

[In percent]

Source of income	Males	Females
Family, friends	12.5	31.6
Legal employment	49.4	43.6
Public assistance	20.0	18.8
Criminal activity	97.4	94.9

While more than 90 percent of both groups relied upon criminal activity as a means of income, most had a second source of funds. However, some 98.7 percent of the males and 96.6 percent of the females reported some form of illegal activity during the twelve months before the interview, and more than 80 percent of this criminality was for drug use support (80.5 percent for males, 87.7 percent for females).

CURRENT CRIMINAL ACTIVITY

The data on current criminal activity clearly demonstrate not only that most of the heroin users were committing crimes, but also that they were doing so extensively and for the purpose of drug use support. Initially, some 98.7 percent of the males reported committing crimes during the twelve-month period prior to interviewer contact, with a median of 80.5 percent of such criminality undertaken for the purpose of supporting a drug habit.

As indicated in Table 4, the 239 male heroin users reported committing 80,644 criminal acts, averaging some 337 offenses per user. While this might be viewed as an astronomical sum, one must consider the relative proportions for each crime category. The violent crimes of robbery and assault, although reaching the considerable figure of almost 3,500, nevertheless represent only 4.3 percent of the total. Similarly, property crimes, while including some 17,846 thefts of various types, account for less than 25 percent of the total figure. On the other hand, a clear majority of the crimes by male heroin users were crimes without victims: Almost 60 percent of the criminal behavior reported here was drug sales, prostitution, gambling, and alcohol offenses, with an additional 8.1 percent of criminal activity involving the buying, selling, or receiving of stolen goods—a secondary level of criminality resulting, in most instances, from the users' initial involvement in property crimes.

TABLE 4.—CRIMINAL ACTIVITY DURING PAST 12 MO, 239 ACTIVE MALE HEROIN USERS

Crime	Total offenses	Percentage of total offenses	Percentage of sample involved	Percentage of offenses resulting in arrest
Robbery	3,328	4.1	46.9	0.3(n=11)
Assault	170	<.2	20.9	.6(n=1)
Burglary	4,093	5.1	69.0	.7(n=30)
Vehicle theft	398	.5	22.6	.5(n=2)
Theft from vehicle	877	1.1	29.3	.7(n=6)
Shoplifting	9,685	12.0	59.4	.2(n=15)
Pickpocketing	11	<.1	.8	
Prostitute theft	62	<.1	1.3	1.6(n=1)
Other theft	1,009	1.3	35.1	.5(n=5)
Forgery/counterfeiting	1,711	2.1	40.2	.4(n=6)
Con games	1,267	1.6	30.1	
Stolen goods	6,527	8.1	59.4	<.1(n=3)
Prostitution	2	<.1	.4	
Procuring	2,819	3.5	30.5	<.1(n=1)
Drug sales	40,897	51.0	91.6	<.2(n=93)
Arson	65	<.1	2.9	
Vandalism	58	<.1	8.8	1.7(n=1)
Fraud	185	.2	12.1	1.1(n=2)
Gambling	6,306	7.8	38.5	<.1(n=3)
Extortion	648	.8	10.0	
Loan sharking	463	.5	13.0	
Alcohol offenses	58	<.1	6.3	10.3(n=6)
All other	5	<.1	2.1	60.0(n=3)
Total	80,644	100.0	100.0	.2(n=189)
Mean number of offenses per subject	337			

These comments are not intended to minimize the amount of serious crime among heroin users. Rather, they emphasize that such criminality is more often victimless crime than predatory crime. On the other hand, these data also indicate that male heroin users have diverse criminal careers. Almost all (91.6 percent) were involved in the sale of drugs; almost half (46.9 percent) also engaged in robberies, 59.4 percent also engaged in shoplifting, and more than two-thirds (69.0 percent) were also burglars. It might also be added here that 42.7 percent of these subjects used weapons during the commission of all or some of their crimes, the usual weapon being a handgun.

Strikingly, the incidence of arrest among these 239 male heroin users was extremely low. Of the 80,644 reported crimes, only .2 percent (n=189) resulted in arrest. More specifically, consider the following ratios of crimes committed to ensuing arrests:

Crimes against persons	293:1
Crimes against property	273:1
Drug sales	440:1
Forgery/counterfeiting	285:1

In sum, considering all crime categories, one arrest occurred for every 427 crimes committed, with the highest proportion of arrests following alcohol offenses, fraud, vandalism, and prostitutes' theft from clients; the lowest levels of arrest were in cases of extortion, loan sharking, prostitution and procuring, pickpocketing, con games, arson, and dealing in stolen goods.

The level of criminal involvement among the female heroin users was also high, but with a different pattern (see Table 5).

TABLE 5.—CRIMINAL ACTIVITY DURING PAST 12 MO, 117 ACTIVE FEMALE HEROIN USERS

Crime	Total offenses	Percentage of total offenses	Percentage of sample involved	Percentage of offenses resulting in arrest
Robbery	573	1.5	17.1	0.5(n=3)
Assault	26	<.1	7.7	11.5(n=3)
Burglary	185	.5	20.5	1.1(n=2)
Vehicle theft	5	<.1	1.7	
Theft from vehicle	182	.5	18.8	.5(n=1)
Shoplifting	5,171	13.8	70.1	.3(n=13)
Pickpocketing	162	.4	4.3	
Prostitute theft	1,345	3.6	51.3	
Other theft	182	.5	20.5	.5(n=1)
Forgery/counterfeiting	888	2.4	29.9	.3(n=3)
Con games	251	.7	17.1	
Stolen goods	1,006	2.7	36.8	<.1(n=4)
Prostitution	14,307	38.2	72.6	.3(n=37)
Procuring	1,153	3.1	23.1	
Drug sales	11,289	30.1	81.2	.2(n=23)
Arson	88	.2	3.4	
Vandalism	3	<.1	1.7	
Fraud	34	<.1	6.0	
Gambling	574	1.5	22.2	
Extortion	41	.1	4.3	
Loan sharking	1	<.1	9	
Alcohol offenses	22	<.1	6.8	22.7(n=5)
All other	2	<.1	1.7	100.0(n=2)
Total	37,490	100.0	100.0	.3(n=97)
Mean number of offenses per subject	320			

Some 96.6 percent of the females reported the commission of crimes during the twelve months preceding the interview, with a median of 87.7 percent of the criminal activity engaged in to support a drug habit. The 117 female heroin users admitted responsibility for 37,490 crimes, with prostitution and drug sales accounting for more than two-thirds (68.3 percent) of the total. Like the males, the female group manifested considerable diversity in their offense behavior, with 81.2 percent admitting drug sales, 72.6 percent engaging in prostitution, 70.1 percent reporting shoplifting, and 51.3 percent indicating prostitute theft. Fewer females participated in crimes of violence, and, while many engaged in burglaries and other types of theft, such larceny was notably less frequent than among males. Females, however, tended to be arrested more frequently than males during this twelve-month study period, with a ratio of 1 arrest for every 387 crimes committed. The highest rates of arrest involved assaults and alcohol; most arrests were for prostitution and drug sales; no arrests resulted from 1,345 cases of prostitution theft; and the ratio of shoplifting crimes to arrests was 398:1 for the more than 5,000 cases.

Finally, fewer females used weapons during all or part of their offenses (18.8 percent), with the most common weapon being a knife rather than a gun.

DISCUSSION

These data suggest a number of considerations and implications relevant to the relationship between heroin use and crime, while at the same time indicating several areas for further research.

First, the data document a high incidence and diversity of criminal involvement among both male and female heroin users. The 356 persons studied here reported involvement in a total of 118,134 criminal offenses during a twelve-month period, most of these offenses committed for the purpose of supporting the economic needs of a drug-using career. Furthermore, while most of the criminal offenses were what are often referred to as victimless crimes, the 356 respondents were nevertheless responsible for some 27,464 instances of what the Federal Bureau of Investigation designates as index, or serious, crimes.[3] Numerous differences are apparent between males and females in this regard, with the males manifesting a greater involvement in predatory crime, especially violent predatory crime; however, the data also demonstrate that heroin users of both sexes manifest considerable participation in many different levels of criminal activity.

Second, it is evident in these data that arrest rates among heroin users are low. The 118,134 criminal events reported here resulted in a total of only 286 arrests, or a ratio of 1 arrest for every 413 crimes committed; with respect to the more serious index crimes, there was a ratio of 1 arrest for every 292 crimes. This low level of arrest is also apparent in the overall arrest histories of the subjects studied. Among the males, whose careers in crime spanned a median of 12.8 years, the median number of arrests was 3.5. Similarly, the median career in crime among the female heroin users was 11.0 years, and the median number of arrests was only 2.6.

Third, the data described here provide some information pertinent to the question about drug use and crime; namely, is crime a pre- or post-drug-use phenomenon? What the data suggest is that the question phrased in these terms is an oversimplification of a very complex phenomenon. By examining the median ages of initiation into various stages of substance abuse and criminal careers, the complexity becomes evident. For example—

	Males	Females
First alcohol use	12.8	13.8
First alcohol intoxication	13.3	13.9
First criminal activity	15.1	15.9
First drug abuse	15.2	15.2
First marijuana use	15.5	15.4
First arrest	17.2	18.3
First barbiturate use	17.5	17.0
First heroin use	18.7	18.2
First continuous heroin use	19.2	18.4

Among the males, there seems to be a clear progression from alcohol to crime, to drug abuse, to arrest, and then to heroin use. But upon closer inspection, the pattern is not altogether clear. At one level, for example, criminal activity can be viewed as predating one's drug-using career, since the median point of the first crime is slightly below that of first drug abuse, and is considerably before the onset of heroin use. But, at the same time, if alcohol intoxication at a median age of 13.3 years were to be considered substance abuse, then crime is clearly a phenomenon that succeeds substance abuse. Among the females, the description is even more complex. In the population of female heroin users, criminal activity occurred after both alcohol and drug abuse and after marijuana use, but before involvement with the more debilitating barbiturates and heroin.

In summary, these preliminary data suggest that an alternative perspective for research on the link between drugs and crime may be in order. Although the findings here are descriptive of only one population, which could be unique, they suggest that the pursuit of some simple cause-and-effect relationship may be futile. It is clear that heroin users are involved extensively in crime, and that their involvement is largely for the purpose of supporting the desired level of drug intake. It is also clear that users' initiation into substance abuse and criminal activity occurs at a relatively early age. But there are several things that are not clear. Do substance abusers, for example, alter the nature, extent, and diversity of their criminal behaviors at the onset of marijuana use, at the onset of heroin use, or after their initial criminal justice processing? Do adolescent predatory criminals alter the nature and extent of their criminal involvement at various stages of drug abuse? Does drug abuse involve a shifting from primarily predatory crime to victimless crime? Does drug taking result in an increase or decrease in criminal activity? And finally, does a drug-taking career fix the criminal careers of adolescents who might otherwise shift into more law-abiding pursuits as they approach young adulthood? These questions can be answered only by turning away from existing notions about the drug/crime nexus, generating a more comprehensive data base, pinpointing the locations where drug use and crime are highest, and circumscribing total criminal involvement at all stages of drug-using and non-drug-using adolescent careers.

[3] The FBI index crimes include homicide, forcible rape, aggravated assault, robbery, burglary, larceny-theft, and motor vehicle theft.

The Criminality of Heroin Addicts When Addicted and When Off Opiates

(By J. C. Ball, L. Rosen, J. A. Flueck and D. N. Nurco)

[Tables appear at end of article]

ABSTRACT

This study of 243 male opiate addicts has two broad objectives: (1) to ascertain the frequency and types of offenses committed by addicts during an 11 year period, while at risk, or "on the street"; (2) to compare criminality during addiction periods with criminality during periods off regular opiates.

It was found that these 243 addicts committed more than 473,738 offenses during their years at risk. The extent of their criminality was measured by the number of Crime-Days accumulated. A crime-day is a 24-hour period during which one or more crimes is committed (not including drug use or drug possession). The mean number of crime-days per year at risk per addict was 178.

With respect to criminal careers, it was found that 156 of the addicts were primarily engaged in theft, 45 were drug dealers and 36 were involved in assorted other crimes. For each of these groups, the extent of their criminality was markedly affected by their addiction status. Their average crime-days per year at risk when addicted was 248.0; when off regular opiates, it was 40.8. Thus, there was a six-fold increase in their frequency of crime when addicted.

A stepwise regression analysis revealed that criminality was correlated with demographic variables, but the dominant influence upon the extent of their crime was the amount of time addicted. In conclusion, the research significance and policy implications of these findings are reviewed.

INTRODUCTION

Overview of the research problem

There is rather general agreement among criminologists that an increase in criminality commonly occurs following the onset of heroin addiction in the United States (Chein et al, 1964; O'Donnell, 1966 and 1969; Ball and Snarr, 1969; Nash, 1973; Weissman et al., 1974; McGlothlin et al., 1978). Despite this overall consensus however, the dynamics of the relationship between opiate addiction and crime continues to be a matter of controversy. Among the questions which remain unresolved, three seem especially crucial:

(1) What is the temporal sequence of events regarding the onset of heroin addiction and the commencement of criminal behavior? (2) What are the types and frequencies of crimes committed by heroin addicts? (3) What impact does post-onset periods of abstinence or subsequent periods of addiction have upon criminality?

Although answers to these questions will not solve the social problem of heroin addiction in the United States which currently involves 550,000 individuals (Federal Strategy, 1979), the answers could provide a means of unraveling one difficult aspect of the problem—that involving criminal behavior. An answer to the first of these three questions is derived from a critical review of pertinent scientific reports. Answers to the second and third questions are provided by an analysis of the present research findings.

The issue of sequence reviewed

The issue of the temporal sequence of drug abuse and criminal behavior has been a topic of scientific concern for over 50 years. The reason for this interest has been primarily etiological—to determine which of these factors was the determining (or causal) one.

Most of the early investigators found little criminality before the onset of opiate addiction (Klob, 1925; Terry and Pellens, 1928; Pescor, 1943). Later studies, however, have shown a high probability of criminality preceding heroin addiction (Robins and Murphy, 1967; Jacoby et al., 1973; Chambers, 1974). Thus, Jacoby reports that 71 percent of heroin users in Philadelphia had a delinquency record prior to onset of their opiate use compared to 35 percent of all boys in the same city-wide age cohort who also had such records.

This difference in the sequence of events between the early and later studies suggests that there is no invariant relationship between heroin addiction and crime. Instead, it seems that the relationship is contingent upon the particular historical period and population of heroin addicts selected. Thus, if heroin is being introduced into a non-criminal or low-criminal population (e.g., medical professionals or middle-class adults) it would be highly unlikely to find criminality preceding heroin use. Conversely, higher levels of preexisting criminality among heroin addicts would be expected within a population with a high endemic crime rate (e.g., youthful lower class males in metropolitan slums). Support for this demographic and historical interpretation of the sequence issue is found in numerous studies of addict populations in which the sequence of onset of opiate use and the commencement of criminality differ. (See Ball and Chambers, 1970.)

It seems reasonable to conclude, therefore, that the issue of the sequence of unique events (first heroin use or a first act of delinquency) may be less significant than determining the continuing influences which sustain criminality and opiate addiction over a period of years or decades. This contention is supported by the fact that an initial onset experience of substance use (opiates, marihuana, alcohol, tobacco, etc.) often does not lead to continued use and dependence and, furthermore, that most citizens engage in one or more acts of delinquency during adolescence without becoming enmeshed in a criminal lifestyle.

Further conceptual impediments to crime-drug research

Before turning to consider the frequency and type of crimes committed by addicts and the impact of heroin addiction upon these crime rates, it is pertinent to comment upon several conceptual and methodological problems which confront researchers in this area.

Although there has been a notable increase in criminological research pertaining to heroin addiction in recent years which has produced a significant knowledge base, there still are unresolved conceptual problems which tend to obscure the fundamental scientific issues and, therefore, hamper the formulation of testable hypotheses and relevant research on this topic. Among the more pressing conceptual problems, four seem most apparent. These are (1) inappropriate use of a unitary factor causal model, (2) failure to distinguish between onset of deviance and its continuance as separate issues, (3) lack of cross-cultural and historical perspective, and (4) general neglect of abstinence periods in studying this relationship. Each of these conceptual issues will be discussed.

A pervasive conceptual problem which has seriously impeded the advancement of research with regard to the crime-drug relationship is use of a unitary causal model which posits that there is a single causal factor which will explain this relationship. Commonly, the researcher holds that heroin use "leads to" crime; or that crime "leads to" heroin use; or that both drug addiction and crime are caused by a single third factor. The belief that there is a single caused factor which will explain both crime and drug abuse appears to be a misapplication of the infectious disease model which seeks to identify a specific causal agent. But the concept of a single invariant causal agent is an inappropriate, and hence, fallacious, explanation for most human behavior. It is no longer meaningful to talk of the cause of crime, or the cause of drug use. There are various reasons why individuals engage in crime or become drug addicts.

A second conceptual problem involves the failure to distinguish between the onset of heroin use and the reasons for continuation of use over the years. These two phenomena are quite different. Thus the circumstances and influences which contributed to first use of heroin are quite different from those which support long-term addition to heroin. And so it is with criminal behavior: a first illegal act is quite different from a criminal career.

A third conceptual problem has far-reaching implications, although it involves rather straightforward findings from cross-cultural and historical research. This involves the fact that crime and opiate use exist independently of one another. Consequently, it is apparent that heroin use does not always promote criminal behavior, nor crime always promote drug use. Rather, a cross-cultural and historical perspective substantiates the proposition that there may, or may not be, a relationship between opiate use and crime within a specified population and culture. (Ball, 1977).

A last conceptual point is that periods of abstinence from opiate addiction have been largely ignored in research, although the contrast between periods of addiction and abstinence (or lesser use) with respect to criminal behavior could significantly further our knowledge of this relationship. This omission may be due to a lingering notion that heroin addicts are seldom if ever off drugs except when incarcerated (which is untrue); or it may be that this research neglect is due to the difficulty of obtaining detaield data pertaining to periods of abstinence and addiction.

By way of recapitulation, it may be said that various conceptual problems have tended to hinder the formulation of specific research questions which could be investigated and resolved. The emphasis upon searching for universal relationships and developing grandiose causal theories has impended middle-range theories based upon verifiable empirical generalizations.

Measurement issues in crime-drug research

By and large, the most striking methodological weakness in contemporary research pertaining to the crime-heroin relationship is the lack of adequate measures of criminality. The measurement problems are easy to identify, but difficult to resolve.

Two measurement issues are of particular significance in the present context. First, it has been recognized that official records of crime are an inadequate measure of actual criminal behavior within most offender populations. This tends to be especially the case among persistent offenders. Thus, recent studies have reported that less than one percent of property offenses committed by drug abusers result in arrest. (Inciardi and Chambers, 1972; McGlohlin et al., 1978). In addition to grossly underestimating the amount of crimes committed by opiate addicts, official records may also fail to provide a representative sample of the types of crimes committed.

Secondly, there is need for a measure of criminality which will enable analysis of actual crime-rates over an offender's career or lifetime. Thus, we would like to be able to measure criminal behavior on a yearly basis in order to surmount the middle-class bias of regarding crime as a unique or infrequent event. If addicts are committing hundreds of crimes a year per subject (as is the case in this study) it is not only inaccurate to depict this as being reflected by one or two arrests, but it is a gross distortion of a social reality. The research need, then, is to obtain a valid and meaningful measure of criminal behavior which will facilitate the computation of yearly rates.

In stating that there are special measurement needs in studying populations who are heavily involved in criminal behavior, it is pertinent to note that most criminological resesarch and most studies pertaining to drug users are concerned with a few officially recorded crimes or a few minor acts of delinquency. As a consequence of this dominant focus upon populations with a low frequency of criminality, measurement problems encountered when studying populations with a high frequency of criminal events (e.g., 200 or more crimes per year) have been neglected. For example, high monthly or yearly offense rates may prove difficult to interpret and use in comparative analysis because of the confounding effect of these few high values upon sample statistics. Thus, if a few individuals commit a thousand or more offenses per year, this fact can easily distort other sample statistics unless appropriate measures are employed.

Indeed, it was precisely this problem which prompted the formulation of our crime-day measure, which will be discussed below.

Statement and development of the research problem

As noted previously, this study was planned to provide answers to two rather specific research questions: What are the types and frequencies of crimes committed by heroin addicts? What impact does post-onset periods of abstinence or subsequent periods of addiction have upon criminality?

In pursuing answers to these seemingly straight-forward research questions, we soon found ourselves involved in reviewing hundreds of interview schedules, devising new coding procedures and otherwise enmeshed in the complexities of criminological data analysis. Among the problems which we encounted were the following:

1. How should we handle multiple offenses committed on the same day? (If we count each act of theft—as in department store "boosting"—as a separate event, the large number obtained will not provide a meaningful basis for comparison).

2. How can we, or should we, differentiate among various types of felony offenses? (That is, given the extent of criminality in this sample, how can we classify their offenses in a meaningful way?)

3. How can drug offenses, "drug related"

offenses and other offenses be differentiated? (At the onset, it was decided to delete drug use and possession offenses, but what about drug sales and property offenses? How should these be analyzed?)

4. What time period should be used in computing crime rates? (Monthly, yearly, or for their addiction career?)

5. Is it feasible to trace crime careers in terms of the predominant type of offense committed? (How can the addicts be classified according to their criminal way of life?)

6. How can periods of addiction and periods of regular opiate use be analyzed with respect to crime rates? (With no accepted procedure for computing rates and with the difficulty of combining, or otherwise ordering, addiction and abstinence periods, how could meaningful comparisons be effected?)

The above is a simplified and organized list of some of the measurement problems which confronted us at the beginning of the data analysis. In retrospect, it is evident that the difficulties were primarily due to a single methodological problem. An appropriate and efficacious measure of criminality was not available. What was needed was a measure that would: provide a feasible means of explaining crime in this population, be scientifically and statistically valid, and yet be reasonably simple to use and understand.

A new measure of criminal behavior: Crime-days per year at risk

In the present paper, a new measure of criminal behavior is described and employed in an on-going research project. The new measure has been termed Crime-Days Per Year at Risk. A crime-day is a 24-hour period in which an individual commits one or more crimes. The number of crime-days per year at risk refers to the number of days per year that an individual has committed crimes from 0 to 365.

This new measure, Crime-Days Per Year at Risk, is found to have unique analytical power as it permits the calculation of uniform crime rates by years at risk and it is not confounded by multiple crimes committed on a given day. Furthermore, the term Crime-Days Per Year at Risk appears to be an effective procedure for explaining and understanding the extent of serious criminal behavior because it relates the number of crimes committed by individuals to a common frame of reference—times per year. The discovery of the average crime-days per year concept was made by the senior author while analyzing detailed life history data pertaining to heroin addicts as part of a follow-up study in Baltimore.

V. Definition of terms:

Crime-Day.—A crime-day is defined as a 24-hour period during which one or more crimes is committed by a given individual. Each day of the year, then, is either a crime-day or a non-crime day.

Heroin Addiction.—This term refers to the daily use of opiates. (Daily use or regular use, is defined as use during at least four days per week for a month, or longer; most were heroin users).

Average crime-days per year.—This measure is defined as the average number of Crime-Days Per Year at Risk for a given individual. The range is from 0 to 365. Thus, an individual with 1,489 crime-days during a seven year risk period has an average Crime-Days Per Year at Risk of 213. (Actual computation is by days at risk and number of crime-days).

Years at risk.—Years at Risk is the number of years an individual is "on the street" or not incarcerated. It is calculated on a cumulative basis by subtracting jail, prison, and hospital time from the years since onset of regular opiate use.

Principal type of crime.—This is the predominate type of crime engaged in by a given individual during his years at risk, as theft (boosting, burglary, etc.), con games, robbery, gambling, drug sales, etc. This principal type of criminal behavior is the most common offense committed from an actuarial viewpoint. It answers the question, what kind of crime does he usually commit? The crimes reported by our sample reflect a broad range of criminal behavior and include: larceny (pick-pocketing, shoplifting, unauthorized use, burglary), robbery, fencing, assault, con games, pimping, soliciting, gambling, rape, abortions, forging, drug dealing, murder, and loan sharking. Mere possession or use of drugs is not classified as a crime in this analysis.

Criminal career.—This is the criminal behavior pattern which an individual has followed while at risk. The two main elements in determining the crime pattern are (a) type of crime and (b) frequency of crime. Examples of crime patterns are: daily theft, daily con games, weekly robbery, weekly forgery, infrequent assault, and so forth. In each case, the crime pattern, or career, is the most common, or usual, offense committed during the subject's years at risk and the frequency of commission. Thus, a pattern of daily theft during a four-year period indicates that the individual had as his common offense theft of property and that this was carried on most of the time he was at risk. Since the crime pattern is derived for each person from his average-crime-days per year and the principal type of crime committed, the actual number and type of crimes is known in each case.

In order to obtain answers to the criminological questions advanced, the study was organized according to the following procedures: (1) A sample of 243 male opiate addicts was selected for study, (2) Periods of addiction and periods of abstinence from opiate dependence were enumerated, (3) The number of crime-days per year at risk was determined for the sample, (4) The addicts were classified by principal type of criminal career pursued from onset of regular opiate use to interview, (5) The extent of crimes committed were analyzed by criminal career types controlled for addiction and abstinence periods, (6) a correlation analysis of addiction, crime and demographic variables was undertaken, (7) a stepwise regression of addiction and abstinence periods was undertaken in order to determine the relationship of selected crime and demographic variables to each of these drug use statutes. In the remainder of the paper, these procedures will be described and the relevant research findings presented.

The sample and interview schedule

This paper is based on interview data obtained from 243 Baltimore opiate addicts (most were heroin addicts). The 243 male addicts were a random sample selected from a chronologically stratified list of 4,069 known opiate users arrested (or identified) by the Baltimore Police Department between 1952 and 1971. The sample was unselected for criminality, but stratified by race and chronological period. Of the 243 subjects, 109 were white and 134 were black. Analysis of race and cohort differences has been undertaken elsewhere (Nurco and DuPont, 1977).

The selection of the final sample of 243 was accomplished as follows. The initial sample drawn from the police files consisted of 349 individuals, but 57 of these had died by the time of followup interview, 2 were in mental hospitals (for psychosis), 6 were unlocated and 17 refused to participate in the study. Thus, 92 percent of the sample who were alive and not in mental institutions were interviewed (i.e., 267 of 290 subjects).

Of the 267 addicts who were interviewed, 14 claimed never to had been regular users of opiates, 3 used opiates regularly for only one or two months and the onset of one preceded everyone in the sample by 22 years; these 18 were excluded. In addition, a careful review of the remaining 249 cases revealed that 6 interviews had significant discrepancies between their self-reports and FBI records; these 6 were eliminated. (These six claimed no criminal behavior, but their arrest record listed two or more non-drug offenses). The remaining sample consisted of 243 cases. The sample procedure and characteristics of the base population are described more fully elsewhere (Nurco et al., 1975).

Although comprehensive penal, hospital and other institutional data was collected with respect to the addict sample, the main source of data for the present analysis was obtained through personal interviews. Each of the 243 addicts was interviewed between July 1973 and July 1974 by specially trained interviewers who were familiar with the Baltimore addict subculture. The interview lasted some three hours and the questions were focused upon six topics: drug use, criminal behavior, work, living arrangements, drug selling and sources of income.

The interview schedule consisted of six parts: (1) Life-time prevalence of drug use by specific drugs of abuse (7 pages, completion time about 30 minutes); (2) History of opiate use by addicted and abstinent periods during risk years (3 pages, 30 minutes to complete); (3) Preaddiction criminality and circumstances of onset of opiate use (7 pages; 30 minutes); (4) Circumstances of first regular use of opiates (i.e., daily use for a month or longer) and each subsequent addiction period. This part includes information on criminality for each period of regular opiate use or abstinence (10 minutes for each addiction period; 7 pages each); (5) Marital history, parental background, juvenile delinquency, military service, treatment history, incarceration history, criminal history (16 pages; 60 minutes to complete); (6) Interviewer's rating of respondent's attitude, appearance and overt responsiveness (1 page; 5 minutes).

The validity of the interview data has been the subject of a separate study (Bonito et al., 1976). The findings of this study substantiate the conclusions from prior research concerning the validity of interview data obtained from opiate addicts; namely that valid data can be obtained if specially trained interviewers who are familiar with the local addict subculture are employed.

III. The research findings—addiction and abstinence periods for 243 males:

The mean age of the 243 males at the time of interview was 35.9 years and 93 percent of the sample was between 25 and 49 years of age. Since onset of opiate addiction usually had occurred when the subjects were between 15 and 19 years, most of the sample had a post-onset career of 10 or more years (198 had 10 or more years, 37 had 5–9, and 8 had 2–4 years).

Since a major focus of the lengthy interview was to obtain detailed chronological data pertaining to addiction status from onset of regular opiate use to time of interview, each subject was asked to describe in detail his addiction, abstinent, and incarceration periods. For the entire sample, there were 2,340 time periods, 1,102 were addiction periods, 488 were abstinent periods, 700 were jail or prison time periods, 52 were hospitalization periods and 78 periods were unclassified because of insufficient data. (These few unknown periods were omitted from further analysis). In the present paper, attention is directed toward the addiction and abstinent periods, as this was the time during which the subjects were at risk.

All subjects had one or more addiction periods. The average length of an addiction period was found to be two years, although longer periods were common. Each subject was asked about his daily and weekly use of specific drugs during each period (dosage,

multiple use, times used per day or week). In this manner, each subject's years, months and days at risk was classified as addicted to or abstinent from opiates.

The total amount of time that this Baltimore male sample spent addicted to opiate drugs since onset of regular opiate use was 61.6 percent of their risk years; they were off regular opiates 38.4 percent of their risk years. Since their average years at risk was 11.3, they were addicted to opiates almost two-thirds of the time, and abstinent somewhat over a third of the time (Figure 1). Two further points are pertinent about their abstinence periods. First, with regard to the abstinence from regular opiate use classification. This status included periods of occasional use of opiates as well as periods of frequent use of non-opiate drugs. Second, it is significant that 85 percent of the sample had such abstinence periods.

Lifetime criminality since onset of opiate addiction

Although periods of addiction or abstinence during the years at risk provided the chronological frame of reference for the interview, additional detailed data was obtained for each period concerning criminal behavior, employment, income, family life and other variables. With respect to criminality, each subject was asked about the number and type of crimes he committed on a weekly and daily basis for each addiction or abstinent period. These responses provided the basis for determining the number of crime-days, the principal type of crime and crime and criminal career pattern for each subject.

The total number of crime-days during the risk years for the 243 addicts is tabulated in Table 1. The range in crime-days within the sample was from 0 to 9,450. That is, from no crimes committed by six addicts to 9,450 crime-days accumulated by one addict during his risk years.

The total number of crime-days amassed by these 243 addicts during their years at risk was 473,738. This total is an undernumeration of the total number of crimes committed as multiple crimes during a crime-day were common. It is also pertinent to note that most of the crimes reported were for theft and that drug use or possession was not classified as a crime.

The mean number of crime-days per addict during their years at risk was 1,998.9. Thus, the majority of these addicts were deeply enmeshed in a criminal way of life. There were, however, important differences in their patterns of criminal behavior as well as their frequency of committing crimes. In order to control for years at risk, crime-days were computed for each person by years at risk (Table 2). The mean number of crime-days per year at risk for the sample was 178.5. Thus, the total amount of time that these Baltimore addicts spent engaged in daily criminal behavior since their onset of addiction was almost half of their risk years. To be exact, they were committing crimes on a daily basis during 47.7 percent of their years at risk (Figure 2).

Criminal careers of the 243 addicts

Each of the 243 addicts were classified as to the common criminal career which he had followed since onset of regular opiate use. These criminal career types were determined on the basis of the principal, or most common, type of crime committed, and secondly, on the frequency of commission—whether daily, weekly or less often. Six of the 243 addicts had committed no crimes during their risk period.

It was found that the 237 addicts who had committed crimes could be classified into nine types of criminal careers. These nine were: daily theft, daily drug sales, other daily crime; weekly theft, weekly drug sales, weekly other crimes; infrequent theft, infrequent sales and infrequent other crimes (Table 5). Some two-thirds of the 237 addicts had theft as their principal type of crime. Of these 156 who were career thieves, 41 engaged in daily theft during their year at risk, 58 engaged in weekly theft and 57 in infrequent theft.

The selling of drugs was the second most favored type of crime committed by these addicts; 45 were principally engaged in selling drugs, or "dealing". Of the 45 dealers, 13 pursued this crime on a daily basis, 18 on a weekly basis and 14 on an infrequent basis.

The remainder of the sample were engaged in committing other types of crimes on a daily, weekly or infrequent basis. Of these 36, only 7 were engaged in daily crime, 7 in weekly crime and 22 in infrequent crimes. Confidence games, forgery, gambling and procuring (pimping) were the principal types of crime committed by these 36 addicts.

The classification of the sample into nine criminal career types somewhat obscures the fact that many addicts engaged in more than one type of crime during their years at risk. This situation is especially notable with regard to the 61 addicts who were daily criminals. Thus, 55 of the 61 had engaged in theft during their years at risk and 43 had engaged in some dealing, although only 13 had this as their principal daily criminal activity. In addition to theft and dealing—the two most common types of crime—33 of the 61 had engaged in other crimes, such as forgery, gambling, confidence games, robbery and pimping. The complete list of all crimes reported by these daily criminals during their years on the street is: theft (this includes shoplifting; "cracking shorts", burglary and other forms of stealing), dealing, forgery, gambling, confidence games (flimflam, etc.), pimping, assault, mugging, robbery, armed robbery, and abortionist. Lastly, although most of the 61 criminals engaged in more than one type of crime during their years on the street, there still was a marked tendency to focus upon one main, or principal type of crime—(especially theft or dealing). Furthermore, 11 of these 61 males confined themselves exclusively to one type of crime during their years at risk (8 only committed theft, one only sold drugs, one was a confidence man and one a gambler).

The impact of addiction upon criminal careers

The extent of criminality among all nine career types was affected by their addiction status. Thus, there was an overall sixfold increase in the number of crime-days per year at risk during addiction as contrasted with the abstinent periods (Table 5). Rather surprisingly, the proportionate increase in crime-days per year at risk when addicted vs. when abstinent was most marked among the criminals who engaged in weekly or monthly offenses. Thus, for 5 of these 6 career types (weekly theft, weekly dealing and the three infrequent types) the extent of criminality increased more than ten times the non-addicted rate. The greatest increase was for the 22 subjects who committed other crimes on a monthly basis—from 2.3 crime-days per year to 108.2 crime days per year.

Although the extent of criminality within this addict sample was notably increased when the subjects were addicted to opiate drugs, the non-addicted crime rate was still quite high. As might be expected, the highest crime rates when not addicted were found among the three criminal career types who had the highest crime rate when addicted (daily theft, daily sales and daily other crimes). In these three career types, the addicts committed crimes from one to three days per week when not addicted (for these three groups, the rates per year at risk were 109.7, 88.3 and 151.0). In considering the rates of criminality for the nine career types when abstinent from opiates, it seems significant that these nine rates vary more (from 2.3 to 151.0) than do the rates when these same subjects are addicted. In a sense then, one effect of opiate addiction is to raise the number of crimes committed to a threshold, or support, level, and this occurs for all nine career types. Thus, when addicted, 7 of the 9 career types commit more than 260 crimes per year and none of the nine career groups fall below 100 crime-days per year at risk.

Correlation of addiction, crime and demographic variables

In order to investigate the relationship of specific addiction, crime and demographic variables, a correlation analysis of ten variables was undertaken. These ten were: (1) Total number of crime-days accumulated during years at risk (Total CD); (2) Total number of crime-days accumulated while addicted during years at risk (CD–H); (3) Total number of crime-days accumulated while not addicted during years at risk (CD-Off); (4) Total number of days addicted during years at risk (H-days); (5) Total number of days not addicted during years at risk (off-days); (6) Total number of officially recorded arrests during years at risk (Arrests); (7) Crime committed after age 17, but prior to onset of addiction; by self-report. Coded as a dichotomy: 1. Yes, 2. No. (Prior Crime); (8) Race; 1. White, 2. Black; (9) Age at onset of opiate addiction, (Onset Age); and (10) Age at time of interview (Age at interview, or Age).

The correlation matrix of Table 4 provides an initial delineation of the relationship among these three sets of variables (i.e., addiction, crime and demography). The first column, total crime-days (variable 1), indicates the overall relationship of criminality to addiction and other variables, but the interpretation of several of these Column 1 correlations is ambiguous due to the distinct effect of addiction vs. non-addiction status. This uniqueness of the two addiction statuses is evident in a comparison of column 2 with column 3. Thus, total crime-days when addicted (variable 2) is significantly correlated with all seven variables: H-days, off-days, arrests, prior crime, race, onset age and age at interview, but not significantly correlated with total crime-days-off (variable 3). Furthermore, total crime-days-off is not significantly correlated with any of these same seven variables (4 through 10). Also underscoring the distinctiveness of the two periods is the absence of correlation between them (i.e., R of minus 0056 between variables 2 and 3) which indicate that the frequency of crime committed during addiction and off-periods are independent of one another. Thus, the amount of crime committed during addiction periods does not predict the amount of crime committed while off opiates; consequently, a "heroin day" is a very different kind of day from an "off-day" insofar as crime is concerned.

With respect to criminal history and demographic variables, these are both correlated with total crime-days and crime days-H, but as noted not with crime-days off. Specifically, the total number of arrests since onset of addiction is positively correlated with variables 1 and 2. The correlation of arrests with crime-days-H is (.3073). Variable 7, prior crime, is also positively associated with CD–H, but this measure of early criminality poses difficulties with respect to interpretation because it is affected by early onset and prior juvenile delinquency; nonetheless, it is included in the present analysis as it does measure prior criminality to some extent.

Race (black) is positively correlated with crime-days-H, but again, not with crime-days off. Age at onset of opiate addiction (Variable 9, Table 4) is negatively correlated with crime-days-H and crime-days-off, although the latter correlation (—.1221) is not significant. The finding that early age at onset of addiction is correlated with a higher

frequency of later criminality is a consistent finding of this study. The moderate positive correlation of age at interview with crime-days-H (.2130) indicates that age (and time at risk) have some relationship to crime-days, but that this issue requires further analysis.

In considering time at risk, or "street" time, it might appear that the high positive correlation between H-days and crime-days-H (.7914) is to be expected because both of these measures are affected by the amount of time at risk. But considerably more is operating here than time at risk. For if time at risk were the principal influence, then, the two correlations (off-days and CD-off; and H-days with CD–H) would be about equal in value. But the marked difference between these two correlations (.1567 vs. .7914) indicates that other influences are operating during the addiction periods as contrasted with the off periods. Furthermore, a partial correlational analysis controlling for age at interview revealed that the relationship between crime and number of days for both the on and off periods was similar to the zero-order values. Thus, for the on periods, a partial value of .7907 was obtained (compared with a zero order value of .7914) and, for the off periods, a partial value of .1817 (compared with .1567). These results indicate that age and time at risk are not the principal influences which determine the number of crime-days accumulated by these 237 addicts.

Stepwise regression analysis of addiction and abstinence periods

Thus far, it has been found that: (1) The frequency of crime is strongly related to the amount of addiction time, and (2) That the addiction and non-addiction (or abstinence) periods are quite distinct experiential periods which require separate analysis. In order to investigate these two major findings with greater precision and analytic power, a stepwise regression analysis of the addiction and abstinence period was undertaken for the 237 male addicts. In this analysis, relevant variables from the correlation matrix are employed.

The stepwise regression analysis of crime-days accumulated while these 237 addicts were addicted yields results which are quite striking (Table 5). Thus, there is strong positive correlation between the number of days addicted and the number of crime-days (.7914). This single variable (H-days) accounts for 63 percent of the variance in criminality during the addiction periods. Two of the remaining variables account for a small additional proportion of the variance; these are age at interview and number of arrests, both positively correlated with crime-days-H.

The stepwise regression analysis of crime-days accumulated during off-periods reveals results which are quite different from those of the addiction periods. With respect to criminality during the off-periods (as measured by crime-days off), only two of the seven variables are significantly correlated (Table 5). The first of these off-days, is only weakly correlated with crime-days-off (+.1567). The second variable to enter, age at onset, is negatively correlated with CD-off indicating the consistent relationship between early age of addiction onset and criminality previously noted. The remaining five variables are not significantly correlated with crime-days while off. Of special interest is the lack of correlation between crime-days-off and H-days. Thus, the amount of crime committed by these heroin addicts while they were not addicted is independent of the amount of their addiction time. This analysis of criminality while not addicted to heroin reveals then, only small variance accounted for by the variables studied. In this sense, the findings are similar to those of most criminological research which shows modest correlations between crime and independent variables.

Stepwise regression analysis of criminality for the three career groups

Inasmuch as the frequency of crime was found to be related to the criminal careers of these 237 addicts, it was deemed necessary to undertake a separate stepwise regression analysis for each of the three major offender groups: those primarily engaged in theft of property, those who were drug sellers and those engaged in other types of crimes (Table 6–8).

Perusal of the three tables reveals that the number of days that the subjects were addicted is the single most important influence upon their criminality during the addiction periods. In this regard, the strongest effect was for the dealers and the weakest effect for the other crimes group. The remaining variables added little to the explained variance for the theft and dealer groups, but were more important for the other crime group. The total variance explained in all three groups was high, (i.e., 67.7%, 73.7%, and 61.4%).

The three offender groups were also quite similar with respect to criminality during the off-periods, in that substantially less of the variances was accounted for by the variables studied. Thus, for the 156 offenders engaged in theft, the 45 dealers and the 36 involved in other crimes, only from 10 to 25 percent of the variance was accounted for during the off-periods.

To recapitulate, these findings suggest that the theft group and the dealers are fairly similar in that their criminality is primarily affected by their drug addiction. During the abstinence period, however, their frequency of crime is not highly explicable by the set of variables investigated in this study. But when daily heroin use takes hold, they turn to crime (by theft or dealing) to acquire sufficient resources to support their daily habit.

The "other" group emerges as a somewhat unique group. Although the impact of daily heroin use is strong, it does not seem to have the same overwhelming effect as it does with the other two groups. Consequently, these 36 individuals have a frequency of criminality that is somewhat more predictable during the non-addiction periods, as indicated by the relatively high R of .5034. While addiction seems to be a factor that definitely increases their crime, at the same time, other factors continue to be of consequence in both the addiction and abstinence periods.

Review and interpretation of the research findings

In reviewing the research findings of this study, attention will first be directed toward the significance of addiction and non-addiction periods. Then, the frequency, magnitude and persistence of offenses committed by these 243 addicts will be considered along with the types of crimes committed during their years at risk. Next, the correlation and stepwise regression analysis will be reviewed. This will be followed by an appraisal of the new measure of criminality utilized in this research—crime days per year at risk. Lastly, the broader implications of this study with respect to the control of crime committed by opiate addicts in the United States will be addressed.

It was found that these 243 addicts spent two-thirds of their time addicted to opiates and one-third not addicted. The time under study was their years at risk, or "street" time, and this averaged 11 years per addict from onset of addiction to time of interview. The fact that addiction was not a continuous state of drug dependency seemed significant. For it indicated that there were considerable periods during which changes in the addict's lifestyle might occur, and in fact, it was found that these periods of abstention (or lesser use) did have important consequences. In particular, it was found that criminality decreased markedly during the months or years that these addicts were not dependent upon heroin and other opiates. The decrease was striking—an 84 percent decline in the crime rate.

One of the major findings of this study was that heroin addicts commit a staggering amount of crime and that this continues fairly much on a daily basis for years and decades. Before turning to an analysis of differences in crime-rates by addiction status and other factors, it is meaningful to note the overall amount of crime which these 237 males have committed.

The research findings presented in Table 1 show that the average addict has committed one or more crimes during some 2,000 days. Taken together, these 237 male opiate addicts have been responsible for committing more than 500,000 crimes during an eleven year risk period. The exact figure is 473,738 crime-days, but this does not include multiple offenses committed on a given day, so the figure of 500,000 crimes is an underestimate. In this regard, it should be noted that theft was the principal type of crime committed and that drug use or possession were not themselves, classified as crimes.

This high frequency of criminality among opiate addicts is similar to that which has been reported by other investigators. Thus, Inciardi and Chambers (1972: 59) found that 26 addicts on the street were responsible on a daily basis for 22 major crimes." In a recent larger study, Inciardi found that 239 active male heroin users committed 80,644 offenses during a 12-month period (Inciardi, 1979). These latter results from addicts in Miami are remarkably similar to the present findings from Baltimore, both with respect to frequency and types of crime committed.

In the present study, it was found that the addicts could conveniently be classified into three major offender types—theft, drug sales and other crimes—on the basis of the crimes which they usually engaged in during their years at risk. This classification proved to be feasible after the concept and measure of crime-days was developed and it was found that criminal careers for most of the addicts were relatively stable. Thus, 156 addicts were found to be primarily engaged in theft, 45 in drug sales and 36 in other types of crime.

The measure of average crime-days per year at risk was introduced and employed to determine the frequency of offenses per year for each of the 237 addicts during all of their years at risk. It was found that the mean number of crime-days per year for the 237 addicts was 178.5. But, many addicts had more, or fewer, crime-days for each year at risk. Indeed, the distribution presented in Table 2 indicates that 9.5 percent of the addicts were engaged in crime virtually every day of their lives since they began regular opiate use. Conversely, there were 6 addicts who reported that they had not been engaged in crime at all during their years at risk. But most of the addicts were consistently engaged in a rather high level of crime during their years at risk; two thirds had from 100 to 365 crime-days per year for all of their years at risk.

A second major finding of the study was that addiction status had a marked influence upon criminality among these males. Thus, it was found that the number of offenses increased sixfold when these subjects were addicted. And significantly, this increase occurred for all nine offender types (Table 3). Thus, when abstinent, the average crime-days per year varied from 2.3 to 151.0, with an average of 40.8. By contrast, when addicted the rate was always over 100 crime-days per year and commonly over 250 crime-days per year at risk.

These research findings pertaining to the impact of addiction upon criminality were surprising and unexpected. Thus, we did not expect this marked increase, given the known involvement of this population in crime. Or, conversely, one might say that we were unprepared for the decrease which occurred when addiction ceased.

These findings concerning markedly different crime-rates when addicted and when off regular opiates led to a correlational analysis of these data. In this analysis, it was observed that the amount of crime committed during addiction periods was largely a function of opiate use, specifically of the time spent addicted. But unexpectedly, it was also found that the amount of crime committed when addicted was unrelated to that committed when off opiates. Thus, it may be held that this analysis provides an explanation for high crime rates during addiction, but provides a much less adequate account of criminality during the non-addiction periods. Although comparatively infrequent, criminality during these off periods deserves further investigation.

The stepwise regression analysis revealed that the impact of addiction upon criminality is pervasive and long-lasting. Thus, addiction was the principal force which increased criminality, regardless of the type of crime pursued. And this relationship between opiate addiction and criminality was not a transitory phenomenon, but an enduring relationship which obtained during an 11 year risk period.

Before turning to discuss the implications of this study, it is pertinent to comment upon the usefulness of the crime-days measure. In this study of subjects with an extensive history of criminality (which involved the computation of offense rates over a decade and more), the introduction of crime-days and crime-days per year at risk was exceedingly efficacious. Indeed, it seems reasonable to conclude that this study could hardly have been completed without the use of a crime-days measure (or a similar measure). For it was found that this measure—crime-days per year at risk—made it possible to compute meaningful and valid rates. It was not only that the rates were appropriate for the data on hand, but the concept of a crime-day proved to have a meaning which facilitated analysis and interpretation of the complex criminal history material.

Extensive criminality among addicts—Implications

The findings of this study concerning the extensive criminality of contemporary opiate addicts in the United States supports similar findings from other research. It is now evident that addicts are responsible for committing an inordinate amount of crime, that many of these offenses are serious in nature and that their criminality is rather firmly enmeshed in their lifestyle and therefore, that it is persistent and recurring.

But, this study adds one new ingredient to the picture. For our research findings indicate that it is opiate use itself which is the principal cause of high crime-rates among addicts. Once addiction ceases, crime rates drop markedly. And this notable decrease in criminality (an overall 84 percent decline) occurs for all types of offenders throughout the risk years. It is apparent, then, that a major means of reducing the amount of crime committed by opiate addicts is within sight. If we can control addiction, it is evident that we will reduce criminality appreciably.

But how can we impact opiate addiction? Three lines of attack come to mind. First, it is imperative that programmatic and research priorities be established which will further this specific objective—to impact addiction among persistent offender groups. These two aspects—programs and related research—must be a core component of any major national effort. For research without implementation can hardly be effective. And action programs not based upon relevant scientific knowledge are doomed to failure. Indeed, they cannot succeed for logical reasons, as only research can establish success or failure. Therefore, a first priority is to recognize that a major coordinated effort is required which will focus upon this single task.

Second, three or four well designed experimental programs need to be established to reach or impact specific offender populations. These experimental programs should make use of relevant knowledge concerning ongoing programs—such as TASC, methadone maintenance, family therapy and intensive probation efforts—yet be based upon new concepts and new research findings. In this last regard, it is imperative that these new programs be targeted to reach a specific offender population (as contrasted with programs which attempt to serve everyone without regard to need or likelihood of success), and employ means which have either a demonstrated association with the reduction of addiction or a well developed rationale for effecting this objective.

Finally, it may not be taken amiss if it be suggested that it is time to get on with the task at hand, and not be sidetracked by irrelevant ideological, scholastic or methodological arguments. Thus, while it is true that drug abuse may be difficult to define, that alcohol abuse is also a major social problem, that penalties for marihuana use are inconsistent, and that, in fact, there are many unresolved problems and difficulties in conducting research (especially if one seeks perfection and closure). Still, it is also true that existing knowledge and methodology is sufficient to address the problem at hand. We know that criminality is rampant among heroin addicts. We know that addiction markedly increases this criminality. And, we know that addiction can be impacted through treatment and control measures.

TABLE 1.—TOTAL CRIME-DAYS AMASSED BY 243 MALE ADDICTS DURING YEARS AT RISK

Crime-days	Number of addicts	Percent of addicts
0 (none)	6	2.5
1 to 99	20	8.2
100 to 499	31	12.8
500 to 999	31	12.8
1,000 to 1,999	54	22.2
2,000 to 2,999	46	18.9
3,000 to 3,999	27	11.1
4,000 to 4,999	12	4.9
5,000 to 5,999	10	4.1
6,000 to 9,450	6	2.5
Total	243	100.0

Note: Total crime-days since onset of addiction: 473,738. Mean crime-days per addict: 1,998.9.

TABLE 2.—CRIME-DAYS PER YEAR AT RISK FOR 243 MALE ADDICTS

Crime-days per year at risk	Number of addicts	Percent of addicts
No crime-days	6	2.5
Less than 1 per year	11	4.5
1 to 49	35	14.4
50 to 99	26	10.7
100 to 149	31	12.8
150 to 199	32	13.2
200 to 249	25	10.3
250 to 299	26	10.7
300 to 349	28	11.5
350 to 365	23	9.5
Total	243	100.0

Note: Mean crime-days per year at risk: 178.5.

TABLE 3.—CRIME-DAYS PER YEAR AT RISK BY TYPE OF CRIMINAL CAREER AND ADDICTION STATUS

Crime career type	Number of addicts	Crime-days per year at risk	Crime-days per year at risk: Addicted	Crime-days per year at risk: Abstinent
1. Theft, daily	41	330.3	347.3	109.7
2. Sale of drugs, daily	13	328.0	353.2	88.3
3. Other crimes, daily	7	319.4	341.4	151.0
4. Weekly theft	58	189.6	280.9	23.3
5. Weekly sale of drugs	18	181.1	284.0	27.6
6. Weekly, other crimes	7	201.9	297.0	70.1
7. Infrequent theft	57	72.4	140.7	7.4
8. Infrequent sales	14	102.4	260.9	10.5
9. Infrequent, other crimes	22	46.8	108.2	2.3
No crime	6

EXPORT TRADING COMPANIES, TRADE ASSOCIATIONS, AND TRADE SERVICES ACT

The Senate continued with consideration of the bill.

UP AMENDMENT NO. 60

(Purpose: To strike section 108)

Mr. ARMSTRONG. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Colorado (Mr. ARMSTRONG) for himself and Mr. PROXMIRE, proposes an unprinted amendment numbered 60.

"Beginning with page 22, line 11, strike out all though page 24, line 15."

Mr. ARMSTRONG. Mr. President, the amendment which I have sent to the desk on behalf of Mr. PROXMIRE and myself addresses itself to an amendment which was adopted by the Banking Committee during the consideration of this bill. I should like to take just 1 minute to explain the amendment. Before I do so, I ask unanimous consent that the Senator from New York (Mr. D'AMATO), and Senators GARN, LUGAR, and TOWER, be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ARMSTRONG. Also, Mr. President, while I am on my feet, let me congratulate the managers of the bill for this important and worthy effort to expand the export trade of this country. It is a good bill. It is a bill of which I am a cosponsor, and one which I certainly intend to support.

Mr. President, during the course of committee consideration, the Committee on Banking inadvertently, in my judgment, added a section to the bill which is most unfortunate, an amendment to allow the Secretary of Commerce to grant up to $40,000 to small business manufacturing firms to help them defray the cost of hiring an export manager. I oppose this part of the bill, not because I am against export managers—I am sure such managers can be helpful to companies who are breaking into the export business—but because I can see no rational justification, particularly at a time of budget restraint, for the Federal Government to be in the business of picking up the cost of such export managers. In my opinion, that is a proper business function, not a proper function of Government.

Mr. President, with that brief word of explanation, I inquire if it would be the disposition of the managers of the bill to accept this amendment so we can avoid a recorded vote on it and save the time of the Senate.

Mr. RIEGLE. Will the Senator yield?

Mr. ARMSTRONG. Yes, I am happy to yield.

Mr. RIEGLE. Mr. President, I might say that others and I supported this item in the committee. I should want to oppose the Senator's amendment and therefore want a debate and propose we vote on it eventually.

Mr. ARMSTRONG. Mr. President, I am happy then to have the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ARMSTRONG. Mr. President, I believe I have made enough explanation of the essence of the amendment but I shall yield the floor at this time to see what other Members have to say. If questions or objections are raised, I shall be happy to respond.

Mr. RIEGLE. Mr. President, may I inquire in terms of the time in opposition to the amendment, would that be controlled by my colleague from Wisconsin?

The PRESIDING OFFICER. There is no control of time.

Mr. HEINZ. Mr. President, let me state for the benefit of my colleague, there is no time agreement on this bill. So the Senator may be recognized to have as much time as he can conceivably consume.

Mr. RIEGLE. I thank the Senator from Pennsylvania. I shall try to be brief, although I do think this is an important issue.

Mr. President, I might say that the part of the bill which the Senator from Colorado is attempting to strike out is a part that was supported within the committee and has been debated at some length. I think it is a very important section of the bill.

Actually, section 108, which is targeted here by the amendment, is a strong small business program. It is aimed at small business in ways that I shall shortly describe. I might say that this part of the bill was also included in last year's bill, so this has been around for a period of time. It was acceptable last year, was part of the bill last year, and is again today on the floor.

The program that is marked out in this section would make possible the employment of export managers by small business manufacturing firms which have not previously been exporters in substantial amounts. Firms which are new to exporting and do not already have an exporting manager would be eligible to compete for grants of 50 percent of the export manager's salary and expenses or a maximum amount of $40,000, whichever is less. Section 108 establishes a pilot program to test a promising new approach to export expansion and then evaluates its effectiveness in generating increased export sales.

It would help defray the costs of hiring an export manager by making 1-year grants—that is all they are, 1-year grants—to enable the company paying half the price of the export manager to get into this business. If it pans out, as we think it will in most cases after the first year, they are on their own and will have to pick up the full expense on their own. It is a very modest initiative.

The program as a whole would be funded at a level of only $2 million a year for 3 years. That would be enough to provide somewhere between 150 and 300 of these grants to small businesses with high export potential to be able actually to break into this business and make a serious effort at developing foreign markets abroad for U.S.-built products.

Mr. President, the Commerce Department forecasts that the U.S. balance-of-trade deficit will reach a record level of $33 billion in 1981. In my view, we are simply not adjusting to the new situation of world interdependence brought about in part by increased petroleum prices but also, in part, by the greater competitiveness of our trading partners.

Mr. President, I think we have to face up to the fact that there is a need to expand our exports and be aggressive about it if we are going to be able to pay for our exports and prevent further deterioration of the dollar and the effect that that would have on inflation in the United States. It would have the effect of increasing inflation in the United States.

I think a key opportunity for expanding our exports lies in the 18,000 small- and medium-sized businesses which could be selling their products abroad today, but are not. The Department of Commerce estimates that as many as 10,000 of these 18,000 firms have an interest in exporting but are unable to overcome the initial barriers to getting started: Lack of information about foreign markets and lack of expertise to handle the technical problems of selling, financing, and shipping products abroad and the unfamiliar business practices of foreign customers. In addition, there are foreign exchange uses and things of that sort.

An obvious way for a firm to solve these problems is to put an experienced export manager on the payroll. But most smaller firms cannot afford to take the frontend risk of the full cost of an export manager's salary, fringe benefits, and expenses. The export manager grant program will help such firms make a commitment to exporting by offering a 50-percent subsidy not to exceed $40,000 for the first-year costs of adding such a person to the firm.

Any small company that would want to compete for these grants would be in competition with any other company across the United States, with the Department of Commerce to select the most promising companies that have come forward for this particular incentive grant who really want to make a serious effort to crack into the export market.

There is a magazine named "INC," which has a circulation of 400,000 in the United States, mainly to small business executives. It has a lead article in the March issue which favors the expanded export trade approach that I am discussing. With regard to this bill, S. 734, the article states as follows:

Congress is considering amendments to the Webb-Pomerene Act and to banking laws that will permit American firms to organize full service trading companies similar to those that have helped Japan achieve its remarkable export success. The bill would help place large and small American firms on an equal footing with other countries' exporters. Of particular concern to Congress has been the estimated 20,000 small businesses that could be exporting but are not; included in the proposal are provisions for

grants to cover initial salary costs for export managers in qualified small businesses.

So I say that section 108 should remain in this bill. It will help small business in this country. It has strong small business support. It will help create new jobs and new opportunities in terms of penetrating what is an expanding world market.

It is an absolutely modest amount of money, and one with high leverage potential in terms of opening up export markets, reducing our balance-of-payments deficit, and creating jobs in the United States.

It is designed in such a way because it is a cost-sharing grant and a 1-year grant. Beyond that point, if a firm wants to continue, it is on its own. I hope we can take this step.

I conclude in this way: I believe we have to face the fact that major exporting nations such as Japan are today assisting business in their country in every conceivable fashion. They are doing it with financial capital incentives. They are doing it with help with respect to Government regulation. They are doing it by coordinating their foreign policy initiatives to try to open the way for their domestic companies to compete aggressively abroad. Certainly, we see the effects of that in the United States, but they can be seen around the world.

In the United States, we have done very little to help business, large or small, in terms of this new world market environment, to be able to compete more effectively. We have lived with an old notion that we do not have to pay that much attention to developing world markets for our products. That has to change. We have 18,000 to 20,000 small businesses in the United States that have a very good potential for becoming export companies, but they have not yet done so. We must save a way to encourage them to get into this act in a serious fashion and to sell these goods aggressively abroad, because it will benefit the United States.

I have confidence that because the amounts are small and because the cost sharing is only for the first year and it is 50–50, this is exactly the kind of balanced initiative that even the new administration has in mind, in terms of stimulating the private sector, creating private jobs, and opening up areas of economic potential. In the past, we have not done enough of that.

I hope the Senate will accept the measure as it is written. It has been crafted carefully. I know that the Senator from Colorado objects to it because it is a new initiative, but I do not think we should always object to something because it is a new initiative. From time to time, we have modest, well-balanced, well-constructed, relatively inexpensive initiatives, with a very high potential payoff in the private sector, with jobs, with reduction of our balance-of-payments deficit, and this is exactly the kind of initiative we should be taking. Otherwise, we will see ourselves sliding backward in world market competition, and I do not believe that is something we can afford.

Mr. PROXMIRE. Mr. President, I am pleased to cosponsor this amendment by the distinguished Senator from Colorado. I support his position on it.

The Senate should strike section 108 from the bill. Section 108 authorizes $2 million of Federal money each year for 3 years for grants to subsidize salaries of export managers, up to $40,000 a year.

That means that if the firm pays him $40,000, the Federal Government will match it with another $40,000, for an $80,000 payment. It seems to me that such expenditures from the Federal trough would be nothing short of outrageous. All Americans today are being asked to sacrifice by budget cuts. I support deep budget cuts, as do others, because we need to reduce inflation. Less Government expenditures is a quintessential way to stop inflation.

Now comes section 108. Under what possible theory can we justify paying export managers employed in private enterprise a Federal subsidized salary of $40,000? This, of course, would be on top of the salary they receive. What a precedent. Where do we stop?

Should the Federal Government pay a subsidy to college professors at Harvard or Yale or the University of Michigan or the University of Wisconsin or Slippery Rock—a $40,000 subsidized salary? After all, college professors serve the public interest at least as nobly as export managers.

How about a Federal subsidy to pay a $40,000 salary of Red Cross administrators or Salvation Army generals or dairy farmers or coal miners or foundry workers?

There is no end to worthy occupations in this country, people who do very constructive work in our economy. I am sure business would love it if they were paid an additional $20,000, $30,000, or $40,000 by the Federal Government.

I submit that if you walked down the street of any town in my State and asked the first small, independent businessman you met whether he would support a $40,000 subsidy from the Federal Government to pay anybody's salary in the private sector, he would say, overwhelmingly, "No."

How this can be tagged as a small business amendment is beyond me. I am sure that the overwhelming proportion of small businessmen want less Government, not more; less Government subsidies, not more.

At a time when he have passed a second concurrent resolution in matching the President's cuts, for us to come along now with a new program to provide subsidies of up to $40,000 to pad the salaries of people in the private sector is absolutely wrong.

I hope the amendment of the distinguished Senator from Colorado is supported.

Mr. RIEGLE. Mr. President, may I be recognized in response to that?

The PRESIDING OFFICER. The Senator from Michigan.

Mr. RIEGLE. Mr. President, I want to respond to the comments of my colleague and friend from Wisconsin, because I think that, in his criticism, he misstates what we have in mind here. Let me make it very clear.

We are talking about a maximum of $40,000. It might be $30,000; it might be $25,000; it might be $20,000.

Mr. PROXMIRE. That is precisely what I said. It could be $30,000, $40,000, $10,000, whatever. It has to be matched.

Mr. RIEGLE. I am glad to have that clarification, because it would not be $40,000 in all instances. That is a ceiling figure. In perhaps a handful of cases, it might go as high as that, but that is a maximum figure, and that is not a set figure. That is not a figure that would necessarily apply in all cases. It might be half of that in some cases.

I want to go on and make a couple of other points.

The Senator from Wisconsin indicated that this would be for the salary. I want to make clear that it is not just for the salary. The task of employing an export manager does not involve only paying the salary in the normal compensation package of a skilled employee in a firm of this kind. An export manager normally has to travel, has to go to foreign countries, depending upon the scope of the foreign market situation that a particular export manager might be trying to develop or explore. The cost of international travel expenses associated with that—long distance phone calls overseas, things of this kind—I am contemplating that expenses of this kind, associated with carrying out an active export manager's role over the course of a year, could conceivably be a figure as high as $80,000.

Mr. PROXMIRE. Mr. President, if the Senator will yield, it seems to me that makes it much worse. We not only subsidize salaries but you have all kinds of expenses. Consider. After all, these export trading companies will often be in competition with each other. We are going to subsidize a small number because it is only $2 million, up to $40,000. Whom do we subsidize and whom do we not?

Talk about unfair competition—in one case the Federal Government is stepping in with a subsidy of $40,000, maybe $20,000 or $30,000, and in the other case it will not be subsidizing at all.

Why not solve the problem by not providing money, not spending the Federal money?

Mr. RIEGLE. Mr. President, I will not yield further.

I will answer by saying that does not solve the problem. The Senator is not offering an answer for the problem. I might say very directly we have a situation here where we are not doing well in terms of our trading relationships abroad. Our balance of payments is increasing. It is adding to inflation. It is undercutting the value of the dollar. We have to do something about it. We have to become more aggressive in terms of trading in this new world economy, and we have to help the small companies get into this act and not just the big giants.

What we have here is a very small program. We are talking about $2 million a year. Small firms can compete for

it, a maximum of $40,000 for 1 year on a pilot basis, to hire a competent export manager to get in to this act to see if we cannot start selling more American products abroad.

Why can we not do something once in a while to help the private sector here in the United States and create jobs?

My goodness, I thought that was supposed to be part of the theme of the new administration, and if it is, it is one I support.

We have 20,000 firms in the United States that have been identified as high-potential firms, small companies that could be out selling our products abroad and providing jobs and capital here in the United States, and we need to move on that problem, and it is competitive.

Any small company that feels it has this kind of potential and is willing to make half the investment for the first year could come in and submit an application of that sort, lay out their plan, and the Department of Commerce would make an evaluation and would select the ones that have the highest potential, and it is a 1-year situation and at the end of that year if it is valuable, then the companies themselves have to carry it forward without a dime from the U.S. Government.

But the fact of the matter is we will get this money back and we will get it back with big dividends.

Let us not be blind to what is happening to us in this world economic situation. We have small companies all across the United States that have potential to grow into big companies if they can get into these foreign markets.

There are an awful lot of people who live around the world who should be buying more American goods. This is an intelligent, modest, rational, very, very carefully targeted way to try to wedge ourselves into that picture.

We can just sit here in a fortress America and think we have all the economic strength that we need and ignore the fact that we are spending $100 billion a year for foreign oil, spending $10 billion a year this year in the net loss on cars and trucks just to Japan, and do nothing about it.

I am trying to offer something here and the reason the committee accepted this amendment in the first place, not this year but last year, is that this is a positive, aggressive effort, modest in scope, scaled down by targeting exactly on the problem.

Let us start selling American goods abroad. Let us help the smaller companies get into this act. That is what we are striving to do here and it makes good sense. It makes good economic sense.

In recent years much attention has been devoted to the need for the United States to improve its export performance. International trade has become substantially more important to the United States than in earlier years because of the direction of world events and the increasingly clear necessity to develop a strong export position to enhance the economic strength and welfare of our Nation, strengthen the value of the dollar, and increase employment. Exports now account for one of every eight jobs in America's factories and one in every four on America's farms.

Despite our historical national attitude of overall indifference to the need for exports, recent trends have made it obvious that we are living in a new international economic environment and we are not adjusting to it successfully. Although roughly 30,000 U.S. companies are now exporting, this figure includes only about 1 out of every 10 U.S. companies. Moreover, only 100 companies account for nearly one-half of all U.S. exports of manufactured goods. It is clear that many American companies are not taking full advantage of foreign market opportunities.

Export promotion and expansion has been recognized by Congress as critical to restoring the health of our economy. This year the U.S. balance-of-trade deficit may run to $50 to $60 billion. Clearly, we are not expanding our exports fast enough to pay for the increased imports brought about in part by oil price rises and in part by the greater economic strength and competitiveness of many of our trading partners. The United States simply can no longer delay a much more aggressive effort at export expansion.

A major opportunity for this expansion lies in the 20,000 businesses the Department of Commerce estimates could be exporting but are not. The increased participation of American businesses in exporting has been recognized as a national priority. Nonetheless, a number of factors discourage these firms from participation in foreign trade. This inactivity constitutes benign neglect of billions of dollars in potential export business.

The legislation before the Senate, the Export Trading Company Act of 1981, represents a multifaceted approach to the problem of restoring export competitiveness to the American economy. S. 734 is the product of nearly 3 years of concerted effort in the Senate and extensive hearings have been held on its provisions. The basic intent of this legislation is to encourage exports by facilitating the formation and operation of export trading companies. To this end, S. 734 deals effectively with two serious impediments in current law to the formation of export trading companies—the bar to U.S. banks having an equity position in, or control of these trading companies and the current uncertainty regarding antitrust exemptions for them under the Webb-Pomerene Act. By permitting U.S. banks to acquire ownership in export trading companies under specified conditions and with sufficient safeguards, banks will be encouraged to be active rather than reactive in export activities, providing needed financial resources and expertise. S. 734 also expands and clarifies the antitrust exemption for export trade associations and establishes a specific certification procedure that will eliminate the element of uncertainty in the current law.

I believe facilitating the establishment and operation of export trading companies is an important approach. This legislation had my enthusiastic backing in the last Congress and continues to have my equally enthusiastic support today. Mr. President, as a member of the Senate Banking Committee I have consistently supported the Export Trading Company Act and today I urge speedy consideration and passage of this important legislation.

I commend the Senator from Pennsylvania for his assistance and help on this matter.

Mr. HEINZ. Mr. President, I reluctantly rise in opposition to the amendment of my friends, Senator ARMSTRONG and Senotor PROXMIRE, but I can do no less in this instance because as they know I was strongly in opposition to their position in the committee. I supported the Riegle amendment because I think it is meritorious for all the reasons my good friend from Michigan has stated. I wish to point out to my colleagues that after a very full debate in the committee the decision was made that the Senator's amendment made sense.

I think it is important that we provide the authority to do some experimentation, to try to make sure that if we are not getting the kind of progress we would like to see on export trading companies, that we have a tool in our kit with which to operate.

There are two points I wish to make here.

The first is that we all know the potential of export trading conpanies. The largest trading company that I know of has a whale of a lot of recognized potential. The Mitsubishi Trading Co., just in terms of its international transactions, exports, imports, worldwide transactions, does $60 billion a year.

Some of the smaller export trading companies do $20, $15 or $10 billion, not million, billion.

I would hate to see us inadvertently throw away the key that opens the door to the United States playing the kind of role that we are capable of playing but that heretofore we have been unable to play in international trade. It strikes me that this very modest provision, which would provide on an experimental basis to certain small businesses an export manager for no more than 12 months, might very well prove to be the kind of key that we need to unlock our export potential the same way other nations of the world have already done.

One other thing I would say is that the amount of money involved in this section of the bill, section 108, is indeed very small. Notwithstanding the fact that it is small I think we all recognize that we want to minimize outlays in fiscal 1981, 1982, and 1983.

We know we are in a tight budget situation, and leaving this section in the bill, does not preclude the Appropriations Committee from not funding this provision, should it decide to do so.

But if we take it out of the bill it will be excluded from consideration, probably for the foreseeable future, and that, I submit, is neither necessary nor wise.

If the Appropriations Committee decides not to fund it, I will support that decision.

But I think it is a mistake to remove the authorization, to remove the oppor-

tunity to take necessary steps at some future time should we so decide.

So, Mr. President, I oppose the Armstrong and the Proxmire amendment. I understand their motivation. They are nothing but the best, as I would expect. It is just that we have a disagreement.

Mr. ARMSTRONG. Mr. President, I appreciate the cheerful demeanor of the Senator from Pennsylvania, and I wish to respond in kind.

I am sorry we are not in full agreement on this matter.

I wish to sum up where we are.

The amendment that has been offered by the Senator from Wisconsin (Mr. PROXMIRE) and I, and a number of our cosponsors, simply strikes from the bill the existing provision which permits the Secretary of Commerce to grant $40,000 to export companies or to companies who wish to become export companies to hire export managers.

The Senator from Michigan has suggested I am against this because it is a new initiative. That is not the case at all. I am against it because it is a very poor idea. It is an idea of getting the Government into the business of deciding which companies should have export managers and which of them should have export managers paid for by the Federal Government. In my opinion, that is it. It is unrelated to the budget stringencies as a matter of policy. In fact, if I thought this were a good idea, which I do not, it is still not a timely idea. This is a year of budgetary restraint. It is the year where we are going to cut back on food stamps, nutrition programs, and Eximbank. We are going to cut back on foreign aid. We are going to cut back on housing programs. We are going to cut back on every traditional worthy program of the Federal Government.

And it is no year, in my judgment, to start up something new, especially something as questionable as this.

Second, it is suggested that this is a pro-small business idea. I will tell Senators this. I never talked to any small businessmen who think that the way to help them is to create new Government programs or to have the Federal Government doling out new employment. The Senator from Wisconsin is entirely right.

Third, it is suggested that this is just a small amount so what, it really does not amount to anything in a $1 trillion budget. It is only a couple million dollars.

That is true, Mr. President. I wish to point out based on this formula we are only talking about maybe a handful of firms. Yet the Senator from Michigan who proposed this idea in the first place said there are as many as 20,000 firms in the country that might conceivably need and qualify for this kind of a program.

So what we are really seeing here is an establishment on a small scale on an idea which has enormous budgetary consequences if it catches on and if in fact it is funded.

Last but not least, we are told by the Senator from Pennsylvania that this is just an authorization. Let us put it in here and see whether or not the Appropriations Committee will fund it.

I suggest to Senators that we are the policymakers. Let us make a decision now. I hope that the Senate will adopt the amendment, take this unwise provision out of the bill, and I point out that the very people who are expected to administer this provision, that is to say the administration, says that the amendment which Senator PROXMIRE and I have offered is a proper one and one which they support.

So, for all those reasons, I call for the adoption of the amendment.

Mr. President, it would now be my suggestion—I think we have completed debate on this issue, the yeas and nays have been ordered—and after consultation with the floor manager of the bill and with the leaders, I ask that we set aside further consideration of this and proceed to the consideration of an amendment which Senator PROXMIRE and I are going to offer on a similar although—a similar subject so that we can have back-to-back votes on it if, in fact, a back-to-back vote is required.

Mr. HEINZ. Mr. President, I know of no objection on our side.

Mr. RIEGLE. I would have to object on this side because, first of all, I want a vote in order to find out where we are because I want to propose putting something in if this were to succeed. I hope it will not, but I want to know where we stand before we go any further.

The yeas and nays have been ordered. and if there is no further comment at this time I suggest that we vote and settle the issue.

Mr. ARMSTRONG. In view of the objection of the Senator from Michigan, we have no other recourse than to do so.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. HARRY F. BYRD, JR. Mr. President, before the roll is called, I ask unanimous consent that I be added as a cosponsor of the amendment of the Senator from Colorado.

Mr. ARMSTRONG. Mr. President, I would be honored to do so. I ask unanimouse consent that the Senator from Virginia be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

● Mr. EAGLETON. Mr. President, I strongly support expansion of U.S. export trade. It is good for this country's balance of trade and it is good for the profits of businesses that find foreign markets. But, I can find no justification whatsoever for the American taxpayers to be subsidizing the salaries of an export manager for these companies. The administration tells us we cannot afford CETA job training funds for unemployed youth and we have cut that program severely. We cannot afford to properly feed our elderly. And, yet, this provision would subsidize up to half the salary of an $80,000-a-year executive for some profitmaking business. I strongly support taking this provision out of the bill.●

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Colorado.

The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. DURENBERGER), and the Senator from Oregon (Mr. PACKWOOD), are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mr. DURENBERGER) would vote "yea."

Mr. CRANSTON. I announce that the Senator from Illinois (Mr. DIXON), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Alabama (Mr. HEFLIN) are necessarily absent.

I further announce that the Senator from New Jersey (Mr. BRADLEY) is absent on official business.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 68, nays 25, as follows:

[Rollcall Vote No. 81 Leg.]

YEAS—68

Abdnor	Garn	Nickles
Armstrong	Glenn	Nunn
Baker	Goldwater	Percy
Bentsen	Gorton	Pressler
Boren	Grassley	Proxmire
Boschwitz	Hatch	Pryor
Bumpers	Hatfield	Quayle
Byrd, Harry F., Jr.	Hawkins	Roth
	Hayakawa	Rudman

Hart		

NOT VOTING—7

Bradley	Heflin	Williams
Dixon	Huddleston	
Durenberger	Packwood	

So Mr. ARMSTRONG's amendment (UP No. 60) was agreed to.

Mr. PROXMIRE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ARMSTRONG. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 61

(Purpose: To strike out section 106)

Mr. PROXMIRE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE), for himself and Mr. ARMSTRONG, proposes an unprinted amendment numbered 61:

Beginning with page 20, line 19, strike out all through page 21, line 12.

Redesignate succeeding sections accordingly.

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that Senator NICKLES be added as a cosponsor on the preceding amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, this amendment I have sent to the desk is cosponsored by the distinguished Senator from Colorado (Mr. ARMSTRONG). This amendment strikes section 106 from the bill. Section 106 authorizes $10 million to be spent in each of the years 1982 through 1986, or $50 million for operating expenses of export trading companies. The original provision in committee was to authorize $100 million. On the morning of the markup, the administration made it plain it did not favor the provision at all. So the committee cut the $100 million authorization to $50 million. The amendment would cut it to zero. That would be in accordance with the administration's position.

I read an excerpt from a letter from the Secretary of Commerce, which says:

While the administration sympathizes with the goal of providing some direct financial backing for trading companies, we cannot advocate such a course in light of overall budget priorities.

Mr. President, there is no excuse to spend Government money for this purpose. Section 106 sends out the wrong signal to the American people. In considering Senate Concurrent Resolution 9, the Senate debated expenditures for veterans benefits, school lunches, social security benefits, and other social programs. Many of them were cut by 25 percent. Can we seriously propose $50 million more in this bill? Here we are authorizing $50 million that the Reagan administration does not want and tells us they do not need. Does it make any sense to spend $50 million on a new program, a program this administration enthusiastically supports, when the same administration tells us they do not want, do not need, this money?

The Secretary of Commerce tells us they cannot advocate such a course in light of overall budget priorities.

Mr. President, I think all of us are very much aware of the fact that only a few days ago the Senate passed a resolution which was certainly unprecedented in recent years, which sharply reduced the rate of spending in a whole series of programs and actually made some very, very sharp cutbacks in others.

Some of those votes were agonizing for many Members of the Senate. For us to come along now with a new program and add $50 million at a time when the administration says they do not need it, do not want it, seems to me to be extraordinarily contradictory. It certainly would indicate we do not have the kind of convictions about economy and fiscal responsibility that we showed only a few days ago.

Mr. President. I yield the floor.

The PRESIDING OFFICER (Mr. MURKOWSKI). The Senator from Pennsylvania.

Mr. HEINZ. Mr. President, I rise in opposition to the Proxmire amendment. What the amendment seeks to do is essentially strike all of section 106, which authorizes the Economic Development Administration and the Small Business Administration to assist export trading companies, with loan guarantees or operating grants in meeting starting up expenses, in the process giving special weight to export benefits, and to furthering the involvement of minority business or agricultural concerns in the export market.

The Senator from Wisconsin has accurately stated that we cut the money in half in the committee from an annual authorization of $20 million to $10 million.

There was, however, also an implication in the Senator's statement that the administration has some programmatic problems with the amendment.

I think a careful examination of the testimony in the hearing record will reveal that Secretary Baldrige does not have any programmatic problem. He does have a budgetary problem, which I will speak to in a moment. But as to any programmatic concerns, Secretary Baldrige, in answer to my question in that regard, said:

Senator, I am sure you understand. We don't think those two provisions are necessarily that bad. It is this very difficult kind of budget cutting we have to do.

So the issue is money. In this case, Mr. President, when people say it is not the money but it is the principle of the thing, as is often the case in real life, you can be sure it is a question of money, not principle.

The fact is that this provision in the bill does not commit the administration or the Appropriations Committee to spend 1 cent. The reason this authorization, a noncumulative authorization, by the way—over 5 years, 1982 through 1986—is here is so that, in the event we decide that because of budgetary austerity, we cannot afford to do anything here in 1982 or 1983, we have the standby authority in 1984, 1985, and 1986 to do something.

Mr. President, this is a 5-year authorization. It means it will not be very easy to get at it again until 1986. That is an extremely long way away, and it is well into the time when we shall have, according to President Reagan's economic forecast, vast budget surpluses, shortages of employees, not shortages of jobs, and inflation so low that we can hardly see it. And let me say, Mr. President, all those scenarios are welcome, indeed.

It does not make a lot of sense to this Senator to foreclose for the promising years of 1984, 1985, and 1986 an opportunity to do something we might well want to do.

Mr. PROXMIRE. Will the Senator yield on that?

Mr. HEINZ. Not yet.

I might add, Mr. President, that programmatically, it is the small, new trading company, dealing primarily with smaller businesses, that is going to have the most difficulty getting started. It is that small, new trading company that is going to be most in need of the kind of assistance that section 106 can provide.

Mr. President, I believe that the thrust of the Proxmire amendment is to discriminate most against the very people we are trying to help the most; namely, small businesses. Incidentally, Mr. President, I think we are all very proud of our record of supporting small businesses. I know Senator PROXMIRE and Senator ARMSTRONG are, but in this instance, they are striking the established means of helping small business—the Small Business Administration and the Economic Development Administration. Not only that, the Secretary of Commerce as much as admits that he does not have any alternative ways to increase small or minority business involvement in these export trading companies.

So, Mr. President, I hope the Senate understands that this amendment is very different from the last one, where, I think, although I did not agree with it, there was a programmatic case made against the amendment. I do not think we can make a programmatic case against this amendment and neither does the administration.

UP AMENDMENT NO. 62

Mr. President, having said that, I do recognize that people here are terribly nervous about budgetary matters. So I am prepared to take what I believe is an appropriate middle ground. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ) proposes an unprinted amendment numbered 62.

Mr. HEINZ. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the material proposed to be stricken, insert the following:

INITIAL INVESTMENTS AND OPERATING EXPENSES

SEC. 106. (a) The Economic Development Administration and the Small Business Administration are directed, in their consideration of applications by export trading companies for loans and guarantees, and operating grants to nonprofit organizations, including applications to make new investments related to the export of goods or services produced in the United States and to meet operating expenses, to give special weight to export-related benefits, including opening new markets for United States goods and services abroad and encouraging the involvement of small, medium-size, and minority businesses or agricultural concerns in the export market.

(b) There are authorized to be appropriated as necessary to meet the purposes of this section $5,000,000 for each of the fiscal years 1982, 1983, 1984, 1985, and 1986. Amounts appropriated pursuant to the authority of this subsection shall be in addition to amounts appropriated under the authority of other Acts.

Mr. HEINZ. Mr. President, essentially, what this amendment does is cut the amount of money in the bill per year from $10 million to $5 million for each of the 5 fiscal years, 1982 through 1986.

It is my hope that my colleagues, in the spirit of compromise, will accept this amendment as an alternative to what is being offered.

Mr. ARMSTRONG. Mr. President, I congratulate the Senator from Wisconsin for taking the lead with this amendment. I am pleased to join him as a cosponsor to the proposal to strike the funding authorization from this bill. I, for one, am opposed to the amendment offered by the Senator from Pennsylvania which, although it leads in the right direction, nonetheless leaves an authorization of $25 million of spending in a bill which requires no money whatsoever.

The bill we are considering, of which I am a cosponsor, is to be permissive, to say that certain private sector entities are to be permitted to form export trading companies in order to stimulate the growth of American exports. In other words, we are saying, "Here's an open door; if your company thinks it can make some money by going through that door, go ahead." Now we are talking about paying people to take this step across the threshold to international trade. This does not make sense from a free enterprise standpoint, it does not make sense from an export standpoint, and it certainly does not make sense, in a time when we are in the tightest budget fix that we have ever been in in the recollection of any living Senator, to say that we would authorize $25 million for such an unusual kind of spending just does not make any budgetary sense.

The bottom line is this, Mr. President: This is welfare for exporters. We can beat around the bush about it, but that is exactly what it is. If we pay people to go into the exporting business, that is a subsidy. A less polite, less tactful name for it is welfare. As one who has voted rather consistently to curb the growth of welfare in this country. I, personally, am not about to vote to pay for this kind of program.

Mr. President, the administration agrees that the money is not needed. The Secretary of Commerce has written a letter outlining his opposition to this authorization. The Office of Management and Budget is opposed to this authorization, and I am certain that my colleagues on the Senate Budget Committee, who, right now, are meeting, seeking to find additional cuts to make so we can have a balanced budget in 1984, if not sooner, are certainly not going to support this.

Mr. President, the Senator from Pennsylvania is correct that this is only an authorization. Yet we all know that the game around here is to get something slipped into a bill as an authorization with the understanding that, after all, it is only an authorization and the final decision is for the appropriations process. But, once something is authorized, the argument is suddenly reversed. Then we are told, in support of a small initial appropriation, that we have to vote for this; after all, this has been authorized by law and we have made an implied commitment, a promise, we have set up a program, surely we are not going to vote to cut out something supported by law. So we get whipsawed back and forth.

Mr. President, there is no justifiable reason for a $50 million authorization, there is no justifiable reason for a $25 million authorization. The administration is against it. I guess I have made it clear that I am against it.

Let me emphasize in closing, Mr. President, that I am strongly in favor of the purpose of the bill, which is to remove existing legal restrictions on the right of certain private companies to form export trading companies. I think the future of this country's economy, in industry and agriculture, is increasing our export markets, and this bill will help us do it. The authorization is not required, in my opinion. Therefore, Mr. President, I shall urge my colleagues to vote against the amendment of the Senator from Pennsylvania and for the amendment of the Senator from Wisconsin.

Mr. HEINZ. Will the Senator from Colorado yield for a question?

Mr. ARMSTRONG. I am pleased to yield for unlimited purposes, Mr. President.

Mr. HEINZ. Mr. President, I know that the Senator from Colorado is an extremely vigilant man, but I have to point out to the Senator that this is the second shot he has had at this bill. He was a member of the committee last year, was a strong supporter of the bill in its entirety last year. He was a member of the committee; he did not object to this same provision, section 106 of the bill, last year.

He did not, as I recollect—if I am wrong, I am sure he will correct me—object to this section when it was $20 million per year, $100 million, last year. If he did, there was no vote or amendment offered, as I recollect.

Is my recollection correct?

Mr. ARMSTRONG. Mr. President, in response to the Senator I say that last year was last year; this year is this year.

One of the very last things that happened in the closing days of the last session of Congress was that I took the floor to oppose an increase of $38 million in the funding for Amtrak, a supplemental appropriation which was so unnecessary that even the Department of Transportation opposed the increase. Yet we could not muster the votes on the floor of the Senate to head off an increase of $38 million for that supplemental, which was so clearly unnecessary.

This year this body already has voted not only to rescind the $38 million in Amtrak but also to cut an additional $500 million out of that wasteful and extravagant program.

What I am saying is that the Amtrak vote and the Conrail vote and the $40 billion in budget cuts which have been approved by the Senate earlier this year show how different the political climate is this year from last.

Why did I not offer an amendment on this matter last year? Because you can only tilt at so many windmills at once. I did not think such an amendment would carry last year. This year I think it will.

This is a time for budgetary restraint, and I believe that the amendment which Senator PROXMIRE and I have offered is consistent with that restraint.

There is a time to start new programs. There is a time to create new ways to establish Federal programs and to spend Federal dollars. But clearly this year, and I would think for the next several years, is not a very likely or timely moment for that.

The Senator's recollection is correct, that I did not offer an amendment; but I do so now.

Mr. HEINZ. Mr. President, I happen to agree with the Senator entirely on the question of the budgetary priorities changing.

The reason I asked the question was not to draw him out on a question on which we are in substantial accord but to establish whether or not he thought that what he supported last year was welfare for exporting last year as opposed to welfare for exporting this year.

Mr. ARMSTRONG. Mr. President, let the record reflect that the Senator from Colorado, despite many misgivings, has supported welfare of different kinds on some occasions.

If last year I positioned myself as having supported a form of welfare which this year seems odious to me, I confess that inconsistency is not one of the hobgoblins of the mind of the Senator from Colorado.

Nonetheless, that the issue is clear. We should not crank this money into the budget.

I believe we are ready for a vote on this matter.

Mr. HEINZ. I thank the Senator for yielding.

Mr. ARMSTRONG. I thank the Senator for his courtesy in jogging my memory on this matter.

The PRESIDING OFFICER. The Chair thanks the Senator from California.

The Senator from Pennsylvania is recognized.

Mr. HEINZ. Mr. President, I ask unanimous consent that we temporarily lay aside for not to exceed 5 minutes the Proxmire amendment and the Heinz amendment to the Proxmire amendment for the purpose of allowing Senator MATHIAS to proceed.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 25

(Purpose: To establish an International Antitrust Task Force)

Mr. MATHIAS. Mr. President, I call up my amendment which is amendment No. 25, a printed amendment.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Maryland (Mr. MATHIAS) proposes an amendment numbered 25.

Mr. MATHIAS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 47, line 16, add the following title III:

SHORT TITLE

SEC. 301. This title may be cited as the "Commission on the International Application of the United States Antitrust Laws Act".

ESTABLISHMENT OF COMMISSION

SEC. 302. (a) There is established the Commission on the International Application of the United States Antitrust Laws (hereinafter referred to as the "Commission").

(b) The Commission shall be composed of eighteen members who shall be appointed by the President as follows:

(1) four members from the executive branch of the Government:

(A) the Vice President of the United States;

(B) the Assistant Attorney General for the Antitrust Division;

(C) the Chairman of the Federal Trade Commission; and

(D) the Legal Advisor of the Department of State;

(2) four members from the Senate, two members to be named upon the recommendation of the majority leader, and two members to be named upon the recommendation of the minority leader;

(3) four members from the House of Representatives to be named upon the recommendation of the Speaker of the House of Representatives; and

(4) six members from the private sector.

(c) The Chairman of the Commission shall be the Vice President of the United States.

(d) The President shall designate the Assistant Attorney General for the Antitrust Division and the Legal Advisor of the Department of State as the Vice Chairmen of the Commission.

(e) The majority and minority leaders and the Speaker of the House shall make recommendations for the appointments to be made pusuant to subsection (b) within thirty days of the enactment of this Act.

(f) The President shall make all of the appointments in accordance with subsection (b) after receiving the recommendations set forth in paragraphs (2) and (3) of subsection (b), but such appointments shall be made no later than sixty days after the date of enactment.

(g) The first meeting of the Commission shall be called by the President within thirty days following the date such appointments to the Commission are made.

(h) Not more than one-half of the members of each class of members set forth in paragraphs (2), (3), and (4) of subsection (b) shall be from the same political party.

(i) The term of office for members shall be for the term of the Commission.

(j) A vacancy in the Commission shall not affect its powers, and shall be filled in the same manner in which the original appointment was made.

(k) Ten members of the Commission shall constitute a quorum (but a lesser number may hold meetings).

(l) The membership of the Commission shall be selected in such a manner as to be broadly representative of the various interests, needs, and concerns which may be affected by the international aspects of the United States antitrust laws.

PURPOSES OF THE COMMISSION

SEC. 303. (a) The Commission shall—

(1) conduct a comprehensive study of and make recommendations concerning the international aspects of the antitrust laws of the United States, the applicable rules of court, related statutes, administrative procedures, and their applications, their consequences, and their interpretation by the courts and Federal agencies (hereinafter referred to as "the United States antitrust laws"); and

(2) make periodic reports to the President and to the Congress concerning its activities and make a final report to the President and the Congress concerning such comprehensive study.

(b) Such comprehensive study shall specifically address—

(1) the application of the United States antitrust laws in foreign commerce, and their effect on—

(A) the ability of United States enterprises to compete effectively abroad; and

(B) the ability of United States enterprises to compete or deal effectively with foreign controlled enterprises in market and nonmarket economies;

(2) the effect of the application of the United States antitrust laws on United States relations with other countries;

(3) the jurisdiction and scope of the application of the antitrust laws to foreign conduct and foreign parties;

(4) the issue of reciprocity between nations with respect to mutual access to markets, equal opportunities for foreign investments, and enforcement of antitrust laws;

(5) the applications of United States rules of court relating to the enforcement of antitrust laws in the context of international transactions (for example, the "per se" and "rule of reason" doctrines);

(6) the application of the United States antitrust laws to joint ventures, mergers, acquisitions, and distributions and licensing arrangements between and among the United States and foreign based enterprises; and

(7) the proper scope and effect of the following on the application of the United States antitrust laws:

(A) the rules governing sovereign immunity;

(B) the defense of "foreign sovereign compulsion"; and

(C) the doctrine of comity.

COMPENSATION OF MEMBERS OF THE COMMISSION

SEC. 304. (a) Members of Congress, who are members of the Commission, shall serve without compensation in addition to that received for their services as Members of Congress, but they shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of the duties vested in the Commission.

(b) Notwithstanding section 5533 of title 5, United States Code, any member of the Commission who is in the executive branch of the Government shall receive the compensation which he would receive if he were not a member of the Commission, plus such additional compensation, if any, as is necessary to make his aggregate salary not in excess of the highest rate for employees compensated at the rate of GS–18 of the General Schedule under section 5332 of title 5, United States Code, and he shall be reimbursed for travel, subsistence, and other necessary expenses incurred by him in the performance of the duties vested in the Commission.

(c) Members from the private sector shall each receive compensation not exceeding $200 per diem when engaged in the performance of duties vested in the Commission, plus reimbursement for travel, subsistence, and other necessary expenses incurred by them in the performance of such duties.

POWERS OF THE COMMISSION

SEC. 305. (a)(1) The Commission or, on the authorization of the Commission, any subcommittee thereof, may, for the purpose of carrying out its functions and duties, hold such hearings and sit and act at such times and places, administer such oaths, and require, by subpena or otherwise, the attendance and testimony of such witnesses, and the production of such books, records, correspondence, memorandums, papers, and documents as the Commission or such subcommittee may deem advisable. Subpenas may be issued to any person within the jurisdiction of the United States courts, under the signature of the Chairman or Vice Chairmen, or any duly designated member, and may be served by any person designated by the Chairman, the Vice Chairmen, or such member. In the case of the failure of any witness to comply with any subpena or to testify when summoned under authority of this section, the provisions of sections 102 through 104, inclusive, of the Revised Statutes (2 U.S.C. 192–194), shall apply to the Commission to the same extent as such provisions apply to Congress.

(2) For purposes of section 552(e) of title 5, United States Code, the Commission shall not be considered to be an agency.

(b) Each department, agency, and instrumentality of the executive branch of the Government, including independent agencies, is authorized and directed to furnish to the Commission, upon request made by the Chairman or Vice Chairmen, such information as the Commission deems necessary to carry out its functions under this title.

(c) Subject to such rules and regulations as may be adopted by the Commission, the Chairman shall have the power to—

(1) appoint and fix the compensation of an Executive Director, and such additional staff personnel as he deems necessary, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, but at rates not in excess of the maximum rate for GS–18 of the General Schedule under section 5332 of such title, and

(2) procure temporary and intermittent services in accordance with the provisions of section 3109 of title 5, United States Code, but at rates not to exceed $200 per diem for individuals.

(d) The Commission is authorized to enter into contracts with Federal or State agencies, private firms, institutions, and individuals for the conduct of research or surveys, the preparation of reports, and other activities necessary to the discharge of its duties to such extent and in such amount as are provided in appropriations Acts.

FINAL REPORT

SEC. 306. The Commission shall transmit to the President and to the Congress not later than one year after the first meeting of the Commission, a final report containing a detailed statement of the findings and conclusions of the Commission, including its recommendations for administrative, judicial, and legislative action which it deems advisable. Any formal recommendation made by the Commission to the President and to the Congress must have the majority vote of the Commission as present and voting.

EXPIRATION OF THE COMMISSION

SEC. 307. Sixty days after the submission to Congress of the final report provided for in section 6, the Commission shall cease to exist.

AUTHORIZATION OF APPROPRIATION

SEC. 308. There are hereby authorized to be appropriated such sums as may be necessary to carry out the activities of the Commission.

EFFECTIVE DATE

SEC. 309. The provisions of this title shall take effect upon the date of enactment of this title.

Mr. MATHIAS. Mr. President, I am a cosponsor of the Export Trading Company Act. I wish to do everything that I can do to make sure that it gets passed

and it gets signed into law at the earliest possible time.

If the United States is going to pay just for the energy we have to import in the next 19 years, to the end of this century, we will have to expand our exports tenfold.

So, there is urgency in getting this bill into law, getting it into action.

I have also proposed this amendment to establish a 12-month task force to study the larger impact our antitrust laws have on the ability of U.S. firms to compete overseas.

I am very happy that the distinguished Senator from Mississippi (Mr. COCHRAN) has joined me as a cosponsor of the amendment.

The export trading company bill addresses a very narrow but important aspect of the problem, and the task force proposed in this amendment would focus on the whole gamut of issues raised by the extraterritorial application of the U.S. antitrust laws.

I think very few of us question the importance of exports to the economic health of the country. Exports now contribute more to our gross national product than private corporate investment does. One out of every eight jobs in the country is involved in exports. One dollar out of every three of U.S. corporate profits comes from international activities. One out of every 3 acres of farmland produces for export.

Yet, despite the critical importance of exports to our economic well-being, the United States still lags far behind its major trading partners in international trade. The U.S. share of free world exports has steadily decreased, from 18.2 percent in 1960 to 12.1 percent in 1980. In Germany, France, Italy, and the United Kingdom exports account for more than 50 percent of all goods produced, while in the United States they account for only 14 percent.

Much of the blame for our poor export performance can be pinned on the maze of disincentives to trade which the Federal Government has built up over the years. Last winter, the President's Export Council came out flatly in favor of removing self-imposed disincentives to U.S. exports. The Council recommended recently that every effort be made to facilitate U.S. export efforts and overseas operations by freeing U.S. firms from unnecessary antitrust constraints and uncertainties. To help accomplish this, the Council specifically recommended the enactment of this international antitrust task force bill, the same proposal contained in this amendment.

The 12-month task force would enable us to examine those issues in a thorough and thoughtful way. It would report its findings to the President and to Congress on what changes, if any, should be made to promote the doctrine of competition worldwide. In addition to the President's Export Council, the bill had the support of the U.S. Chamber of Commerce and the National Association of Manufacturers. We held extensive Senate hearings and the bill attracted 19 cosponsors and passed the Senate without a dissenting vote. Unfortunately, in the press of business in the final days of the 96th Congress, the House of Representatives failed to act on the bill. On February 5, I reintroduced the bill and Representative MCCLORY has already introduced a companion bill in the House of Representatives.

I have discussed this proposal with the floor managers of the pending legislation, S. 734, and I believe that they generally support the establishment of an international antitrust task force.

As a matter of fact, one of the distinguished cosponsors of the bill last year was the Senator from Pennsylvania, the manager of the bill today, Mr. HEINZ.

So, I am hopeful that this legislation will pass not only in this Congress but this year.

The PRESIDING OFFICER. The Chair reminds the Senator his 5 minutes have expired.

Mr. HEINZ. Mr. President, I ask unanimous consent that the Senator be yielded 3 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Maryland is recognized for 3 additional minutes.

Mr. MATHIAS. Mr. President, I am well aware that for a variety of reasons the pending amendment has the potential of slowing down the forward progress of S. 734 in the other body, and I am reluctant to add any burdens that might slow down the progress of the bill that I not only support but which I think is urgently necessary.

So, if it is the judgment of the manager of the bill that this is the case, I would consider withdrawing the amendment.

Mr. HEINZ. Mr. President, will the Senator from Maryland yield?

Mr. MATHIAS. I am happy to yield to the Senator from Pennsylvania.

Mr. HEINZ. Mr. President, I thank the Senator from Maryland for his excellent statement and for his excellent amendment.

I, in principle, can support his amendment, but I do believe that it is important to keep S. 734 as clean as possible so that we can keep the focus here today on export trading companies. We have so far been able to do so.

I assure my good friend from Maryland that with respect to his bill, S. 432, that he can count on my assistance in moving that bill ahead and as it is considered by his committee, the Judiciary Committee, I believe it is a good bill.

I believe that the task force he seeks to establish is extremely timely and important. As a matter of fact, I ask unanimous consent that at the appropriate time he add me as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATHIAS. Mr. President, I am very happy to add the Senator from Pennsylvania as a cosponsor of the bill.

His support and he will be critical to the early passage of it. I hope that it can be passed in the very near future.

I will see that his name is added as a cosponsor.

The bill is, of course, identical with this amendment. It still has, as it did last year, very widely expressed support, and I am confident it can be passed by the Senate in the normal course of business.

So I will accept the suggestion of the Senator from Pennsylvania and at this time, Mr. President, I withdraw the amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. HEINZ. Mr. President, will the Senator yield further?

Mr. MATHIAS. Yes.

Mr. HEINZ. Mr. President, I express my gratitude to the Senator from Maryland and also note for the RECORD that he has been an exceptionally strong supporter of S. 734, our export trading company legislation.

He has been a great advocate of a strong export policy. He has been a great advocate of a strong economy, and it is due to his support and the support of many like-minded Senators that we have been able to bring S. 734 before the Senate at this relatively early date.

I thank the Senator from Maryland for his cooperation.

Mr. MATHIAS. Mr. President, I thank the Senator from Pennsylvania.

UP AMENDMENT NO. 62

Mr. ARMSTRONG. Mr. President, the pending business I believe is the Heinz amendment in the nature of a substitute to the Proxmire-Armstrong amendment.

The PRESIDING OFFICER. The Heinz amendment is the substitute for the language proposed to be stricken by an amendment of the Senators from Wisconsin and Colorado.

Mr. ARMSTRONG. Mr. President, I thank the Chair.

In a moment I am going to move to table the Heinz amendment.

Before I offer that motion I just wish to make two observations since I expect this shall be the last time I will speak during the course of the debate on the amendment or on the bill.

First of all, I want to again congratulate those who brought this bill to the floor because, in my opinion, both from the standpoint of the long-run future of the economy of this country and from the standpoint of getting our finances in shape, from a budgetary standpoint, the prestige and security interests of this country, and in every way, this is an important and worthy bill.

The objection which the Senator from Wisconsin and I have to funding is one which we have already explained. There is no need to put $50 million in authorization in this bill. The administration is against it, the Secretary is against it, OMB is against it, and I trust the Senate will be against it.

The parliamentary situation, to recap, is simply that Mr. PROXMIRE and I have offered an amendment to delete all of the $50 million in spending which is authorized in the bill.

The Senator from Pennsylvania (Mr. HEINZ) has offered a substitute which would set the level at $25 million.

In order to clarify the situation and to permit Senators to dispose of the Heinz amendment without voting against what appears to be a cut in the amount of the authorization, I do now move to table the Heinz amendment.

Mr. HEINZ. Mr. President, will the Senator withhold his motion for one moment?

Mr. ARMSTRONG. Surely.

Mr. HEINZ. I think we are at a point where we are going to be able to have some back-to-back votes. Hopefully there will be one vote on the motion to table and the motion to table will not succeed—that is my hope and expectation. We will then voice-vote everything else. The Heinz amendment will be adopted, and then we can proceed to final passage—at least that is my hope. But the key to it is, I think, we are very close to wrapping this up.

Before we do that, Mr. President——

Mr. ARMSTRONG. Mr. President, before the Senator moves on from that point, if the Senator will yield, I take it it would be his intention to have a voice vote whether the tabling motion carries or not.

My expectation is that the motion to table will carry. In short, what the Senator is saying is that if the vote on the tabling motion is conclusive, in effect, before taking the money out, you are going to be for leaving it in for at least $25 million if the vote is not to table.

Mr. HEINZ. I do not know if I can go that far, but obviously if the motion to table does not succeed, we will then voice-vote the Heinz amendment, and that voice vote would be presumably successful in view of the will of the Senate, and then we could voice-vote final passage.

Mr. ARMSTRONG. Is it not the Senator's intention if the tabling motion succeeds also to proceed to a voice vote on the Proxmire-Armstrong amendment?

Mr. HEINZ. That would be the Senator's intention. I cannot speak for other Members.

Mr. ARMSTRONG. There is no need for repetitive rollcalls.

The PRESIDING OFFICER. If the amendment offered by the Senator from Pennsylvania prevails, under the precedents of the Senate, the amendment of the Senator from Wisconsin is rendered moot and is not voted upon.

Mr. HEINZ. I think we all understand that.

Mr. President, before we return to the business at hand, I want to take a moment to express my appreciation for the work of the Senator from Illinois (Mr. DIXON). He has been an unswerving supporter of this bill throughout its path through the Senate. Unfortunately, Senator DIXON cannot be here today for the final vote on S. 734, but I think the RECORD should reflect not only his support for the bill but also for the good work he has done as a member of the committee to help keep the bill intact and keep it strong.

In doing so I might add he has been following in the footsteps of his predecessor, Senator Adlai Stevenson of Illinois, to whose seat he succeeded. Senator Stevenson, of course, is really the true father of the export trading company legislation before us.

If his work on this bill is any indication, Senator DIXON is a more than worthy successor to Senator Stevenson.

Mr. PROXMIRE. Mr. President, will the Senator from Colorado withhold his tabling motion for just a minute so that I can make clear what we are voting on?

Mr. ARMSTRONG. Mr. President, I am pleased to withhold my request.

Mr. PROXMIRE. Mr. President, of course, I fully congratulate the distinguished Senator from Colorado. I do think, however, that it is clear that the Heinz amendment, if it carries, will mean we will have $25 million, that there will be authorized $25 million of spending which is likely to follow that.

If the Heinz amendment is defeated, it is clear that we will not spend that $25 million. In fact, it should be overwhelmingly clear to everybody here that we will save $25 million.

There should be no confusion on this because, as I understand it, this is an amendment which, as the Chair properly said, will make the Armstrong-Proxmire amendment, which would knock out the entire $50 million and go to zero funding, make that amendment moot, invalid, knock it out of the box entirely.

So the issue before the Senate in voting for the Armstrong motion to table, those who want to save $25 million would vote "aye," in favor of tabling, and those who think there should be $25 million in the bill will vote "no."

Mr. ARMSTRONG. Mr. President, I think we are ready for the motion.

The PRESIDING OFFICER. Does the Senator make the motion to table?

Mr. ARMSTRONG. I do so move and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Colorado to table the amendment of the Senator from Pennsylvania.

The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. DURENBERGER) and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Illinois (Mr. DIXON), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Kentucky (Mr. HUDDLESTON), and the Senator from Louisiana (Mr. LONG) are necessarily absent.

I further announce that the Senator from New Jersey (Mr. BRADLEY) is absent on official business.

The PRESIDING OFFICER (Mr. CHAFEE). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 55, nays 38, as follows:

[Rollcall Vote No. 82 Leg.]

YEAS—55

Abdnor	DeConcini	Hatch
Armstrong	Denton	Hawkins
Baucus	Dole	Hayakawa
Bentsen	Domenici	Helms
Biden	Eagleton	Hollings
Boren	East	Humphrey
Boschwitz	Exon	Johnston
Bumpers	Ford	Kassebaum
Byrd, Harry F., Jr.	Glenn	Kasten
Chiles	Goldwater	Lugar
	Grassley	Mattingly
McClure	Proxmire	Stafford
Melcher	Pryor	Symms
Mitchell	Quayle	Thurmond
Moynihan	Roth	Tower
Murkowski	Rudman	Wallop
Nickles	Sasser	Warner
Nunn	Schmitt	Zorinsky
Percy	Simpson	

NAYS—38

Andrews	Gorton	Matsunaga
Baker	Hart	Metzenbaum
Burdick	Hatfield	Pell
Byrd, Robert C.	Heflin	Pressler
Cannon	Heinz	Randolph
Chafee	Inouye	Rieg.e
Cochran	Jackson	Sarbanes
Cohen	Jepsen	Specter
Cranston	Kennedy	Stennis
D'Amato	Laxalt	Stevens
Danforth	Leahy	Tsongas
Dodd	Levin	Weicker
Garn	Mathias	

NOT VOTING—7

Bradley	Packwood	Williams
Dixon	Huddleston	
Durenberger	Long	

So the motion to table UP amendment No. 62 was agreed to.

Mr. ARMSTRONG. Mr. President, I move to reconsider the vote by which the motions to lay on the table was agreed to.

Mr. HEINZ. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ARMSTRONG addressed the Chair.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. ARMSTRONG. Mr. President, is the pending business now the Proxmire-Armstrong amendment?

The PRESIDING OFFICER. The Senator is correct.

Mr. ARMSTRONG. Mr. President, I suggest we move to a vote and have it by a voice vote.

Mr. METZENBAUM. Mr. President, I ask for the yeas and nays.

Mr. President, I withdraw that request.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Colorado and the Senator from Wisconsin.

So the amendment (UP No. 61) was agreed to.

Mr. ARMSTRONG. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HEINZ. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 63

(Purpose: To recognize the importance of agricultural exports)

Mr. PRESSLER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

Mr. HEINZ. Mr. President, may we have order?

The PRESIDING OFFICER. The Senator is correct.

Will the Senate please be in order? Will Senators please take their seats?

The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Dakota (Mr. PRESSLER) proposes an unprinted amendment numbered 63.

Mr. PRESSLER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 25, between lines 18 and 19, insert the following:

"(6) agriculture constitutes the foundation of the economy of the United States and will continue to be a leading sector in U.S. export growth;" and renumber the remaining subsections accordingly.

Mr. PRESSLER. Mr. President, I shall not take very much time as I have worked out this amendment with both the minority and the majority leaders earlier today.

I felt it very appropriate that agriculture be included in the findings in this bill because it is such an important part of our exports. Indeed, agriculture is our leading export.

The purpose of having agriculture in the findings of the act is that for too long Washington has thought of international trade as being merely industrial products. The fact of the matter is that agriculture is our chief export but it gets very little help and agricultural products are often sold to other nations on a concessionary basis.

This means that farmers, small businessmen, and farming communities pay for part of our trade bill.

I want agriculture to be treated on an equal basis and this amendment is a step in this direction.

In the future, administrators and lawyers interpreting this act will be able to look at the language contained in my amendment as a basis to work more vigorously for farm exports.

Mr. President, this amendment recognizes the importance of agricultural exports to U.S. international trade. This point seems indisputable and I hope that the managers of the bill will be able to accept it as a useful addition to the Export Trading Companies Act.

This amendment simply adds wording to the findings section of the bill. The amendment reads: "agriculture constitutes the foundation of the economy of the United States and will continue to be a leading sector in U.S. export growth."

The United States exported $31.975 billion worth of agricultural products in 1979, and preliminary figures indicate that 1980 agricultural exports were valued at about $40 billion. One-third of American agricultural production is exported. The agricultural trade surplus is approaching $30 billion or more. These facts should be recognized in that section of this bill which recognizes the increasing importance of exports to the U.S. economy as a whole.

As I indicated in testimony to the Senate Agriculture Committee on March 23, 1981, my own State of South Dakota exports over 20 percent of its farm produce. The farmers and ranchers of South Dakota are interested in seeing that percentage increase.

With that, Mr. President, let me say again that I hope the managers of the bill will find this additional language to be an acceptable and worthwhile addition to the bill.

Mr. President, small agricultural businesses no less than small manufacturers would be more active in exporting their goods overseas if they possessed the technical knowledge and experience which are essential for successful operation in the complicated business of selling their goods in foreign markets.

Already, American agriculture is the greatest success story in U.S. international trade. The U.S. agricultural trade surplus of over $24 billion last year helped greatly to diminish the awesome cost of importing $93 billion worth of foreign oil. Our food and fiber exports are essential for world survival and will continue to be in great demand as the world experiences a near doubling of its population by the end of the 20th century.

Mr. President, the great success of U.S. agricultural production lies principally in the fact that most of the exportable production is controlled by small and medium sized owner-operators of American farmland. The United States and the world have a tremendous vested interest in insuring that these producers continue to battle the great odds they must face—unpredictable weather, an uncertain economy, and sometimes questionable Government policies—in order to guarantee the continual production of food and fiber.

While most food production is controlled by small producers, the foreign marketing of that food is controlled by a very small handful of companies. They have been very successful in the export business. It is time to offer agricultural businesses some encouragement to expand their marketing potential in the world market.

Mr. HEINZ. Mr. President, the Senator is entirely correct. We have examined the amendment. I think we can certainly accept it on this side.

Mr. PROXMIRE. Mr. President, I am delighted to accept it on this side.

Mr. President, I might add that I think we all owe tribute to the Senator from Pennsylvania, who has done a superb job in handling this bill in committee and on the floor.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Dakota.

The amendment (UP No. 63) was agreed to.

Mr. HEINZ. Mr. President, I ask for the yeas and nays on passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

● Mr. BENTSEN. Mr. President, we hear a great deal about America's problems in international trade. Year after year we run a balance of trade deficit of about $30 billion. There is general agreement that we "must do something" to remain competitive in vital world markets.

But despite this vocal and very legitimate preoccupation with our trade performance, the Congress has been unable to enact legislation that would strengthen our hand in the export area. Not one significant element of the omnibus trade bill drawn up by the export caucus last year has become law.

The export trading company legislation, currently under consideration by the Senate, is an excellent opportunity to begin the process of eliminating disincentives to American exports; this legislation, which was passed unanimously by the Senate last fall but floundered in the House, will make American business better able to meet the terms of competition in the quest for international markets.

As an original cosponsor of S. 734 and its predecessor in the last Congress, I am convinced this legislation can make an important contribution to America's trade performance in the decade of the eighties.

No one should pretend that S. 734, despite its obvious advantages, constitutes some magical solution to our trade problems. Before America can return to world economic leadership and compete successfully in the international marketplace, we must demonstrate that we can put our own economic house in order. It will take time, sacrifice, and discipline to achieve the sort of fundamental reforms required to restore a healthy, dynamic American economy characterized by stability and real growth. But we have begun the process and as we succeed, our trade performance will inevitably improve.

The long-term nature of our economic problems should not, however, discourage us from taking steps that will have an immediate and favorable impact on our ability to export. The time has long since passed when American business and industry can accept unique, self-imposed restraints on our ability to market our products abroad.

We have seen that efficient export trading companies, able to provide a wide variety of services for their clients, have been an essential ingredient in the commercial success of nations like Japan that have emerged as consistent winners in the battle for exports.

Let us provide this advantage to our exporters. The provisions of S. 734 would encourage thousands of smaller and medium-size U.S. businesses—currently put off by the risk and complexity of exporting—to go after international markets. Trading companies of the type envisioned by this legislation will help spread out the risks of foreign trade and absorb currency fluctuations. They will help identify emerging market opportunities, assist in organizing joint construction projects abroad, and handle the logistics of foreign trade that presently deter so many potential exporters.

In addition, this legislation helps clarify many of the long-standing antitrust ambiguities that hinder the formation of American consortia to bid on significant export projects. Senator DANFORTH and I have long been interested in the effort to update the Webb-Pomerene Act and make it applicable to the export of services as well as goods. S. 734 accomplishes that objective. It also expands and clarifies the antitrust exemption for export trade associations and transfers administration of the act to the Department of Commerce.

It creates an office within Commerce to promote joint export activities and establishes a specific certification pro-

cedure that will eliminate the element of uncertainty in current law.

I am also enthusiastic, Mr. President, about the banking aspects of the Export Trading Company Act which permit the U.S. banking community to participate in export trading companies and provide the financial resources and expertise that have become such an essential ingredient in the success of our competitors. We have seen, time and again, that the ability to offer attractive credit terms to potential foreign buyers often means the difference between winning and losing sales.

While the United States has traditionally discouraged relationships between banks and trading companies, our competitors in trade have gone in the opposite direction and, with bank-owned trading companies, have frequently gained a competitive advantage over U.S. exporters. By permitting U.S. banks to acquire ownership in export trading companies under specified conditions and with appropriate safeguards, S. 734 would provide an important new asset in our drive to restore export competitiveness to the American economy.

For too long, Mr. President, this Nation has approached international trade as a luxury rather than a necessity.

Today success in the world of trade has become an indispensable ingredient in domestic prosperity. The United States has been slow to adjust and adapt to the changing environment of trade, and our share of world exports has decreased dramatically as a result.

I can see no good reason to continue to deny our exporters the support and assistance of full-fledged American export trading companies. Enactment of S. 734 will help even up the rules of the game and enable America to compete more effectively for world markets.●

● Mr. PERCY. Mr. President, I am an enthusiastic supporter of this legislation that will make a significant contribution to this country's export effort. I supported similar legislation last year, when the Senate passed a bill by a vote of 77 to 0, and I am a cosponsor of this year's legislation.

It is highly appropriate that this bill is one of the very first to come to a vote this year. We have had several measures on the floor that will move the President's domestic economic recovery legislation forward. This is the first major bill of this Congress that will advance our international economic position, and I commend Senator HEINZ and the Banking Committee for moving so expeditiously to bring this to a Senate vote.

Mr. President, our export performance over the past decade has been lackluster. Our merchandise trade has been seriously out of balance the past 4 years, with deficits of over $30 billion twice since 1977. The trade balance improved somewhat last year, but the Commerce Department still projects a preliminary 1980 trade deficit of over $26 billion. Moreover, these massive imbalances look even larger when compared with the relatively smaller deficits earlier in the 1970's. The 1976 trade deficit was a mere $9 billion. The previous year, 1975, we even scored a surplus of $9 billion. So massive trade deficits are not what we are accustomed to.

I am concerned not only that we seem to be losing our ability to finance our own imports but that we are also losing our global share of exports. In the last decade, the U.S. share of world markets declined from over 21 percent to 17.4 percent, the largest relative decline among major industrial exporters.

The goal of this legislation is to improve U.S. export performance by furthering the development of U.S. export trading companies. Only 10 percent of the 250,000 manufacturing firms in the U.S. export. The majority of these businesses are small and medium sized; many of them would export if they could cope with the risks and complexities of exporting. The Department of Commerce has estimated that up to 20,000 additional U.S. manufacturers and agricultural producers could export. It is in the Nation's best interests that these firms begin to market goods and services abroad. S. 734 will facilitate that movement of small businesses into the export field.

It comes as no surprise that more of these firms do not get involved in the export sector. The disincentives have simply been too strong.

Just this winter this matter was addressed by a distinguished panel of private citizens, the Japan-United States economic relations group. U.S. Ambassador Robert Ingersoll is the American chairman of the group, and Ambassador Nobuhiko Ushiba, former State Minister for External Economic Affairs, is his Japanese counterpart. An important part of their January 1981 report states:

> Solutions to the problems hindering further United States export growth are even more important in a global context than that of the bilateral imbalance. Even so, the Group believes one of the most important factors in the bilateral trade relationship is the management and performance of the United States economy, particularly government and industry policies toward exports. No change would improve the United States-Japan economic relationship more than an improvement in the fundamental strength of the United States economy. . . .
>
> In addition, United States exports to Japan and indeed to all the world are inhibited by a lack of United States business attention to foreign market opportunities and by government disincentives to exporting. Industrial exports account for a noticeably lower percentage of GNP in the United States than any other advanced industrial country. Much of American business has traditionally had little interest in foreign markets. The size and familiarity of the American domestic market, combined with ignorance about foreign markets, have deterred American firms from realizing important foreign market opportunities. In addition, a variety of United States laws and government policies tend to make exporting less attractive.

Mr. President, that is a candid assessment of the U.S. trade position and where remedial action should be directed. The Japan-United States economic relations group has pinpointed, in their excellent analysis, one of the primary reasons for our poor export record. This legislation before us today will move us off dead center and will begin to reverse those policies that tend to make exporting less attractive.

The Export Trading Company Act has a number of important provisions, but I would like to highlight just a few. Perhaps one of the most significant provisions is in title II of S. 734 where a new procedure is outlined for certification of export trade associations and export trading companies. Once an association or company has been certified, they can then apply for exemption from the antitrust laws for the purpose of marketing products abroad. One of the grievances that small- and medium-sized businesses have had over the years is the threat that if they joined with other firms to market products overseas, the Justice Department or Federal Trade Commission would view this as a broach of the antitrust laws. The result was a strong reluctance to export. This carefully-worded section granting antitrust immunity, limited in scope to what is specified in the certification, provides business with a much greater degree of certainty and should offer a major incentive for joint ventures in exporting.

Title I of the bill also contains important provisions relating to banks and their role in boosting our export performance. Under the provisions of S. 734, banks will be authorized to invest up to 5 percent of their capital in export trading companies. As much as $10 million can be invested in export trading companies by banks, so long as this investment does not make the trading company a subsidiary of the bank. To encourage these investments, the bill allows investments of this type to go forward without the approval of bank regulatory agencies. Of course, in cases where investments exceed $10 million, the appropriate regulatory bodies would be called on to review the investment. In cases where more than 50 percent of the stock of an export trading company would be purchased by a bank, regulatory agency approval is also required.

A third very important part of this bill is section 104 which directs the Secretary of Commerce to promote and encourage the formation and operation of export trading companies. On this type of outreach program could depend the whole success of the other key parts of the bill. Export trading companies of the magnitude envisioned by the legislation are a new aspect of the American economic landscape. Many smaller firms, as I mentioned earlier, have studiously avoided exporting. We need to get the word out to them that some of the disincentives have been reduced and others have been eliminated outright. As with all new endeavors, success of export trading companies will hinge on the success we have in communicating the new terms of the law.

Mr. President, I am greatly encouraged by the Senate's speedy consideration of this legislation. It is important for the entire country, but it will also have a marked impact on my own State of Illinois, which is already one of the premiere exporting States of the Nation. In agricultural exports, we have consistently ranked No. 1, with a wide range of agricultural products. Our top ex-

ports have been feed grains and soybeans. One of every two farming jobs rely on exports in my State and we have always sought new ways to market exports and we are always looking for new markets for our products.

In manufacturing, Illinois ranks second in the United States in exports. Machinery, food products, chemicals and transportation equipment are by far the most important manufactured exports, accounting for one of every nine jobs. Moreover, the manufacturing export sector is spread throughout the State and is not concentrated just in Chicago. In the Chicago economy, about 6 percent of the work force had jobs relating to exports, but in each of Decatur, Peoria, and Springfield, well over 20 percent of the work force jobs depend on exports.

In short, Mr. President, exporting is a way of life in my home State. We know the value of cultivating foreign markets and Illinois farmers, businessmen, and workers have traditionally given their support to expanding overseas opportunities. I know my fellow Illinoisans will welcome passage of this bill and the new export instruments it promises.●

● Mr. GLENN. Mr. President, I rise to speak in support of S. 734, a bill to encourage exports by facilitating the formation and operation of export trading companies. I cosponsored this legislation last year and the reasons for supporting it this year are even more compelling. The purpose of this bill is to improve U.S. export performance at a time when American companies are facing increasingly vigorous competition in the international marketplace. From every corner of the world, government planning and financing of foreign trade challenges the resources of American firms. To meet this challenge, American companies must organize the most efficient business operations possible and we in Government must do what we can to help American firms improve their competitive edge.

One way in which we can do this is by facilitating the formation of trading companies. The trading company is not a new idea. It is as old as commerce itself and has enjoyed great success in other countries. In Japan, for example, the top 10 trading organizations, the Sogo Shoshas, account for approximately 60 percent of Japan's imports and 50 percent of its exports. Trading companies have also played an important role in the economic growth of many European countries. Yet, despite their historical and international success, trading companies have not flourished in the United States.

There are several reasons—both economic and legal—for this failure. It is my contention that the economic conditions no longer prevail and that the legal restraints are equally outdated. First, we have been generally self-sufficient for the bulk of our economic needs throughout our Nation's history. Second, the industrial revolution occurred early in our history and its effects spread quickly. This made the acquisition and distribution of goods easy and further reduced our need for foreign trade. Third, the large size of our domestic market meant that American businessmen had ample growth opportunities close at hand and involving relatively small risk. These factors, all the products of our unique geographic and economic heritage, limited the attractiveness of and need for foreign trade companies. But these unique conditions no longer prevail. The interdependence and competitiveness of the world market make it impossible for the United States to sustain its economic growth while operating on outdated notions of resource self-sufficiency in limited domestic markets.

Unfortunately, Federal laws and regulations limit our ability to respond effectively to these new challenges. For example, Government regulations prevent U.S. banks from offering many important trading services. In addiiton, antitrust uncertainties deter many U.S. firms from cooperating with other U.S. producers in their organization of export activities. These restrictions are anachronisms. They hamper American firms at a time when foreign governments are cooperating with and, in many instances, even subsidizing and directing the export efforts of their own firms. The result is that our unilateral export restrictions cost American businessmen opportunities abroad and cost American workers jobs at home.

S. 734 addresses many of these obstacles and facilitates the formation and operation of export trading companies. It does so by allowing banking organizations to play a significant role in the future success of American export trading companies. In the past, many small- and medium-sized firms found foreign markets difficult to penetrate and too costly to do business in. That is one of the reasons why the Commerce Department estimates that some 20,000 smaller U.S. firms who could profitably export presently do not. Bank participation will enhance opportunities for small- and medium-sized firms to enter world markets by giving them access to the capital, financing, and marketing capabilities heretofore possessed only by larger firms.

While the degree of future bank participation in export trading companies—as well as the forms that such participation may take—remain uncertain at present, section 105 of the bill sets certain limitations on the level of involvement permitted banking organizations that invest in or finance these companies. S. 734 allows banking organizations to invest up to $10 million in one or more export trading companies without prior regulatory agency approval, as long as that investment does not amount to control. Investments in excess of $10 million, or any investment or action which amounts to control of an export trading company, must be approved by the appropriate Federal banking agency. The bill sets an overall limit on a bank's involvement by prohibiting its direct and indirect investments in the ownership of one or more export trading companies from exceeding 5 percent of the bank's capital and surplus. Total investment by a banking organization, combined with extensions of credit to export trading companies, cannot exceed 10 percent of the bank's capital and surplus.

Some have argued that these restrictions do not go far enough; that banks should not be allowed to gain control of an export trading company, because that would represent a substantial departure from the long-established separation of banking and commerce in our economic system. They fear that the public's deposits may become exposed to undue risk if banks acquire ownership control of trading companies.

Legitimate questions concerning the scope of bank participation do merit careful consideration. It is time that banks, given their international offices, experience in trade financing and familiarity with domestic U.S. producers, will be likely sources of leadership in forming export trading companies. But I feel that S. 734 includes important safeguards which not only protect against unsound banking practices, but also against any unfair competitive advantages that might otherwise accrue to an export trading company having a bank investor.

A specific provision of the bill, for example, prohibits banks from extending credit on a preferential basis to an export trading company in which it has an equity interest. This subsection meets a traditional concern of U.S. policy that banks not favor their affiliates in loan transactions. But even without the inclusion of this provision, the Financial Institutions Regulatory and Interest Rate Control Act of 1978 already provides safeguards against such unfair lending practices by banking institutions. Similarly, the 5-percent limit placed on total equity investments, and the 10-percent limit placed on a bank's total investments in or financing of trading companies, protect banking organizations from overexposure.

I see no harm in allowing a bank to own a trading company as long as such limitations exist. In fact, permitting banks to have equity and management control over their affiliate relationships seems far wiser than mandating the bank capital be controlled solely by the decisions of nonbanking partners. Banking organizations will surely be more inclined to form export trading companies if they can control their investments. Such investments, in turn, will provide banks with a long-term incentive to establish the additional framework needed to offer a complete range of export services.

S. 734 also stipulates that any bank's proposed or existing investment in trading companies may be terminated by the appropriate Federal regulatory agency upon its determination that the ownership or control of any such investment constitutes a serious risk to the financial safety, soundness, or stability of that bank. I believe that these limitations, coupled with the banking agencies' broad regulatory, supervisory, and examination powers and other existing legal restrictions, assure that there will be no serious risk to the safety and soundness of bank participation in export trading companies.

The access to capital and international

markets provided by title I of S. 734 is a necessary, but not a sufficient, step in facilitating the formation of American trading companies. It is not sufficient because American firms have long been unwilling to risk investments in export activities, given the uncertain climate created by domestic antitrust rulings. So unless we are willing to clarify how our antitrust laws related to export trade, we cannot hope to utilize the full resources of the American business community in our effort to regain a competitive position in international trade.

On this last point, our competitiveness has deteriorated precisely because we have failed to develop a foreign trade policy consistent with changing international realities. Whereas private, multinational firms seeking the most efficient production and distribution of goods and services once dominated world markets, economic nationalism now prevails. In the critical areas of oil, steel, and autos, Government owned or directed, vertically integrated corporations shape the flow of trade. They do so as instruments of national governments and their actions are directed by political, rather than economic, consideration.

The postwar challenge America issued to her trading partners was not met by a purely American response. Industrial development programs in Italy, France, Great Britain, Japan, and the developing nations are hybrids of the American model and their implementation has altered the evolution of world trade. Although I do not advocate the adoption of these nationalistic, economic policies here in the United States, neither do I believe we can shape a coherent, effective foreign economic policy without recognizing the unsettling effects of those policies on world trade and American industries.

Through the Marshall Plan and other development assistance programs, the United States helped Europe, Japan and the developing nations establish their industrial strength. We generously stood back while they nurtured their industries with financial assistance and protectionism. While we continue to provide the shelter of our defense umbrella, they continue along the path of independence and economic nationalism. It is time now to adjust our own policies to the new realities of the global market.

One way in which we can do this is by unleashing the full force of America's private enterprise from the restraints of needless and confusing regulation. I believe that this bill's clarification of longstanding ambiguities in the area of antitrust exemptions for export trading companies is a long overdue step in this direction. Title II of S. 734 encourages the formation of export trading companies by expanding the provisions of the Webb-Pomerene Act to include trade in services, as well as that in goods, wares or merchandise. This feature will greatly expand export opportunities for trading companies in areas where American companies are especially competitive. Furthermore, title II establishes a clearance procedure whereby firms can determine in advance whether their export activities are immune from antitrust suits. By establishing a certification procedure and codifying the enforcement intentions of our Government's antitrust oversight branches, title II of S. 734 eliminates some of the uncertainties in current law that have discouraged the formation of American consortia to bid on significant export projects. At the same time, however, S. 734 also protects against any anticompetitive effects that might result from the establishment and operation of export trading companies.

Mr. President, this bill will not, by itself, solve America's foreign trade problems. Restoring the international competitiveness of the American enterprise will require us to do much more in the areas of capital formation, regulatory reform and research and development. But because S. 734 recognizes that cooperation between business and Government is a critical ingredient in any comprehensive national effort to improve our export performance, I believe it is an important step in the right direction.●

● Mr. DODD. Mr. President, I rise in support of S. 734, the Export Trading Company Act. It is clear that increased export activity must constitute a major component of any economic recovery program. This legislation will facilitate access to foreign markets by many businesses, particularly smaller businesses, who, because of inadequate capital or marketing expertise, have not enjoyed such access.

Last year, the White House Commission on Small Business pointed out that small businesses produce, investment dollar for investment dollar, 24 times as many innovations as big business, and create over 85 percent of new jobs nationwide. In today's global economy, increasingly dominated by sophisticated, innovative, high-technology goods and services, it should be clear that smaller businesses should be in the forefront of American attempts to more effectively penetrate world markets. Smaller businesses can thus augment activities by larger businesses, which have for some time exported computers, heavy machinery, chemicals, aerospace technology, power-generating machinery, and telecommunications equipment and services.

During the recent past, fewer than 1 out of 10 U.S. manufacturing firms export, and the major share of the export market is dominated by large corporations. S. 734, if enacted, would promote the establishment of export trading companies and thus would overcome some of the most basic, yet significant, obstacles to exporting by small business.

Under title I, export trading companies would benefit from increased financial leverage provided through Federal loans and loan guarantees. The Secretary of Commerce would provide information about export trading companies to export-minded U.S. businesses. And banks would be permitted to invest in export trading companies under strict limitations designed to insure the safety and soundness of participating banks. Bank investments of over $10 million would be subject to prior approval of Federal regulatory agencies and bank investments exceeding 5 percent of bank capital would be prohibited outright.

Uncertainty over constraints posed by antitrust laws has been a significant factor inhibiting the formation of export trading companies. Title II of this legislation would clarify antitrust provisions of the 1918 Webb-Pomerene Act and provide procedures through which specified export trade activities would be granted antitrust clearance by the Department of Commerce. To eliminate confusion regarding the status of present Webb-Pomerene associations, this bill "grandfathers" such existing associations so they can continue operations unimpeded and free of uncertainty under this act.

Export trading companies would help smaller businesses pool the costs and risks associated with participation in foreign markets. Services provided by export trading companies might include market research, transportation, warehousing, and aftersales servicing, as well as trade financing. One can look to Japan for an example of the success of trading companies. Japanese trading companies account for over 50 percent of that country's total trade, which involves thousands of products worldwide.

Even though there are many differences between Japanese and American business policies which preclude point-by-point emulation, it still seems clear that great potential exists in a close relationship between trading companies and U.S. manufacturers which produce new and innovative products.

Mr. President, the state of our economy and of our Nation demands that we take strong action to improve our competitiveness in world markets. We must take steps to improve productivity and reduce inflation here at home. However, even if we perform adequately in this regard, we will still face intense and growing competition from foreign industry, much of which enjoys the benefits offered by trading companies, as well as active government support in the form of generous subsidies and credit. This legislation will provide a significant additional step toward enhancing the ability of our businesses to compete, on similar terms, with aggressive industries abroad. Therefore, I urge the Senate today to act favorably on this legislation, as it did last year by a vote of 77 to 0.●

ADVANCING OUR GROWTH OBJECTIVES IN WORLD MARKETS

● Mr. BRADLEY. Mr. President, the Senate recently completed work on a reconciliation resolution to reduce drastically Federal spending levels for fiscal year 1981 and spending targets for fiscal years 1982 and 1983. The cuts, many of which will bore deeply into important social programs, were justified by a desire to restore growth to the private sector of the economy. They were made on the expectation that reducing the Federal presence in the economy will make room for more rapid economic expansion in the private sector and that this growth in turn ultimately will provide more benefits to all Americans.

Mr. President, although I differ with the President on spending priorities and have serious doubts about the economic theory underlying his revival program, I wholeheartedly agree that restoring

robust economic growth must be an American priority. But for us to win the battle for growth it must take place on two fronts—restoring confidence and investment levels within our economy domestically and advancing our position in markets internationally.

The budget, and fiscal policy generally, primarily is a force on the domestic economy. Export trading companies, the subject of the legislation before us today, are a potential force to advance our growth objectives in the international economy.

Mr. President, the world has changed and influences on the U.S. economy have changed. Trade activity is no longer marginal. Rather it is the most dynamic element. Twenty years ago exports and imports combined amounted to some 10 percent of U.S. gross national product. Today the combined figure is close to 25 percent.

During the coming years, much of the stimulus to U.S. growth will have to come from foreign demand, particularly from the developing world. Even under the rosiest assumptions about domestic economic growth rate, we are not likely to keep pace with the developing world, and certainly not with newly industrializing countries—the Taiwans, Brazils, and South Koreas of the world. While during the seventies the older industrialized nations of the world grew at an average 3.4 percent, the developing world on a whole clipped along at a pace of 5.7 percent, and the newly industrialized countries boasted even higher average growth rates.

Of course, these growth rates in the developing world as a whole were on a much lower base and the distribution of growth was very uneven, with some of the poorest countries experiencing negative rates. But past statistics and future projections point to development activity outside our borders as the dynamic factor in world economic expansion. Developing markets have become increasingly important for U.S. expansion and will certainly become even more important in the future. Just last year, countries of the developing world took nearly 40 percent of U.S. exports, more than was taken by the European community and Japan combined.

Trade has become a major influence in U.S. economic life, but we have done little as a nation to improve our trade performance, little to reap the full benefits of trade. Our trade competitors in Western Europe and Japan have not been so negligent.

They have made trade a centerpiece of their growth strategies, stressing the long-term returns of gaining a foothold in new and developing markets. Their government officials have been energetic export promoters in foreign lands. Their official export credit agencies have made export financing and insurance available on generous terms and for a broad range of purposes, and their laws and policies have encouraged, not discouraged, the coordination of business and financial activities for exporting purposes.

Export trading companies particularly have made a major contribution to Japan's trade performance. We are all fully aware of how impressive that performance has been. Export trading companies account for over 50 percent of total trade by Japan today.

Mr. President, S. 734 offers our Nation an opportunity to mobilize for trade, to strengthen our areas of comparative advantage and to take advantage of the widening opportunities in the world.

Mr. President, the future of our economy depends on our success in world markets—the stake is no less critical than that. The Government can seek to reduce barriers to competitive performance by U.S. companies, but ultimately the fate of the U.S. economy lies with the private sector.

The Export Trading Companies Act is a measure that relies on private sector initiative. It does not ask Government to take over a business function, it removes barriers that impede U.S. business from mobilizing to function more effectively.

It is particularly suited to mobilize the untapped resources of small business in America. Only some 10 percent of the 250,000 to 300,000 manufacturing firms in the United States do any exporting. Some 75 percent of these 250,000 to 300,000 firms are small- or medium-sized businesses, but firms of this size account for only 10 to 15 percent of U.S. exports. Indeed 85 percent of all exports are sold by a mere 1,000 to 2,000 firms and about 100 firms account for 50 percent of exports. Most of these are large firms. The Department of Commerce estimates that an additional 20,000 firms who do not export at all could do so.

Small businesses are beginning to see over the horizon of our borders to the wealth of growth opportunity abroad. But the view is still murky, and therefore uninviting.

For small businesses, the uncertainties of export transactions can preclude investment in exporting. It simply is too risky to invest time and money in acquiring market information, locating potential buyers, and arranging for financing warehousing, insurance, transportation, and distribution, even though the final returns may well prove worth it. It does not serve anyone's interest to permit potential profitable business to stagnate for lack of information and centralized services.

The export trading companies bill offers a way out of this stagnation. It is such a sensible approach that one is astonished that it has not been enacted to date.

The bill is designed to promote exports by encouraging the formation of export trading companies or associations. Its major achievement is to permit these trading groups to offer a range of export services including banking services, at "one-stop".

By permitting the participation of banks in such companies, the legislation helps potential exporters overcome two of the greatest barriers to export—obtaining information and business contacts in world markets and obtaining adequate capital. Banks can bring to trading companies resources that are essential to their success, including expertise in international transactions, such as currency exchange and letters of credit, international bank and correspondent banks relationships, knowledge of potential customers, experience in managing investment risk decisions, and capital to start up a trading company and finance its transactions.

The integrity of our Nation's banking system is duly protected by an array of conditions placed on the terms of bank participation. For example, the appropriate banking agency must approve bank investments in trading companies in excess of $10 million and investments that give a bank control of, or more than 50 percent of the assets of a trading company. Further, the agency can disapprove or place conditions on bank investment or activity in a trading company, and participating banks are barred from offering preferential terms to affiliated trading companies.

A second major achievement of this bill is the creation of a certification process that reduces the uncertainty of potential participants in export trading associations as to the liability of such companies to antitrust prosecution. Unpredictable antitrust liability has been a cloud over the formation of trading companies, despite the explicit exemption under a 1918 law of export promoting activities, under certain conditions, from U.S. antitrust laws.

Since 1918 it has been U.S. policy to exclude from antitrust prosecution export-promoting activities that do not restrain trade in the U.S. market. But this has not been U.S. practice. This is because business cannot know in advance whether courts will construe certain cooperative activities as exempt from antitrust prosecution under the 1918 law. This uncertainty has a chilling effect on potential participants in an export trading association.

The export trading companies bill creates a certification process that balances the exporter's need for a more productable legal environment against society's interest in a competitive U.S. economy. The certification process enables trading companies to organize effectively for export promotion without undermining the purposes of the Sherman and Clayton Acts.

Essentially, trading companies can obtain prior assurance against antitrust prosecution by presenting the Department of Commerce with an application detailing its proposed activities. Commerce then consults with the Department of Justice and the Federal Trade Commission to determine whether these activities will promote exports and not result in a substantial lessening of competition, or in the use of unfair methods of competition against other U.S. exporters. A positive determination would exempt the applicant from antitrust prosecution for only those activities specified in the application.

Safeguards assure that the exemption will not impair competition in U.S. markets or extend beyond the bounds of the certifications as approved. For example, the Department of Justice or the FTC can seek injunctive relief to prevent certification from taking effect, and can initiate decertification of a trading company in Federal court.

Mr. President, the export trading companies bill has been the subject of close and careful scrutiny. It has been examined piecemeal in numerous congressional hearings, undergone review by two administrations and been the subject of vigorous Senate debate. It ultimately has won support in all these forums.

Mr. President, the refined product of all these labors is before us today. It is the product of expertise, balance, deliberation, and healthy compromise. It is a worthy product, and I am proud, as one of its early supporters, to urge its enactment.●

● Mr. WEICKER. Mr. President, I rise in support of S. 734, the Export Trading Company Act of 1981. As a cosponsor of this legislation and its predecessor in the 96th Congress, I am particularly supportive of the role this legislation will play in increasing exports by small- and medium-sized firms.

Mr. President, small businesses which desire to export are often stymied by the tremendously burdensome requirements of such an effort. Gaining an expertise in foreign markets, tax provisions, freight handling, and business customs requires an indepth study and is tremendously time consuming. A small business cannot afford the large in-house international marketing staff which would be required to handle all aspects of a successful export effort.

Heretofore, Government export promotion programs have not been successful in filling this informational gap or in providing the type or level of assistance necessary to aid small business exporters. Export associations and trading companies currently in existence, while providing an alternative to direct exporting by small business, have been harvesting by certain legal restrictions and ambiguities.

S. 734 seeks to address many of these problems which have restricted successful operation of export trading companies and associations and in so doing, increase exporting by small- and medium-sized businesses.

Of course, Mr. President, a major problem facing small business is access to capital. This problem is even more acute when a small business attempts to export. By providing, under carefully monitored circumstances, for bank ownership of export trading companies, this legislation seeks to address this critical capital problem.

Mr. President, the White House Conference on Small Business, held in January 1980, examined the area of small business involvement in international trade. The conference endorsed five recommendations to improve the atmosphere necessary for successful exporting by small business. The recommendation receiving the broadest support included an endorsement of the development of export trading companies with greater powers and authority. This Congress has repeatedly expressed its support for the recommendations of the White House Conference on Small Business. Passage of the pending measure will be one more step toward fulfillment of the conference agenda.

Mr. President, I urge my colleagues to support this important legislation.●

Mr. CHAFEE. Mr. President, the purpose of the bill before us today is to promote the formation of export trading companies and trade associations. I totally support that goal. This bill, S. 144, directs the Secretary of Commerce to promote export trading companies by providing information and advice to individuals and by bringing together the producers of goods and services with firms experienced in export trade. It permits banks to make limited investment in export trading companies. It also clarifies the antitrust provisions applicable to export trade associations and trading companies and provides a certification procedure that will enable them to obtain antitrust preclearance for their export trade operations.

When I look at my home State, I see that 90 percent of Rhode Island's companies are small. If Rhode Island is going to increase jobs and stimulate the economy through exporting, then small companies must participate.

Having sponsored an export opportunities conference for firms in Rhode Island, I learned that many companies do not export because they have neither the funds to invest in market development overseas, nor the time or personnel to master customs documents, shipping, packaging, regulations on sales agents, and the many details involved in selling goods and services overseas. Such companies need far more than a 1-day conference, or a Government brochure. They need someone to market their products for them; a way to spread the risks and costs among many firms, which they cannot afford on an individual basis.

At present, four small- or medium-sized firms in Rhode Island belong to joint export associations. But the difficulty in securing adeaquate financing, and uncertainty over antitrust exemptions has prevented these trading companies from reaching more than a small fraction of U.S. firms which could export. In addition, the banks in Rhode Island are small to medium sized. There are no Chase Manhattans in Rhode Island. I have talked with companies who belong to joint export associations which are operating under current law. I have talked with Rhode Island bankers. They would like the opportunity to work together to promote Rhode Island exports. The legislation before us today would give them that chance.

Mr. President, every other major trading nation not only permits but encourages the formation of export trading companies or their equivalent. Only the United States has failed to allow the development of this vehicle for aiding smaller firms who either cannot or will not enter the world marketplace on their own.

I have heard a good deal of talk lately about the trading power of the Japanese and our need to compete with them more effectively. Two-thirds of Japanese exports are handled by trading companies. In the U.S., experts believe that less than 10 percent of our exports make use of joint marketing methods. How can we expect U.S. firms to compete when we deny them what has been the most effective weapon in the Japanese trade arsenal? As Senator HEINZ has pointed out, the sixth largest U.S. exporter is Mitsui, a Japanese trading company.

We must recognize the reality of what we face ahead in the world trade arena. There is increasing competition for slices of the world trade pie. Yet, world trade volume has leveled off considerably, increasing by only 1 percent in 1980. The share of manufactured goods exported by the industrialized nations is only two-thirds of what it was 20 years ago.

In as much as the markets of the industrialized world are relatively mature, the greatest potential for growth lies in the less developed countries. But, these nations have the least developed commercial channels. Trying to enter their markets can be a complex and frustrating experience, particularly for smaller companies trying to export on their own. If U.S. companies are going to share in the growth of these markets, thus increasing exports, creating jobs, and strengthening our economy, then they must have the tools provided in the legislation before us today.

Finally, Mr. President, I would like to point out that we are not asking the Government to give anything to U.S. companies. We are only asking that it not hinder U.S. companies' ability to compete overseas. The administration has urged the Congress to pass this legislation quickly. The time has come to do just that.

The PRESIDING OFFICER. The bill is open to further amendment.

If there be no further amendments to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? The yeas and nays have been ordered.

Mr. BAKER. Mr. President, before the rollcall begins, there will be no more rollcall votes today.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. DURENBERGER) and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mr. DURENBERGER) would vote "Yea."

Mr. CRANSTON. I announce that the Senator from Illinois (Mr. DIXON), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Kentucky, (Mr. HUDDLESTON), and the Senator from Louisiana (Mr. LONG) are necessarily absent.

I further announce that the Senator from New Jersey (Mr. BRADLEY) is absent on official business.

I further announce that, if present and voting, the Senator from New Jersey (Mr. BRADLEY), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Illinois (Mr. DIXON), and the Senator from Louisiana (Mr. LONG) would each vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 93, nays 0, as follows:

[Rollcall Vote No. 83 Leg.]

So the bill (S. 734), as amended, was passed as follows:

S. 734

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—EXPORT TRADING COMPANIES

SHORT TITLE

SEC. 101. This title may be cited as the "Export Trading Company Act of 1981".

FINDINGS

SEC. 102. (a) The Congress finds and declares that—

(1) tens of thousands of American companies produce exportable goods or services but do not engage in exporting;

(2) although the United States is the world's leading agricultural exporting nation, many farm products are not marketed as widely and effectively abroad as they could be through producer-owned export trading companies;

(3) exporting requires extensive specialized knowledge and skills and entails additional, unfamiliar risks which present costs for which smaller producers cannot realize economies of scale;

(4) export trade intermediaries, such as trading companies, can achieve economies of scale and acquire expertise enabling them to export goods and services profitably, at low per-unit cost to producers;

(5) the United States lacks well-developed export trade intermediaries to package export trade services at reasonable prices (exporting services are fragmented into a multitude of separate functions; companies attempting to offer comprehensive export trade services lack financial leverage to reach a significant portion of potential United States exporters);

(6) State and local government activities which initiate, facilitate, or expand export of products and services are an important and irreplaceable source for expansion of total United States exports, as well as for experimentation in the development of innovative export programs keyed to local, State, and regional economic needs;

(7) the development of export trading companies in the United States has been hampered by insular business attitudes and by Government regulations; and

(8) if United States export trading companies are to be successful in promoting United States exports and in competing with foreign trading companies, they must be able to draw on the resources, expertise, and knowledge of the United States banking system, both in the United States and abroad.

(b) The purpose of this Act is to increase United States exports of products and services, particularly by small, medium-size, and minority concerns, by encouraging more efficient provision of export trade services to American producers and suppliers.

DEFINITIONS

SEC. 103. (a) As used in this Act—

(1) the term "export trade" means trade or commerce in goods produced in the United States or services produced in the United States, and exported, or in the course of being exported, from the United States to any foreign nation;

(2) the term "goods produced in the United States" means tangible property manufactured, produced, grown, or extracted in the United States, the cost of the imported raw materials and components thereof shall not exceed 50 per centum of the sales price;

(3) the term "services produced in the United States" includes, but is not limited to, accounting amusement, architectural, automatic data processing, business, communications, construction franchising and licensing, consulting, engineering, financial, insurance, legal, management, repair, tourism, training, and transportation services, not less than 50 per centum of the sales or billings of which is provided by United States citizens or is otherwise attributable to the United States;

(4) the term "export trade services" includes, but is not limited to, consulting, international market research, advertising, marketing, insurance, product research and design, legal assistance, transportation, including trade documentation and freight forwarding, communication and processing of foreign orders to and for exporters and foreign purchasers, warehousing, foreign exchange, and financing, when provided in order to facilitate the export of goods or services produced in the United States;

(5) the term "export trading company" means a company, whether operated for profit or as a nonprofit organization, which does business under the laws of the United States or any State and which is organized and operated principally for the purposes of—

(A) exporting goods or services produced in the United States; and

(B) facilitating the exportation of goods or services produced in the United States by unaffiliated persons by providing one or more export trade services;

(6) the term "United States" means the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands;

(7) the term "Secretary" means the Secretary of Commerce; and

(8) the term "company" means any corporation, partnership, association, or similar organization, whether operated for profit or as a nonprofit organization.

(b) The Secretary is authorized, by regulation, to further define such terms consistent with this section.

FUNCTIONS OF THE SECRETARY OF COMMERCE

SEC. 104. The Secretary shall promote and encourage the formation and operation of export trading companies by providing information and advice to interested persons and by facilitating contact between producers of exportable goods and services and firms offering export trade services.

OWNERSHIP OF EXPORT TRADING COMPANIES BY BANKS, BANK HOLDING COMPANIES, AND INTERNATIONAL BANKING CORPORATIONS

SEC. 105. (a) For the purpose of this section—

(1) the term "banking organization" means any State bank, national bank, Federal savings bank, bankers' bank, bank holding company, Edge Act Corporation, or Agreement Corporation;

(2) the term "State bank" means any bank or bankers' bank which is incorporated under the laws of any State, any territory of the United States, the Commonwealth of Puerto Rico, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, or the Virgin Islands;

(3) the term "State member bank" means any State bank which is a member of the Federal Reserve System;

(4) the term "State nonmember insured bank" means any State bank which is not a member of the Federal Reserve System, but the deposits of which are insured by the Federal Deposit Insurance Corporation;

(5) the term "bankers' bank" means any bank insured by the Federal Deposit Insurance Corporation if the stock of such bank is owned exclusively by other banks (except to the extent directors' qualifying shares are required by law) and if such bank is engaged exclusively in providing banking services for other banks and their officers, directors, or employees;

(6) the term "bank holding company" has the same meaning as in the Bank Holding Company Act of 1956;

(7) the term "Edge Act Corporation" means a corporation organized under section 25(a) of the Federal Reserve Act;

(8) the term "Agreement Corporation" means a corporation operating subject to section 25 of the Federal Reserve Act;

(9) the term "appropriate Federal banking agency" means—

(A) the Comptroller of the Currency with respect to a national bank or any bank located in the District of Columbia;

(B) the Board of Governors of the Federal Reserve System with respect to a State member bank, bank holding company, Edge Act Corporation, or Agreement Corporation;

(C) the Federal Deposit Insurance Corporation with respect to a State nonmember insured bank; and

(D) the Federal Home Loan Bank Board with respect to a Federal savings bank.

In any situation where the banking organization holding or making an investment in an export trading company is a subsidiary of another banking organization which is subject to the jurisdiction of another agency, and some form of agency approval or notification is required, such approval or notification need only be obtained from or made to, as the case may be, the appropriate Federal banking agency for the banking organization making or holding the investment in the export trading company;

(10) the term "capital and surplus" shall be defined by the appropriate Federal banking agency;

(11) an "affiliate" of a banking organization has the same meaning as an "affiliate" of a member bank under section 2 of the Banking Act of 1933, and, with respect to a bank holding company, includes any bank or other subsidiary of such company, the term "subsidiary" has the same meaning as in section 2 of the Bank Holding Company Act of 1956;

(12) the terms "control" and "subsidiary" shall have the same meanings assigned to those terms in section 2 of the Bank Holding Company Act of 1956, and the terms "controlled" and "controlling" shall be construed consistenly with the term "control" as

provided in section 2(a)(2) of the Bank Holding Company Act of 1956, except that for purpose of the Export Trading Company Act of 1981, the determination of control as provided in section 2(a)(2) of the Bank Holding Company Act of 1956 shall be made by the appropriate Federal banking agency; and

(13) for the purposes of this section, the term "export trading company" means a company which does business under the laws of the United States or any State and which is exclusively engaged in activities related to international trade, whether operated for profit or as a nonprofit organization: *Provided, however,* That any such company must also either meet the definition of export trading company in section 103(a)(5) of this Act, or be organized and operated principally for the purpose of providing export trade services, as defined in section 103(a)(4) of this Act: *Provided further,* That any such company, for purposes of this section, (A) may engage in or hold shares of a company engaged in the business of underwriting, selling, or distributing securities in the United States only to the extent that its banking organization investor may do so under applicable Federal and State banking law and regulations, and (B) may not engage in manufacturing or agricultural production activities.

(b)(1) Notwithstanding any prohibition, restriction, limitation, condition, or requirement of any law applicable only to banking organizations, a banking organization, subject to the limitations of subsection (c) and the procedures of this subsection, may invest directly and indirectly in the aggregate, up to 5 per centum of its consolidated capital and surplus (25 per centum in the case of an Edge Act Corporation or Agreement Corporation not engaged in banking) in the voting stock or other evidences of ownership of one or more export trading companies. A banking organization may—

(A) invest up to an aggregate amount of $10,000,000 in one or more export trading companies without the prior approval of the appropriate Federal banking agency, if such investment does not cause an export trading company to become a subsidiary of the investing banking organization; and

(B) make investments in excess of an aggregate amount of $10,000,000 in one or more export trading companies, or make any investment or take any other action which causes an export trading company to become a subsidiary of the investing banking organization or which will cause more than 50 per centum of the voting stock of an export trading company to be owned or controlled by banking organizations, only with the prior approval of the appropriate Federal banking agency.

Any banking organization which makes an investment under authority of clause (A) of the preceding sentence shall promptly notify the appropriate Federal banking agency of such investment and shall file such reports on such investment as such agency may require. If, after receipt of any such notification, the appropriate Federal banking agency determines that export trading company is a subsidiary of the investing banking organization, it shall have authority to disapprove the investment or impose conditions on such investment under authority of subsection (d). In furtherance of such authority, the appropriate Federal banking agency, after notice and opportunity for hearing, may require divestiture of any voting stock or other evidences of ownership previously acquired, and may impose conditions necessary for the termination of any controlling relationship.

(2) If a banking organization proposes to make any investment or engage in any activity included within the following two subparagraphs, it must give the appropriate Federal banking agency ninety days prior written notice before it makes such investment or engages in such activity.

(A) any additional investment in an export trading company subsidiary; or

(B) the engagement by any export trading company subsidiary in any line of activity, including specifically the taking of title to goods, wares, merchandise, or commodities, if such activity was not disclosed in any prior application for approval.

During the notification period provided under this paragraph, the appropriate Federal banking agency may, by written notice, disapprove the proposed investment or activity or impose conditions on such investment or activity under authority of subsection (d). An additional investment or activity covered by this paragraph may be made or engaged in, as the case may be, prior to the expiration of the notification period if the appropriate Federal banking agency issues written notice of its intent not to disapprove.

(3) In the event of the failure of the appropriate Federal banking agency to act on any application for approval under paragraph (1)(B) of this subsection within a period of one hundred and twenty days, which period begins on the date the application has been accepted for processing by the appropriate Federal banking agency, the application shall be deemed to have been granted. In the event of the failure of the appropriate Federal banking agency either to disapprove or to impose conditions on any investment or activity subject to the prior notification requirements of paragraph (2) of this subsection within the ninety-day period provided therein, such period beginning on the date the notification has been received by the appropriate Federal banking agency, such investment or activity may be made or engaged in, as the case may be, any time after the expiration of such period.

(c) The following limitations apply to export trading companies and the investments in such companies by banking organizations:

(1) The name of any export trading company shall not be similar in any respect to that of a banking organization that owns any of its voting stock or other evidences of ownership except where a majority of the outstanding voting stock or other evidences of ownership of the company is owned or controlled by such banking organization.

(2) The total historical cost of the direct and indirect investments by a banking organization in an export trading company combined with extensions of credit by the banking organization and its direct and indirect subsidiaries to such export trading company shall not exceed 10 per centum of the banking organization's capital and surplus.

(3) A banking organization that owns any voting stock or other evidences of ownership of an export trading company may be required, by the appropriate Federal banking agency, to terminate its ownership or shall be subject to limitations or conditions which may be imposed by such agency, if the agency determines that the company has taken positions in commodities or commodities contracts, in securities, or in foreign exchange, other than as may be necessary in the course of its business operations.

(4) No banking organization holding voting stock or other evidences of ownership of any export trading company may extend credit or cause any affiliate to extend credit to any export trading company or to customers of such company on terms more favorable than those afforded similar borrowers in similar circumstances, and such extension of credit shall not involve more than the normal risk of repayment or present other unfavorable features.

(d)(1) In the case of every application under subsection (b)(1)(B) of this section, the appropriate Federal banking agency shall take into consideration the financial and managerial resources, competitive situation, and future prospects of the banking organization and export trading company concerned, and the benefits of the proposal to United States business, industrial, and agricultural concerns (with special emphasis on small, medium-size, and minority concerns), and to improving United States competitiveness in world markets. The appropriate Federal banking agency may not approve any investment for which an application has been filed under subsection (b)(1)(B) if it finds that the export benefits of such proposal are outweighed in the public interest by any adverse financial, managerial, competitive, or other banking factors associated with the particular investment. Any disapproval order issued under this section must contain a statement of the reasons for disapproval.

(2) In approving any application submitted under subsection (b)(1)(B), the appropriate Federal banking agency may impose such conditions which, under the circumstances of such case, it may deem necessary (A) to limit a banking organization's financial exposure to an export trading company, or (B) to prevent possible conflicts of interest or unsafe or unsound banking practices. With respect to the taking of title to goods, wares, merchandise, or commodities by any export trading company subsidiary of a banking organization, the appropriate Federal banking agencies may, by order, regulation, or guidelines, establish standards designed to ensure against any unsafe or unsound practices that could adversely affect a controlling banking organization investor. In particular, the appropriate Federal banking agencies may establish inventory-to-capital ratios, based on the capital of the export trading company subsidiary, for those circumstances in which the export trading company subsidiary may bear a market risk on inventory held.

(3) In determining whether to impose any condition under the preceding paragraph (2), or in imposing such condition, the appropriate Federal banking agency must give due consideration to the size of the banking organization and export trading company involved, the degree of investment and other support to be provided by the banking organization to the export trading company, and the identity, character, and financial strength of any other investors in the export trading company. The appropriate Federal banking agency shall not impose any conditions or set standards for the taking of title which unnecessarily disadvantage, restrict, or limit export trading companies in competing in world markets or in achieving the purposes of section 102 of this Act. In particular, in setting standards for the taking of title under the preceding paragraph (2), the appropriate Federal banking agencies shall give special weight to the need to take title in certain kinds of trade transactions, such as international barter transactions.

(4) Notwithstanding any other provision of this Act, the appropriate Federal banking agency may, whenever it has reasonable cause to believe that the ownership or control of any investment in an export trading company constitutes a serious risk to the financial safety, soundness, or stability of the banking organization and is inconsistent with sound banking principles or with the purposes of this Act or with the Financial Institutions Supervisory Act of 1966, order the banking organization, after due notice and opportunity for hearing, to terminate (within one hundred and twenty days or such longer period as the appropriate Federal banking agency may direct in unusual circumstances) its investment in the export trading company.

(5) On or before two years after enactment of this Act, the appropriate Federal

banking agencies shall jointly report to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives their recommendations with respect to the implementation of this section, their recommendations on any changes in United States law to facilitate the financing of United States exports, especially by small, medium-size, and minority business concerns, and their recommendations on the effects of ownership of United States banks by foreign banking organizations affiliated with trading companies doing business in the United States.

(6) The appropriate Federal banking agency may, by regulation or order, exempt from the collateral requirements of section 23A of the Federal Reserve Act any loan or extension of credit made by a national or State bank to an export trading company affiliate if the agency determines such exemption is necessary to finance the operating expenses of an affiliated export trading company and does not expose the bank to undue financial risks. This paragraph does not apply to bank affiliates currently exempt from the requirements of section 23A.

(e)(1) Any party aggrieved by an order of an appropriate Federal banking agency under this section may obtain a review of such order in the United States court of appeals within any circuit wherein such organization has its principal place of business, or in the court of appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within thirty days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the appropriate Federal banking agency. The appropriate Federal banking agency shall promptly certify and file in such court the record upon which the order was based. The court shall set aside any order found to be (A) arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law; (B) contrary to constitutional right, power, privilege or immunity; (C) in excess of statutory jurisdiction, authority, or limitations, or short of statutory right; or (D) without observance of procedure required by law.

(2) Except for violations of subsection (b)(3) of this section, the court shall remand for further consideration by the appropriate Federal banking agency any order set aside solely for procedural errors and may remand for further consideration by the appropriate Federal banking agency any order set aside for substantive errors. Upon remand, the appropriate Federal banking agency shall have no more than sixty days from date of issuance of the court's order to cure any procedural error or reconsider its prior order. If the agency fails to act within this period, the application or other matter subject to review shall be deemed to have been granted as a matter of law.

(f)(1) The appropriate Federal banking agencies are authorized and empowered to issue such rules, regulations, and orders, to require such reports, to delegate such functions, and to conduct such examinations of subsidiary export trading companies, as each of them may deem necessary in order to perform their respective duties and functions under this section and to administer and carry out the provisions and purposes of this section and prevent evasions thereof.

(2) In addition to any powers, remedies, or sanctions otherwise provided by law, compliance with the requirements imposed under this section may be enforced under section 8 of the Federal Deposit Insurance Act by any appropriate Federal banking agency defined in that Act.

(g) Nothing in this section shall at any time prevent any State from adopting a law prohibiting banks chartered under the laws of such State from investing in export trading companies or applying conditions, limitations, or restrictions on investments by banks chartered under the laws of such State in export trading companies in addition to any conditions, limitations, or restrictions provided under this section.

GUARANTEES FOR EXPORT ACCOUNTS RECEIVABLE AND INVENTORY

SEC. 106. The Export-Import Bank of the United States is authorized and directed to establish a program to provide guarantees for loans extended by financial institutions or other private creditors to export trading companies as defined in section 103(5) of this Act, or to other exporters, when such loans are secured by export accounts receivable or inventories of exportable goods, and when in the judgment of the Board of Directors—

(1) the private credit market is not providing adequate financing to enable otherwise creditworthy export trading companies or exporters to consummate export transactions; and

(2) such guarantees would facilitate expansion of exports which would not otherwise occur.

The Board of Directors shall attempt to insure that a major share of any loan guarantees ultimately serves to promote exports from small, medium-size and minority businesses or agricultural concerns. Guarantees provided under the authority of this section shall be subject to limitations contained in annual appropriations Acts.

TITLE II—EXPORT TRADE ASSOCIATIONS

SHORT TITLE

SEC. 201. This title may be cited as the "Export Trade Association Act of 1981".

FINDINGS; DECLARATION OF PURPOSE

SEC. 202. (a) FINDINGS.—The Congress finds and declares that—

(1) the exports of the American economy are responsible for creating and maintaining one out of every nine manufacturing jobs in the United States and for generating $1 out of every $7 of total United States goods produced;

(2) exports will play an even larger role in the United States economy in the future in the face of severe competition from foreign government-owned and subsidized commercial entities;

(3) between 1968 and 1977 the United States share of total world exports fell from 19 per centum to 13 per centum;

(4) trade deficits contribute to the decline of the dollar on international currency markets, fueling inflation at home;

(5) service-related industries are vital to the well-being of the American economy inasmuch as they create jobs for seven out of every ten Americans, provide 65 per centum of the Nation's gross national product, and represent a small but rapidly rising percentage of United States international trade;

(6) agriculture constitutes the foundation of the economy of the United States and will continue to be a leading sector in United States export growth;

(7) small- and medium-sized firms are prime beneficiaries of joint exporting, through pooling of technical expertise, help in achieving economies of scale, and assistance in competing effectively in foreign markets; and

(8) the Department of Commerce has as one of its responsibilities the development and promotion of United States exports.

(b) PURPOSE.—It is the purpose of this title to encourage American exports by directing the Department of Commerce to encourage and promote the formation of export trade associations through the Webb-Pomerene Act, by making the provisions of that Act explicitly applicable to the exportation of services, and by transferring the responsibility for administering that Act from the Federal Trade Commission to the Secretary of Commerce.

DEFINITIONS

SEC. 203. The Webb-Pomerene Act (15 U.S.C. 61–66) is amended by striking out the first section (15 U.S.C. 61) and inserting in lieu thereof the following:

"SECTION 1. DEFINITIONS.

As used in this Act—

"(1) EXPORT TRADE.—The term 'export trade' means trade or commerce in goods, wares, merchandise, or services exported, or in the course of being exported from the United States or any territory thereof to any foreign nation.

(2) SERVICE.—The term 'service' means intangible economic output, including, but not limited to—

"(A) business, repair, and amusement services;

"(B) management, legal, engineering, architectural, and other professional services; and

"(C) financial, insurance, transportation, informational and any other data-based services, and communication services.

"(3) EXPORT TRADE ACTIVITIES.—The term 'export trade activities' means activities or agreements in the course of export trade.

"(4) METHODS OF OPERATION.—The term 'methods of operation' means the methods by which an association or export trading company conducts or proposes to conduct export trade.

"(5) TRADE WITHIN THE UNITED STATES.—The term 'trade within the United States' whenever used in this Act means trade or commerce among the several States or in any territory of the United States, or in the District of Columbia, or between any such territory and another, or between any such territory or territories and any State or States or the District of Columbia, or between the District of Columbia and any State or States.

"(6) ASSOCIATION.—The term 'association' means any combination, by contract or other arrangement, of persons who are citizens of the United States, partnerships which are created under and exist pursuant to the laws of any State or of the United States, or corporations, whether operated for profit or organized as nonprofit corporations, which are created under and exist pursuant to the laws of any State or of the United States.

"(7) EXPORT TRADING COMPANY.—The term 'export trading company' means an export trading company as defined in section 103(5) of the Export Trading Company Act of 1981.

"(8) ANTITRUST LAWS.—The term 'antitrust laws' means the antitrust laws defined in the first section of the Clayton Act (15 U.S.C. 12), sections 5 and 6 of the Federal Trade Commission Act (15 U.S.C. 45, 46), and any State antitrust or unfair competition law.

"(9) SECRETARY.—The term 'Secretary' means the Secretary of Commerce.

"(10) ATTORNEY GENERAL.—The term 'Attorney General' means the Attorney General of the United States.

"(11) COMMISSION.—The term 'Commission' means the Federal Trade Commission.".

ANTITRUST EXEMPTION

SEC. 204. The Webb-Pomerene Act (15 U.S.C. 61–66) is amended by striking out section 2 (15 U.S.C. 62) and inserting in lieu thereof the following:

"SEC. 2. EXEMPTION FROM ANTITRUST LAWS.

"(a) ELIGIBILITY.—The export trade, export trade activities, and methods of operation of any association, entered into for the sole purpose of engaging in export trade, and engaged in or proposed to be engaged in such export trade, and the export trade, export trade activities and methods of operation of any export trading company, that—

"(1) serve to preserve or promote export trade;

"(2) result in neither a substantial lessen-

ing of competition or restraint of trade within the United States nor a substantial restraint of the export trade of any competitor of such association or export trading company;

"(3) do not unreasonably enhance, stabilize, or depress prices within the United States of the goods, wares, merchandise, or services of the class exported by such association or export trading company;

"(4) do not constitute unfair methods of competition against competitors engaged in the export trade of goods, wares, merchandise, or services of the class exported by such association or export trading company;

"(5) do not include any act which results, or may reasonably be expected to result, in the sale for consumption or resale within the United States of the goods, wares, merchandise, or services exported by the association or export trading company or its members; and

"(6) do not constitute trade or commerce in the licensing of patents, technology, trademarks, or know-how, except as incidental to the sale of the goods, wares, merchandise, or services exported by the association or export trading company or its members

shall, when certified according to the procedures set forth in this Act, be eligible for the exemption provided in subsection (b).

"(b) EXEMPTION.—An association or an export trading company and its members are exempt from the operation of the antitrust laws with respect to their export trade, export trade activities and methods of operation that are specified in a certificate issued according to the procedures set forth in this Act, carried out in conformity with the provisions, terms, and conditions prescribed in such certificate and engaged in during the period in which such certificate is in effect. The subsequent revocation in whole or in part of such certificate shall not render an association or its members or an export trading company or its members, liable under the antitrust laws for such export trade, export trade activities, or methods of operation engaged in during such period.

"(c) DISAGREEMENT OF ATTORNEY GENERAL OR COMMISSION.—Whenever, pursuant to section 4(b)(1) of this Act, the Attorney General or the Commission has formally advised the Secretary of disagreement with his determination to issue a proposed certificate, and the Secretary has nonetheless issued such proposed certificate or an amended certificate, the exemption provided by this section shall not be effective until thirty days after the issuance of such certificate.".

AMENDMENT OF SECTION 3

SEC. 205. The Webb-Pomerene Act (15 U.S.C. 61–66) is amended—

(1) by inserting immediately before section 3 (15 U.S.C. 63) the following:

"SEC. 3. OWNERSHIP INTEREST IN OTHER TRADE ASSOCIATIONS PERMITTED.", and

(2) by striking out "SEC. 3. That nothing" in section 3 and inserting in lieu thereof "Nothing".

ADMINISTRATION; ENFORCEMENT; REPORTS

SEC. 206. (a) IN GENERAL.—The Webb-Pomerene Act (15 U.S.C. 61–66) is amended by striking out sections 4 and 5 (15 U.S.C. 64 and 65) and inserting in lieu thereof the following sections:

"SEC. 4. CERTIFICATION.

"(a) PROCEDURE FOR APPLICATION.—Any association or export trading company seeking certification under this Act shall file with the Secretary a written application for certification setting forth the following:

"(1) The name of the association or export trading company.

"(2) The location of all of the offices or places of business of the association or export trading company in the United States and abroad.

"(3) The names and addresses of all of the officers, stockholders, and members of the association or export trading company.

"(4) A copy of the certificate or articles of incorporation and bylaws, if the association or export trading company is a corporation; or a copy of the articles, partnership, joint venture, or other agreement or contract under which the association or export trading company conducts or proposes to conduct its export trade activities, or contract of association, if the association or export trading company is unincorporated.

"(5) A description of the goods, wares, merchandise, or services which the association or export trading company or their members export or propose to export.

"(6) A description of the domestic and international conditions, circumstances, and factors which show that the association or export trading company and its activities will serve a specified need in promoting the export trade of the described goods, wares, merchandise, or services.

"(7) The export trade activities in which the association or export trading company intends to engage and the methods by which the association or export trading company conducts or proposes to conduct export trade in the described goods, wares, merchandise, or services, including, but not limited to, any agreements to sell exclusively to or through the association or export trading company, any agreements with foreign persons who may act as joint selling agents, any agreements to acquire a foreign selling agent, any agreements for pooling tangible or intangible property or resources, or any territorial, price-maintenance, membership, or other restrictions to be imposed upon members of the association or export trading company.

"(8) The names of all countries where export trade in the described goods, wares, merchandise, or services is conducted or proposed to be conducted by or through the association or export trading company.

"(9) Any other information which the Secretary may request concerning the organization, operation, management, or finances of the association or export trading company; the relation of the association or export trading company to other associations, corporations, partnerships, and individuals; and competition or potential competition, and effects of the association or export trading company thereon. The Secretary may request such information as part of an initial application or as a necessary supplement thereto. The Secretary may not request information under this paragraph which is not reasonably available to the person making application or which is not necessary for certification of the prospective association or export trading company.

"(b) ISSUANCE OF CERTIFICATE.—

"(1) NINETY-DAY PERIOD.—The Secretary shall issue a certificate to an association or export trading company within ninety days after receiving the application for certification or necessary supplement thereto if the Secretary, after consultation with the Attorney General and Commission, determines that the association and, its export trade, export trade activities and methods of operation, or export trading company, and its export trade, export trade activities and methods of operation meet the requirements of section 2 of this Act and will serve a specified need in promoting the export trade of the goods, wares, merchandise, or services described in the application for certification. The certificate shall specify the permissible export trade, export trade activities and methods of operation of the association or export trading company and shall include any terms and conditions the Secretary deems necessary to comply with the requirements of section 2 of this Act. The Secretary shall deliver to the Attorney General and the Commission a copy of any certificate that he proposes to issue. The Attorney General or Commission may, within fifteen days thereafter, give written notice to the Secretary of an intent to offer advice on the determination. The Attorney General or Commission may, after giving such written notice and within forty-five days of the time the Secretary has delivered a copy of a proposed certificate, formally advise the Secretary and the petitioning association or export trading company of disagreement with the Secretary's determination. The Secretary shall not issue any certificate prior to the expiration of such forty-five-day period unless he has (A) received no notice of intent to offer advice by the Attorney General or the Commission within fifteen days after delivering a copy of a proposed certificate, or (B) received any noticed formal advice of disagreement or written confirmation that no formal disagreement will be transmitted from the Attorney General and the Commission. After the forty-five-day period or, if no notice of intent to offer advice has been given, after the fifteen-day period, the Secretary shall either issue the proposed certificate, issue an amended certificate, or deny the application. Upon agreement of the applicant, the Secretary may delay taking action for not more than thirty additional days after the forty-five-day period. Before offering advice on a proposed certification, the Attorney General and Commission shall consult in an effort to avoid, wherever possible, having both agencies offer advice on any application.

"(2) EXPEDITED CERTIFICATION.—In those instance where the temporary nature of the export trade activities, deadlines for bidding on contracts or filling orders, or any other circumstances beyond the control of the association or export trading company which have a significant impact on its export trade, make the ninety-day period for application approval described in paragraph (1) of this subsection, or an amended application approval as provided in subsection (c) of this section, impractical for the association or export trading company seeking certification, such association or export trading company may request and may receive expedited action on its application for certification.

"(3) AUTOMATIC CERTIFICATION FOR EXISTING ASSOCIATIONS.—Any association registered with the Federal Trade Commission under this Act as of January 19, 1981, may file with the Secretary an application for automatic certification of any export trade, export trade activities, and methods of operation in which it was engaged prior to enactment of the Export Trade Association Act of 1981. Any such application must be filed within one hundred and eighty days after the date of enactment of such Act and shall be acted upon by the Secretary in accordance with the procedures provided by this section. The Secretary shall issue to the association a certificate specifying the permissible export trade, export trade activities, and methods of operation that he determines are shown by the application (including any necessary supplement thereto), on its face, to be eligible for certification under this Act, and including any terms and conditions the Secretary deems necessary to comply with the requirements of section 2(a) of this Act, unless the Secretary possesses information clearly indicating that the requirements of section 2(a) are not met.

"(4) APPEAL OF DETERMINATION.—If the Secretary determines not to issue a certificate to an association or export trading company which has submitted an application for certification, or for an amendment of a certificate, then he shall—

"(A) notify the association or export trading company of his determination and the reasons for his determination, and

"(B) upon request made by the association or export trading company, afford it an opportunity for reconsideration with respect to that determination.

"(c) MATERIAL CHANGES IN CIRCUMSTANCES; AMENDMENT OF CERTIFICATE.—Whenever there is a material change in the membership, export trade activities, or methods of operation, of an association or export trading company then it shall report such change to the Secretary and may apply to the Secretary for an amendment of its certificate. Any application for an amendment to a certificate shall set forth the requested amendment of the certificate and the reasons for the requested amendment. Any request for the amendment of a certificate shall be treated in the same manner as an original application for a certificate.

"(d) AMENDMENT OR REVOCATION OF CERTIFICATE BY SECRETARY.—

"(1) The Secretary on his own initiative shall, upon a determination that the export trade, export trade activities or methods of operation of an association or export trading company no longer comply with the requirements of section 2 of this Act, revoke its certificate or make such amendments as may be necessary to comply with the requirements of such section.

"(2) Prior to revoking or amending a certificate, the Secretary shall—

"(A) notify the holder of the certificate in writing of the facts or conduct which may warrant the action, and

"(B) provide the holder of the certificate an opportunity for such hearing as may be appropriate in the circumstances.

"(3) Before revoking or amending a certificate pursuant to this subsection the Secretary may in his discretion provide the holder of the certificate an opportunity to achieve compliance within a reasonable period of time not to exceed ninety days, except that nothing in this paragraph shall affect any action under section 4(e) of this Act.

"(e) ACTION FOR REVOCATION OF CERTIFICATE BY ATTORNEY GENERAL OR COMMISSION.—

"(1) The Attorney General or the Commission may bring an action against an association or export trading company or its members to invalidate, in whole or in part, its certificate on the ground that the export trade, export trade activities or methods of operation of the association or export trading company fail or have failed to meet the requirements of section 2 of this Act. Except in the case of an action brought during the period before an antitrust exemption becomes effective, as provided for in section 2(c), the Attorney General or Commission shall notify any association or export trading company or member thereof, against which it intends to bring an action for revocation, thirty days in advance, as to its intent to file an action under this subsection. The district court shall consider any issues presented in any such action de novo and if it finds that the requirements of section 2 are not met, it shall issue an order revoking the certificate or any other order necessary to effectuate the purposes of this Act and the requirements of section 2.

"(2) Any action brought under this subsection shall be considered an action described in section 1337 of title 28, United States Code. Pending any such action which was brought during the period any exemption is held in abevance pursuant to section 2(c) of this Act, the court may make such temporary restraining order or prohibition as shall be deemed just in the premises.

"(3) No person other than the Attorney General or Commission shall have standing to bring an action against an association or export trading company or their respective members for failure of the association or export trading company or their respective export trade, export trade activities or methods of operation to meet the eligibility requirements of section 2 of this Act.

"(f) COMPLIANCE WITH OTHER LAWS.—Each association and each export trading company and any subsidiary thereof shall comply with United States export control laws pertaining to the export or transshipment of any goods on the Commodity Control List to controlled countries. Such laws shall be complied with before actual shipment.

"(g) JUDICIAL REVIEW.—Final orders of the Secretary under this section shall be subject to judicial review pursuant to chapter 7 of title 5, United States Code.

"SEC. 5. GUIDELINES.

"(a) INITIAL PROPOSED GUIDELINES.—Within ninety days after the enactment of the Export Trade Association Act of 1981, the Secretary, after consultation with the Attorney General, and the Commission shall publish proposed guidelines for purposes of determining whether export trade, export trade activities and methods of operation of an association or export trading company will meet the requirements of section 2 of this Act.

"(b) PUBLIC COMMENT PERIOD.—Following publication of the proposed guidelines, and any proposed revision of guidelines, interested parties shall have thirty days to comment on the proposed guidelines. The Secretary shall review the comments and, after consultation with the Attorney General, and Commission, publish final guidelines within thirty days after the last day on which comments may be made under the preceding sentence.

"(c) PERIODIC REVISION.—After publication of the final guidelines, the Secretary shall periodically review the guidelines and, after consultation with the Attorney General, and the Commission, propose revisions as needed.

"(d) APPLICATION OF ADMINISTRATIVE PROCEDURE ACT.—The promulgation of guidelines under this section shall not be considered rulemaking for purposes of subchapter II of chapter 5 of title 5, United States Code, and section 553 of such title shall not apply to their promulgation.

"SEC. 6. ANNUAL REPORTS.

"Every certified association or export trading company shall submit to the Secretary an annual report, in such form and at such time as he may require, which report updates where necessary the information described by section 4(a) of this Act.

"SEC. 7. CONFIDENTIALITY OF APPLICATION AND ANNUAL REPORT INFORMATION.

"(a) GENERAL RULE.—Portions of applications made under section 4, including amendments to such applications, and annual reports made under section 6 that contain trade secrets or confidential business or financial information, the disclosure of which would harm the competitive position of the person submitting such information shall be confidential, and, except as authorized by this section, no officer or employee or former officer or employee, of the United States shall disclose any such confidential information, obtained by him in any manner in connection with his service as such an officer or employee.

"(b) DISCLOSURE TO ATTORNEY GENERAL OR COMMISSION.—Whenever the Secretary believes that an applicant may be eligible for a certificate, or has issued a certificate to an association or export trading company, he shall promptly make available all materials filed by the applicant, association or export trading company, including applications and supplements thereto, reports of material changes, applications for amendments and annual reports, and information derived therefrom, to the Attorney General or Commission, or any employee or officer thereof, for official use in connection with an investigation or judicial or administrative proceeding under this Act or the antitrust laws to which the United States or the Commission is or may be a party. Such information may only be disclosed by the Secretary upon a prior certification that the information will be maintained in confidence and will only be used for such official law enforcement purposes.

"SEC. 8. MODIFICATION OF ASSOCIATION TO COMPLY WITH UNITED STATES OBLIGATIONS.

"At such time as the United States undertakes binding international obligations by treaty or statute, to the extent that the operations of any export trade association or export trading company, certified under this Act, are inconsistent with such international obligations, the Secretary may require the association or export trading company to modify its respective operations, and in so doing afford the association or export trading company a reasonable opportunity to comply therewith, so as to be consistent with such international obligations.

"SEC. 9. REGULATIONS.

"The Secretary, after consultation with the Attorney General and the Commission, shall promulgate such rules and regulations as may be necessary to carry out the purposes of this Act

"SEC. 10. TASK FORCE STUDY.

"Seven years after the date of enactment of the Export Trade Association Act of 1981, the President shall appoint, by and with the advice and consent of the Senate, a task force to examine the effect of the operation of this Act on domestic competition and on United States international trade and to recommend either continuation, revision, or termination of the Webb-Pomerene Act. The task force shall have one year to conduct its study and to make its recommendations to the President.".

(b) REDESIGNATION OF SECTION 6.—The Act is amended—

(1) by striking out "SEC. 6." in section 6 (15 U.S.C. 66), and

(2) by inserting immediately before such section the following:

"SEC. 11. SHORT TITLE.".

EFFECTIVE DATE WITH REGARD TO EXISTING ASSOCIATIONS

SEC. 207. (a) GENERAL RULE.—The amendments to the Webb-Pomerene Act set forth in sections 203, 204, 205, and 206 of this Act shall become effective with regard to an existing association described in subsection (b) only at such time as the association may elect to be certified pursuant to subsection (c).

(b) ELECTION TO CONTINUE UNDER PRIOR LAW.—Application of the antitrust laws to any association which as of January 1, 1981, had filed with the Commission the information specified under section 5 of the Webb-Pomerene Act as in effect immediately prior to the date of enactment of this Act shall continue to be governed by the standards set forth in that Act, unless such association elects to seek certification under subsection (c).

(c) ELECTION TO APPLY FOR CERTIFICATION.—Any association to which subsection (b) applies may, at any time after the effective date of this Act, file an application for certification with the Secretary containing the information set forth in section 4(a) of the Webb-Pomerene Act, as amended by section 206 of this Act. The Secretary shall consider and act upon such application in the manner provided in section 4(b) of the Webb-Pomerene Act, as amended by section 206 of this Act. The association filing an application pursuant to this subsection shall continue to be subject to subsection (b) of this section until the Secretary issues a certificate and such certificate has been accepted by the association; the association must decide whether or not to accept such certificate no later than thirty days after the Secretary's determination with respect thereto has become final.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER FOR RECESS UNTIL 9:30 A.M. TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9:30 a.m., Thusrday, April 9, 1981.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent that when the Senate reconvenes tomorrow and following the time allocated to the two leaders under the standing order, there be a period for the transaction of routine morning business, not to exceed 1 hour, with Senators permitted to speak for not more than 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS FROM TOMORROW MORNING UNTIL FRIDAY, APRIL 10, AND FOR ADJOURNMENT FROM FRIDAY UNTIL MONDAY, APRIL 27, 1981

Mr. STEVENS. Mr. President, I ask unanimous consent that when the Senate completes its business on tomorrow, it stand in recess until 9:30 a.m. on Friday, April 10; that when the Senate recesses on Friday, it stand in adjournment until 12 noon on Monday, April 27, 1981, pursuant to Senate Concurrent Resolution 17.

The PRESIDING OFFICER. Without objection. it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, is it anticipated that Friday's session will be pro forma only?

Mr. STEVENS. That is the understanding, that Friday's session will be pro forma only. Tomorrow, there will be routine business.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. STEVENS. I am happy to yield.

Mr ROBERT C. BYRD. On tomorrow, will the Senate transact any business or will the session be for the purpose of routine type morning business?

Mr. STEVENS. The Senate will have routine morning business and, subject to normal clearance, will deal with some routine unanimous-consent matters. It is not anticipated that we will take up any controversial matters tomorrow.

Mr. ROBERT C. BYRD. Mr. President, there will be just the introduction of bills, resolutions. speeches, and so forth?

Mr. STEVENS. I do have a unanimous-consent request that the RECORD be left open for bills and reports, but that is my understanding. I do not know whether there will be any other items that might be cleared on the Executive Calendar or come off the regular calendar on the consent basis, but it will be totally on a unanimous-consent basis. Any transaction of such business will be confined to tomorrow and will not be done on Friday.

Mr. ROBERT C. BYRD. Any transaction of such business will be confined to tomorrow and will not be done on Friday?

Mr. STEVENS. There is no intention to conduct any business on Friday except to have the pro forma session in the morning at 9:30.

Mr. ROBERT C. BYRD. I thank the distinguished assistant majority leader.

ORDER FOR RECORD TO BE HELD OPEN ON THURSDAY, APRIL 9 AND FRIDAY, APRIL 10, 1981

Mr. STEVENS. Mr. President, I ask unanimous consent that on Thursday, April 9 and Friday, April 10 the RECORD be open for bills, resolutions, and inserts from 9 a.m. until 3 p.m. and that committees may be authorized to file reports from 9 a.m. until 3 p.m on Thursday and Friday

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER AUTHORIZING THE SECRETARY OF THE SENATE TO RECEIVE MESSAGES DURING ADJOURNMENT

Mr. STEVENS. Mr. President, I ask unanimous consent that during the adjournment of the Senate over until April 27, 1981, the Secretary of the Senate be authorized to receive messages from the President of the United States and the House of Representatives and that they be appropriately referred.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER AUTHORIZING THE PRESIDENT OF THE SENATE, THE PRESIDENT PRO TEMPORE, OR THE ACTING PRESIDENT PRO TEMPORE TO SIGN DULY ENROLLED BILLS AND JOINT RESOLUTIONS

Mr. STEVENS. Mr. President, I ask unanimous consent that during the adjournment of the Senate over until April 27, 1981, the President of the Senate, the President pro tempore, or the Acting President pro tempore be authorized to sign duly enrolled bills and joint resolutions.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER AUTHORIZING THE SECRETARY OF THE SENATE TO RECEIVE REPORTS DURING ADJOURNMENT

Mr. STEVENS. Mr. President, I ask unanimous consent that during the adjournment of the Senate over until April 27, 1981, on Thursday, April 16, 1981, and Thursday, April 23, 1981, the Secretary of the Senate be authorized to receive reports from 9 a.m. until 3 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE SENATE TO TAKE CERTAIN ACTION AND FOR RECOGNITION OF CERTAIN SENATORS ON MONDAY, APRIL 27, 1981

Mr. STEVENS. Mr. President, I ask unanimous consent that when the Senate reconvenes on Monday, April 27, 1981, the reading of the Journal be dispensed with; no resolution come over under the rule; the call of the Calendar be dispensed with; and that following the recognition of the two leaders under the standing order, Mr. BAKER, Mr. STEVENS, Mr. ROBERT C. BYRD, and Mr. CRANSTON be recognized for not to exceed 15 minutes each, upon the conclusion of which, there be a period for the transaction of routine morning business, not to exceed 1 hour with Senators permitted to speak therein for not more than 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF SENATOR HEFLIN ON TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent that Senator HEFLIN be granted a 15-minute special order tomorrow following the time set aside under the standing order for the leaders

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate go into executive session to consider all nominations on the Executive Calendar with the exception of the nomination under the ACTION agency and the nomination of John B. Crowell under the Department of Agriculture.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I shall not object, I simply want to be sure that I understood the distinguished acting majority leader correctly.

He is excluding from consideration at this time Mr. John B. Crowell of Oregon to be Assistant Secretary of Agriculture and Mr. Thomas W. Pauken of Texas to be Director of the ACTION agency. Am I correct?

Mr. STEVENS. That is the Senator's understanding.

Mr. ROBERT C. BYRD. I have no objection.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nominations will be stated.

DEPARTMENT OF AGRICULTURE

The legislative clerk read the nomination of Seeley Lodwick, of Iowa, to be Under Secretary of Agriculture for International Affairs and Commodity Programs.

Mr. JEPSEN. Mr. President, it is with deep satisfaction that I present to the Members of the Senate a distinguished Iowan whose leadership in the field of agriculture has brought credit to our State; Seeley G. Lodwick is a farmer, an agricultural economist, and a public servant. His home is in Wever, Lee County, Iowa. He holds a degree in agricultural economics from Iowa State University. He served in the U.S. Marine Corps for 3 years during World War II and was discharged as a lieutenant in 1945.

As one who has been a livestock producer, dairy and beef as well as hogs, and also a grain producer, he knows from personal experience the problems—and the satisfactions—of Iowa farm families.

He is also thoroughly experienced in Government affairs. In 1969 he came to Washington, D.C., to become the director of the conservation and land use division of the Agricultural Stabilization and Conservation Service. In the following years he became secretary of the Commodity Credit Corporation and executive assistant to the ASCS administrator.

Mr. Lodwick became director of government relations for the American Farm Bureau Federation in 1973. In that capacity he was recognized as a capable, articulate and credible spokesman for farmers. In 1976 he returned to the Department of Agriculture as assistant administrator for ASCS.

I was fortunate to have Seeley Lodwick join my staff as Iowa administrator after I took my seat in the U.S. Senate in 1979. His faithful service, sound advice, integrity and dependability have been invaluable to me.

I urge all Members of the Senate to join me in recommending to the Senate that Mr. Lodwick be confirmed as Under Secretary for International Affairs and Commodity Programs.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of William Gene Lesher, of Virginia, to be an Assistant Secretary of Agriculture.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of C. W. McMillan, of Virginia, to be a member of the Board of Directors of the Commodity Credit Corporation.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of Seeley Lodwick, of Iowa, to be a member of the Board of Directors of the Commodity Credit Corporation.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of William Gene Lesher, of Virginia, to be a member of the Board of Directors of the Commodity Credit Corporation.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

FEDERAL AVIATION ADMINISTRATION

The legislative clerk read the nomination of J. Lynn Helms, of Connecticut, to be Administrator of the Federal Aviation Administration.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

The legislative clerk read the nomination of Raymond A. Peck, Jr., of the District of Columbia, to be Administrator of the National Highway Traffic Safety Administration.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

DEPARTMENT OF COMMERCE

The legislative clerk read the nomination of Joseph Robert Wright, Jr., of New York, to be Deputy Secretary of Commerce.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of William H. Morris, Jr., of Tennessee, to be an Assistant Secretary of Commerce.

Mr. GARN. Mr. President, the Committee on Banking, Housing and Urban Affairs is pleased to report the nomination of Mr. William Morris of Tennessee to the Senate for confirmation as Assistant Commerce Secretary for Trade Development.

Our Nation's merchandise trade deficit, which has totaled more than $110 billion over the past 5 years and which has exceeded the aggregate trade deficit for the first 200 years of our Republic, is a problem which cries out for innovative solutions. Without improvement in our trade balance we are doomed to the dreadful choice of high interest rates or a devalued dollar. Neither of which are attractive long-range solutions.

At his confirmation hearings and in his career as a businessman and public servant, Bill Morris has shown a capacity to come up with innovative answers to difficult problems. That, plus his success in promoting trade in his home State of Tennessee makes him eminently qualified for the position of Assistant Secretary for Trade Development to which he has been nominated.

I urge my colleagues to join with me in voting for his confirmation.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

FEDERAL HOME LOAN BANK BOARD

The legislative clerk read the nomination of Richard T. Pratt, of Utah, to be a member of the Federal Home Loan Bank Board.

Mr. GARN. Mr. President, as chairman of the Banking Committee, it is a distinct pleasure for me to bring before the Senate the nomination of Richard T. Pratt of Utah to be a member of the Federal Home Loan Bank Board. Dr. Pratt will also be designated by the President as chairman of the Bank Board. Dr. Pratt is eminently qualified for these positions, having both distinguished academic and employment careers.

The importance of the position of chairman of the Federal Home Loan Bank Board at this time in our economic history cannot be overstated. As the economy has taken all sorts of twists and turns during the past few years, the effects on savings and loan associations, personal savings rates, and housing have been tremendous. High interest rates have adversely affected the earnings and deposit levels of thrift institutions.

During the next several months, Congress has the task of putting the country's financial house in order which, when accomplished, will enable savings and loans to maintain stability and growth. Lowering the deficit and cutting Federal spending will break the inflationary psychology of the economy and help insure that consumers and the housing industry continue to be served by a strong savings and loan industry.

As the prospective leader of the Federal Home Loan Bank Board, no one is better qualified than Richard T. Pratt. He has the academic credentials—a B.S. and MBA from the University of Utah and a Ph. D. from Indiana University—and the employment experience—university professor, Chief Economist of the U.S. Savings and Loan League, and consultant to Federal Home Loan banks and other organizations in the savings and loan industry—to more than fulfill the task for which he has been nominated.

The Banking Committee has completed a thorough review of Dr. Pratt's background and suitability to serve on the Federal Home Loan Bank Board. On April 6, 1981, the committee held a hearing on the nomination and, having subsequently concluded their consideration of this matter, the members of the committee unanimously recommended that Dr. Pratt be confirmed by the full Senate.

Dr. Pratt has been nominated to serve the remainder of former Bank Board Chairman Jay Janis' term, expiring June 30, 1981, and to serve a full 4-year term beginning on July 1 of this year and ending on June 30, 1985. This will assure continuity in his service at the Bank Board.

Accordingly, besides urging my colleagues to support Dr. Pratt's nomination, I move that the two nominations be considered en bloc when the Senate votes on this matter.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

SECURITIES AND EXCHANGE COMMISSION

The legislative clerk read the nomination of John S. R. Shad, of New York, to be a member of the Securities and Exchange Commission.

Mr. GARN. Mr. President, I rise in support of the nominations of John S. R. Shad, of New York, to be chairman of

the Securities and Exchange Commission. Mr. Shad brings to the Commission an outstanding record of achievement and experience, and I support his nominations enthusiastically.

President Reagan simultaneously nominated Mr. Shad for two terms on the Securities and Exchange Commission, and the two nominations are being considered en bloc. These are the term of the former chairman, Harold Williams, which expires on June 5, 1982, and the full 5-year term beginning June 5, 1981 and ending June 5, 1986. The Committee on Banking, Housing, and Urban Affairs received from Fred F. Fielding, Counsel to the President, a letter explaining the intent of the two nominations, and I ask unanimous consent that the text of that letter be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, D.C., April 1, 1981.

Hon. JAKE GARN,
Chairman, Committee on Banking, Housing and Urban Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This is to explain and confirm the President's intentions with regard to the nomination of John S. R. Shad to be a Member of the Securities and Exchange Commission.

Mr. Shad has been nominated to fill the remainder of the unexpired term of Harold Williams, and on June 5, 1981, to succeed into the term expiring June 5, 1986.

Mr. Shad has agreed to resign on June 5, 1981, the term expiring June 5, 1982. It is the President's intention to accept that resignation, thereby allowing Mr. Shad to succeed into the full five-year term expiring June 5, 1986.

Sincerely,

FRED F. FIELDING,
Counsel to the President.

Mr. GARN. The Banking Committee held a hearing on April 6, 1981, on Mr. Shad's nominations, and he indicated that the letter quoted above accurately explains his understandings and intentions.

On April 7, 1981, the committee unanimously approved Mr. Shad's nominations.

The Securities and Exchange Commission faces a number of challenges in the years ahead, including a responsibility to reduce wherever possible, any unnecessary burdens associated with the statutes and regulations which it administers. John Shad is well-equipped by background, experience, and integrity to lead the Commission in its endeavors, and I recommend that his nominations be promptly confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. STEVENS. Mr. President, I move to reconsider the votes by which these nominations were confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

TIME AGREEMENT ON EXECUTIVE CALENDAR NO. 1

Mr. STEVENS. Mr. President, I ask unanimous consent that on Wednesday, April 29, the Senate go into executive session no later than 10 a.m. to consider the Resolution of Ratification of the Maritime Boundary Settlement Treaty with Canada under the following time agreement:

Two hours on the resolution equally divided between Senators PERCY and PELL, and that at the expiration or yielding back of the 2 hours, the Senate conduct a rollcall vote on the resolution.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alaska?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I wonder if the distinguished Senator would excise from the request the provision providing for rollcall votes by unanimous consent? Could we order that in the usual rather than including the unanimous-consent request?

Mr. STEVENS. Then I shall restate at the expiration or yielding of the 2 hours the Senate proceed to the vote on the Resolution of Ratification of the treaty and we will seek a rollcall vote at that time under the normal procedure.

I repeat my request, Mr. President, for unanimous consent that the Senate go into executive session no later than 10 a.m. on April 29 to consider the Resolution of Ratification of the Maritime Boundary Settlement Treaty with Canada, that there be 2 hours equally divided between Senators PERCY and PELL, at the expiration or yielding back of the 2 hours the Senate proceed immediately to the vote on the Resolution of Ratification of the treaty, and I give notice that there will be requests at that time for rollcall votes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that it be in order for a rollcall vote at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I now ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. Mr. President, with regard to the treaty we have set down for debate on the 27th of April, I ask unanimous consent that the treaty be considered as amended and as having passed through the various parliamentary stages up to and including the presentation of the Resolution of Ratification which will be printed.

The PRESIDING OFFICER. Without objection, it is so ordered.

MARITIME BOUNDARY SETTLEMENT TREATY WITH CANADA—EX. U, 96TH CONGRESS, 1ST SESSION

The PRESIDING OFFICER. Without objection, the treaty will be considered as having passed through its various parliamentary stages up to and including the presentation of the Resolution of Ratification, which the clerk will state.

The legislative clerk read as follows:

Resolved (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Treaty between the Government of the United States of America and the Government of Canada to Submit to Binding Dispute Settlement the Delimitation of the Maritime Boundary in the Gulf of Maine Area, signed at Washington, March 29, 1979 (Executive U, 96th Congress, 1st session), subject to the following amendments:

"1. that the second sentence of Article I of this treaty shall be amended as follows:

'The Chamber of the International Court of Justice shall be deemed to have been constituted when the Registrar of the Court has been notified of the name or names of the judge or judges ad hoc.'

"2. that Article IV of this treaty shall be amended as follows:

'This Treaty shall be ratified in accordance with the domestic requirements of the Parties and shall enter into force on the date instruments of ratification are exchanged and shall remain in force until terminated by agreement of the Parties.'

"3. that Article I of the Special Agreement Between the Government of the United States of America and the Government of Canada to Submit to a Chamber of the International Court of Justice the Delimitation of the Maritime Boundary in the Gulf of Maine Area, signed at Washington, March 29, 1979, shall be amended as follows:

'The Parties shall submit the question posed in Article II to a Chamber of the International Court of Justice, composed of five persons, to be constituted after consultation with the Parties, pursuant to Article 26(2) and Article 31 of the Statute of the Court and in accordance with this Special Agreement.'

"4. that Article VI, paragraph 1.(a) of the Special Agreement Between the Government of the United States of America and the Government of Canada to Submit to a Chamber of the International Court of Justice the Delimitation of the Maritime Boundary in the Gulf of Maine Area, signed at Washington, March 29, 1979, shall be amended as follows:

'(a) a Memorial to be submitted by each Party not later than seven months after the Registrar shall have received the notification of the name or names of the judge or judges ad hoc;'

"5. that paragraph 1 of Article XIII of the Agreement Between the Government of the United States of America and the Government of Canada to Submit to a Court of Arbitration the Delimitation of the Maritime Boundary in the Gulf of Maine Area, signed at Washington, March 29, 1979, shall be amended as follows:

'1. Following the rendering of the decision of the Court or of the Chamber of the International Court of Justice constituted pursuant to the Special Agreement Between the Government of the United States of America and the Government of Canada to Submit to a Chamber of the International Court of Justice the Delimitation of the Maritime Boundary in the Gulf of Maine Area, either party may request negotiations directed toward reaching agreement on ex-

tension of the maritime boundary as far seaward as the Parties may consider desirable.'

"6. that paragraph 4 of Article XIII of the Agreement Between the Government of the United States of America and the Government of Canada to Submit to a Court of Arbitration the Delimitation of the Maritime Boundary in the Gulf of Maine Area, signed at Washington, March 29, 1979, shall be amended as follows:

'4. If Agreement pursuant to paragraph 1 or paragraph 2 is not reached, and the matter cannot be submitted to the Court in accordance with paragraph 3, either Party may call upon the President of the International Court of Justice to select, after consultation with the Parties, five persons to constitute a Court of Arbitration.'

"7. that paragraph 5 of Article XIII of the Agreement Between the Government of the United States of America and the Government of Canada to Submit to a Court of Arbitration the Delimitation of the Maritime Boundary in the Gulf of Maine Area, signed at Washington, March 29, 1979, be renumbered paragraph 6.

"8. that a new paragraph 5 be added to Article XIII of the Agreement Between the Government of the United States of America and the Government of Canada to Submit to a Court of Arbitration the Delimitation of the Maritime Boundary in the Gulf of Maine Area, signed at Washington, March 29, 1979, as follows:

'5. If the decision referred to in paragraph 1 was rendered by a Chamber of the International Court of Justice, and this Agreement subsequently enters into force, a Court of Arbitration shall be established, in accordance with Article I of this Agreement, for the purposes of deciding the question referred to in paragraph 2 of this Article.'"

LEGISLATIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I now ask unanimous consent that there be a period for the transaction of routine morning business not to exceed 10 minutes and Senators be recognized during that period for not to exceed 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR TESTIMONY BY WILLIAM I. WRIGHT

Mr. STEVENS. Mr. President, I send to the desk a resolution on behalf of Mr. BAKER and the distinguished Senator from West Virginia (Mr. ROBERT C. BYRD).

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 110) to authorize testimony by William I. Wright.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. BAKER. Mr. President, this resolution, under Senate rule XI, would authorize William Wright to testify in the case of *Dr. Gary L. Pearson, DVM* v. *The United States*, Civil Action No. 249–78, pending in the U.S. Court of Claims. The resolution also directs the Office of Senate Legal Counsel to represent Mr. Wright in connection with his testimony in this case.

Mr. Wright, who is now a staff member for Senator ANDREWS, was previously a staff member to Senator Milton Young. Mr. Wright's testimony has been requested at the trial in connection with his service with Senator Young.

The court previously established limits on the scope of certain testimony in the case. This resolution would authorize Mr. Wright's testimony, within that limitation, concerning knowledge he obtained while he served on the staff of Senator Young. No subpena has been issued since Mr. Wright is willing to testify voluntarily.

Senate Legal Counsel will represent Mr. Wright in connection with his testimony to protect the privileges of the Senate if the need arises.

I ask unanimous consent that this resolution be adopted.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

S. RES. 110

Whereas, the case of *Dr. Gary L. Pearson, DVM* v. *The United States* (Ct. Cl. No. 249–78) is pending in the United States Court of Claims Trial Division and is set for trial on April 20, 1981;

Whereas, the testimony of William I. Wright, as to knowledge he obtained while he served on the staff of former Senator Milton Young has been requested at the trial;

Whereas, by the privileges of the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, when it appears that testimony of a staff employee of the Senate is needful for use in any court for the promotion of justice, the Senate will take such action thereon as will promote the ends of justice consistently with the privileges and rights of the Senate;

Whereas, the Court of Claims Trial Division by order entered October 2, 1980, prescribed limits for testimony to be taken in this case;

Whereas, in consideration of said limitation the Senate by Senate Resolution 537, Ninety-Sixth Congress, Second Session, authorized Senator Milton Young to testify in this case;

Whereas, Title VII of the Ethics in Government Act of 1978, Public Law 95–521 (the Act), establishes the Office of Senate Legal Counsel and provides that the Senate may direct its Counsel to represent the Senate, its committees, members, officers, or employees; Now, therefore, be it

Resolved, That William I. Wright is authorized to testify at the trial in the case of *Dr. Gary L. Pearson, DVM* v. *The United States*, (Ct. Cl. No. 249–78) as to matters within the scope of inquiry permitted by the October 2, 1980 order of the Court of Claims Trial Division; and

SEC. 2. That, pursuant to sections 703(a), 704(a)(1), and 708(c) of the Act, the Senate Legal Counsel is directed to represent William I. Wright in connection with his testimony in this case.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Who seeks the floor?

LEAVE OF ABSENCE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that official leave be granted today for the junior Senator from New Jersey (Mr. BRADLEY), who is attending the Organization for Economic Cooperation and Development/International Energy Agency Parliamentary Symposium on energy and the economy in Paris, France.

The PRESIDING OFFICER. Without objection, it is so ordered.

IS MILITARY AID TO EL SALVADOR THE ANSWER?

Mr. ROBERT C. BYRD. Mr. President, the acting head of the Roman Catholic Church in El Salvador, Bishop Arturo Rivera y Damas, has called for a political solution to the civil war in that small strife-torn country.

Although the Bishop called for a halt to U.S. military aid to the junta, he was equally strong in his denunciation of those countries in the "Soviet bloc" that are supplying arms to the leftist guerrillas. The Bishop's remarks came in the wake of earlier comments from President Duarte that what El Salvador needed more than military assistance was economic aid to allow that country to move forward with its land reform program.

I have become increasingly persuaded that a political solution to El Salvador's problem is the only workable solution. Bishop Rivera y Damas has a reputation for caution and realism. The Bishop was quoted in the April 7, 1981 Washington Post as declaring:

> This country is torn by "a profound, social, military and political crisis" marked by "untold human suffering and countless murders" . . . "the help that El Salvador needs must be directed to meeting the social" needs of the country through a "non-military solution."

The junta itself has conceded that social and economic reform, and the resources required to accomplish it, are the key elements to El Salvador's future.

There are some who question the motives of the Catholic Church in El Salvador and elsewhere in Latin America. The Secretary of State, last month, even implied that the three Catholic nuns and one Catholic layworker slain in El Salvador could have been involved in

gunrunning to the leftist guerrillas. He subsequently denied that these were his personal views.

Yet, the U.S. Catholic Conference and other religious groups have openly opposed U.S. military assistance to El Salvador. As a result of this public stand, it was with considerable interest that I read a column in the April 6, 1981, Washington Star written by John Langan. Father Langan, a Jesuit who is on the staff of the Woodstock Theological Center and a teacher of philosophy at Georgetown University, discussed the role of the church in countries like El Salvador. Father Langan asked the question:

> Does religious commitment to human rights and aid for the poor damage fundamental American interests?

He further explained that religious opposition to American military aid to El Salvador:

> Is not based on a desire to see a totalitarian regime imposed on that country. The U.S. Catholic Conference and Bishop Rivera y Damas of San Salvador are strongly opposed to intervention by the Soviet Union and its surrogates.
>
> What church leaders have consistently stressed is the double need to stop the bloodshed and keep the focus on the internal character of the civil war, both in its sources and in the range of possible solutions.

This is a very straightforward explanation of the reasons for supporting a political rather than a military solution in El Salvador. It is an explanation with which few can argue.

But what I found most convincing about Father Langan's discussion of the role of the church was the following:

> Patient efforts to ensure the poor of the world an opportunity to work out their problems in a way that respects their need for human dignity and freedom contribute to justice and stability in the world. They create the condition in which the half-truths of Marxism and the dictatorial policies to which it gives rise can be exposed as incompatible with the needs and aspirations of developing peoples.

Mr. President, Father Langan's views are fundamental to our experience as a democracy. Our history as a nation has been characterized by our ability to work out our human and social problems in a way that respects the individual's need for human dignity and freedom. This has been an underlying basis for our strength. We are a nation which prides itself on upholding Judeo-Christian values. And for our foreign policy to be effective it must reflect the values of the American people.

I ask unanimous consent that articles from the Washington Post and Washington Star be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, April 7, 1981]

SALVADORAN CHURCHMAN OPPOSES U.S. MILITARY AID

(By Marjorie Hyer)

The acting head of the Roman Catholic Church in El Salvador, calling for an end to U.S. military aid to his country, met yesterday with Vice President Bush, Deputy Secretary of State William Clark and congressional and church leaders.

Declaring that his country is torn by "a profound social, military and political crisis" marked by "untold human suffering and countless murders," Bishop Arturo Rivera y Damas said "the help that El Salvador needs must be directed to meeting the social needs" of the country through a "nonmilitary solution."

Rivera y Damas renewed the appeal of his predecessor, the late Archbishop Oscar Romero, who shortly before his murder a little more than a year ago called for a cutoff of American military aid to the ruling junta in El Salvador. The junta has been widely criticized, particularly in church circles, for its failure to control right-wing paramilitary units which have been blamed for much of the violence in the country.

There was no immediate response from Bush or the State Department to the bishop's appeal.

In assailing the stepped-up military aid of the Reagan administration, Rivera y Damas said that "with the same emphasis I denounce and criticize the governments of Cuba and Nicaragua" and the "countries of the Soviet bloc" for supplying arms to leftist guerrillas battling for control of the country.

The 58-year-old bishop, in his stop here after a European trip that included an official visit to the Vatican, denied reports circulating in some church circles that Pope John Paul II has been less than enthusiastic about the activist role of Latin American church leaders, including Romero, in trying to deal with political turmoil there. "If you are speaking about [Romero's] ministry of speaking out in favor of the poor," he said in response to a question, "I have been encouraged [by the Vatican] to do so, and I have been encouraged to look for a specific solution" to the prolonged violence in El Salvador.

The bishop said he was "dissatisfied" by the government's efforts in tracking down the persons responsible for the slaying of three American nuns and a lay woman social worker last December. "Lately there has not been much movement" in the investigation, he said. "I personally am not satisfied with the way it is being handled."

Rivera y Damas also said "I certainly am not satisfied with the investigation" of the assassination of Romero, unsolved after more than a year.

[From the Washington Star, April 6, 1981]

THE CHURCH'S MISSION INCLUDES STRUGGLING

(By John Langan)

Does the opposition of the U.S. Catholic Conference and other religious groups to American military aid to El Salvador promote the cause of totalitarianism in Central America? Does religious support for revolutionary movements imply a loss of the sense of the transcendent? Does religious commitment to human rights and to aid for the poor damage fundamental American interests?

Recently Father James Schall, S.J., (The Star, March 27) suggested that we should give affirmative answers to all these questions. I disagree—not out of any desire to illustrate the incorrigible diversity of Jesuits, but out of a concern that we understand the depth and character of the contemporary Catholic commitment to social justice.

Religious opposition to American military aid to El Salvador is not based on a desire to see a totalitarian regime imposed on that country. The U.S. Catholic Conference and Bishop Rivera Y. Damas of San Salvador are strongly opposed to intervention by the Soviet Union and its surrogates.

What church leaders have consistently stressed is the double need to stop the bloodshed and keep the focus on the internal character of the civil war, both in its sources and in the range of possible solutions. They judge that American arms will be used to support repressive practices that will cost more lives and will not reach the sources of injustice.

They make this judgment on the basis of their own prudence and experience, but also on the basis of the work and suffering and danger that many religious women and men have chosen to share with the poor of El Salvador. These people do not want El Salvador to become another Cuba, but they do not want yet another generation of the Salvadoran people to be victimized. Their judgment of what should be done must be taken seriously, even though it may be mistaken because of the many uncertainties about the present balance of military and political forces in the country, and about the policy direction of whatever regime might result from an internal resolution of the present conflict.

URGING INTERVENTION

But similar uncertainties affect the judgments of those who urge American intervention. All parties to the debate need to acknowledge that it is both difficult and imperative to enable the people of El Salvador to arrive at some understanding which will establish the rule of law and which will enable the people to address their pressing economic problems.

Church authorities take a certain risk in recommending or condemning a particular course of action, but their doing so in this case does not signal any loss of a sense of religious transcendence.

All of us who are children of Abraham—Jews, Christians, and Muslims alike—profess belief in a God of justice, who requires of his people that they "do justice and love kindness and walk humbly with your God." Religious people have often been unwise in the way they read the demands of justice in particular situations. It is also true that appeals to human rights and to the cause of the poor can be misused. Not everyone who says, "Lord, Lord" will be saved; not everyone who calls for justice is to be trusted.

There is need for a healthy respect for the complexities of a pluralistic, divided world. But religious leaders would be neglecting a fundamental aspect of their religious mission if they failed to proclaim the Lord's call to justice and peace. Both Vatican II and recent popes have seen this. John Paul II has not failed to act on this imperative, as we can see from his most recent calls for the observance of human rights in the Philippines and for the peaceful resolution of the crisis in Poland.

The religious commitment to human rights and to hearing the cry of the poor need not be damaging to fundamental American interests, provided that these are properly understood. Despite the difficult and often tragic character of political choices, we should not accept any understanding of our national interest which requires us to oppose the aspirations of the majority of humanity to a better and freer life.

SOVIET EXPANSIONISM

There are many ways in which American will and power should oppose Soviet expansionism, but we must not allow the face of Marxist participation in revolutionary movements in the Third World to force us into an unwise and inappropriate military response. Patient efforts to ensure the poor of the world an opportunity to work out their problems in a way that respects their need for human dignity and freedom contribute to justice and stability in the world. They create the condition in which the half-truths of Marxism and the dictatorial policies to which it gives rise can be exposed as incompatible with the needs and aspirations of developing peoples.

The Christian struggle for social justice is an integral part of the mystery of salvation. It involves the risks of faith and of human enterprise generally. Contrary to what Father Schall argues, it does not imply

either a loss of religious commitment or support for totalitarianism.

SPEECH BY MISS LISA PANOSIAN OF GREENVILLE, S.C.

Mr. THURMOND. Mr. President, I have learned that a young lady from my State, Miss Lisa Panosian, daughter of Dr. and Mrs. Edward Panosian of Greenville, has received a commendable award of at least a $1,000 scholarship through competition in the "I Speak for Freedom" high school speech contest. I wish to bring this speech to the attention of my colleagues because of the splendid job Miss Panosian has done, and because I feel it is a prime example of what tomorrow's leaders are doing today to prepare themselves for the challenges ahead.

Mr. President, I ask unanimous consent that the text of this outstanding address be printed in the RECORD at the conclusion of these remarks.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

HOW ECONOMIC FREEDOM AFFECTS PROGRESS

(By Lisa Noel Panosian)

The air was stifling one late afternoon when Fu Chong came home from his day's work in the collective rice paddies of the state. As he reflected on the events of the day, his mind then, as often before, filled with a growing discontent with his situation in life. He was frustrated anew by the obvious futility of his trying to improve the means of production in his rice paddies. Ah, but that was the problem: they were not his rice paddies. They belonged to the "wise, magnanimous state, whose chief concern was the best interests of her people."

Was not each person who worked on her communal rice paddies laboring unselfishly for the good of society, and did not that unselfish concern for society as a whole prompt him to work diligently to increase and improve production? Did he need a personal profit motive to create in him an incentive to perform to the best of his ability? Fu Chong's answer to that question was a definite "Yes!"

He knew it to be so from his own experience. For he had often thought of changes and improvements he would make if those rice paddies were his, if he were to gain from their increased production, if he were able to enjoy the fruits of his labor. "But no," he would end resignedly, "why try? "Who would indeed benefit from my efforts? The party officials?" And so, day after day, Fu Chong fulfilled his duty and no more in the collective rice paddies of the state and received wages equal to those of every other worker of his kind.

Not very far away on the shores of the little island of Taiwan, Sun Fuchin made his way home along the path which led from his rice paddies. He was weary from the heat and toil of the day, for he had risen early that morning and it was now dusk. His back ached from hours of stooping over his work. But he was pleased; he was content with his labors, for he could see the profits coming in already. Since the land reform program had been established, enabling him to own the land on which he labored, his income had almost tripled. He had the freedom to produce on his land just as much as he chose. He could sell his crop to whomever he desired and at a price which he determined. He felt a sense of pride which comes with ownership. He knew the satisfaction which comes from a task well done. He was eager to experiment with the new ideas he had been developing to increase productivity even more. He had spent many evening hours analyzing his present system and working out possible improvements for it. And so, day after day, Sun Fuchin labored in his rice paddies, diligently cultivating his plants and using all his resources finding ways to better his crop. As reward for his efforts, he received the profits from the sale of his rice.

In 1949 destitute Nationalist Chinese forces left mainland China and settled in Taiwan, then known as Formosa. Just sixteen years later in 1965 Formosa declared itself financially sound and no longer in need of U.S. economic aid. Today Taiwan holds the second-highest standard of living in all Asia. These facts are truly glowing tributes to the success of the free enterprise system.

Progress in any society begins with the individual, for a society is made up of individuals. When a government encourages its people to make a profit, by not taxing them above what is needful, by not regulating their businesses beyond what is necessary, that government is encouraging progress. It is only natural for a man to work more diligently, more resourcefully if he sees that work as an opportunity for personal gain and advancement. When individuals in a society progress, that society as a whole will progress, but that progress can begin only when the individual is free.

OIL PRICES—THE FUEL OF INFLATION

Mr. ROBERT C. BYRD. Mr. President, in the last several days we have heard a great deal of talk about fighting inflation. The vote on the reconciliation resolution, and the several amendments which were offered to it, were characterized as the first opportunity to demonstrate our commitment to reducing Government spending and restoring economic growth. As Democrats, there should be no doubt that we support the President's goals and intend to abide by the overall budget cut target outlined in the President's economic recovery program. However, the presumption that big Government is the only cause of inflation is simplistic and shortsighted. One need only look at the latest report of the Consumer Price Index to see the fallacy of that presumption.

The Consumer Price Index rose 1 percent during the month of February. This is an annual rate of 12 percent. Soaring energy prices fueled this rise. Without the energy price increases, the CPI would have risen only three-tenths of 1 percent. Prices for gasoline, fuel oil, and utilities skyrocketed in the wake of President Reagan's decision to accelerate the decontrol of domestic crude oil and gasoline. The cost of gasoline rose by an average of 8.4 cents per gallon and heating oil by about the same amount.

Last week, the March report of the producer price index was released and the story was much the same. Large increases in the prices of petroleum products pushed up the producer price index by 1.3 percent, to an annual rate of 16.8 percent. Outside of the energy area, only a moderate increase was registered.

During the next several months, these higher energy costs will permeate the economy, forcing the cost of food and every manufactured article to rise. All these price increases as reflected in the CPI and the producer price index will, of course, add to the cost of Government. Higher energy prices will, among other things, translate into higher social security and retirement benefits and other indexed Government payments. Those who blame the size of Government for all our economic troubles are really missing the point. Energy prices, which have soared by a staggering 1,200 percent since 1974, have greatly inflated the costs of Government, particularly the "social safety net" programs, and have been one of the most obvious causes of the economic stagnation which now grips our Nation.

There is unquestionably a need to reduce the growth of Government and the size of the Federal budget. But cuts should not be made at the expense of programs designed to free us from our dangerous dependence on insecure sources of foreign oil. The administration is evidently convinced that America can produce its way out of its energy problems—that enough oil and natural gas will be discovered to end our dependence on the Persian Gulf. Based on that assumption, the administration's budget drastically cuts every alternative fuel research and development program and most conservation and strategic planning activities as well. Almost total reliance is placed on the so-called "free market" to develop synthetic fuels. The free market is supposed to equitably distribute gasoline supplies in the event of a severe shortage. Market forces—in other words, high prices—are viewed as the primary motivation for energy conservation.

The administration's reliance on as yet undiscovered sources of domestic oil and natural gas is misplaced and dangerous to our economic and national security. There is no substantiation for the claim that America can produce its way out of this crisis. To the contrary, every credible study indicates that the United States will be lucky to maintain current production levels over the next decade. The more likely scenario is a significant decline in domestic production, requiring continued dependence on OPEC oil. There is no domestic oil solution to the problem of oil imports, which will cost the United States no less than $80 billion this year alone.

Any real hope for achieving energy security rests on other energy sources—coal, oil shale, biomass, alcohol fuels, solar, and other renewables and conservation. Every reasonable effort must be made to substitute alternative energy resources for liquid petroleum products. We cannot assume that individuals and businesses will move quickly enough on their own to meet this need. While realistic energy prices will encourage some conservation and production, it has been the judgment of Democrats and Republicans alike that additional incentives are necessary if the promise of America's abundant energy resources is to be realized in the near term.

The Reagan energy budget would dismantle the comprehensive energy program which was enacted, with overwhelming bipartisan support, by the 95th

and 96th Congresses. Under the administration's proposals, all fossil energy demonstration projects would be terminated at the Department of Energy and would be left to compete for funding by the Synthetic Fuels Corporation—where the administration has delayed naming a new chairman and board of directors. Outlays for fossil energy research, including all coal-related research conducted by the Assistant Secretary for Fossil Energy, would be sharply reduced—by $300 million in fiscal year 1981 and by $1.2 billion in fiscal year 1982. The entire alcohol fuels and biomass program would be eliminated. Solar energy research would be halved. Research into superefficient batteries, which could lead to the production of a practical electric car, would be terminated. Standby oil allocation plans would be withdrawn. Funding for energy-saving measures to be activated by State and local governments in the event of an energy emergency would be terminated. The gasoline rationing apparatus would be discarded, with no program to replace it.

Mr. President, this is not a viable energy program—this is a program for disaster. These cuts, both in energy research and supply and in energy conservation, would have the effect of destroying the national energy policy which was put in place during the last two Congresses. Continued reliance on insecure supplies of imported oil—which is the only policy incorporated in the administration proposals—will jeopardize our national security, constrain the independence of U.S. foreign policy, and throttle economic growth. That should hardly be the result of a sweeping program that is being presented to the Nation as a way to promote economic recovery.

COOLNESS UNDER FIRE

Mr. HARRY F. BYRD, JR. Mr. President, the Richmond Times-Dispatch had an excellent editorial on April 2, 1981. It is captioned "Coolness Under Fire." I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

COOLNESS UNDER FIRE

Passing a test that no president should ever have to undergo, Ronald Reagan has proved that he possesses one of the rarest qualities of leadership: The ability to remain cool and controlled in the face of supreme danger. This, indeed, is a characteristic of heroes, which, in the opinion of millions of Americans, Mr. Reagan will forever remain.

On Monday, President Reagan stared death in the face—and laughed. The courage and wit that he has demonstrated since he was shot constitute one of the most remarkable facets of this tragic, terrifying event. Many men would have been frightened into hysteria by a threat that had drawn not even the tiniest drop of their blood, but not once has the wounded Mr. Reagan lost control of his mind or his emotions.

When he arrived at the hospital Monday afternoon, neither he nor any of the doctors who examined him knew the severity of his wound. There was a bullet inside the president—inside the body of a 70-year-old man—but how much damage it had caused nobody knew. Mr. Reagan might well have been on the threshold of death, but he displayed not the slightest sign of panic.

Instead, he joked. When his wife, Nancy, arrived in the emergency room, he quipped: "Honey, I forgot to duck." Later, as the doctors prepared to operate, he joshingly begged: "Please tell me you're all Republicans." After the operation, the president, silenced by tubes in his mouth, wrote the doctors a note echoing the view of W. C. Fields that "All in all, I'd rather be in Philadelphia." Still later he penned another note informing the doctors and nurses that "Winston Churchill said there is no more exhilarating feeling than being shot without results." And finally, when aide Lyn Nofsiger informed the president Tuesday that the government was functioning normally, Mr. Reagan, whose most important goal is to change the way the government functions, growled good-humoredly: "What makes you think I'd be happy about that?"

Observed The Washington Star editorially about all this:

"But what the Reagan jokes express even more strongly—and significantly—is a leader's coolness in a crisis. They are assertions of cheerful calm in the midst of known disaster and unmeasured danger. Benjamin Franklin, the man who observed that if the signers of the Declaration of Independence did not hang together they were likely to hang separately, would have understood. He would have liked them."

In Washington, members of Congress and journalists are reacting with admiration—if not awe—to the coolness and control that President Reagan has exhibited. Among them the prevailing view is that he will emerge from this tragedy a more revered and more influential leader. We share that belief.

VOTING RIGHTS ACT AMENDMENTS OF 1981—S. 895

Mr. CHAFEE. Mr. President, I am pleased to join as a cosponsor of S. 895, the Voting Rights Act Amendments of 1981.

The Voting Rights Act of 1965 is a crucial piece of civil rights legislation. Its goal is to protect the constitutionally guaranteed voting rights of all our citizens.

The key provisions of this legislation can be divided into two categories: Permanent protections and temporary protections. Among the important permanent protections are a ban on racial discrimination and a ban on literacy tests. The most important temporary protections are requirements for jurisdictions with a history of discriminatory voting practices to "pre-clear" any changes in their election laws with the Department of Justice, and a provision requiring jurisdictions to provide voting assistance in languages other than English to certain minorities.

The Voting Rights Act of 1965 has been reauthorized and updated in 1970 and 1975. The temporary provisions are scheduled to expire next year and are in need of extension.

What would the legislation that we are proposing do? Basically, it would address three issues.

First, it would provide for a 10-year continuation of section 5—the "preclearance" provision—of the Voting Rights Act.

Second, it would amend section 2 of the Voting Rights Act to clear up an uncertainty that has developed regarding ways for proving discrimination. After passage of the Voting Rights Act, a variety of direct and indirect evidence was considered sufficient to prove intent to discriminate. However, in 1980 a Supreme Court opinion confused this situation by implying that direct proof of intent was necessary to prove discrimination. The bill that we are introducing would clarify this situation by reaffirming the old standard that had been used prior to this Supreme Court opinion.

Third, the bill would provide for a 7-year continuation of section 203 of the Voting Rights Act. This change would put the so-called "bilingual" provision on the same expiration timetable as other provisions of the act.

Mr. President, the Voting Rights Act is the most potent mechanism in place for preventing voting discrimination. In the 15 years it has been on the books, over 800 discriminatory changes in election laws have been blocked under the "preclearance" provision. Clearly, there is a need for this legislation to be reauthorized, and I urge my colleagues to give this bill prompt and favorable consideration.

HENRI CARTIER-BRESSON

Mr. LEAHY. Mr. President, recently I was privileged to see a display, put on by the Corcoran Gallery of Art, of a half-century of photographs made by Henri Cartier-Bresson. Cartier-Bresson is, in my estimation, one of the greatest photographers ever, and the exhibit holds 156 photographs from 23 countries selected by him as a personal statement of his 50 years in photography.

The display was arranged by the American Express Foundation and demonstrates not only its commitment to photography as an art form, but also the foresight of the Corcoran Gallery. The Corcoran, its director Peter Marzio and its board deserve the thanks not only of Washington but of the whole country for recognizing that photography is one of the greatest of art forms. Not only have they done this in the past, but their show now in Washington demonstrates that in a way it could not be disputed.

I feel extremely privileged to have been able to view this exhibit, and I feel privileged that it is showing throughout our great country.

Mr. President, I ask unanimous consent that articles regarding the exhibit appearing in the Washington Post and the Washington Star be printed in the RECORD at this point, and I extend my personal thanks to the International Center of Photography in New York, the American Expess Foundation, and the Corcoran Gallery of Art for this rare opportunity.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Apr. 4, 1981]

MOMENTS NOTICED—THE CLASSIC PHOTOGRAPHY OF HENRI CARTIER-BRESSON

(By Paul Richard)

No photographer alive has a more secure position in the history of art than Henri Cartier-Bresson—esthete, man of action, artist and reporter—whose distilled retrospec-

tive goes on view today at the Corcoran Gallery. We see in every image the three interacting masteries that have, for half a century, lent grandeur to his art.

The first is temporal. No photographer has ever been more at ease in the flow of time, or faster on the trigger. A leaping figure floats in air, sun glints from a spectacle—and we know that in the instant before he shot these pictures he managed to foresee what was about to happen. "In photography," he's said, "you've got to be quick, quick, quick, quick. Like an animal and a prey."

But he is also slow. Cartier-Bresson's alacrity is not more awesome than his patience. A magazine assigned him once to photograph the architect Louis Kahn. For this job Cartier-Bresson did not dart, he floated. He hid himself—for days—behind a narrow column among the many drafting boards in Kahn's busy office. "I used to go around the room while he was waiting for me to stop at a certain board," the architect recalled. "And I did stop, too, because the board was occupied by a beautiful Chinese girl, that's why. I went over to the board and I started to draw, and I heard the camera go click-click-click. He was ready, you see; he was waiting for the very moment, but he was setting the stage for it."

Cartier's second mastery is geometrical. His photographs are full of visual rhymes. Look, for instance at the picture he took one rainy day in 1932 behind the Gare Saint-Lazare. It is a picture dense with echoes. The man leaping in air is twinned with his reflection. The posters in the background—of a dancer in midair—and the foreground—barrel-hoops—are as strangely paired.

"How did he catch so quickly the analogy between the running man and the poster," writes Yves Bonnefoy, a friend of the artist. "How, from so many fugitive elements, could he compose a scene as perfect in its details as it is mysterious in its essence? How can one know before seeing and decide before knowing?"

As if in obedience to some psychic choreography, the shapes in Cartier-Bresson's photographs dance with one another. Two pigs stand up in unison in a picture shot in Holland in 1953. Alberto Giacometti strides across a gallery as if in imitation of the statue by his side. This show is full of perfect puns. As William Faulkner stretches, the terrier at his feet performs the same gesture. "The greatest joy for me is geometry," says Cartier-Bresson.

His third mastery is kindness—though his long career has been as full of action, danger and violence as Andre Malraux's.

He photographed the French Resistance during World War II. He was captured by the Germans and was forced to spend three years in a prisoner-of-war camp from which, on his third try, he finally escaped. (The artist, ever since, has valued anonymity. He will not pose for portraits; his Leica's chrome is blackened so that no sudden glint will catch a subject's eye.) In 1949, he covered the Chinese Revolution. When Ghandhi was assassinated in 1948, Cartier-Bresson was present. For years he made his living as a photojournalist, but his most newsy photographs are never headline-harsh. Look, for instance, at his picture of a "Gestapo informer recognized by a woman she has denounced, deportation camp, Dessau, Germany, 1945." One would expect Cartier-Bresson's sympathies to be immediately apparent. But the informer, with her fist clenched, is not read as the enemy. It is the rage of her attacker that makes the viewer cringe. Cartier-Bresson is no propagandist. And endless politesse, a sympathy—for his subjects, and also for the viewer—permeates his art.

How many thousand photographs he's made since 1932 is anybody's guess. Most have been discarded. The 156 included in this show, all chosen by the artist, are those for which Cartier-Bresson hopes to be remembered. Their installation here is not chronological. A picture from the '70s might hang without discomfort beside one made 40 years before.

In its discipline, its graciousness—and above all in its artlessness—the work of Cartier-Bresson seems almost Oriental. Writer Richard Whelan notes that Cartier-Bresson regards Eugen Herrigel's "Zen in the Art of Archery" as "one of the best photography manuals ever written;" "Bow, arrow, goal and ego melt into one another . . . As soon as I take the bow and shoot, everything becomes so clear and straight-forward and ridiculously simple." When Cartier-Bresson insists that photography "doesn't take any brains," the meaning is the same.

Henri Cartier-Bresson is now 73. Though he started as a painter, and nowadays prefers drawing to photography, he has always been an artist. He links Atget to Robert Frank. Through Cartier-Bresson has called himself a "surrealist" photographer, that label does not fit. He's a spiritual photographer.

His exhibit at the Corcoran was organized in New York in 1979 for the International Center of Photography. Its tour is sponsored by the American Express Foundation. It will remain at the Corcoran through May 17.

CARTIER-BRESSON: AN EYE FOR THE DECISIVE MOMENT

(By James Cassell)

"To me," wrote Henri, Cartier-Bresson in 1952, "photography is the simultaneous recognition, in a fraction of a second, of the significance of an event as well as of a precise organization of forms which give that event its proper expression."

Cartier-Bresson is one of the major figures in 20th-century photography. The influence of his theories—as well as the sustaining vigor of his work—is evident in the retrospective exhibition that opened yesterday at the Corcoran Gallery of Art. The 155 photographs, personally selected for the show by the 72-year-old Frenchman, span his travels throughout Europe, the Orient and America over a half a century.

With Bob Capa and David Seymour, Cartier-Bresson founded the famed photo agency, Magnum, in 1947. He was one of the first photographers to use the 35mm camera, making it possible for him to create his lively, so often spontaneous pictures. His book, "The Decisive Moment," was published in 1952, and the photographic theories espoused there are widely accepted today by practitioners and thinkers alike.

To understand the "significance of an event, "one has to have been born with something unusual; and one has to live deeply within oneself. A father's pride and three generations of a family pass before the artist's unimposing camera in the image "Lock at Bougival, France, 1955." The man's strapping body, back to the camera, fills the frame. The story is told by his arms relaxed at his side, his shoulders, and the face of a mother holding her baby. On either side of this "decisive moment" there may be hardships. But the image attests to the joy and courage of being a parent, and to its fulfillment.

It's no mystery how, coupled with the artist's extraordinary awareness, Cartier-Bresson's photography came to possess a graphic vigor, in both peopled and unpeopled scenes. It can be seen in the image of a child walking on his hands before a mountain landscape on a dirt road in Greece, or in the triangle of trees jutting out from the bridge in the misty "Ile de la Cite, Paris." Cartier-Bresson pays his debts to painting openly. He studied painting with the art critic and academician Andre Lhote between 1927 and 1928. Although such diverse influences as the irrationality of Dada can be found in his work, he once said emphatically, "All my training was surrealism."

A knowledge of Cartier-Bresson's roots in fine art does not mean that we should dismiss him as an imitator of painting. What he gained from painting, he saw and knew as present in the everyday world. If he was influenced by surrealism and, just as apparently, by the power and energy of Constructivist expression, he transcended them. What is truly transcendent in his imagery is its moral import.

If the tone of Cartier-Bresson's photography is morally hopeful and uplifting, it is not because he has been a stranger to adversity. As a French soldier, he was taken prisoner in 1940 by the Germans; in 1943, he became active in the MNPGD, an underground movement helping war prisoners and escapees. He photographed the occupation of France and at the close of the war shot "Le retour," a documentary about the homecoming of the prisoners of war and those who had been deported to Germany.

Were it simply a matter of graceful lines and curves, visual whimsy and wit, Cartier-Bresson's photographs would not survive. They survive because they are humane and compassionate: the emotionally beaten faces of Spain in the 1930s; the division of a city and a people along the Berlin wall; the heroic portraits of Jean-Paul Sartre and William Faulkner; a tragic portrait of poet Ezra Pound. There is spiritual hungar in the image of a Parisian man holding the hand of a cardinal to his lips. There is love among children playing in the rubble of a city, or in a couple's embraces.

Cartier-Bresson's view of America is not so gentle. He shows a people who are isolated and wasteful, a people whose advanced technology and "good life" are, at the bottom of it all, spiritual saboteurs. His imagery of America is somewhat akin to the Swiss-born photographer Robert Frank's mournful work. "The Americans," published in the 1950s.

It is a tribute to the French that they not only invented photography, but that they have given us in this century two of the medium's giants: Henri Cartier-Bresson and Eugene Atget. To mention them together is to think at once how dissimilar they are: Atget, the old man, lugging his large camera around Paris in the first quarter of the century; photographing the forgotten streets, the eroding statues and gardens; waiting for everyone to leave a scene, waiting for the right light. And Cartier-Bresson, darting about with his small Leica almost unnoticed, waiting for a gesture or movement, for the "decisive moment." They are fundamentally different, except in their patience and in their recognition of what Oscar Wilde said: "The true mystery of the world is the visible, not the invisible."

The exhibition, accompanied by a book of Cartier-Bresson's photographs published by Robert Delpire, was organized by the International Center of Photography in New York and made possible with the support of the American Express Foundation. It continues at the Corcoran Gallery of Art, 17th and New York Avenue, through May 17.

ORDER FOR STAR PRINT—S. 408

A BILL TO REDUCE TAXES ON AMERICANS WORKING ABROAD

Mr. CHAFEE. Mr. President, on February 5 of this year, I introduced S. 408 to reduce and simplify the taxation of Americans working overseas. This bill will help put American workers back on even ground with their foreign competitors by changing sections 911 and 913 of the Internal Revenue Code.

Because the original printing of S. 408

contained three drafting errors, I ask unanimous consent that the bill be reprinted with the corrections I am now sending to the desk. I also request that the names of the cosponsors be included on this star print: Senators TSONGAS, MATHIAS, ROTH, MATSUNAGA, COCHRAN, LUGAR, BOSCHWITZ, SCHMITT, GRASSLEY, BOREN, and SIMPSON.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, it is important to note that this legislation has a strong bipartisan group of sponsors. It is very similar to a proposal I made last year which was adopted by the Finance Committee, also with bipartisan support.

Our bill includes the following provisions:

An exclusion from U.S. tax for the first $50,000 plus half of the next $50,000 of earned income. The maximum exclusion, therefore, would be $75,000;

An exclusion from U.S. tax for housing allowances or costs which exceed 16⅔ percent of the salary of a GS–14 step 1. In 1981, this would exclude foreign housing costs which exceed $5,785;

A residency requirement reduced to 11 out of any 12 consecutive months. The current residency requirement is 17 out of 18 months and must include a full tax year; and

Repeal of the complex and confusing cost-of-living deductions under section 913 of the code.

Current tax policy affecting Americans who work abroad continues to plague our efforts to increase U.S. exports. It is becoming more widely understood in Congress that our tax laws must be changed if U.S. companies, which employ Americans in their foreign operations, are to remain competitive in the world market. The task of strengthening U.S. export policy and improving the competitive position of U.S. industry is simply not a partisan issue. It is a matter of national interest.

No better explanation of the current problem and no more compelling argument for correcting it has been put forth than by the General Accounting Office in its February 27, 1981, report titled, "American Employment Abroad Discouraged by U.S. Income Tax Laws." For those of my colleagues who have not had a chance to study the GAO findings, I ask unanimous consent that a brief digest of the report be printed in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

EXHIBIT 1

AMERICAN EMPLOYMENT ABROAD DISCOURAGED BY U.S. INCOME TAX LAWS

DIGEST

The competitiveness of U.S. exports in the world market has become a major national concern because of the deficit in the U.S. balance of trade that developed in the 1970s and its implications for real income and employment in the United States. This problem has been the focus of major initiatives to improve Government export promotion programs and to identify and correct Government disincentives to exports.

To adequately promote and service U.S. products and operations in foreign countries, U.S. companies employ a large force of U.S. citizens abroad. There is widespread concern that tax provisions contained in the Foreign Earned Income Act (FEIA) (Public Law 95–615, Title II; Nov. 8, 1978) are proving a disincentive to employment of U.S. citizens abroad, and, therefore, adversely affecting exports.

A GAO survey of a group of major U.S. companies having substantial operations abroad revealed that U.S. taxes were an important factor in reducing the number of Americans employed overseas, because the:

Tax laws do not fully relieve the companies' employees from taxes on income reflecting the excessive costs of living and working abroad.

Companies generally reimburse overseas employees for their additional tax burden, making Americans more costly than citizens of competing countries, who generally are not taxed by their home countries.

Complexity of the new tax laws makes compliance difficult and expensive.

IMPACT ON EMPLOYMENT OF AMERICANS OVERSEAS

The United States is alone among the major industrial countries in taxing foreign-source income on a citizenship basis. It taxes not only base salary but also overseas allowances to the extent they are not offset by deductions provided for in the Foreign Earned Income Act.

Most major U.S. firms that GAO surveyed operate programs to reimburse expatriate employees for the additional tax burdens resulting from their overseas assignments. These programs are usually available to both Americans and third-country nationals.[1] They are generally designed to ensure that the tax liabilities borne by employees do not exceed the home-country taxes on their base salaries.

GAO found that these programs are significantly more expensive for Americans than for third-country nationals, who generally are not taxed by their home countries. For example, a third-country national in Saudi Arabia, where there is no income tax, did not require a tax reimbursement. Americans, on the other hand, paid U.S. taxes substantially in excess of those that would normally apply to their base salaries. The companies provided Americans in Saudi Arabia with tax reimbursements averaging $18,889 for married employees in the $45,000 to $55,000 salary range and $10,558 for unmarried employees in the $25,000 to $45,000 salary range.

The difference between the tax reimbursement payments provided to Americans by the companies and those made to third-country nationals contributed significantly to the relative costliness of Americans. Although it varied from country to country[2] the difference was in all cases substantial, ranging from 24.5 percent of the differential in total compensation to over 100 percent. In the latter cases, the tax reimbursement made U.S. workers more costly even though their other compensation was lower than that of third-country nationals.

This cost differential was reported by the U.S. firms as a major cause of the decrease in their employment of Americans overseas. Further, the relative number of Americans in overseas positions decreased in comparison with third-country nationals from 1976 to 1980.

[1] The third-country nationals included in GAO's survey were citizens of Canada, France, Japan, the United Kingdom, and West Germany.

[2] The host countries included in GAO's survey are Brazil, Hong Kong, Japan, Saudi Arabia, the United Kingdom, and Venezuela.

APPARENT INADEQUACY AND COMPLEXITIES OF THE FOREIGN EARNED INCOME ACT

Congressional intent in passing the FEIA was twofold—to create greater equity between people working abroad and at home and to provide benefits for the U.S. economy by encouraging Americans to work in hardship areas. The first objective was to be achieved through a series of deductions for the excess costs of living overseas and the second through either an additional $5,000 hardship deduction or through a $20,000 exclusion (with no deductions) for individuals in designated hardship area camps. In practice, however, the law:

Falls far short of its goal of providing equity, and

Runs counter to the general goal of simplifying U.S. tax returns.

The FEIA provides a series of deductions for certain excess foreign living costs. In total, the deductions for cost of living, housing, schooling expenses, and home leave transportation do not appear to reduce income earned abroad by the actual costs of these items. Although the schooling and home leave transportation deductions were generally adequate according to data provided by U.S. company officials, the housing and cost of living deductions were often seriously inadequate in reducing income by actual allowances. In addition, the FEIA neglects to consider other costs, the most significant of which is the tax on the tax reimbursement designed to compensate employees for the excess taxes, both U.S. and foreign, that are incurred as a result of working overseas. Tax reimbursements were provided by 95 percent of the firms responding to our questionnaire. The tax reimbursement, while varying according to salary level, host country, and compensation package, often represented more than 30 percent of the individual's base salary.

The apparent inadequacy of the FEIA deductions overall is demonstrated by the large amounts by which an individual's total allowances exceed his FEIA deductions. In six countries, the allowances exceeded the deductions by $29,000 to $53,000 for married individuals and $19,000 to $28,000 for unmarried individuals. These figures represent the extent to which the FEIA does not reduce taxable income related to the excessive costs of living overseas. In practice, major companies protect their employees from such taxation.

GAO found a general consensus that the FEIA is unreasonably complex. Many individuals overseas are unable to prepare their own tax returns and many of the U.S. firms surveyed incur substantial costs for preparation of employee returns. The risk of incorrect preparation of returns is great, and individuals are often forced to seek outside assistance. The average estimated cost of preparing an employee's tax return, according to the companies surveyed, was almost $700 if prepared by the company and more than $1,100 if prepared by an accounting firm.

MATTERS FOR CONSIDERATION BY THE CONGRESS

Taxation of Americans working abroad is part of the continuing conflict among the tax policy objectives of raising revenue, achieving tax equity, simplifying tax returns, and other special aims of public policy, such as promoting U.S. exports and competitiveness abroad. In considering the question of whether, and to what extent, Americans working abroad should be taxed, the Congress must decide what priority should be assigned to each of the conflicting policy objectives.

GAO believes that the Congress should consider placing Americans working abroad on an income tax basis comparable with that of citizens of competitor countries who gener-

ally are not taxed on their foreign earned income, because:

Present U.S. tax provisions are widely regarded as discouraging employment of U.S. citizens abroad.

Present tax provisions have reportedly made Americans relatively more expensive than competing third-country nationals, thereby reducing their share of employment abroad by major U.S. companies.

Americans retained abroad by major companies are generally reimbursed for their higher taxes, adding to the companies' operating costs and making them less competitive.

A number of optional means of taxing Americans abroad have been proposed to the Congress. Two of these—complete exclusion or limited but generous exclusion of foreign earned income for qualifying taxpayers—would establish a basis of taxation comparable with that of competitor countries and, at the same time, would be relatively simple to administer.

Mr. CHAFEE. Finally, Mr. President. I am happy to announce that the Finance Subcommittee on Taxation and Debt Management will be conducting a hearing on our bill later this month, on April 24. We urge all our colleagues to join us in seeking removal of this export disincentive from the Tax Code this year. There is no reason to delay any further.

● Mr. TSONGAS. Mr. President, I am pleased to join with Senator CHAFEE and 10 other colleagues in sponsoring S. 408. This legislation deals with the problem that income earned by Americans abroad is taxed at an excessive level. Under current law, no one wins except our foreign competitors. The losers include U.S. workers, U.S. corporations, and the U.S. Treasury itself.

The United States taxes its citizens working overseas far more heavily than other nations do. The net income of an American managing a major construction project, for example, may well be less than the net income of a European working under his supervision. This inequity results in high turnover of Americans in jobs overseas. In addition, it tends to put workers from other countries in jobs for which Americans are very well qualified. Overtaxation of Americans abroad contributes to unemployment at home.

An American corporation can try to compensate for high taxation by raising salaries for our citizens working abroad. But this is a no-win proposition because it can make the firm too expensive to compete with high powered corporations from Germany, England, France, Japan, and elsewhere. The result is a substantial loss of potential profits for U.S. business. U.S. exports suffer because of this self-inflicted disadvantage.

The Treasury Department has viewed this tax policy with tunnel vision. Its estimation of major tax revenues from the Foreign Earned Income Act of 1978 discounted the cumulative effect of high taxation—reduced job opportunities, higher labor costs, and reduced exports. I believe that the long-term reality is that tax reduction for workers abroad is essential to our economic strength.

This Nation can no longer live in an illusion of economic independence. OPEC has pounded home the message that other nations have major power to affect our lives. Last year we sent over $70 billion to OPEC countries for oil. The international automobile market is another index of new realities that hit close to home. With gas prices now beginning to reflect the world's limited oil supply, American automakers are taking a beating from more fuel-efficient foreign models.

Mr. President, we can try to plug these dollar drains with protectionism, or we can embrace our new role as a world trader in a world economic community and act boldly to improve our competitiveness. I believe the latter is the only real choice. We must begin to insure that U.S. business is not a handicapped competitor abroad. Taxing U.S. citizens abroad more fairly is a step in the right direction, and so I urge my colleagues to join in support of this bill.

Mr. President, on August 20, 1980, Mr. Donald E. Cullivan, president of the International Division of Camp Dresser & McKee Inc., testified on this issue before members of the House Ways and Means Committee. I believe his comments would interest my distinguished colleagues. Mr. President, I ask that the text of his statement be printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

TESTIMONY OF DONALD E. CULLIVAN

Mr. Chairman, my name is Donald Cullivan and I am the president of the International Division of Camp Dresser & McKee Inc. (CDM), the 14th largest consulting engineering firm in the United States. CDM currently employs nearly 1,500 people and our annual revenues are currently about $70 million a year. About 15 percent of our work is done overseas.

Currently I am also the chairman of the International Engineering Committee of the American Consulting Engineers Council which represents over 3,600 U.S. consulting engineering firms. Today, however, I speak to you as the person responsible for my company's overseas work to give you some facts and cases about the adverse effects of sections 911 and 913 of the 1978 tax law as they relate to CDM.

From 1963 to 1970 I lived and worked as an engineer in Brazil, Bangladesh, and Thailand. In those days, with a $25,000 exemption, the extra income resulting from this tax relief was very substantial and represented a significant incentive for an engineer to move his family to a developing country. That incentive no longer exists.

CDM is presently joint venturing with a British firm for a major project in the Middle East. An American employee of CDM is the project manager responsible for this massive project with an estimated construction cost of over a billion dollars. Despite this heavy responsibility, and despite the fact that his salary is the highest of any employee on the project, his take home pay is exceeded by five of the British engineers he is supervising. The reason is because their income is essentially tax free. His situation would be even worse except for the fact that CDM has a tax equalization program to reimburse him for the higher tax he must pay as an overseas employee than he would be paying on the same salary in the United States.

In order to compensate for the loss of tax exemption as an incentive to Americans to go abroad and because we cannot make up the difference from company income and still remain competitive, CDM is forced to turn to recruitment of non-Americans for its projects. Prior to the 1976 Tax Reform Act, from 10 to 15 percent of our overseas employees were third country nationals (TCN's), people who are neither citizens of the United States, nor of the country in which we are working. Currently this rate is nearly 40 percent.

The Treasury Department has made a strong case that it cannot grant tax exemption to U.S. citizens abroad because the United States needs this revenue. Even if tax relief is not granted, this revenue is going to disappear or greatly diminish in the future. The reason is that, without tax relief, the Americans will continue to come home and the use of TCN's will increase:

Last year, our full-time U.S. overseas employees paid about $220,000 in U.S. income taxes.

If our use of TCN's had remained at only 15 percent instead of increasing to 40 percent, Treasury would have received $330,000.

This tax revenue will shrink to about $100,000 if our use of TCN's increases to 70 percent, which is certainly the direction in which we are presently heading. (And where will the jobs come from for those returning Americans?)

We are often asked for specifics about how much business we have lost because of the change in the laws on taxation of Americans abroad. In the past 3 years we lost out on competition for 4 major projects with fees in excess of $10 million. Our tax structure is the primary reason. The British can field people of equivalent skill at nearly one-third less cost. Remember that, for engineering projects, salary costs account for the greatest part of the cost of doing the work. Small wonder, then, that British engineering firms have increased their overseas revenues by nearly 50 percent over the past 3 years.

Last year we paid $46,000 to 24 long-term employees for tax equalization and additional funds to our tax consultants to implement the program. We have also borne the cost of assisting our people in completing their tax returns, which are extremely complicated under the present laws.

The losses we can measure are bad enough but foreign clients have told me we were not invited to compete because our tax laws make U.S. firms too expensive. We cannot tell how much business we may be losing because of such views.

In 1979 my company accounted for slightly over 1 percent of the estimated $813 million earned overseas by U.S. design firms. So multiply these problems and losses by 100 and you have some idea of how the U.S. engineering firms are doing under the present tax laws.

Then remember that engineering work accounts for only 2 to 10 percent of the total cost of the project and you start to get some idea of the ripple effect on U.S. contractors and equipment manufacturers. It is not surprising, therefore, that Chase-Econometrics estimates a $6 billion loss in Federal taxes in 1980 as a result of a drop in exports because of our overseas tax laws.●

● Mr. ROTH. Mr. President, I rise in support of this legislation, which amends the tax code to reduce substantially the burden on our American businessmen stationed overseas. At present our tax provisions make it prohibitively expensive for U.S. citizens to live and work in foreign countries. As a result, they are returning home at a time when we desperately need for them to remain in the field, selling U.S. goods and services to foreign buyers.

American businessmen stationed in foreign countries are our ambassadors for business matters. They are our foreign representatives, and, like our diplomatic corps, should be afforded tax exemptions on the higher costs of living overseas.

Our overseas businessmen are on the cutting edge, seeking out new markets,

new sales possibilities for U.S. products and new contracts. Yet our tax system makes it more economical for them to return to the United States than to continue to represent U.S. firms and U.S. products abroad. When Americans return home—and studies suggest that as much as 30 percent of our overseas work force already has—exports drop. They fall not only in the initial plant and equipment, but also in the replacement and spare parts that accompany any contract.

We must turn this situation around if we are going to expand overseas sales, increase our international competitiveness and provide jobs for more Americans at home.

The bill introduced today by my colleague, Senator CHAFEE, is an important step in the right direction. By allowing U.S. nationals to exclude from taxation up to $75,000 of their earned income, this legislation will encourage them to remain overseas and promote the sale of U.S. products. I believe, however, we could go even further in this area to bring the United States on par with our trading partners who do not saddle their overseas representatives with huge tax burdens.

The United States must now do all in its power to stem our growing economic crisis by improving our trade performance worldwide.

We, in government, can take an important step toward achieving this goal by creating a climate for our exporters which allows them to trade as freely as possible. By revising our tax laws to curtail the undue and disproportionate taxation of our citizens residing abroad, we can go a long way toward reversing the declines in our overseas selling capability.●

MESSAGES FROM THE HOUSE

At 11:40 a.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House has passed the following bill, with an amendment, in which it requests the concurrence of the Senate:

S. 840. An act to continue in effect any authority provided under the Department of Justice Appropriation Authorization Act, Fiscal Year 1980, for a certain period.

The message also announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 2884. An act to provide for the distribution within the United States of the International Communication Agency film entitled "In Their Own Words."

The message further announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 55. Concurrent resolution expressing the sense of the Congress with respect to implementing the objectives of the International Year of Disabled Persons (1981).

ENROLLED JOINT RESOLUTION SIGNED

At 2:15 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the Speaker has signed the following enrolled joint resolution:

S.J. Res. 61. Joint resolution to authorize and request the President to issue a proclamation designating April 9, 1981, as "African Refugee Relief Day"

The joint resolution was subsequently signed by the President pro tempore (Mr. THURMOND).

At 3:20 p.m., a message from the House of Representatives delivered by Mr. Gregory, announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 50. Concurrent resolution expressing the sense of the Congress that the Soviet Union should provide proper medical care for Viktor Brailovsky and permit him and his family to emigrate to Israel, urging the President to protest the continued suppression of human rights in the Soviet Union, and for other purposes.

ENROLLED BILL SIGNED

At 4:28 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the Speaker has signed the following enrolled bill:

S. 840. An act to continue in effect any authority provided under the Department of Justice Appropriation Authorization Act, Fiscal Year 1980, for a certain period.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

At 5:30 p.m., a message from the House of Representatives delivered by Mr. Gregory, announced that the House has agreed to the following concurrent resolution:

S. Con. Res. 17. Concurrent resolution provides for an adjournment of the Congress from April 10, 1981 to April 27, 1981.

At 5:45 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the House disagrees to the amendment of the Senate to the bill (H.R. 31) to amend the Truth in Lending Act to encourage cash discounts, and for other purposes; asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. ST GERMAIN, Mr. ANNUNZIO, Mr. GONZALEZ, Mr. MINISH, Mr. STANTON of Ohio, Mr. EVANS of Delaware, and Mr. WYLIE as managers of the conference on the part of the House solely for the consideration of all provisions of the Senate amendment except section 303, and modifications thereof committed to conference; and Mr. DINGELL, Mr. WAXMAN, Mr. SCHEUER, Mr. BROYHILL, and Mr. MADIGAN as managers of the conference on the part of the House solely for the consideration of section 303 of the Senate amendment and modifications thereof committed to conference.

HOUSE BILL REFERRED

The following bill was read twice by unanimous consent and referred as indicated:

H.R. 2884. An act to provide for the distribution within the United States of the International Communication Agency film entitled "In Their Own Words"; to the Committee on Foreign Relations.

HOUSE CONCURRENT RESOLUTIONS REFERRED

The following concurrent resolutions were read and referred as indicated:

H. Con. Res. 50. Concurrent resolution expressing the sense of the Congress that the Soviet Union should provide proper medical care for Viktor Brailovsky and permit him and his family to emigrate to Israel, urging the President to protest the continued suppression of human rights in the Soviet Union, and for other purposes; to the Committee on Foreign Relations.

H. Con. Res. 55. Concurrent resolution expressing the sense of the Congress with respect to implementing the objectives of the International Year of Disabled Persons (1981); to the Committee on Labor and Human Resources.

ENROLLED BILL AND JOINT RESOLUTION PRESENTED

The Secretary reported that on today he had presented to the President of the United States the following enrolled bill and joint resolution:

S. 840. An act to continue in effect any authority provided under the Department of Justice Appropriation Authorization Act, Fiscal Year 1980, for a certain period.

S.J. Res. 61. Joint resolution to authorize and request the President to issue a proclamation designating April 9, 1981, as "African Refugee Day".

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–888. A communication from the Executive Associate Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a report that the appropriations to the United States Secret Service has been apportioned on a basis indicating a need for a supplemental estimate of appropriation; to the Committee on Appropriations.

EC–889. A communication from the Executive Associate Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a report that an appropriation for the Department of Justice has been apportioned on a basis indicating a necessity for a supplemental estimate of appropriation; to the Committee on Appropriations.

EC–890. A communication from the Acting General Counsel of the General Accounting Office, transmitting, pursuant to law, a report on the status of budget authority that was proposed for rescission, but for which Congress failed to pass a rescission bill; to the Committee on Appropriations.

EC–891. A communication from the Military Executive of the Reserve Forces Policy Board, Office of the Secretary of Defense, transmitting, pursuant to law, the annual report of the Board for fiscal year 1980 and the report on Readiness Assessment of the Reserve Components, Fiscal Year 1980; to the Committee on Armed Services.

EC–892. A communication from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting, pursuant to law, a report on 12 construction projects to be undertaken by the Army Na-

tional Guard; to the Committee on Armed Services.

EC–893. A communication from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting, pursuant to law, a report on 5 construction projects to be undertaken by the Army Reserve; to the Committee on Armed Services.

EC–894. A communication from the Secretary of the Interior, transmitting a draft of proposed legislation to amend the Land and Water Conservation Fund Act of 1965, as amended, and for other purposes; to the Committee on Energy and Natural Resources.

EC–895. A communication from the Secretary of Transportation, transmitting, pursuant to law, the second annual report of the administration of the Offshore Oil Pollution Compensation Fund; to the Committee on Energy and Natural Resources.

EC–896. A communication from the Acting Administrator, General Service Administration, transmitting, pursuant to law, a prospectus for alterations at the Federal Center, Alameda, California, in the amount of $1,722,000; to the Committee on Environment and Public Works.

EC–897. A communication from the Acting Administrator, Environmental Protection Agency, transmitting a draft of proposed legislation to extend the Toxic Substances Control Act for two years; to the Committee on Environment and Public Works.

EC–898. A communication from the Chairman, Nuclear Regulatory Commission, transmitting a draft of proposed legislation to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes; to the Committee on Environment and Public Works.

EC–899. A communication from the Secretary of State, transmitting a draft of proposed legislation to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize development and security assistance programs for fiscal year 1982, and for other purposes; to the Committee on Foreign Relations.

EC–900. A communication from the Acting Director, U.S. Army Control and Disarmament Agency, transmitting a draft of proposed legislation to authorize appropriations under the Arms Control and Disarmament Act, and for other purposes; to the Committee on Foreign Relations.

EC–901. A communication from the Assistant Secretary for Congressional Relations, Department of State, transmitting, pursuant to law, an agreement between the Coordination Council for North American Affairs and the American Institute in Taiwan; to the Committee on Foreign Relations.

EC–902. A communication from the Chairman, National Credit Union Administration Board, National Credit Union Administration, transmitting, pursuant to law, a report on the administration of the Government in the Sunshine Act; to the Committee on Governmental Affairs.

EC–903. A communication from the General Counsel, Securities and Exchange Commission, transmitting, pursuant to law, a report on a new system of records; to the Committee on Governmental Affairs.

EC–904. A communication from the Secretary of Labor, transmitting, pursuant to law, a report on the administration of the Freedom of Information Act; to the Committee on the Judiciary.

EC–905. A communication from the Comptroller General, transmitting, pursuant to law, a report entitled "Number Of Undocumented Aliens Residing In The United States Unknown"; to the Committee on the Judiciary.

EC–906. A communication from the Acting Director of the Agency for Volunteer Service, transmitting, a draft of proposed legislation to authorize appropriations for programs under the Domestic Volunteer Service Act of 1973, and for other purposes; to the Committee on Labor and Human Resources.

EC–907. A communication from the Chairman of the Consolidated Rail Corporation, transmitting, pursuant to law, an analysis of the effects upon the corporation and its employees of alternative changes in labor agreements and related operational changes; to the Committee on Labor and Human Resources.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session, the following executive reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary:

Rudolph W. Giuliani, of New York, to be Associate Attorney General.

By Mr. ROTH, from the Committee on Governmental Affairs:

Henry F. Greene, of the District of Columbia, to be an associate justice of the Superior Court of the District of Columbia.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. THURMOND (for himself and Mr. ZORINSKY):

S. 907. A bill to amend section 351 of chapter 18 of title 18, United States Code, to include Cabinet officers, and for other purposes; to the Committee on the Judiciary.

S. 908. A bill to amend the District of Columbia Code to provide for the imposition of the sentence of death in certain cases and to establish a rational criteria for the imposition of such sentence, and for other purposes; to the Committee on Governmental Affairs.

S. 909. A bill to amend section 924 of the Gun Control Act of 1968 to provide for the imposition of mandatory minimum sentence for the use of a firearm to commit any felony or carries a firearm during the commission of any felony, and for other purposes; to the Committee on the Judiciary.

By Mr. McCLURE (by request):

S. 910. A bill to amend the Land and Water Conservation Fund Act of 1965, as amended, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. SIMPSON:

S. 911. A bill to amend section 562 of title 38, United States Code, to authorize the payment of a special pension to the surviving spouses of persons awarded the Medal of Honor; to the Committee on Veterans' Affairs.

By Mr. SIMPSON (by request):

S. 912. A bill to amend the Atomic Energy Act to clarify that no prior public hearing is required for applications for amendment which involve no significant hazards consideration and for other purposes; to the Committee on Environment and Public Works.

S. 913. A bill to amend the Atomic Energy Act of 1954, as amended, to authorize the Commission, upon determination that such action is necessary in the public interest, to issue an interim operating license authorizing fuel loading, low-power operation and testing of a nuclear power reactor in advance of the conduct of a hearing; to the Committee on Environment and Public Works.

S. 914. A bill to amend section 38, United States Code, to authorize the Administrator to make contributions for construction projects on land adjacent to national cemeteries in order to facilitate safe ingress or egress; to the Committee on Veterans' Affairs.

S. 915. A bill to amend section 38, United States Code, to authorize the Administrator to provide a memorial plaque or marker in appropriate situations to the next of kin of an individual who would otherwise be memorialized in a national, private or local cemetery; to the Committee on Veterans' Affairs.

S. 916. A bill to amend title 38, United States Code, to eliminate provision of outpatient dental treatment for service-connected non-compensable dental conditions which are unrelated to service trauma or prisoner of war status; to the Committee on Veterans' Affairs.

S. 917. A bill to amend section 38, United States Code, to increase the rates of disability compensation for disabled veterans; to increase the rates of dependency and indemnity compensation for their surviving spouses and children; and for other purposes; to the Committee on Veterans' Affairs.

S. 918. A bill to amend title 28, United States Code, to terminate the authority for the pursuit of flight training programs by veterans and for the pursuit of correspondence training by veterans, spouses, and surviving spouses, and for other purposes; to the Committee on Veterans' Affairs.

S. 919. A bill to limit payment of special pay authorized eligible Veterans' Administration physicians and dentists under section 4118, title 38, United States Code, and for other purposes; to the Committee on Veterans' Affairs.

S. 920. A bill to amend title 38, United States Code, to revise and clarify eligibility for reimbursement of expenses, of travel for Veteran's Administration health care, and for other purposes; to the Committee on Veterans' Affairs.

S. 921. A bill to amend title 38, United States Code, to extend authority to provide contract hospital care and medical services in Puerto Rico and the Virgin Islands, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. BOREN (for himself, Mr. CHILES, Mr. HATCH, Mr. HELMS, and Mr. TOWER):

S. 922. A bill to amend the Farm Labor Contractor Registration Act of 1963, as amended, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. BIDEN (for himself and Mr. MATHIAS):

S. 923. A bill to amend chapter 207 of title 18, United States Code, relating to pretrial services; to the Committee on the Judiciary.

By Mr. METZENBAUM:

S. 924. A bill to amend title XVIII of the Social Security Act to provide medicare coverage for influenza vaccine and its administration; to the Committee on Finance.

By Mr. INOUYE:

S. 925. A bill to transfer the National Institute of Mental Health to the National Institutes of Health; to the Committee on Labor and Human Resources.

By Mr. CANNON (by request):

S. 926. A bill to amend subtitle IV of title 49, United States Code, to provide for more effective regulation of motor carriers of passengers, and for other purposes; to the Committee on Commerce, Science, and Transportation.

S. 927. A bill to amend subtitle IV of title 49, United States Code, to provide for more effective regulation of motor carriers of pas-

sengers; to the Committee on Commerce, Science, and Transportation.

By Mr. STAFFORD:

S. 928. A bill to amend the Elementary and Secondary Education Act of 1965 to provide comprehensive elementary school guidance and counseling programs for elementary students through States and local educational agencies; to the Committee on Labor and Human Resources.

By Mr. GOLDWATER (for himself, Mr. PACKWOOD, Mr. SCHMITT, Mr. PRESSLER, Mr. STEVENS, Mr. CANNON, Mr. HOLLINGS, and Mr. INOUYE):

S. 929. A bill to amend the Communications Act of 1934 to provide for improved administration of the Amateur Radio Service and Private Land Mobile and Fixed Services by the Federal Communications Commission, to address the problem of radio-frequency interference to certain electronic equipment, to permit volunteer assistance to the Federal Communications Commission in the area of Examinations, Licensing, and Enforcement in the Amateur Radio Service, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. HAYAKAWA:

S. 930. A bill to amend the Immigration and Nationality Act to establish a program providing for the issuance of visas to nationals of Mexico seeking temporary employment in the United States; to the Committee on the Judiciary.

By Mr. BAUCUS:

S. 931. A bill to restore fair and effective enforcement of the antitrust laws; to the Committee on the Judiciary.

S. 932. A bill to amend title 18 of the United States Code in order to promote the effective investigation and prosecution of livestock fraud; to the Committee on the Judiciary.

By Mr. ABDNOR (for himself and Mr. PRESSLER):

S. 933. A bill to authorize rehabilitation of the Belle Fourche Irrigation Project, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. INOUYE:

S. 934. A bill for the relief of Mr. and Mrs. Faalili Afele; to the Committee on the Judiciary.

By Mr. GARN:

S. 935. A bill to dissolve the National Consumer Cooperative Bank, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. ROTH (for himself, Mr. BENTSEN, and Mr. KASTEN):

S. 936. A bill entitled the "Savings Expansion Act of 1981"; to the Committee on Finance.

By Mr. STENNIS:

S. 937. A bill for the relief of Borislav Subotic; to the Committee on the Judiciary.

By Mr. ROTH:

S. 938. A bill to amend section 304 of the Congressional Budget and Impoundment Control Act of 1974 to require a two-thirds vote for the adoption of any concurrent resolution on the budget for a fiscal year which revises the concurrent resolution on the budget most recently agreed to for such fiscal year if the appropriate level of total budget authority or total budget outlays or the recommended level of Federal revenues set forth in the concurrent resolution on the budget making such revisions exceeds the appropriate level of total budget authority or total budget outlays or the recommended level of Federal revenues, as the case may be, set forth in the first concurrent resolution on the budget for such fiscal year; to the Committee on the Budget and the Committee on Governmental Affairs, jointly, pursuant to the order of August 4, 1977.

By Mr. EAGLETON (for himself, Mr. BIDEN, Mr. CRANSTON, Mr. DANFORTH, Mr. KENNEDY, Mr. MATHIAS, Mr. METZENBAUM, Mr. RANDOLPH, Mr. RIEGLE, Mr. WEICKER, and Mr. WILLIAMS):

S. 939. A bill to authorize appropriations for the Legal Services Corporation for fiscal years 1982, 1983, and 1984, and to encourage the use of private attorneys in the provision of legal services under that act, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. THURMOND (for himself and Mr. HOLLINGS):

S. 940. A bill to encourage corporations to donate certain historical film to educational organizations by increasing the limit on the charitable contribution deduction of such corporations; to the Committee on Finance.

By Mr. THURMOND (for himself, Mr. GOLDWATER, Mr. CANNON, and Mr. HEINZ):

S. 941. A bill to authorize the construction and maintenance of the General Draza Mihailovich Monument in Washington, D.C., in recognition of the role he played in saving the lives of approximately 500 U.S. airmen in Yugoslavia during World War II; to the Committee on Rules and Administration.

By Mr. JACKSON:

S. 942. A bill for the relief of Asha; to the Committee on the Judiciary.

By Mr. HELMS (by request):

S. 943. A bill to provide price support and production adjustment incentives for farmers in order to assure the availability of an abundance of food and fiber, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

S. 944. A bill to increase the interest rates for loans made or insured under the Consolidated Farm and Rural Development Act for water and waste disposal, and essential community facilities; to the Committee on Agriculture.

S. 945. A bill to amend the Consolidated Farm and Rural Development Act and the Small Business Act; to the Committee on Agriculture, Nutrition, and Forestry and the Committee on Small Business, jointly, pursuant to the order of March 31, 1981.

S. 946. A bill to improve the effectiveness and reduce the cost of programs under the National School Lunch and the Child Nutrition Act of 1966; to the Committee on Agriculture, Nutrition, and Forestry.

S. 947. A bill to amend section 110(b) of the Agricultural Act of 1949 to eliminate the requirement that the Secretary of Agriculture waive interest on loans made on 1980 and 1981 crops of wheat and feed grains in the farmer-held grain reserve program; to the Committee on Agriculture, Nutrition, and Forestry.

S. 948. A bill to recover costs associated with cotton classing and standards, tobacco inspection and standards, and warehouse examination, inspection and licensing, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

S. 949. A bill to amend the United States Grain Standards Act to require that fees charged for official inspection and weighing services cover costs to the Federal Grain Inspection Service including administrative and supervisory costs, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

S. 950. A bill to amend the Rural Electrification Act of 1936 to remove provision for the special 2 percent interest rate for insured loans; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. THURMOND (for himself and Mr. BIDEN) (by request):

S. 951. A bill to authorize appropriations for the purpose of carrying out the activities of the Department of Justice for fiscal year 1982, and for other purposes; to the Committee on the Judiciary.

By Mr. PRESSLER:

S. 952. A bill to simplify the program of grants to the States for vocational education and for other purposes; to the Committee on Labor and Human Resources.

By Mr. HELMS (for himself and Mr. EAST):

S.J. Res. 63. Joint resolution proposing an amendment to the Constitution requiring a balanced Federal Budget; to the Committee on the Judiciary.

By Mr. SIMPSON (for himself, Mr. THURMOND, Mr. STAFFORD, Mr. KASTEN, Mr. DENTON, Mr. MURKOWSKI, Mr. SPECTER, Mr. CRANSTON, Mr. RANDOLPH, Mr. MATSUNAGA, Mr. DECONCINI, and Mr. MITCHELL):

S.J. Res. 64. Joint resolution designating August 13, 1981, as "National Blinded Veterans Recognition Day"; to the Committee on the Judiciary.

By Mr. PELL (for himself, Mr. SARBANES, Mr. BAUCUS, Mr. WILLIAMS, Mr. GOLDWATER, Mr. SPECTER, Mr. TSONGAS, Mr. MOYNIHAN, Mr. LEVIN, Mr. RIEGLE, Mr. ZORINSKY, Mr. HAYAKAWA, Mr. INOUYE, Mr. BRADLEY, Mr. METZENBAUM, Mr. BOREN, Mr. EAGLETON, Mr. HUDDLESTON, Mr. DANFORTH, Mr. HOLLINGS, Mr. DURENBERGER, Mr. DODD, Mr. JACKSON, Mr. HART, Mr. NUNN, Mr. PRYOR, Mr. HEFLIN, Mr. MATHIAS, Mr. MATSUNAGA, Mr. BENTSEN, Mr. CRANSTON, Mr. CANNON, Mr. DECONCINI, Mr. BIDEN, Mr. ARMSTRONG, Mr. CHILES, Mr. EXON, Mr. COHEN, Mr. GLENN, Mr. BOSCHWITZ, Mr. ROTH, Mr. WALLOP, and Mr. LEAHY):

S.J. Res. 65. Joint resolution proclaiming Raoul Wallenberg to be an honorary citizen of the United States, and requesting the President to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom; to the Committee on the Judiciary and the Committee on Foreign Relations, jointly, by unanimous consent.

By Mr. PRYOR:

S.J. Res. 66. Joint resolution designating May 6, 1981, as "National Nursing Home Residents Day"; to the Committee on the Judiciary.

By Mr. INOUYE:

S.J. Res. 67. Joint resolution to establish "National Nurse-Midwifery Week"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. THURMOND (for himself and Mr. ZORINSKY):

S. 907. A bill to amend section 351 of chapter 18 of title 18, United States Code, to include Cabinet officers, and for other purposes; to the Committee on the Judiciary.

S. 908. A bill to amend the District of Columbia Code to provide for the imposition of the sentence of death in certain cases and to establish a rational criteria for the imposition of such sentence, and for other purposes; to the Committee on Governmental Affairs.

S. 909. A bill to amend section 924 of the Gun Control Act of 1968 to provide for the imposition of mandatory minimum sentence for the use of a firearm to commit any felony or carries a firearm during the commission of any felony, and for other purposes; to the Committee on the Judiciary.

(The remarks of Mr. THURMOND on this legislation appear earlier in today's RECORD.)

By Mr. McCLURE (by request):

S. 910. A bill to amend the Land and Water Conservation Fund Act of 1965, as amended, and for other purposes; to the Committee on Energy and Natural Resources.

AMENDMENT OF LAND AND WATER CONSERVATION FUND ACT OF 1965

● Mr. McCLURE. Mr. President, at the request of the administration, I send to the desk for appropriate reference a bill to amend the Land and Water Conservation Fund Act of 1965, as amended, and for other purposes.

Mr. President, this draft legislation was submitted and recommended by the Department of the Interior, and I ask unanimous consent that the bill and the executive communication which accompanied the proposal from the Secretary be printed in the RECORD.

There being no objection, the bill and communication were ordered to be printed in the RECORD, as follows:

S. 910

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Land and Water Conservation Fund Act of 1965 (78 Stat. 897), as amended (16 U.S.C. 460 1–4 through 460 1–11), is further amended by inserting the following new paragraph after paragraph (3) in subsection 7(a):

"(4) For the restoration and improvement of units of the National Park System, the National Forest System, the National Wildlife Refuge System, and authorized areas administered by the Bureau of Land Management including construction and rehabilitation of physical facilities within such units or areas; however, no funds are authorized for direct operations of any such unit or area."

U.S. DEPARTMENT OF THE INTERIOR,
Washington, D.C., April 2, 1981.

Hon. GEORGE BUSH,
President of the U.S. Senate,
Washington, D.C.

DEAR MR. PRESIDENT: There is enclosed a draft bill, "To amend the Land and Water Conservation Fund Act of 1965, as amended, and for other purposes."

We recommend that the bill be referred to the appropriate committee for consideration, and that it be enacted.

The draft bill amends section 7(a) of the Land and Water Conservation Fund Act of 1965 (78 Stat. 897), as amended (16 U.S.C. 460 1–4 through 460 1–11), to include among the purposes for which moneys may be appropriated and allocated from the Land and Water Conservation Fund, the restoration and improvement of units of the National Park System, the National Forest System and the National Wildlife Refuge System, and authorized areas of the Bureau of Land Management.

Currently, appropriations from the Land and Water Conservation Fund for Federal purposes may be allocated only for land acquisition in the National Park System, certain units of the National Forest System, certain areas administered by the Fish and Wildlife Service, including areas to be acquired for the protection of endangered and threatened species, certain areas administered by the Bureau of Land Management and, in addition, for payment into the Treasury as partial offset for capital costs of recreation and fish and wildlife enhancement at water development projects. Recently we have experienced a period of expanded Federal acquisition funded from the Land and Water Conservation Fund. This Administration believes that the Federal government must reorient its priorities to protect and manage better the lands already acquired. Accordingly, we have recommended for fiscal year 1982 a decreased emphasis on land acquisition and an increased emphasis on restoration rehabilitation and capital improvements which will enhance the experience of visitors to the National Park System.

Enactment of the enclosed draft bill would authorize appropriations from the Fund to augment regular appropriations for the four Federal land managing agencies. The first use of this authorization would be to begin a long-range program in the National Park System to (1) correct health and safety deficiencies in the parks, by upgrading sewage and drinking water systems, and inadequate roads and bridges; (2) correct threats to natural and cultural resources; and (3) improve the repair and maintenance of support facilities in the parks.

The Office of Management and Budget has advised that enactment of the enclosed draft bill is in accord with the program of the President.

Sincerely,

JAMES G. WATT,
Secretary.●

By Mr. SIMPSON:

S. 911. A bill to amend section 562 of title 38, United States Code, to authorize the payment of a special pension to the surviving spouses of persons awarded the Medal of Honor; to the Committee on Veterans' Affairs.

(The remarks of Mr. SIMPSON on this legislation appear earlier in today's RECORD.)

By Mr. SIMPSON (by request):

S. 912. A bill to amend the Atomic Energy Act to clarify that no prior public hearing is required for applications for amendment which involve no significant hazards consideration and for other purposes; to the Committee on Environment and Public Works.

S. 913. A bill to amend the Atomic Energy Act of 1954, as amended, to authorize the Commission, upon determination that such action is necessary in the public interest, to issue an interim operating license authorizing fuel loading, low-power operation and testing of a nuclear power reactor in advance of the conduct of a hearing; to the Committee on Environment and Public Works.

(The remarks of Mr. SIMPSON on this legislation appear earlier in today's RECORD.)

By Mr. BOREN (for himself, Mr. CHILES, Mr. HATCH, Mr. HELMS, and Mr. TOWER):

S. 922. A bill to amend the Farm Labor Contractor Registration Act of 1963, as amended, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

FARM LABOR CONTRACTOR REGISTRATION ACT AMENDMENTS OF 1981

● Mr. BOREN. Mr. President, today I am introducing legislation on behalf of Senators CHILES, HATCH, HELMS, TOWER, and myself to provide for the proper administration and enforcement of the Farm Labor Contractor Registration Act. This legislation is similar to S. 2875 which I introduced last year and twice was passed by the Senate. It is also similar to legislation introduced last year in the House by Representative LEON PANETTA of California which gained some 160 cosponsors.

Mr. President, the Farm Labor Contractor Registration Act is a problem that must be resolved. The act was originally passed by Congress to protect migrant farmworkers from being exploited and abused by irresponsible crew leaders, acting as independent agents between these workers and agricultural employers. Under the act, crew leaders are required to register as farm labor contractors, be fingerprinted, disclose their salaries, post signs indicating the wages paid employees, give employees in writing the terms and conditions of employment, pass a special medical exam to operate a motor vehicle used to transport migrant farmworkers, and comply with numerous other requirements. The act also prohibits farm labor contractors from knowingly hiring illegal aliens.

Specifically exempt from these requirements are farmers, ranchers, and other agricultural employers, including their employees, who meet certain requirements. Unfortunately, despite these exemptions, farmers, ranchers, and other agricultural employers, including their employees, have been required by the Department of Labor to register as farm labor contractors or be subject to civil and possibly criminal penalties. The result has been another laver of unnecessary Government regulation and misdirection of the Department's limited resources.

One of the problems has been that the present language in the act is somewhat vague and ambiguous, which can and has resulted in gross misinterpretation. For example, the Department has interpreted the term "migrant worker" to mean anyone employed in agriculture. By this definition even members of the farm family could be considered migrant workers. Clearly, this is not what Congress intended. In fact, according to the U.S. Department of Agriculture, migrant farmworkers represent less than 10 percent of the hired agricultural work force.

The legislation, which I am introducing today, serves to clarify the meaning of this provision, as well as other provisions in the act, to insure its proper administration and enforcement. By doing so, it eliminates unnecessary and often overlapping regulations for farmers, ranchers, and other agricultural employers, including their employees. At the same time, it increases protections for migrant farmworkers by targeting the Department of Labor's enforcement so as to require independent farm labor contractors to register and comply fully with the law. Further, it carefully preserves those protections which are now provided under separate statute, including the Fair Labor Standards Act, Occupational Safety and Health Act, and similar labor laws which apply to agriculture.

Mr. President, I am pleased to say that every major farm organization has endorsed this legislation. I believe there is broad bipartisan support within the Congress and I hope that my colleagues will join with me in sponsoring this much needed legislation. I ask unanimous consent that a copy of the bill and a brief summary of its provisions be inserted after my remarks.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 922

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Farm Labor Contractor Registration Act Amendments of 1981".

SEC. 2. Section 3(b)(2) of the Farm Labor Contractor Registration Act of 1963, as amended (7 U.S.C. 2042(b)(2)), is amended to read as follows:

"(2) any farmer, processor, canner, ginner, packing shed operator, nurseryman, or any other person engaged in agricultural production or processing, who engages in such activity for the purpose of supplying migrant workers for agricultural employment for such person's own operation;".

SEC. 3. Section 3(b)(3) of such Act is amended to read as follows:

"(3) any bona fide employee of any person referred to in (1) or (2) above who engages in such activity for his or her employer;".

SEC. 4. Section 3(b)(10) of such Act is amended to read as follows:

"(10) Any person who would be required to register solely because the person is engaged in any such activity solely for the purpose of supplying full-time students or other persons whose prinicpal occupation is not farm work to detassel, rogue or otherwise handle seed for planting purposes and to engage in other incidental farm work: *Provided,* That such students or other persons are not required by the circumstances of such activity to be away from their permanent place of residence overnight. *Provided further,* That such students or other persons, if under 18 years of age, are not engaged in providing transportation in vehicles caused to be operated by the contractor.".

SEC. 5. (a) Section 3(b) of such Act is amended by—

(1) striking "or" after paragraph (9);

(2) striking the period after paragraph (10) and substituting "; or"; and

(3) inserting the following after paragraph (10):

"(11) any bona fide nonprofit or cooperative association of farmers, growers, or ranchers, duly incorporated and qualified under the nonprofit association or farmer cooperative statutes of a State, which is operated solely for the mutual benefit of the members thereof; and any bona fide employee of such association or cooperative who engages in such activity for his or her employer.".

(b) Section 14 of such Act is amended by adding the following new sentence at the end thereof: "The Secretary may require any association described in section 3(b)(11) formed after January 1, 1981 to register under the Act if it has not been established solely to evade the purposes of this Act.".

SEC. 6. Section 3 of such Act is amended by adding new subsections (h) and (i) to read as follows:

"(h) The term 'for such person's own operation' refers to the operations of a person as a farmer, processor, canner, ginner, packing shed operator, nurseryman, or any other person engaged in agricultural production or processing, and includes all activities by such person or such person's bona fide employees with respect to the agricultural or horticultural commodities which are or will be the subject of or diverted from such operations, and regardless of whether any other person has title to such commodities or directly benefits from such operations or activities.

"(i) The term 'bona fide employee' shall mean any employee, including but not limited to any individual acting as a foreman, manager, or in some other supervisory capacity, but shall not include any individual having the status of an independent contractor.".

SEC. 7. Subsection 3(d) of such Act is amended by inserting the words "on a farm or ranch" after the word "grading".

SEC. 8. Subsection 3(g) of such Act is amended to read as follows:

"(g) The term 'migrant worker' means an individual who is engaged in agricultural employment on a seasonal or other temporary basis and who cannot regularly return to his or her domicile each day after working hours. Such term shall also include for purposes of this Act any individual who is engaged in agricultural employment on a seasonal or other temporary basis and who is transported to and from his or her place of agricultural employment by any person referred to in section 3(b), or any employee thereof, unless otherwise exempt.".

SECTION-BY-SECTION ANALYSIS

1. Title: Farm Labor Contractor Registration Act Amendments of 1981.

2. Section 2 clarifies the existing exemptions under 3(b)(2) for farmers, ranchers, and other agricultural employers who recruit and hire migrant farmworkers for their own operation. The Department of Labor (DOL) previously held that the existing exemption only applies to individuals who "personally" engage in such activities. Since the majority of agricultural employers, including many farmers, are incorporated, the effect of the DOL interpretation has been to eliminate the exemption for all but a few. The proposed change would make clear that farmers, ranchers, and other agricultural employers are excluded from the definition of "farm labor contractor" regardless of their form of doing business. This is consistent with the interpretation adopted by the 9th Circuit Court in Marshall v. Green Goddess Avocado Corp., and by federal district courts in Espinoza v. Stokely-Van Camp and Cantu v. Owatonna Canning Co., Inc.

3. Section 3 clarifies the existing exemptions for employees of farmers, ranchers, and other agricultural employers. The present Act excludes from the definition of farm labor contractor any full-time or regular employee of a farmer, processor, canner, ginner, packing shed operator, or nurseryman who recruits, solicits, hires, furnishes, or transports migrant farmworkers for his or her employer on no more than an incidental basis. The ambiguity of the phrase "on no more than an incidental basis" has resulted in much controversy and led to several court cases as to its actual meaning.

There has been some suggestion, including one by then Secretary of Labor Ray Marshall, that a strict time test, such as 20 percent, be applied. But such a test would be exceedingly difficult to administer and result in burdensome record-keeping and paperwork requirements for farmers, ranchers, and others. Therefore, section 3 simply deletes the phrase entirely.

Section 3 also addresses the concern some have expressed that the present exemption for "full-time or regular employees" in section 3(b)(3) of the Act creates a loophole whereby a farm labor contractor may escape regulation by simply "masking" as a full-time or regular employee. Under the proposed new 3(b)(3), the term "full-time or regular employee" is deleted in favor of language that requires an individual to be a "bona fide employee." Any individual having the status of an independent contractor would not be exempt, but would be required to register and comply fully with the law.

4. Section 4 revises the existing exemption contained in section 3(b)(10) of the Act. Section 3(b)(10) was enacted in 1978 to prevent DOL from applying the Act to persons (in many cases school teachers on their summer break) who supply students or others not principally engaged in farm work to detassel and rogue seed industry crops principally during the summer months. However, the exemption was narrowly limited to hybrid seed corn or sorghum for seed, provided such activities were performed no more than four weeks during the year.

Section 4 removes these limitations without changing the basic thrust of the provision. The limitations in present law are illogical and unfair. There is no reason to limit the exemption only to seed crops of hybrid corn and sorghum. Whenever students or others not principally engaged in farm work are used anywhere in the seed industry the exemption should apply. Further, the four week limitation has proved to be both unworkable and unnecessary. It is unworkable because companies are unable to verify that the students are doing detasseling or roguing for only four weeks of the year; and it is unnecessary because the persons covered by the exemption are not farmworkers and work only for a brief period of time in connection with their temporary employment in seed-industry-related jobs.

5. Section 5 creates a new subsection 3(b)(11) in the Act which excludes nonprofit or cooperative associations of farmers, growers, or ranchers from the definition of farm labor contractor.

6. Section 6 creates a new subsection, 3(h), which would define the term "for such person's own operation" as used in 3(b)(2). Subsection 3(b)(2) currently states that an employer is excluded from the definition of farm labor contractor if he supplies migrant farmworkers for his own operation. Congress added the phrase "for his own operation" to ensure that a crew leader or independent contractor would not evade regulation under the Act by simply claiming to be a farmer. The problem has been that the phrase has been interpreted to mean that such person must have title to the commodities to be considered his own operation. Such an interpretation completely ignores the numerous situations throughout agriculture, including the livestock, cotton, citrus, fruit, and vegetable industries, where a producer or processor performs an activity pursuant to his own operation, but does not have title to the commodity.

The new subsection 3(h) clarifies Congressional intent so that a farmer, rancher, or other agricultural employer can act "for such person's own operation" regardless of whether he has title to the commodity.

Section 6 also adds a new subsection, 3(i), which defines the term "bona fide employee." Under this definition, an individual having the status of an independent contractor would not be entitled to the exclusion for employees, but would be required to register and comply fully with the law. There is a clear distinction built on hundreds and hundreds of cases under common law between an employee and an independent contractor. It should be noted that an employer can be held liable for the actions of any employee. An employer may also be held responsible under the Fair Labor Standards Act (FLSA), Occupational Safety and Health Act (OSHA), the Wagner-Peyser Act, and numerous other statutes.

7. Section 7 amends section 3(d) of the Act to clarify the definition of agricultural employment. The amendment makes clear that the inclusion in the definition of "agricultural employment" of the phrase "handling, planting, drying, packing, packaging, processing, freezing, or grading" refers to those operations that are on a farm or ranch. This is consistent with the references in the definitions of "agricultural employment" and "migrant worker" to agriculture as defined in the Fair Labor Standards Act and agricultural labor as defined in the Internal Revenue Code. Those two statutes have long been held to differentiate clearly between an operation on a farm or ranch and an operation in a plant or business away from the farm or ranch.

8. Section 8 clarifies the meaning of the term "migrant worker" as presently contained in subsection 3(g) of the Act. The change is in response to DOL's interpretation that a migrant worker means anyone employed in agriculture. By this reasoning, even members of the farm family could be considered to be migrant workers. The proposed change also provides protections for the so-called "day-haul worker" since it includes within the definition of "migrant worker" an individual who is transported to and from his or her place of agricultural employment.

● Mr. CHILES. Mr. President, I am pleased to join with Senator BOREN in introducing this legislation which seeks to clarify the Farm Labor Contractor Registration Act (FLCRA), as amended. There is strong sentiment in the Senate for the changes we are proposing. In the 96th Congress, the Senate, on two occasions, adopted similar legislation aimed at ending the burdensome and unnecessary requirements imposed on farmers and other agricultural employers under FLCRA. I sincerely hope that in this Congress we will be able to finally resolve this considerable problem for the agriculture community.

In the continuing debate on this issue, which began soon after the 1974 amendments were enacted, I have stressed my support for the Farm Labor Contractor Registration Act and its purpose. I believe most Senators recognize that migrant farmworkers have been exploited and abused by the farm labor contractor or crew leader. There is a definite need for a strong, enforceable statute that insures the registration of crew leaders and provides a means to crack down on abusive practices. That is my understanding of what Congress intended when it passed the 1974 legislation and why I supported the measure.

Unfortunately, the statute and its enforcement by the Department of Labor have resulted in a situation quite at odds with congressional intent and quite frustrating for the farmer. Anyone familiar with the enforcement history of the law realizes that it now goes way beyond registration and regulation of the crew leader. Under the act, as currently interpreted and administered, just about every farmer and other employer in agriculture is considered a farm labor contractor. I was assured in 1974 by the Senate floor manager of the bill that this was not to be the case, but the Department has so administered the law, and the courts have supported that interpretation.

Currently, the Department is registering as farm labor contractors: Citrus growers in Florida, fruit and vegetable farmers, corn and grain sorghum seed producers, cotton ginners, cattle feedlot operators, and nurserymen, just to name a few. We have even had a situation in Florida where three cultivators working a citrus grove were required to register because they took turns driving each other to work and thus were considered to be transporting migrant labor. I really do not think Congress had this in mind when we passed the 1974 amendments.

The vague language and convoluted format of FLCRA have allowed the clear meanings of its key words to be subverted and the intent of Congress to be frustrated.

It is important to remember that the whole debate and legislative history of the 1974 amendments revolve around the fact that farm labor contractors were abusing migrant farmworkers as well as failing to live up to their arrangements with farmers, packers, and processors. Congress enacted FLCRA in order to regulate crew leaders for the purpose of protecting not only migrant farmworkers but also agricultural producers. At no point in the House or Senate committee reports and at no point in the floor debates was there any assertion that farmers, processors, canners, packing shed operators, ginners, or nurserymen had been guilty of the kind of abuses those amendments were designed to correct. Neither do those committee reports nor floor debates express any intention to subject legitimate farmers, processors, or other fixed location agricultural employers to registration or to the substantive requirements of the act.

Unfortunately, the defective language and format of the act have allowed the Department of Labor to ignore the intent of Congress. The Department has taken advantage of these fundamental defects in its unrelenting efforts to envelop farmers, packers, processors, and their employees within the regulatory scheme of the act. At the same time, the Department has failed to concentrate, as Congress intended, on the activities of crew leaders. The result has been widespread harassment of farmers, packers, processors, and their employees, yet little discernible effort to seek out and correct actual abuses by crew leaders.

The vague language of the act has allowed the Department to interpret:

"Migrant worker" to include local workers,

"Agricultural employment" to include nonagricultural employment, and

Narrow, loophole-closing qualifications so as to render an exclusion virtually meaningless.

The convoluted format of the act begins by broadly describing activities in which many who obviously are not crew leaders frequently engage, then narrowing the scope by a series of exclusions until supposedly only crew leaders remain. In theory, such a drafting scheme can be made to work, but here the combined effect of the format, vague definitions, and vague qualifications within exclusions have provided the legalistic rationale for a complete subversion of Congress clear intent that farmers, packers, and processors be protected, rather than regulated as farm labor contractors.

The legislation Senator BOREN and I are introducing today will define in clear and precise terms who is covered by the act and who is not. It will express the certain intent of the Congress that the enforcement and regulatory structure of the law will be targeted at the traditional crew leader and not the entire agricultural industry. It will establish for the Department and the courts carefully drawn guidelines so that we will not again experience a situation in which the will of Congress is thwarted.

I urge the Congress to move promptly on this legislation so that this onerous burden on the agriculture community is ended. The farmers and agricultural producers in this Nation face enough problems in today's economy without this one. We in Congress have the responsibility to see that burdensome Government regulations and requirements that hinder farming operations and efficiency are removed. To my mind, changing the Farm Labor Contractor Registration Act, as we have proposed, is an excellent opportunity to show that Congress is going to meet that responsibility.●

By Mr. BIDEN (for himself and Mr. MATHIAS):

S. 923. A bill to amend chapter 207 of title 18, United States Code, relating to pretrial services; to the Committee on the Judiciary.

PRETRIAL SERVICES ACT OF 1981

Mr. BIDEN. Mr. President, today along with Senator MATHIAS, I am introducing the Pretrial Services Act of 1981. This act establishes pretrial services in each Federal district to assist judicial officers in making appropriate pretrial release decisions and to supervise and monitor conditions of pretrial release. This bill is similar to pretrial services legislation which passed in the 96th Congress with bipartisan support.

We have often heard in recent months from Government officials, including the Attorney General and the Chief Justice, who are alarmed at the rising crime rate. I have no doubt that nearly every person in this country shares that concern. Merely saying that there is a problem unfortunately does very little toward providing a solution.

The Pretrial Services Act of 1981 provides an opportunity to have an impact on one important type of crime—crime committed by persons released on bail.

Pretrial services perform two essential functions. First, pretrial services officers provide the court with the information essential to determining appropriate release conditions for each defendant. Second, the officers supervise persons released on bail to insure that bail conditions are met.

Most important, pretrial services are already a proven success. The Speedy Trial Act of 1974 established demonstration pretrial services programs in 10

Federal districts. The 10 districts encompass some 20 percent of the Federal criminal caseload. In a recent study conducted by the Administrative Office of the U.S. Courts, pretrial services resulted in a significant decrease in crimes committed by persons released on bail and also in the number of persons who fail to appear for trial.

The Pretrial Services Act expands pretrial services from the 10 demonstration districts to all Federal districts. The act provides that existing personnel and facilities should be used unless it is determined, on a district-by-district basis that additional resources are necessary. The Administration Office of the U.S. Courts estimates that it will cost less than $6 million to provide pretrial services to all defendants under this act. This cost must be weighed against the savings to the criminal justice system which will result from a reduction in unnecessary pretrial incarceration and a decrease in the number of defendants who fail to appear for trial. The real value of pretrial services and the most difficult to measure is the savings to the community which is the direct result of reduced crime on bail.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 923

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—PRETRIAL SERVICES ACT OF 1981

SEC. 101. This title may be cited as the "Pretrial Services Act of 1981".

SEC. 102. Section 3152 of title 18, United States Code, is amended to read as follows:

"§ 3152. Establishment of pretrial services in all districts

"The Director of the Administrative Office of the United States Courts (hereinafter in this chapter referred to as the 'Director') shall, under the supervision and direction of the Judicial Conference of the United States, provide directly, or by contract or otherwise, to such extent and in such amounts as are provided in appropriation acts, for the establishment of pretrial services in each judicial district (other than the District of Columbia). Pretrial services established under this section shall be supervised by a chief probation officer appointed under section 3654 of this title or by a chief pretrial services officer appointed pursuant to section 3152A of this title.".

SEC. 103. Chapter 207 of title 18, United States Code, is amended by inserting after section 3152, the following new section:

"§ 3152A. Establishment of pretrial services in special districts

"(a) If an appropriate United States district court and the circuit judicial council jointly recommend the establishment of pretrial services in a particular district, pretrial services shall be established under the general authority of the Administrative Office of the United States Courts.

"(b) The pretrial services established under subsection (a) shall be supervised by a chief pretrial services officer selected by a panel consisting of the chief judge of the circuit, the chief judge of the district, and a magistrate of the district or their designees. The chief pretrial services officer appointed under this subsection shall be an individual other than one serving under the authority of section 3654 of this title.".

SEC. 104. Section 3153 of title 18, United States Code, is amended to read as follows:

"§ 3153. Organization and administration of pretrial services in all districts

"(a) With the approval of the district court, the chief pretrial services officer in districts in which pretrial services are established pursuant to section 3152 of this title, or the chief probation officer in all other districts, shall appoint such other personnel as may be required. The position requirements and rate of compensation of the chief pretrial services officer, the chief probation officer and such other personnel shall be established by the Director with the approval of the Judicial Conference of the United States, except that no such rate of compensation shall exceed the rate of basic pay in effect and then payable for grade CS–16 of the General Schedule under section 5332 of title 5, United States Code.

"(b) The chief pretrial services officer in districts in which pretrial services are established pursuant to section 3152 of this title, or the chief probation officer in all other districts, is authorized, subject to the general policy established by the Director and the approval of the district court, to procure temporary and intermittent services to the extent authorized by section 3109 of title 5, United States Code. The staff, other than clerical staff, may be drawn from law school students, graduate students, or such other available personnel.

"(c)(1) Except as provided in paragraph (2) of this subsection, information contained in pretrial services files, presented in any pretrial services report, or divulged by a pretrial services officer, a chief probation officer, or a staff member during the course of any hearing, shall be used only for the purposes of a bail determination and shall otherwise be confidential. The report shall be made available to the attorney for the accused and the attorney for the Government.

"(2) The Director shall issue regulations establishing the policy for release of information contained in pretrial services files. Such regulations shall provide exceptions to the confidentiality requirements under paragraph (1) of this subsection to allow access to such information—

"(A) by qualified persons for purposes of research related to the administration of criminal justice;

"(B) by persons under contract under section 3154(4) of this title;

"(C) by probation officers for the purpose of compiling presentence reports;

"(D) insofar as such information is a pretrial diversion report, to the attorney for the accused and the attorney for the Government; and

"(E) in certain limited cases, to law enforcement agencies for law enforcement purposes.

"(3) Information contained in pretrial services files, presented in any pretrial services report, or divulged by a pretrial services officer, a chief probation officer, or a staff member during the course of any hearing, shall not be admissible on the issue of guilt in any judicial proceeding, except that such information may be used in proceedings to determine guilt or penalties for failure to appear or a violation of the conditions of release, in perjury proceedings, and for the purpose of impeachment in any subsequent proceeding.".

SEC. 105. Section 3154 of title 18, United States Code, is amended to read as follows:

"Pretrial services functions shall include the following:

"(1) Collect, verify, and report to the judicial officer prior to the pretrial release hearing, information pertaining to the pretrial release of each individual charged with an offense, and recommend appropriate release conditions for each such individual.

"(2) Review and modify the reports and recommendations specified in paragraph (1) of this section for persons seeking release pursuant to section 3146(e) or section 3147 of this chapter.

"(3) Supervise persons released into its custody under this chapter.

"(4) Operate or contract for the operation of appropriate facilities for the custody or care of persons released under this chapter including residential halfway houses, addict and alcoholic treatment centers, and counseling services.

"(5) Inform the court and the United States attorney of all apparent violations of pretrial release conditions or arrests of persons released to its custody or under its supervision and recommend appropriate modifications of release conditions.

"(6) Serve as coordinator for other local agencies which serve or are eligible to serve as custodians under this chapter and advise the court as to the eligibility, availability, and capacity of such agencies.

"(7) Assist persons released under this chapter in securing any necessary employment, medical, legal, or social services.

"(8) Prepare, in cooperation with the United States marshal and the United States attorney such pretrial detention reports as are required by the provisions of the Federal Rules of Criminal Procedure relating to the supervision of detention pending trial.

"(9) Develop and implement a system to monitor and evaluate bail activities, provide information to judicial officers on the results of bail decisions, and prepare periodic reports to assist in the improvement of the bail process.

"(10) To the extent provided for in an agreement between a pretrial services officer in districts in which pretrial services are established pursuant to section 3152 of this title, or the chief probation officer in all other districts, or a staff member in his or her official capacity, and the United States attorney, collect, verify, and prepare reports for the United States attorney's office of information pertaining to the pretrial diversion of any individual who is or may be charged with an offense, and perform such other duties as may be required under any such agreement.

"(11) Make contracts, to such extent and in such amounts as are provided in appropriation Acts, for the carrying out of any pretrial services functions.

"(12) Perform such other functions as specified under this chapter.".

SEC. 106. Section 3155 of title, 18, United States Code, is amended to read as follows:

"§ 3155. Annual reports

"Each chief pretrial services officer in districts in which pretrial services are established pursuant to section 3152 of this title, and each chief probation officer in all other districts, shall prepare an annual report to the chief judge of the district court and the Director concerning the administration and operation of pretrial services. The Director shall be required to include in the Director's annual report to the Judicial Conference under section 604 of title 28, United States Code, a report on the administration and operation of the pretrial services for the previous year.".

SEC. 107. The table of sections for chapter 207 of title 18, United States Code, is amended—

(1) so that the item relating to section 3152 reads as follows:

"3152. Establishment of pretrial services in all districts.";

(2) by adding after the item relating to section 3152, the following:

"3152A. Establishment of pretrial services in special districts.";

(3) so that the item relating to section 3153 reads as follows:

"3153. Organization and administration of pretrial services in all districts.";

and

(4) so that the item relating to section 3155 reads as follows:

"3155. Annual reports.".

SEC. 108. (a)(1) Except as provided in paragraph (2), this title and the amendments made by this title shall take effect on the date of enactment of this title.

(2) The amendment made by section 103 of this title shall take effect eighteen months after the date of enactment of this title.

(b) During the period beginning on the date of enactment of this title and ending on the effective date specified in subsection (a)(2) of this section, the pretrial services agencies established under section 3152 of title 18 of the United States Code in effect before the date of enactment of this title may continue to operate, employ staff, provide pretrial services, and perform such functions and powers as are authorized under the provisions of chapter 207 of title 18 of the United States Code.

SEC. 109. (a) There are authorized to be appropriated, for fiscal year 1982 and each succeeding fiscal year thereafter, such sums as may be necessary to carry out the provisions of chapter 207 of title 18 of the United States Code, as amended by section 103 of this title.

(b) There are authorized to be appropriated for the period beginning after September 30, 1981, and ending on the effective date specified in section 108(a)(2) of this title, such sums as may be necessary to carry out the activities of the pretrial services agencies established under section 3152 of title 18 of the United States Code in effect before the date of enactment of this title.

By Mr. METZENBAUM

S. 924. A bill to amend title XVIII of the Social Security Act to provide medicare coverage for influenza vaccine and its administration; to the Committee on Finance.

MEDICARE COVERAGE FOR INFLUENZA VACCINE AND ITS ADMINISTRATION

● Mr. METZENBAUM. Mr. President, last year, the Congress for the first time recognized the importance of preventive health care for the elderly by enacting legislation I introduced to provide older Americans with vaccinations against pneumococcal pneumonia through the medicare program.

Today, I am introducing legislation to extend medicare coverage to influenza vaccines, another area in which a modest expenditure will bring very positive benefits to the people of this country.

Influenza strikes persons of all ages, but for the elderly it presents by far the greatest threat to life, persons aged 75 and above are 10 times more likely than those aged 55 to 64 to die of flu. In addition, chronic conditions common among the aged—heart, lung, and kidney diseases, diabetes, and cancer—increase susceptibility to influenza while decreasing the body's ability to fight the infection. In 1979, over 3½ million elderly Americans contracted the flu.

The Surgeon General, in his report "healthy people," recommended the vaccination of the elderly against influenza. In the past, the American College of Preventive Medicine and the American Association of Retired Persons have endorsed this same recommendation.

Under current law, medicare pays for the treatment of influenza, but not for its prevention. And because of the expense of the flu vaccine and the necessary visit to a doctor, few elderly Americans avail themselves of a safe procedure that can add years to their productive lives.

In the 1977–78 flu season, for example, only 23.5 percent of those 65 years or older received influenza vaccines—and the result was unnecessary illness, death, and medicare expenses for treatment. In fact, the Office of Technology Assessment recently reported that an influenza vaccination program for the elderly could substantially reduce medicare costs by reducing the cost of treatment. It makes little sense to permit suffering to continue and to expend the unnecessary medicare funds in order to treat an illness that can easily be prevented in the first place.

Mr. President, I believe that this is a commonsense measure and one that meets the most rigorous tests of cost-benefit analysis.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 924

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1861(s)(10) of the Social Security Act is amended—

(1) by inserting ", influenza vaccine," after "vaccine"; and

(2) by striking out "its" and inserting in lieu thereof "their".

(b) The amendments made by subsection (a) shall become effective on, and apply to services furnished on or after, July 1, 1981.●

By Mr. INOUYE:

S. 925. A bill to transfer the National Institute of Mental Health to the National Institutes of Health; to the Committee on Labor and Human Resources.

TRANSFER OF NATIONAL INSTITUTE OF MENTAL HEALTH TO THE NATIONAL INSTITUTES OF HEALTH

● Mr. INOUYE. Mr. President, today I am introducing legislation that would transfer the National Institute of Mental Health (NIMH) from its current position within the Alcohol, Drug Abuse, and Mental Health Administration (ADAMHA), to the National Institutes of Health (NIH), where it would become a new division.

I am submitting my proposal today, primarily to serve as a catalyst for the debate that, in my judgment, must follow from President Reagan's proposed drastic reductions in our Nation's social welfare programs. I fully realize that reasonable people could differ as to the appropriateness of placing NIMH with NIH rather than have it remain with ADAMHA, or that perhaps the entire ADAMHA superstructure should be transferred to NIH.

However, the programs of ADAMHA are qualitatively different from those of NIMH. I believe that one fact is undisputably clear and that is that for too long a period of time now, our efforts to address the mental health needs of our Nation have been set back because we have not been willing to aggressively attempt to interrelate mental health care with our general physical health care delivery system.

This year every one of the Institutes within the purview of NIH have been recommended for increased funding and that is a recommendation that I strongly support. However, the programs under ADAMHA, whether we are talking about mental health care, alcoholism programs, or drug abuse programs, have been drastically slashed. Further, the Office of Management and Budget (OMB) has made a pronouncement that the Federal Government should drastically reduce its commitment to social science research.

In my judgment, this is extraordinarily shortsighted and should not be tolerated. I have yet to see any objective evidence presented, nor a convincing argument made, that indicate in any way that we should reduce our commitment to our Nation's social science efforts. I am confident that had our mental health programs come under the jurisdiction of NIH, that we would not have been subjected to such shortsighted pronouncements.

For too long a period of time now, those of us in the Congress have been unwilling to accord our Nation's mental health professionals—whether we are talking about psychiatric nurses, clinical psychologists, clinical social workers, or psychiatrists—true professional parity.

The fact that mental health benefits under the Social Security Act are extraordinarily miniscule and have not been modified since the original bill was enacted is inexcusable. In fact, when hearings were held in August 1978, it was the first time that the issue of mental health benefits had been directly considered by the committee in 7 years. In my judgment, a number of crucial issues were raised during those hearings that must now be aggressively addressed.

For example, is there any real difference between the types of services that each of the four traditional mental health disciplines provide? To what extent can we honestly say that various forms of psychotherapeutic treatment are safe, effective, and appropriate? And to what extent will we really be able to curtail our Nation's ever-escalating physical health care costs unless we provide the aggressive mental health services to address the 60 to 80 percent of the reasons that individuals presently visit a physician?

There are, in fact, a number of crucial policy issues that must be addressed in the near future, and I am afraid that unless we are willing to place the NIMH within the jurisdiction and protection of NIH, we simply will not allocate sufficient resources to this most important endeavor during the foreseeable future.

Accordingly, the bill I have introduced today would direct the Department of Health and Human Services to so transfer NIMH. I sincerely hope that my colleagues will give serious consideration to this proposal and that a close examination will be made at the extraordinarily

shortsighted nature of the reductions proposed by this administration for mental health training and research programs.

Mr. President, I request unanimous consent that the text of this bill and the attached factsheet be printed in the RECORD.

There being no objection, the bill and fact sheet were ordered to be printed in the RECORD, as follows:

S. 925

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the second and third sentences of subsection (a) of section 455 of the Public Health Service Act are redesignated as paragraph (2) of such section.

(b) The first sentence of section 455(a) of such Act is amended to read as follows:

"(1) There is established, as a division of the National Institutes of Health, the National Institute of Mental Health (hereinafter in this part referred to as the 'Institute') to administer the programs and authorities of the Secretary with respect to mental health.".

NATIONAL INSTITUTE OF MENTAL HEALTH
1946–1981

July 3, 1946—P.L. 79–487—National Mental Health Act—Authorized funds for the Public Health Service to establish the National Institute of Mental Health to improve the mental health of the people of the United States through research relating to the causes, diagnosis, and treatment of psychiatric disorders and to train personnel in matters relating to mental health.

April 1, 1949—The National Institute of Mental Health was administratively established as part of the National Institutes of Health—

The Budget of the United States for the Public Health Service for the Fiscal Year Ending June 30, 1949: "For construction of a combined hospital and research building . . . for the National Institute of Mental Health and for general medical research . . . $5,000,000 . . . Provided . . . the appropriation . . . under the head "National Institute of Mental Health" in the Independent Offices Appropriation Act, 1948, shall be consolidated with this appropriation. . . ."

April 28, 1955—House Joint Resolution 256 authorized the Surgeon General to make a comprehensive study of the problem of mental illness. The resolution specifically stated, "Nothing in this section shall in any way affect the availability of amounts otherwise appropriated for work in the field of mental health; nor be construed to interfere with or diminished the more limited and specific programs of research and study being carried on through or under the auspices of the National Institute of Mental Health."

August 2, 1956—The Health Amendments Act of 1956 authorized the Surgeon General to provide for training of public health personnel, including trainees in the mental health area, and to make grants to State or local agencies, not only for research but also for care and treatment of patients.

October 31, 1963—The Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963 authorized the Surgeon General to make grants for construction of research and treatment centers and for training teachers of mentally and physically handicapped children.

September 19, 1954—Department of Health, Education, and Welfare Appropriations (P.L. 88–605) for the National Institute of Mental Health and for Construction of Community Mental Health Centers both appear under the National Institutes of Health, but are kept separate from one another.

August 31, 1965—Although appropriations for the National Institute of Mental Health are still separate from Construction of Community Health Centers, P.L. 89–156 allocates funds to the National Institute of Mental Health "for expenses necessary for carrying out the provisions . . . of the Community Mental Health Centers Act."

April 25, 1966—Reorganization Plan No. 3, submitted by President Johnson, proposed a reorganization of the Public Health Service and the Department of Health, Education, and Welfare. The plan was approved by the Committees on Government Operations of both the Senate and the House of Representatives and became effective on June 25, 1966. The plan gave the Secretary the authority to reorganize the Department in order to achieve its most effective and economical operation.

John W. Gardner, then-Secretary of the Department of Health, Education, and Welfare, suggested a reorganization of the Public Health Service into eight components, including the National Institute of Mental Health as a separate bureau "responsible for the rapidly expanding national program for dealing with mental illness . . . (to) incorporate the present functions of the existing Mental Health Institute, plus the Fort Worth and Lexington Psychiatric Hospitals . . . administer a unified program of research, manpower training, demonstrations, and mental health services . . . (and) also serve as the principal focus for research and control programs in alcoholism and drug addiction. The National Institutes of Health will continue to have a supervisory relationship to its intramural research program."

January 1, 1967—The National Institute of Mental Health was officially separated from the National Institutes of Health and became a separate Bureau of the Public Health Service.

1973—Under an administrative reorganization of the Department of Health, Education, and Welfare, the National Institute of Mental Health was transferred back into the National Institutes of Health on July 1.

On September 25, the National Institute of Mental Health became a part of the newly established Alcohol, Drug Abuse, and Mental Health Administration. The intramural research programs remained physically within the National Institutes of Health, as they do today.

May 14, 1974—P.L. 93–282 established in law the Alcohol, Drug Abuse, and Mental Health Administration, composed of the National Institute of Mental Health, the National Institute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse.●

By Mr. CANNON (by request):

S. 926. A bill to amend subtitle IV of title 49, United States Code, to provide for more effective regulation of motor carriers of passengers, and for other purposes; to the Committee on Commerce, Science, and Transportation.

S. 927. A bill to amend subtitle IV of title 49, United States Code, to provide for more effective regulation of motor carriers of passengers; to the Committee on Commerce, Science, and Transportation.

REGULATORY REFORM OF THE MOTOR BUS INDUSTRY

● Mr. CANNON. Mr. President, I am today introducing two bills by request that propose substantial changes in the way that the Nation's bus industry is regulated by the Government. They are two quite different, but thoughtful, approaches to a general desire to reduce regulation over this business as much as possible.

The first bill has been drafted and proposed by the Interstate Commerce Commission in response to a request made by the Senate Commerce Committee last year. At that time we requested proposed legislative changes from both the ICC and the Department of Transportation. The response of the ICC was timely and has contributed to the development of the issue. I am sure that the ideas and perspectives will be very helpful in the upcoming debate. We have still received no response from DOT.

The second bill was prepared by the American Bus Association. It represents a general consensus of the members of the ABA and is thus a very important document for us to consider. I want to personally convey my appreciation to the members and staff of the American Bus Association for the many long hours they have spent reaching an agreement on this important issue.

In introducing these bills today, I am not endorsing either approach. Rather, I think it is time to get the debate moving and begin talking about specific proposals. The issues that will be raised in the inquiry that will follow are certainly familiar ones for the Commerce Committee—service to small communities, freedom of entry, pricing flexibility, Federal preemption of state regulation, promotion of competition, and so on. But the structure of the bus industry is certainly unlike that of many of the other transportation businesses that we have looked at over the past several years. Hence, the solutions may differ and will have to be fashioned to take into account the unique characteristics of the bus industry.

So to get the process underway, I ask unanimous consent, Mr. President, that the ICC proposal, "Motor Bus Act of 1981," and its accompanying section-by-section analysis, and the American Bus Industry proposal, the "Bus Regulatory Modernization and Improvement Act of 1981," and a summary of its provisions, be inserted into the RECORD at this point.

There being no objection, the bills and explanations were ordered to be printed in the RECORD, as follows:

S. 926

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Bus Regulatory Modernization and Improvement Act of 1981".

PURPOSE OF THE ACT

SEC. 2. This Act is part of the continuing effort by Congress to reduce unnecessary regulation by the Federal Government.

CONGRESSIONAL FINDINGS

SEC. 3. The Congress hereby finds—

(1) that a safe, competitive, financially sound, and fuel efficient motor bus system is vital to the maintenance of a strong national economy, and a strong national defense, and to conservation of energy;

(2) that the best means of assuring such a system of transportation is through regulated competition and reformed regulation of entry, rates, and service;

(3) that in order to reduce the uncertainty felt by the Nation's motor bus industry and those persons and communities which rely on its service, the Interstate Commerce Commission should be given explicit direction for regulation of motor carriers of

passengers and well-defined parameters within which it may act pursuant to congressional policy;

(4) that the Interstate Commerce Commission shall not attempt to go beyond the powers vested in it by the Interstate Commerce Act and other legislation enacted by Congress; and

(5) that statutes governing Federal regulation of the motor bus industry must be revised to reflect the transportation needs and realities of the 1980's and to ensure the development and maintenance of a bus transportation system responsive to the needs of the public, in which regulatory decisions are reached fairly and expeditiously.

NATIONAL TRANSPORTATION POLICY

SEC. 4. Section 10101(a)(7) of title 49, United States Code, is amended—

(1) by deleting "of property" after "transportation".

(2) by inserting "passengers" after "receivers" in subparagraph (A), and

(3) by inserting "and traveling" after "shipping" in subparagraph (B).

ENTRY POLICY

SEC. 5. Section 10922 of title 49, United States Code, is amended as follows:

(1) in subsection (a) by striking out "II or", "motor common carriers of passengers or", and "respectively";

(2) in subsection (b)(7) by striking out "of property" after "common carrier" and by inserting "or under subsection (c)" after "subsection";

(3) in subsection (b)(8) by striking out "of property" after "contract carrier" and by inserting "or under subsection (c)" after "subsection";

(4) by redesignating subsections (c), (d), (e), (f), (g), (h), (i) and (j), and any references thereto, as subsections (d), (e), (f), (g), (h), (i), (j), and (k), respectively; and

(5) by inserting after subsection (b) the following new subsection:

"(c)(1) Except as provided in this section, the Commission shall issue a certificate to a person authorizing that person to provide transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title as a motor common carrier of passengers—

"(A) if the Commission finds that the person is fit, willing, and able to provide the transportation to be authorized by the certificate and to comply with this subtitle and the regulations of the Commission; and

"(B) if the Commission finds, on the basis of a preponderance of evidence in the record, that the transportation to be provided by such person is consistent with the present or future public convenience and necessity.

"(2) In the determination as to whether an applicant is fit, willing, and able pursuant to paragraph (1)(A) of this subsection, the burden of proof shall be upon the applicant. In the determination as to whether the transportation proposed is consistent with the public convenience and necessity pursuant to paragraph (1)(B) of this subsection, the burden of proving that the transportation proposed would serve a useful public purpose, responsive to a public demand, shall be upon the applicant, but the burden of proof in all other respects shall be upon opponents of the application.

"(3) In determining whether an application is consistent with the public convenience and necessity pursuant to paragraph (1)(B) of this subsection, the Commission shall review each application filed hereunder and, in making its determination, shall consider—

"(A) the transportation policy of section 10101 of this title;

"(B) evidence of public support for an application or other demonstration of public need;

"(C) quality and quantity of available service;

"(D) whether granting or denying the application would tend to conserve fuel; and

"(E) whether granting the application or a series of similar applications—

"(i) might result in discontinuance of intercity bus service to communities having no other intercity bus transportation; or

"(ii) might impair or curtail the operations of existing carriers.

"(4) The Commission may not make a finding relating to public convenience and necessity under paragraph (1) of this subsection which is based upon general findings developed in rulemaking proceedings.

"(5) The requirement in paragraph (1) of this subsection that persons issued certificates be fit, willing, and able includes, among other things, financial fitness, operational fitness, safety fitness, and compliance with the provisions of this title and other Federal laws and regulations. Fitness shall be a continuing requirement for the holding of a certificate.

"(6) The Commission shall not issue any certificate under this subsection to a motor carrier of passengers which is owned by or operated on behalf of a public or governmental body, including public agencies and instrumentalities of one or more States, and public corporations, boards, and commissions established under the laws of any State, if service is provided by an authorized privately owned carrier.

"(7) The Commission shall not issue any certificate authorizing transportation of passengers in interstate or foreign commerce to any person whose government does not permit carriers domiciled in the United States to transport passengers within its territory on substantially the same conditions as apply to the transportation of passengers by its own nationals.

"(8) The provisions of paragraph (1) of this subsection (other than subparagraph (A)) shall not apply to applications under this subsection for authority to provide—

(A) transportation of passengers in one-way charter or special operations to or from the carrier's authorized points in its base territory by a carrier authorized to transport passengers in round-trip charter or special operations when such transportation is to or from a point in its base territory and is part of an intermodal round-trip movement involving the same group of passengers;

(B) transportation of passengers in charter or special operations, in sightseeing and pleasure tours, from points in a city or county any part of which the applicant is authorized to serve; or, from any such authorized point of service to any point in the United States; or

(C) transportation of passengers in charter service in the same vehicle and at the same time as the carrier provides regular route, scheduled passenger service.

ENTRY PROCEDURE

SEC. 6. Section 10322(b)(2) of title 49, United States Code, is amended by inserting "(A)" after "(2)" and by adding the following subparagraphs:

"(B) The Commission shall reach a final decision upon applications for authority to transport passengers under subchapter II of chapter 109 of this subtitle and shall issue the certificate within one year after publication of the notice in the Federal Register plus any extension of time authorized by this section;

"(C) The Commission shall promulgate rules of procedure for processing applications to transport passengers which provide for adequate notice and opportunity for any interested person to file written evidence and argument as to whether the transportation proposed by an applicant is consistent with the public convenience and necessity. If an application is opposed, the Commission shall provide adequate time for the applicant to present evidence in support of the application; for protestants to present evidence in opposition to the application; for the applicant to reply to protestants; and for the applicant and protestants to discuss amendments to the application;

"(D) If the Commission finds that the applicant is fit, willing, and able to provide the transportation proposed and if no person opposes the grant of authority sought by the applicant, the Commission may issue a certificate without evidence of public support for the service proposed;

"(E) The Commission may require evidence in proceedings involving authority to transport passengers by motor vehicle to be submitted in the form of verified statements or to be adduced in an oral hearing, but the Commission shall assign for oral hearing all applications for authority to transport passengers which involve (i) a substantial extension of regular-route authority; (ii) authority to originate charter or tour operations in a broad territory; (iii) a substantial question respecting the applicant's safety and operational fitness; and (iv) important issues of fact which cannot be resolved fairly or satisfactorily on the basis of sworn written submissions."

ZONE OF PRICING FREEDOM FOR MOTOR CARRIERS OF PASSENGERS

SEC. 7. Section 10708(d) of title 49, United States Code, is amended to read as follows:

"(d)(1) Notwithstanding any other provision of this title, the Commission may not investigate, suspend, revise, or revoke any rate proposed by a motor common carrier or freight forwarder on the grounds that such rate is unreasonable on the basis that it is too high or too low if—

"(A) the carrier notifies the Commission that it wishes to have the rate considered pursuant to this subsection; and

"(B)(i) in the case of transportation of property, the aggregate of increases and decreases in any such rate is not more than 10 percent above the rate in effect one year prior to the effective date of the proposed rate, nor more than 10 percent below the lesser of the rate in effect on July 1, 1980 (or, in the case of any rate which a carrier first establishes after July 1, 1980, for a service not provided by such carrier on such date, such rate on the date such rate first becomes effective), or the rate in effect one year prior to the effective date of the proposed rate.

"(ii) in the case of motor carriers of passengers, the aggregate of increases and decreases in any such rate is not more than 10 percent above the rate in effect one year prior to the effective date of the proposed rate, nor more than 20 percent below the lesser of the rate in effect on the date of enactment of this bill (or, in the case of any rate which a carrier first establishes after the date of enactment of this bill for a service not provided by such carrier on such date, such rate on the date such rate first becomes effective) or the rate in effect one year prior to the effective date of the proposed rate. This subsection does not preclude the establishment by carriers of new or innovative special promotional fares for unlimited passenger travel between all points in a carrier's system or all points in the United States or between specific city pairs.

"(2) The Commission, by rule, may increase the percentages specified in paragraph (1)(B) of this subsection for any group of motor common carriers or freight forwarders if it finds that—

"(A) there is sufficient actual and potential competition to regulate rates; and

"(B) there are benefits to (i) carriers or freight forwarders, ((ii) shippers or passengers, and (iii) the public from further rate flexibility; except that the Commission may not increase such percentages by more than 5 percentage points during any one-year period.

"(3)(A) In determining, pursuant to paragraph (1)(B) of this subsection, whether the

aggregate of increases and decreases in a proposed rate that is to take effect on or before the 730th day following the date of enactment of this paragraph) or on or before January 1, 1982 in the case of motor carriers of passengers) is more than 10 percent (or such other percentage as the Commission may establish under paragraph (2) of this subsection) above the rate in effect one year prior to the effective date of the proposed rate, general rate increases obtained in the one-year period prior to the effective date of the proposed rate shall not be included in such aggregate, except to the extent that such general rate increases exceed 5 percent of the rate in effect one year prior to the effective date of the proposed rate.

"(B) In the case of a proposed rate that is to take effect after the 730th day following the date of enactment of this paragraph (or on or after January 1, 1982, in the case of motor carriers of passengers), the percentage which first appears in paragraph (1)(B) of this subsection (relating to the upper limit of the zone of ratemaking freedom), or such other percentage as the Commission may establish under paragraph (2) of this subsection in lieu of such percentage, shall be increased or decreased, as the case may be, by the percentage change in the Producers Price Index, as published by the Department of Labor, that has occurred during the one-year period prior to the effective date of the proposed rate.

"(4) Any rate implemented by a carrier pursuant to this subsection shall be subject to the antitrust laws, as defined in the first section of the Clayton Act (15 U.S.C. 12), except that the docketing and publication of such rate by the carrier under section 10706(b) of this title shall not be construed as a violation of the antitrust laws. Nothing in this subsection shall limit the Commission's authority to suspend and investigate proposed rates on the basis that such rates may violate the provisions of section 10741 of this title or constitute predatory practices in contravention of the transportation policy set forth in section 10101(a) of this title."

"(5) As used in the subsection, 'rate' includes any fare for the transportation of passengers, including commuter fares."

RULE OF RATEMAKING

SEC. 8. Section 10701(e) of title 49, United States Code, is amended by deleting "of property" after "motor carrier" each place such phrase appears and by inserting "or fare" or "or fares" after the words "rate" or "rates" each place such words appear.

RATE BUREAUS

SEC. 9. (a) Section 10706(b) of title 49, United States Code, is amended by—

(1) deleting in subsection (b)(1) and (b)(2) "of property" after "motor common carrier";

(2) placing a period after "subsection" in the second sentence of subsection (b)(2) and striking the remainder of the sentence; and

(3) deleting "such transportation policy" in the third sentence of subsection (b)(2) and inserting: "the transportation policy set forth in section 10101(a) of this title. If the agreement fulfills each requirement of this subsection, it shall be presumed to be consistent with such policy."

(b) Section 10706(b)(3)(D) of title 49, United States Code, is amended by adding "of motor common carriers of property" after "single-line rates" in the first sentence and by adding as the second sentence: "In the case of motor common carriers of passengers, no agreement approved under this subsection may provide for discussion of or voting upon single-line rates on or after January 1, 1985."

(c) Section 10706(b)(3)(E) of title 49, United States Code, is amended—

(1) by inserting "(i)" after "(E)"; and

(2) by adding at the end thereof the following new clause:

"(ii) In any proceeding in which it is alleged that a carrier was a party to an agreement, conspiracy, or combination in violation of a Federal law cited in subsection (b)(2) of this section or of any similar State law, proof of an agreement, conspiracy, or combination may not be inferred from evidence that two or more carriers acted together with respect to an interline rate or related matter and that a party to such action took similar action with respect to a rate or related matter on another route or traffic. In any proceeding in which such a violation is alleged, evidence of a discussion or agreement shall not be admissible if the discussion or agreement—

"(1) was in accordance with an agreement approved under paragraph (2) of this subsection; or

"(II) concerned an interline movement of the carrier, and the discussion or agreement would not, considered by itself, violate the laws referred to in the first sentence of this clause.

In any proceeding before a jury, the court shall determine whether the requirements of clause (I) or (II) are satisfied before allowing the introduction of any such evidence."

(d) Section 10706(b)(3)(F) of title 49, United States Code, is amended to read as follows: "The Commission shall, by regulation, determine reasonable quorum standards to be applied for meetings of committees of organizations established or continued under an agreement approved under this subsection.

(e) Section 14(b)(3) of the Motor Carrier Act of 1980, 94 Stat. 806, is amended by changing "ten members" to "eleven members" and by inserting after "shippers" the clause "one who is a motor common carrier of passengers from the membership of the National Bus Traffic Association, Inc."

DISCRIMINATORY STATE REGULATION OF PASSENGER FARES AND EXPRESS RATES

SEC. 10. (a) Section 10521(b)(2) of title 49, United States Code, is amended by inserting "except as provided in section 11501 of this title" immediately after "motor carrier."

(b) Section 11501(b) of title 49, United States Code is amended to read as follows:

"(b)(1) A State authority may only exercise jurisdiction over intrastate transportation provided by a rail carrier or by a motor carrier of passengers providing transportation subject to the jurisdiction of the Commission under subchapters I or II of chapter 105 of this title if such State authority exercises such jurisdiction exclusively in accordance with the provisions of this subtitle.

"(2) Within 120 days after the effective date of the Staggers Rail Act of 1980, and in the case of motor carriers of passengers, within 120 days after the effective date of this Act, each State authority exercising jurisdiction over intrastate rates, fares, classifications, rules, bus schedules, and practices for intrastate transportation described in paragraph (1) of this subsection shall submit to the Commission the standards and procedures (including timing requirements) used by such State authority in exercising such jurisdiction.

"(3)(A) Within 90 days after receipt of the intrastate regulatory standards and procedures of a State authority under paragraph (2) of this subsection, the Commission shall certify such State authority for purposes of this subsection if the Commission determines that such standards and procedures are in accordance with the standards and procedures applicable to regulation of rail carriers or motor carriers of passengers by the Commission under this title. If the Commission determines that such standards and procedures are not in such accordance, it shall deny certification to such State authority, and such State authority may resubmit new standards and procedures to the Commission for review in accordance with this subsection.

"(B) The standards and procedures existing in each State on the effective date of the Staggers Rail Act of 1980 in the case of rail carriers, and on the effective date of this Act in the case of motor carriers of passengers, for the exercise of jurisdiction over intrastate rail rates, classifications, rules, and practices and for the exercise of jurisdiction over intrastate passenger fares, express rates, and bus schedules shall be deemed to be certified by the Commission from that date until the date an initial determination is made by the Commission under subparagraph (A) of this paragraph.

"(4)(A) Any State authority which is certified by the Commission under this subsection may use its standards and procedures in exercising jurisdiction over intrastate rates, fares, classifications, rules, bus schedules and practices during the 5-year period commencing on the date of such certification. Any State authority which is denied certification or which does not seek certification may not exercise any jurisdiction over intrastate rates, fares, classifications, rules, bus schedules, and practices until it receives certification under this subsection.

"(B) Any intrastate transportation provided by a rail carrier or a motor carrier of passengers in a State which may not exercise jurisdiction over an intrastate rate, fare, classification, rule, bus schedule, or practice of that carrier due to a denial of certification under this subsection shall be deemed to be transportation subject to the jurisdiction of the Commission under subchapters I and II of chapter 105 of this title.

"(5)(A) Certification of a State authority under this subsection is valid for the 5-year period beginning on the date of such certification. Prior to the expiration of such 5-year period, the State authority shall resubmit its intrastate regulatory standards procedures to the Commission for subsequent certification in accordance with this subsection.

"(B) During any 5-year certification period, a State may not change its certified standards and procedures without notifying and receiving express approval from the Commission.

"(6) Notwithstanding any other provision of this subtitle, a State authority may not exercise any jurisdiction over general rate increases under section 10706 of this title, inflation-based rate increases of rail carriers under section 10712 of this title, or fuel adjustment surcharges approved by the Commission.

(c) Section 11501(c) of title 49, United States Code, is amended to read as follows:

"(c) Any rail carrier or motor carrier of passengers providing transportation subject to the jurisdiction of the Commission under subchapters I or II or chapter 105 of this title may petition the Commission to review the decision of any State authority, in any administrative proceeding in which the lawfulness of an intrastate rate, fare, classification, rule, bus schedule, or practice is determined, on the grounds that the standards and procedures applied by the State were not in accordance with the provisions of this subtitle. The Commission shall take final action on any such petition within 30 days after the date it is received. If the Commission determines that the standards and procedures were not in accordance with the provisions of this subtitle, its order shall determine and authorize the carrier to establish the appropritae rate, fare, classification, rule, bus schedule, or practice."

(d) Section 11501(d) of title 49, United States Code, is amended to read as follows:

"(d)(1) The Commission has exclusive

authority to prescribe an intrastate rate or fare for transportation provided by a rail carrier subject to the jurisdiction of the Commission under subchapter 105 of this title, or a motor carrier of passengers subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title when—

"(A) A rail carrier or motor carrier of passengers, as the case may be, files with an appropriate State authority a change in an intrastate rate or fare, or a change in a classification, rule, or practice that has the effect of changing an intrastate rate or fare, that adjusts the rate or fare to the rate or fare charged on similar traffic moving in interstate or foreign commerce; and

"(B) The State authority does not act finally on the change by the 120th day after it was filed.

"(2) When a rail carrier or a motor carrier of passengers files an application with the Commission under this subsection, the Commission shall prescribe the intrastate rate or fare under the standards of subsection (A) of this section and chapter 107 of this title. Notice of the application shall be served on the State authority."

(e) Section 10501(d) of title 49, United States Code, is amended to read as follows:

"(d) The jurisdiction of the Commission and of State authorities (to the extent such authorities are authorized to administer the standards and procedures of this title pursuant to this section and section 11501(b) of this title) over transportation by rail carriers or motor carriers of passengers, as the case may be, and the remedies provided in this title with respect to the rates, fares, classification, rules and practices of such carriers, is exclusive."

EXIT POLICY

SEC. 11. (a) Section 10521(b)(1) is amended by inserting "except as provided in section 11101(d) of this title" after "motor carrier."

(b) Section 11101 of title 49, United States Code, is amended by adding at the end thereof the following new subsections:

"(d) No State or political subdivision thereof and no interstate agency or other political agency of two or more States shall enact or enforce any law, rule, regulation, standard, or other provision relating to the discontinuance of regular-route service by a motor common carrier of passengers having authority under this title to transport passengers in interstate or foreign commerce.

"(e)(1) No later than 60 days after the date of enactment of this section, the Commission shall institute a rulemaking proceeding in which it shall promulgate rules for the discontinuance of essential intrastate and interstate regular-route service by a motor common carrier of passengers. The rules shall provide for notice and opportunity for interested parties to comment, but need not provide for oral evidentiary hearings. As used in this subsection, the term, 'discontinuance of essential intrastate and interstate regular route service' means a total cessation of service for which there is no reasonably adequate substitute and does not refer to changes in or elimination of schedules.

"(2) Such rules shall establish criteria for determining what service is 'essential'; shall require carriers to notify the Commission, the appropriate State regulatory agency, and affected communities concerning proposed discontinuances of service; and shall establish a procedure under which any interested person, or the Commission on its own initiative, may seek postponement of the proposed discontinuance.

"(3) If a protest is received within 30 days after the notice of discontinuance is served, the carrier within 15 days thereafter shall furnish to the Commission—

"(A) an estimate of the annual subsidy required, if any, to continue the service;

"(B) traffic, revenue, and other data necessary to determine the amount of annual financial assistance, if any, which would be required to continue the service; and

"(C) other information that the Commission may prescribe by rule or regulation as necessary to enable a potential offeror to calculate an adequate subsidy or to enable another carrier to decide whether to seek to institute a replacement service.

"(4) Within 30 days following the receipt of a protest of a proposed discontinuance of service, such service may be discontinued unless the Commission finds (A) that the service proposed to be discontinued is essential, and (B) that an investigation is needed to assist the Commission in determining whether the service can be continued by the existing carrier under a Federal or State program of financial assistance in which the carrier is eligible to participate or by another carrier. If an investigation is undertaken, the Commission shall submit to a potential offeror or offerors of assistance and to prospective providers of replacement service the information described in paragraph (3) of this subsection, together with such additional information as it deems relevant, and shall complete the investigation within 30 days.

"(5) Whenever the Commission decides upon investigation that the service proposed to be discontinued is essential and that a financially responsible person or persons (including a government entity) has offered adequate financial assistance or that another carrier is willing to provide replacement service for a period of not less than 1 year, the Commission may order the carrier to continue the service for a period of 30 days. If at the end of that 30-day period, the carrier has not agreed with an offeror of financial assistance to continue the service for a period of not less than 1 year, the Commission may order the carrier to continue the service for a period of no longer than 90 days.

"(6) The Commission shall not find any financial assistance offered to be adequate unless such assistance is equal to the difference between the revenues attributable to the service proposed to be discontinued and the fully allocated cost of providing such service, plus a reasonable return on investment."

TAX DISCRIMINATION AGAINST BUS CARRIER TRANSPORTATION PROPERTY

SEC. 12. Section 11503a of title 49, United States Code, is amended by deleting "of property" in subparagraph (a)(3).

TEMPORARY AUTHORITIES AND EMERGENCY TEMPORARY AUTHORITIES

SEC. 13. Section 10928 of title 49, United States Code, is amended by—

(1) deleting in subsection (a) reference to "motor carrier of passengers or"; and

(2) deleting "of property" where those words appear in subsections (b) and (c).

SECURITIES

SEC. 14 (a) Section 11302(a) of title 49, United States Code, is amended by inserting "of property" after "carriers" and "carrier" each place they appear.

(b) Section 3(a)(6) of the Securities Act of 1933 (15 U.S.C. 77c(a)(6)) is amended by inserting "of property" after "motor carrier".

FINANCIAL AND SAFETY FITNESS

SEC. 15(a) Subsection (a)(1) of Section 30 of the Motor Carrier Act of 1980, 94 Stat. 820, is amended by inserting "and passengers" before "for hire."

(b) Subsection (a)(2) of Section 30 of the Motor Carrier Act of 1980 is amended by inserting "used in the transportation of property for hire" before "shall".

(c) The Motor Carrier Act of 1980 is amended by redesignating subsections (d), (e), (f), and (g), and all references thereto, as subsections (e), (f), (g), and (h), respectively, and by inserting after subsection (c) the following new subsection:

"(d)(1) The minimum level of financial responsibility established by the Secretary for any vehicle operated in interstate commerce by a motor carrier of passengers shall not be less than the following amounts:

Equipment seating capacity	Limit for bodily injury to or death of 1 person or damage in any 1 accident to property of others	Limits for bodily injuries to or death of all persons injured or killed in any 1 accident (subject to maximum of $500,000) for bodily injuries to or death of 1 person	Limit for loss or damage in any 1 accident to property of others
More than 11 passengers	$500,000	$5,000,000	$500,000
11 passengers or less	500,000	2,000,000	500,000

"(2) If the safety fitness of an applicant is any proceeding under Section 5 of this Act is challenged by any person who provides information in support of the allegation of unfitness, or if the Interstate Commerce Commission has reason to doubt the safety fitness of an applicant, the matter shall be referred to the Secretary, and no certificate shall be issued by the Commission unless the Secretary certifies that the applicant is in compliance and may reasonably be expected to comply with the applicable Federal motor carrier safety regulations."

(d) Subsection (g) of Section 30 of the Motor Carrier Act of 1980, as amended, is amended by striking "This" and inserting: "With respect to the transportation of property for hire by motor vehicle, this."

SUMMARY OF PRINCIPAL PROVISIONS

CONGRESSIONAL FINDINGS

The statement of purpose makes it clear that the Congress is providing "explicit direction" for the regulation of motor carriers of passengers and that the Commission must not attempt to go beyond the powers delegated to it by the Interstate Commerce Act. In addition, the Congress would find that the best means of assuring a strong and financially sound bus industry in the private sector is not through unrestricted competition but by "regulated competition and reformed regulation of entry, rates, and service . . . in which regulatory decisions are reached fairly and expeditiously."

NATIONAL TRANSPORTATION POLICY

The bill would include motor carriers of passengers in the statement of transportation policy adopted for motor carriers of property by the Motor Carrier Act of 1980.

ENTRY POLICY

Section 5 of the ABA bill proposes a higher entry standard for motor carriers of passengers than the Congress approved last year for motor carriers of property. The ABA bill would require the Commission to consider whether granting or denying the application would promote conservation of fuel and whether granting the application could result in discontinuance of service to communities having no other form of public transportation or would impair the operations of existing carriers.

The bus industry bill, like the Motor Carrier Act of 1980, would prohibit master certification based on general findings of public convenience and necessity.

Proposed subsection (c)(6) of 49 U.S.C. 10922 would prohibit the Commission from issuing a certificate to a public transportation authority if service is provided by an authorized privately owned carrier.

Proposed subsection (c)(7) would pro-

hibit the Commission from granting operating authority to Mexican bus operators unless Mexico permitted carriers domiciled in the United States to transport passengers in Mexico on substantially the same terms and conditions as apply to the transportation of passengers by Mexican carriers.

The industry bill also proposes to permit entry merely upon proof of fitness where carriers holding round-trip charter authority desire to provide one-way service which is part of an intermodal trip; where such carriers desire county-wide charter origin authority or nationwide destination authority; and where such carriers seek to transport charter groups in the same vehicle with regularly scheduled passengers.

ENTRY PROCEDURE

The policies and procedures adopted by the Commission in Ex Parte No. MC-55 (Sub-No. 43), coupled with the tight deadlines imposed by Section 25 of the Motor Carrier Act of 1980, are incompatible with meaningful economic controls on entry. The requirement that the Commission decide applications for motor carrier operating authority within 180 days after filing (270 days for cases assigned for oral hearing) is being used to justify virtually automatic entry.

Allegedly because of the short time frames involved, the Commission now requires applicants to submit their evidence in support of the application at the time it is filed; will not permit applications to be amended after they are filed; and will grant oral hearing "only in extraordinary factual circumstances." Because procedure vitally affects substance, the bus industry bill gives the Commission 330 days within which to act on applications for authority to transport passengers; authorizes restrictive amendments to applications; and requires oral hearings to be held in certain types of cases.

ZONE OF PRICING FREEDOM FOR MOTOR CARRIERS OF PASSENGERS

The bus industry bill would provide that within a prescribed zone fares could be raised or lowered without suspension by the ICC on the ground that such fares are too high or too low. The rate flexibility provisions of the bus industry bill are essentially the same as those proposed by the ICC and those made applicable to motor carriers of property by the Motor Carrier Act of 1980. Flexible fare adjustments could be made by individual carrier action but not by carriers acting collectively.

RULE OF RATEMAKING

The rule of ratemaking adopted for the trucking industry in the Motor Carrier Act of 1980 and recommended for the bus industry by the ICC would be made applicable to motor carriers of passengers by section 8 of the bus industry bill.

RATE BUREAUS

Under Section 9 of the bus industry bill, as under the Motor Carrier Act of 1980, the ICC's discretion to withdraw antitrust immunity for the collective consideration of rates would be sharply curtailed. Because the ICC's hostility toward collective ratemaking has not abated, the ABA bill would give the ICC somewhat less discretion in approving rate bureau agreements than that accorded by the Motor Carrier Act of 1980. Motor carriers of passengers would be prohibited from discussing or voting upon single-line rates on or after January 1, 1985, unless the Motor Carrier Ratemaking Study Commission recommended, and the Congress agreed, that collective consideration of single-line rates should be permitted. The ABA bill would also add as a member of the Study Commission a carrier member of the National Bus Traffic Association.

DISCRIMINATORY STATE REGULATION OF PASSENGER FARES AND EXPRESS RATES

Section 10 of the bus industry bill would give the ICC the same authority to rectify discriminatory State regulation of bus fares that was conferred by section 214 of the Staggers Rail Act of 1980 over discriminatory State regulation of railroad freight rates. The ICC favors partial Federal preemption of State authority over the passenger fares and express rates of interstate carriers for the following reasons set forth in the section-by-section analysis of its proposed Motor Bus Act of 1981 transmitted to the Congress on December 15, 1980:

"The Commission remains concerned that Federal reform initiatives to enhance competition and ease regulatory barriers could potentially be nullified by State regulatory actions. Potential problems could result in the area of ratemaking. Carriers that have both interstate and intrastate authority and provide both services over the same route using the same equipment, cannot allocate the costs of the service between the interstate and intrastate portions with any degree of precision. There is always some question of what part of the joint costs of the service as a whole should be borne by each part of the traffic. If the ICC introduced a zone of reasonableness fare flexibility for the interstate traffic, while the intrastate fare remained more closely regulated by the states, then state commissions could hold down intrastate fares forcing carriers to take increases in interstate fares. Currently the ICC has no mechanism to counteract this kind of an effort by the State commission. The result could be a situation in which the low intrastate fares put a significant burden on interstate commerce. That should be avoided especially in view of air and rail competition on the longer interstate movements which would make it difficult for carriers to retain long haul interstate passengers if they were required to cross-subsidize intrastate passengers. It also would be unfair and unequitable to force interstate passengers to pay rates that cross-subsidize intrastate passengers."

EXIT POLICY

Section 11 of the bus industry bill would preempt State authority respecting discontinuance of intrastate regular-route service and changes in bus schedules by motor common carriers of passengers certificated by the ICC.

Under the exit proposal as drafted, the Commission would be required to institute a rulemaking proceeding to define for both intrastate and interstate regular-route services what constitutes a "discontinuance of service"; to establish criteria for determining what service is "essential"; and to establish notification requirements for proposed discontinuance of service and for protests of such action. A procedure for obtaining an official determination that service slated for discontinuance is "essential" should spur the funding of programs to maintain and improve bus service. Under the legislation proposed, discontinuance of interstate regular-route service would be more difficult to accomplish but this disadvantage would be offset by the ability to discontinue unprofitable intrastate bus service more readily.

In transmitting to the Congress its proposed Motor Bus Act of 1981, the ICC gave the following reasons for Federal preemption of State authority over intercity bus service:

"ICC restrictions on exit from this industry have had a minimal effect in the past. The more severe check on exit comes from individual state regulatory authorities. Federal reform proposals for exit have to deal with the potential problems that could result from divergent federal and state policies. For example, a bus carrier that seeks to abandon an unprofitable interstate route may still be forced to serve the similarly unprofitable intrastate portion of the route if the state denies the carrier the abandonment of the route. Faced with this, a carrier might be forced to maintain the interstate route to minimize overall losses even though this will place a burden on the carrier's interstate service as a whole."

TAX DISCRIMINATION AGAINST BUS CARRIER TRANSPORTATION PROPERTY

Section 12 of the ABA bill, like the Motor Carrier Act of 1980, would prohibit discriminatory State taxation of the property of interstate motor carriers.

TEMPORARY AUTHORITIES AND EMERGENCY TEMPORARY AUTHORITIES

Section 13 of the bus industry bill would apply to motor carriers of passengers the temporary authority provisions of the Motor Carrier Act of 1980.

SECURITIES

Section 14 of the bill would eliminate the Commission's jurisdiction over the issuance of securities and assumption of obligations by motor carriers of passengers.

FINANCIAL AND SAFETY FITNESS

Section 30 of the Motor Carrier Act of 1980, requires carriers of hazardous materials to maintain a minimum level of financial responsibility covering public liability and property damage in an amount not less than $5,000,000. The same minimum level would be established by section 15 of the ABA bill for motor carriers of passengers operating vehicles having a seating capacity of 12 or more passengers. The minimum level for carriers operating vehicles having a seating capacity of 11 passengers or less would be $2,000,000. In addition, section 15 of the ABA bill provides that when the safety fitness of an applicant for operating authority is challenged, no certificate shall be issued by the ICC unless the Secretary of Transportation certifies that the applicant is in compliance and may reasonably be expected to comply with the applicable Federal Motor Carrier Safety Regulations.

S. 927

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Motor Bus Act of 1981."

PURPOSE OF THE ACT

SEC. 2. This Act is part of the continuing effort by Congress to reduce unnecessary regulation by the Federal Government.

CONGRESSIONAL FINDINGS

SEC. 3. (a) The Congress hereby finds that a safe, sound, competitive, and fuel efficient motor bus system is vital to the maintenance of a strong national economy and a strong national defense and vital to the transportation needs of the elderly, handicapped and the poor; that the statutes governing Federal regulation of the motor bus industry are outdated and must be revised to reflect the transportation needs and realities of the 1980's; that historically the existing regulatory structure has tended in certain circumstances to inhibit market entry, carrier growth, maximum utilization of equipment and energy resources, and opportunities for minorities and others to enter the motor bus industry; that protective regulation has resulted in operating inefficiencies and diminished price and service competition; that the objectives contained in the NTP can best be achieved through greater competition and reduced regulation; that in order to reduce the uncertainty felt by the Nation's motor bus industry and those persons and communities that rely on its services, the Interstate Commerce Commission should be given explicit direction for regulation of the motor bus industry and well-defined parameters within which it may act pursuant to congressional policy; that the Interstate Commerce Commission should not attempt to go beyond the powers vested in it by the

Interstate Commerce Act and other legislation enacted by Congress; and that legislative and resulting changes should be implemented with the least amount of disruption to the transportation system consistent with the scope of the reforms enacted.

(b) The appropriate authorizing committees of Congress shall conduct periodic oversight hearings on the effects of this legislation, no less than annually for the first 5 years following the date of enactment of this Act, to ensure that this Act is being implemented according to congressional intent and purpose.

NATIONAL TRANSPORTATION POLICY

SEC. 4. Section 10101(a) of title 49, United States Code, is amended:

(1) by deleting paragraph (7) and by adding the following new paragraph:

"(7) with respect to motor carrier transportation, to promote competitive and efficient transportation services in order to (A) meet the needs of shippers, receivers, passengers, and consumers; (B) increase competition by encouraging a variety of quality and price options to meet changing market demands and the diverse requirements of the shipping and traveling public; (C) allow the most productive use of equipment and energy resources; (D) enable efficent and well-managed carriers to earn adequate profits, attract capital, and maintain fair wages and working conditions; (E) provide and maintain passenger and freight service to small communities and small shippers; (F) improve and maintain a sound, safe, and competitive privately-owned motor carrier system; (G) promote greater participation by minorities in the motor carrier industry; and (H) promote intermodal transportation".

MOTOR CARRIER OF PASSENGERS ENTRY POLICY

SEC. 5. (a) Section 10922 of title 49, United States Code, is amended—

(1) in subsection (a) by deleting the phrases, "II or", "motor common carrier of pasiengers or," and "respectively"; and

(2) in subsection (b)(1) by deleting "of property" before "if the Commission finds"; and

(3) in subsection (b) by adding a new subparagraph (4)(F) to read as follows:

"(4)(F) transportation of passengers in charter or special services"; and

(4) in subsection (b)(4)(A) by deleting "of property" after "motor common carrier"; and

(5) in subsection (b)(7) by deleting "of property" after "motor common carrier"; and

(6) in subsection (b)(8) by deleting "of property" after "motor contract carrier".

ELIMINATION OF CERTAIN RESTRICTIONS ON MOTOR CARRIERS OF PASSENGER OPERATIONS

SEC. 6. Section 10922 of title 49, United States Code, is further amended:

(a) in subsection (d) by adding the following new paragraph:

"(5) A certificate authorizing the transportation of passengers in round-trip charter or special operations shall include authority to transport passengers in one-way charter or special operations to or from the carrier's authorized area";

(b) by adding the following new subsection:

"(h)(3) With respect to motor carriers of passengers, not later than 180 days after the date of enactment of this subsection, the Commission shall—

"(A) eliminate gateway restrictions and circuitous route limitations imposed upon motor common carriers of passengers; and

"(B) implement, by regulation, procedures to process expeditiously applications of individual motor carrier of passengers seeking removal of operating restrictions or broadened authority on existing regular route operating authority certificates in order to—

"(i) eliminate unreasonable or excessively narrow territorial limitations; or

"(ii) eliminate any other unreasonable restriction that the Commission deems to be wasteful of fuel, inefficient, or contrary to the public interest; or

"(iii) broaden charter authority incidental to regular route authority; or

"(iv) broaden package express authority incidental to regular route authority.

"(4) The regulations promulgated by the Commission pursuant to paragraph (3)(B) of this subsection shall provide for final Commission action upon an application not later than 120 days after the date the application is filed with the Commission, except that in extraordinary circumstances, the Commission may extend such deadline for a period of not to exceed 90 additional days. Such regulations shall also provide for notice and the opportunity for interested parties to comment, but need not provide for oral evidentiary hearings. In granting or denying applications under paragraph (3)(B) of this subsection, the Commission shall (A) consider, among other things, the impact of the proposed restriction removal upon the applicant's consumption of energy resources, potential cost savings and improved efficiency, and the transportation policy set forth in section 10101(a) of this title, and (B) give special consideration to providing and maintaining service to small and rural communities and small shippers.

"(5) A motor carrier of passengers, providing passenger or express transportation over a regular route or routes pursuant to a certificate issued by the Commission under this section is authorized to provide transportation between any two points on such regular routes, regardless of whether such points or the entire route between such points lie within the same State. Authorization for such passenger or express transportation shall be subject to the sole jurisdiction of the Commission under this chapter.

ZONE OF PRICING FREEDOM FOR MOTOR CARRIERS OF PASSENGERS

SEC. 7. Section 10708 of title 49, United States Code, is amended by deleting subsection (d) and adding the following new subsection:

"(d)(1) Notwithstanding any other provision of this title, the Commission may not investigate, suspend, revise, or revoke any rate or fare proposed by a motor common carrier of property, motor carrier of passengers, or a freight forwarder on the grounds that such rate or fare is unreasonable on the basis that it is too high or too low if—

"(A) the carrier notifies the Commission that it wishes to have the rate of fare considered pursuant to this subsection; and

"(B)(1) in the case of transportation of property, the aggregate of increases and decreases in any such rate of fare is not more than 10 percent above the rate in effect one year prior to the effective date of the proposed rate, nor more than 10 percent below the lesser of the rate in effect on July 1, 1980 (or, in the case of any rate which a carrier first establishes after July 1, 1980, for a service not provided by such carrier on such date, such rate on the date such rate first becomes effective), or the rate in effect one year prior to the effective date of the proposed rate.

"(B)(2) in the case of transportation of passengers, the aggregate of increases and decreases in any such fare is not more than 10 percent above the fare in effect one year prior to the effective date of the proposed fare, nor more than 20 percent below the lesser of the fare in effect on the date of enactment of this bill (or in the case of any fare which a carrier first establishes after the date of enactment of this bill for a service not provided by such carrier on such date, such fare on the date such fare first becomes effective) or the fare in effect one year prior to the effective date of the proposed fare.

This subsection shall not preclude a carrier from establishing new or innovative special promotional fares for unlimited passenger travel between all points in a carrier's system or all points in the United States or between specific city pairs nor shall it influence the level of rates on such fares.

"(2) The Commission, by rule, may increase the percentages specified in paragraph (d)(1)(B) of this subsection for any group of motor common carriers or freight forwarders if it finds that—

"(A) there is sufficient actual and potential competition to regulate rates or fares; and

"(B) there are benefits to (i) motor carriers or freight forwarders, (ii) shippers, passengers and (iii) the public from further rate flexibility; except that the Commission may not increase such percentages by more than 5 percentage points during any one-year period.

"(3)(A) In determining, pursuant to paragraph (1)(B) of this subsection, whether the aggregate of increases and decreases in a proposed rate or fare that is to take effect on or before the 730th day following the date of enactment of this paragraph (or on or before January 1, 1982 in the case of motor carriers of passengers) is more than 10 percent (or such other percentage as the Commission may establish under paragraph (2) of this subsection) above the rate or fare in effect one year prior to the effective date of the proposed rate or fare, general rate increases obtained in the one year period prior to the effective date of the proposed rate or fare shall not be included in such aggregate, except to the extent that such general rate or fare increases exceed 5 percent of the rate in effect one year prior to the effective date of the proposed rate or fare.

"(B) In the case of a proposed rate or fare that is to take effect after the 730th day following the date of enactment of this paragraph (or on or after January 1, 1982 in the case of motor carriers of passengers), the percentage which first appears in paragraph (1)(B) of this subsection (relating to the upper limit of the zone of ratemaking freedom), or such other percentage as the Commission may establish under paragraph (2) of this subsection in lieu of such percentage, shall be increased or decreased, as the case may be, by the percentage change in the Producers Price Index, as published by the Department of Labor, that has occurred during the one-year period prior to the effective date of the proposed rate or fare.

"(4) Any rate or fare implemented by a carrier pursuant to this subsection shall be subject to the antitrust laws, as defined in the first section of the Clayton Act (15 U.S.C. 12), except for the provisions of section 10706(b)(3)(G) and that the docketing and publication of such rate or fare by the carrier under section 10706(b) of this title including such requirements the Commission may impose to protect the right of independent action, shall not be construed as a violation of the antitrust laws. Nothing in this subsection shall limit the Commission's authority to suspend and investigate proposed rates or fares on the basis that such rates or fares may violate the provisions of section 10741 of this title or constitute predatory practices in contravention of the transportation policy set forth in section 10101(a) of this title."

RULE OF RATEMAKING

SEC. 8. (a) Section 10701(e) of title 49, United States Code, is amended by deleting "of property" after "motor carrier" each place such phrase appears and by inserting

"or fare" or "or fares" after the words "rate" or "rates" each place such words appear.

RATE BUREAUS

SEC. 9. (a) Section 10706(b) of title 49, United States Code, is amended by—

(1) deleting in subsection (b)(1) and, (b)(2), "of property" after "motor common carrier"; and

(2) inserting in subsection (b)(3)(D) "for motor carriers of property" after "No agreement approved under this subsection"; and

(3) inserting the following new paragraph:

"(3)(G) For Motor Carriers of Passengers, an organization established or continued under an agreement approved under this subsection may not—

"(i) permit a motor carrier of passengers to discuss, to participate in agreements related to, or to vote on single line rates or fares proposed by another motor carrier of passengers. This clause shall take effect on January 1, 1982.

"(ii) permit a motor carrier of passengers to participate in agreements related to, or to vote on rates related to a particular interline movement unless that motor carrier of passengers practicably participates in that movement; or

"(iii) if there are interline movements over two or more routes between the same end points, permit a carrier to discuss, to participate in agreements related to, or to vote on rates except with a carrier which forms part of a particular single route. This clause shall take effect on January 1, 1982."

(b) Section 10706(c) of title 49, United States Code, is amended by deleting "of property" after "(except a rail carrier or a motor common carrier)."

MOTOR CARRIER BROKERS OF PASSENGERS

SEC. 10(a) Section 10924 of title 49, United States Code, is amended—

(1) in subsection (a) by deleting "passengers or" after "broker for transportation of"; and

(2) in subsection (b) by deleting "of property" after "transportation."

TEMPORARY AUTHORITIES AND EMERGENCY TEMPORARY AUTHORITIES

SEC. 11. Section 10928 of title 49, United States Code, is amended by—

(1) deleting in subsection (a) any reference to "motor carrier of passengers or" each place such term appears; and

(2) adding at the end thereof the following new subsections:

"(d)(1) Without regard to subchapter II of chapter 103 of this title and subchapter II of chapter 5 of title 5, the Commission, pursuant to such regulations as the Commission may issue, may, in its discretion, grant a fit, willing, and able motor carrier of passengers emergency temporary authority to provide transportation service to a place or in an area having an immediate need for bus service. Written applications for emergency temporary authority are not required; telephonic requests will be acceptable. Unless suspended or revoked, the Commission may grant the emergency temporary authority for not more than 30 days. A grant may be renewed for one additional 30 day period.

"(2) The Commission shall take final action upon an application made under this subsection not later than 5 days after the date the application is made with the Commission.

"(e)(1) Without regard to subchapter II of chapter 103 of this title and subchapter II of chapter 5 of title 5, the Commission, pursuant to such regulations as the Commission may issue, may grant a fit, willing, and able motor carrier of passengers temporary authority to provide transportation to a place or in an area having an immediate need for bus service. Unless suspended or revoked, the Commission may grant the temporary authority for not more than 270 days.

"(2) The commission shall take final action upon an application filed under this subsection not later than 60 days after the date the application is filed with the Commission."

MERGER PROCEDURE

SEC. 12. (a) Subchapter III of chapter 113 of title 49, United States Code, is amended by—

(1) Renaming section 11345a "Consolidation, merger and acquisition of control: motor carrier procedure"; and

(2) Deleting in subsection (a) "of property" after "motor carrier" each place such term appears; and

(3) The analysis of subchapter III of chapter 113 of title 49, United States Code, is amended by inserting after "11345. Consolidation, merger, and acquisition of control: rail carrier procedure."

"11345a—Consolidation, merger, and acquisition of control: motor carrier procedure".

MINIMUM FINANCIAL RESPONSIBILITY FOR MOTOR CARRIERS

SEC. 13. Section 30(a) of the Motor Carrier Act of 1980 is amended by—

(1) inserting "or passengers" after "of property" each place such term appears; and

(2) in subsection (a)(2) by inserting "($1,500,000 in the case of motor carriers of passengers)" immediately after "$750,000", and inserting ", or $750,000 in the case of motor carriers of passengers" after "$500,000"; and

(3) in subsection (a)(3) by inserting "or type" immediately after "the levels of financial responsibility for such class" and deleting "$750,000".

EXIT POLICY

SEC. 14. (a) Amend 49 U.S.C. § 10521 (b)(1) by inserting "except as provided in section 11101(d) of this title" immediately after "motor carrier"; and

(b) Amend 49 U.S.C. § 11101 by adding at the end thereof the following new subsections:

"(d) No state or political subdivision thereof and no interstate agency or other political agency of two or more States shall enact or enforce any law, rule, regulation, standard or other provision relating to the discontinuance or scheduling of interstate or intrastate regular-route service by a motor common carrier of passengers having authority under this title to transport passengers in interstate or foreign commerce.

"(e)(1) No later than 60 days after the enactment of this section, the Commission shall institute a rulemaking proceeding in which it shall promulgate rules for such discontinuance of interstate or intrastate regular-route service. The rules shall provide for notice and opportunity for interested parties to comment, but need not provide for oral evidentiary hearings.

"(2) Such rules shall require carriers to notify the Commission, the appropriate State regulatory agency, and affected communities concerning proposed discontinuances of services; and shall establish a procedure under which any interested person, or the Commission on its own initiative, may protest the proposed discontinuance. Absent protests, the carrier can discontinue service as specified in the public notification.

"(3) If a protest is received within 30 days after the notice of discontinuance is served. the carrier within 15 days thereafter shall furnish to the Commission and the protestants—

"(A) an estimate of the annual additional revenues or subsidy required to continue the service; and

"(B) traffic, revenue, and other data necessary to determine the amount of annual financial assistance which would be required to continue the service; and

"(C) other information that the Commission may prescribe by rule or regulation as necessary to enable a potential offeror to calculate an adequate subsidy.

"(4) Within 30 days following the receipt of a protest of a proposed discontinuance of service, such service may be discontinued unless the Commission finds—

(A) that an investigation is needed to assist in determining whether the service can be continued by the existing carrier or by another carrier; or

(B) an offer of financial assistance in which the carrier is eligible to participate and which would provide adequate assistance has been made. Thirty days are allowed to complete the Commission study or complete the agreement on financial assistance. If an investigation is undertaken or an offer contemplated, the Carrier shall submit to a potential offeror or offerors of assistance the information described in subsection (e)(3) of this section, together with such additional information as it deems relevent.

"(5) If at the end of that 30-day period, the carrier has not agreed with the offeror of financial assistance to continue the service, the Commission at its discretion may allow the discontinuance or order the carrier to continue the service for a period of no longer than 60 days. After 60 days, absent an agreement on financial assistance, the carrier may discontinue service.

"(6) If a bus carrier seeking to discontinue such interstate or intrastate regular-route service does not comply with the discontinuance procedures of this section, the Interstate Commerce Commission has the power to enjoin the discontinuance."

DISCRIMINATORY STATE REGULATION OF PASSENGER FARES AND EXPRESS RATES

SEC. 15. (a) Section 10521 (b)(2) of title 49 of the United States Code is amended by inserting "except as provided in section 11501 of this title," immediately after "motor carrier"; and

(b) Section 11501(b) of title 49, United States Code, is amended to read as follows:

"(b)(1) A State authority may only exercise jurisdiction over intrastate transportation provided by a rail carrier providing transportation subject to the jurisdiction of the Commission under Subchapter I of Chapter 105 of this title or a motor carrier of passengers providing transportation subject to the jurisdiction of the Commission under Subchapter II of the Chapter 105 of the title if such State authority exercises such jurisdiction exclusively in accordance with the provisions of this subtitle.

"(2) Within 120 days after the effective date of the Staggers Rail Act of 1980 in the case of rail carriers, and within 120 days after the effective date of the Motor Bus Act of 1981 in the case of motor carriers of passengers, each State authority exercising jurisdiction over intrastate rates, fares, classifications, rules and practices for intrastate transportation described in paragraph (1) of this subsection shall submit to the Commission the standards and procedures (including timing requirements) used by such State authority in exercising such jurisdiction.

"(3)(A) Within 90 days after receipt of the intrastate regulatory rate standards and procedures of a State authority under paragraph (2) of this subsection, the Commission shall certify such State authority for purposes of this subsection if the Commission determines such standards and procedures are in accordance with the standards and procedures applicable to regulation of rail carriers or motor carriers of passengers (as the case may be) by the Commission under this title. If the Commission determines that such standards and procedures are not in such accordance, it shall deny certification to such State authority, and such State authority may resubmit new

standards and procedures to the Commission for review in accordance with this subsection.

"(B) The standards and procedures existing in each State on the effective date of the Staggers Rail Act of 1980 in the case of rail carriers, and on the effective date of the Motor Bus Act of 1981 in the case of motor carriers of passengers, for the exercise of jurisdiction over intrastate rail or motor carrier of passenger (as the case may be) rates, fares, classification, rules, and practices, shall be deemed to be certified from that date until the date an initial determination is made by the Commission under subparagraph (A) of this paragraph.

"(4)(A) Any State authority which is certified by the Commission under this subsection may use its standards and procedures in exercising jurisdiction over intrastate rail or motor carrier of passenger (as the case may be) rates, fares, classifications, rules, and practices during the 5-year period commencing on the date of such certification. Any State authority which is denied certification or which does not seek certification may not exercise any jurisdiction over intrastate rates, fares, classification, rules, and practices until it receives certification under this subsection.

"(B) Any intrastate transportation provided by a rail carrier or a motor carrier of passengers in a State which may not exercise jurisdiction over an intrastate rate, fares, classification, rule, or practice of that carrier due to a denial of certification under this subsection shall be deemed to be transportation subject to the jurisdiction of the Commission under subchapter 1 of chapter 105 of this title in the case of rail carriers, or under subchapter II of chapter 105 of this title in the case of motor carriers of passengers.

"(5)(A) Certification of a State authority under this subsection is valid for the 5-year period beginning on the date of such certification. Prior to the expiration of such 5-year period, the State authority shall resubmit its intrastate regulatory standards and procedures to the Commission for subsequent certification in accordance with this subsection.

"(B) During any 5-year certification period, a State may not change its certified standards and procedures without notifying and receiving expressed approval from the Commission.

"(6) Notwithstanding any other provision of this subtitle, a State authority may not exercise any jurisdiction over general rate increases under section 10706 of this title, inflation based rate increasing under section 10712 of this title, or fuel adjustment surcharges approved by the Commission."

(c) Section 11501(c) of title 49, United States Code, is amended to read as follows:

"(c) Any rail carrier providing transportation subject to the jurisdiction of the Commission under subchapter I of chapter 105 of this title or any motor carrier of passengers providing transportation subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title may petition the Commission to review the decision of any State authority, in any administrative proceeding which the lawfulness of an intrastate rate, fare, classification, rule, or practice is determined, on the grounds that the standards and procedures applied by the State were not in accordance with the provisions of the subtitle. The Commission shall take final action on any such petition within 30 days after the date it is received. If the Commission determines that the standards and procedures were not in accordance with the provisions of this subtitle, its order shall determine and authorize the carrier to establish the appropriate rate, fare, classification, rule, or practice."

(d) Section 11501(d) of title 49, United States Code, is amended to read as follows:

"(d)(1) The Commission has exclusive authority to prescribe an intrastate rate or fare for transportation provided by a rail carrier subject to the jurisdiction of the Commission under subchapter 105 of this title, or a motor carrier of passengers subject to the jurisdiction of the Commission under subchapter II of chapter 105 of this title when—

"(A) A rail carrier or motor carrier of passengers, as the case may be, files with an appropriate State authority a change in an intrastate rate or fare, or a change in classification, rule, or practice that has the effect of changing an intrastate rate or fare, that adjusts the rate or fare to the rate or fare charged on similar traffic moving in interstate or foreign commerce; and

"(B) The State authority does not act finally on the change by the 120th day after it was filed.

"(2) When a rail carrier or a motor carrier of passengers files an application with the Commission under this subsection, the Commission shall prescribe the intrastate rate or fare under the standards of subsection (A) of this section and Chapter 107 of this title. Notice of the application shall be served on the State authority."

(e) Section 10501(d) of Title 49, United States Code, is amended to read as follows:

"(d) The jurisdiction of the Commission and of State authorities (to the extent such authorities are authorized to administer the standards and procedures of this title pursuant to this section and Section 11501(b) of this title) over transportation by rail carriers or motor carriers of passengers, as the case may be, and the remedies provided in this title with respect to the rates, fares, classification, rules and practices of such carriers, is exclusive."

MOTOR CARRIERS OF PASSENGERS, MIXED LOADS AND OTHER PROVISIONS

SEC. 16. (a) Redesignate section 10529 as section 10530, and add a new section 10529 as follows:

"§ 10529. Mixed loads of regular route scheduled passenger service and charter passenger service and other provisions.

A motor common carrier of passengers may provide charter passenger service in the same vehicle and at the same time as it provides regular route, scheduled passenger service. Such charter service shall be provided pursuant to rules to be promulgated by the Commission. Charter trips between points authorized in the charter certificate can make use of authorized regular route service over any segment of the charter trip.

Such transportation of mixed regular route scheduled service and charter service shall not affect the status of such regular route scheduled service or the status of such charter service except that the providing of such charter service may not interfere with the carrier's obligations in providing regular route, scheduled service.

(b) Amend section 10922(d) by deleting paragraph (4) and adding a new paragraph (4) as follows:

"(4) A certificate of motor common carrier to transport passengers shall be deemed to include authority to transport newspapers, express, or mail in the same motor vehicle with passengers or in a separate vehicle of any type.

STUDY OF IMPROVED COMPETITION IN SPECIFIC MARKETS

SEC. 17. Congress hereby reaffirms the finding of Section 3 of this act, that historically the existing regulatory structure has tended in certain circumstances to inhibit market entry. In addition, Congress affirms that the entry policy adopted for property and passenger carriers expands carriers' opportunity to compete and that prospective competition from potential market entrants will act to keep rates in line with costs even on routes served by a single carrier. However, to assure that the desired goals of this legislation are achieved, Congress directs the Interstate Commerce Commission to investigate and study the results of more flexible entry policies for the motor bus industry and submit a report including legislative or other recommendations to the President and Congress not later than December 31, 1982.

BUS TERMINAL STUDY

SEC. 18. (a) The Secretary of Transportation and the Interstate Commerce Commission shall make a full investigation and study of the relationship between the ownership and location of bus terminals serving customers on regularly scheduled routes and the level of competition among bus carriers. A report shall be submitted, including legislative or other recommendations, to the President and Congress not later than December 31, 1982.

(b) The report shall include an analysis of the ownership of current bus terminals and whether meaningful competition is discouraged and improved interline service for the convenience of passengers is hindered by policies with respect to outside carrier use of bus terminals.

(c) The report shall also include an analysis of the desirability of intermodal terminals and their impact on urban development and the desirability of Federal assistance in the construction of non urban terminals.

TAX DISCRIMINATION AGAINST BUS CARRIER TRANSPORTATION PROPERTY

SEC. 19. Section 11503a of title 49, United States Code, is amended by deleting in subparagraph (a)(3) "of property" after "motor carrier."

SECTION-BY-SECTION ANALYSIS TO ACCOMPANY THE MOTOR BUS ACT OF 1981—S. 927

SECTION 2. Purpose of the Act.—

The stated purpose of this section, that the Intercity Motor Bus Act is part of the continuing effort by Congress to reduce unnecessary regulation by the federal government, is identical to the purpose expressed in the Motor Carrier Act of 1980.

SECTION 3. Congressional Findings.—

This section tracks Section 3 of the Motor Carrier Act of 1980 and Section 2 of the Household Goods Transportation Act of 1980 on the grounds that Congress' findings should essentially be of the same nature in the area of bus regulatory reform. It has been suggested by some that the Congressional findings ought to be changed somewhat in the area of bus regulation to reflect differences in the competitive situation in that industry vis-a-vis the trucking industry or to reflect a Congressional policy relating to bus terminals and subsidies, or both. While we believe the latter issues are of concern, there is no body of evidence substantiating these concerns. Accordingly, we do not propose in this legislation that specific measures be undertaken to meet these problems except insofar as they should be monitored and studied. In addition, we do not recommend expansion of the Congressional findings along those lines until these studies are completed.

Section 4. National Transportation Policy.—

The changes suggested here merely incorporate[1] passenger carriers into the new National Transportation Policy applicable to motor carriers of property since enactment of the Motor Carrier Act of 1980. We believe that the goals expressed in that legislation

[1] Vice Chairman Gresham notes that Paragraph (7)(B) of the current National Transportation Policy "allows" a variety of quality and price options, while the draft bill would "encourage" it. If a substantive change in meaning is intended, he believes it should be so labeled.

are equally appropriate to motor carriers of passengers.

Section 5. Motor Carrier Entry Policy.—We propose to amend Section 10922 of Title 49, United States Code, by incorporating motor carriers of passengers into the changes mandated for motor common carriers of property by the Motor Carrier Act. Thus, both kinds of motor carriers will be treated alike.

It has been suggested by some that an essentially different kind of treatment is needed for entry policy relating to motor carriers of passengers because of the different competitive circumstances that obtain in that industry. Unlike the trucking industry, where no one carrier controls more than 5 percent of the total market, the bus industry is clearly dominated by one carrier—Greyhound—which in terms of 1978 operating revenue represents approximately 60 percent of the Class 1 intercity bus revenues and approximately 44 percent of the total intercity bus industry. Trailways and the Trailways affiliated bus system follow with approximately 24 percent of the Class 1 intercity bus revenues and approximately 18 percent of the total industry market, and the remainder is divided among numerous smaller carriers.

This situation has led to a number of suggestions for different treatment of the bus industry. The industry bill, S. 2895/H.R. 7677, proposes a considerably more restrictive entry standard than that which Congress adopted in the Motor Carrier Act. The provisions of the industry bill restricted the public convenience and necessity standards by requiring that grants of operating authority be based upon a preponderance of the evidence in individual cases. There are strong restrictions on granting new authority for publicly-owned carriers and a requirement that rates recover all costs. In general, we believe that the overall direction of S. 2895/H.R. 7677 is anticompetitive as it relates to entry policy. It is particularly inappropriate in the case of the bus industry with its dominant pair of firms—a structural feature which in our view calls for an especially liberal entry policy to assure competitive and efficient rates and service.

Strong intermodal competition faced by the bus industry increases the need for competition between bus companies if the bus industry is to successfully meet this challenge. In addition, the more flexible entry policies we recommend create strong pressure from potential market entrants on existing carriers to be more competitive. Indeed, intermodal competition and the threat of potential entry create a strong incentive for existing carriers to price competitively and meet customer demands for service. Failure to serve adequately or monopoly prices could result in loss of a market to another bus carrier or another mode such as the private automobile.

Another approach which has been suggested would be to curtail the ability of the largest carrier, Greyhound, from gaining new authority while other carriers have an opportunity to gain larger shares of the total market under the liberalized entry provisions of new legislation. Such an approach, it is argued, is necessary to reduce Greyhound's market share of bus traffic nationally under a system of reduced regulation. We do not favor that approach for several reasons. First, we believe that such an approach would interfere unnecessarily with Greyhound's own prerogatives and is inconsistent with a policy based on competition. Second, it reflects a "blunt instrument" approach to a variety of different market situations, including those where adequate competition presently exists, those where Greyhound has an effective monopoly in certain markets, and those where other carriers have effective monopolies in certain markets. However, the thrust of this bill as a whole is to substantially reduce regulation but not to eliminate it altogether. Thus, the fear that some smaller carriers may have of unlawful retaliatory actions by larger carriers when they file for new and expanded authority appears to be unjustified in that the Commission could still afford protection through the regulatory process. The purpose here is merely to create a firm presumption in favor of applicants for new or extended authority.

Another approach which has been suggested regarding bus entry policy for regular route service is to adopt a "fitness only" or other lesser standard for new entrants into city pair or regional markets where effective competition presently does not exist. This approach is appealing and an appropriate response to the problems of inadequate competition, but there are potentially serious problems in implementing such a policy when it is applied only to specific markets. It would be necessary for the Commission, either upon evidence submitted by carriers or through its own efforts, to identify particular city pair or regional markets which would be eligible for this treatment. This could involve a substantial evidentiary burden on carriers, the Commission, or both, and protracted proceedings not likely to result in benefits commensurate with the administrative effort. Obviously, a number of such proceedings could be, and might have to be, undertaken at the same time. Moreover, since the overall purpose of this legislation is to reduce administrative burdens as well as enhance competition, we are not prepared to recommend this approach at this time. However, the problem may be of sufficient magnitude to warrant further study, and for that reason we would propose that the feasibility of this approach be investigated.

We are also incorporating the prohibition against making a finding relating to public convenience and necessity for bus carriers based upon general findings developed in rulemaking proceedings previously approved by Congress in P.L. 96–296 and P.L. 96–454.
